# Services of the State Survey Offices & BKG

States/AdV & BKG

# Standardization process for geographical names

#### Institutions involved in Germany:

- communes, counties, states
   (for populated places and administrative units)
- state survey administration (for geographic regions/landscapes)
- federal and state hydrographic administration (for hydrographic features)
- federal and state transport administration (for streets and railways)
- StAGN Permanent Committee on Geographical Names (responsible for orthographic rules and principles for place names)

#### → decentralized responsibility between federal government and states

#### Official surveying and mapping in Germany

Officially approved geographical names of minority and regional languages spoken in Germany

Sorbian	ca. 700
Frisian	ca. 500
Danish	ca. 80
Romany	0
	spoken by some

spoken by some 70.000 Sinti and Roma (spread all over Germany)

# Legal framework regarding minority languages in the Federal Republic of Germany

- 1. <u>Grundgesetz</u> Constitution of the Federal Republic of Germany (1949)
- 2. Protokollnotiz zum <u>Einigungsvertrag</u> Special note to the minutes of the Unification Treaty (1990)
- 3. <u>Framework Convention</u> (Council of Europe) for the Protection of National Minorities (1995/1997)
- 4. <u>European Charter</u> (Council of Europe) for Regional or Minority Languages (1992/1998)
- 5. <u>State laws</u> in Saxony (1999), Brandenburg (1994), Schleswig-Holstein (2004)

> nach den Empfehlungen der VEREINTEN NATIONEN

unter Mitarbeit des Ständigen Ausschusses für Geographische Namen (StAGN) und der Vermessungsverwaltungen der Länder der Bundesrepublik Deutschland

VERLAG DES INSTITUTS FÜR ANGEWANDTE GEODÄSIE FRANKFURT AM MAIN 1981 In 1981 the first edition of the Gazetteer Federal Republic of Germany ("West Germany") was published by the Institute for Applied Geodesy (IfAG; its name was changed to BKG in 1996).

It comprised some 21.500 geographical names contained on the 1:500 000 General Topographic Map series.

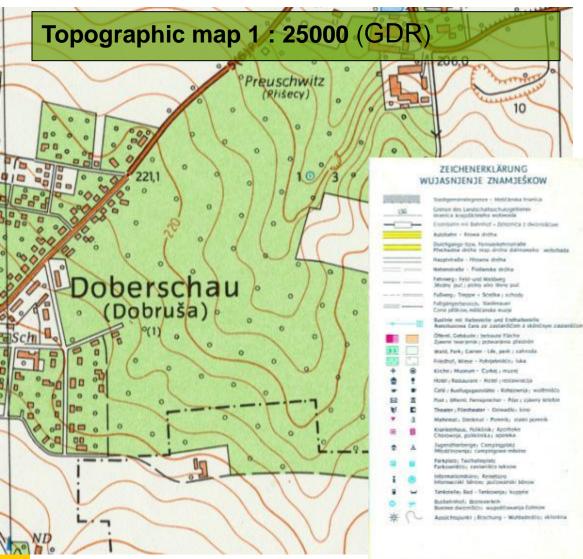

At that time it was the first gazetteer in Germany which had been prepared in accordance with the United Nations resolutions.

## Geographical names in production database – GN-DE

The object/feature themes of the GN-DE geographical names database are:

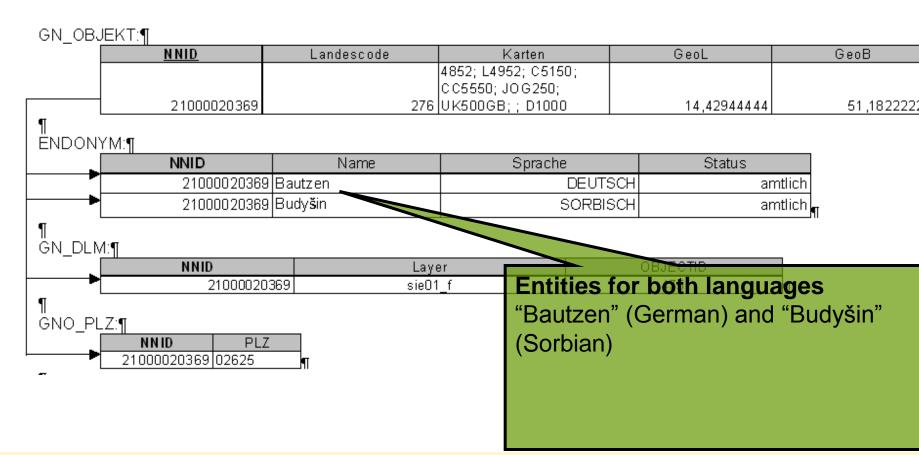

- settlement, transportation, vegetation, hydrography, relief, areas and regions
- with **attributes** regarding the administrative hierarchy (administrative) • code), river system (hydrographic key number in accordance with the German Working Group on water issues (Bund/Länder-Arbeitsgemeinschaft Wasser -LAWA) and
- **number of inhabitants**, **size** (area, length), **position** (geometry data) • from DLM250 as well as additional attributive geographical coordinates), **postcodes**, **status**, **language** of the geographical name and **height** data (in meters).

#### "UNGEGN schema" (proposal): elements

Field Name	Data Type	Description	Example
RecordID	Index	This number is assigned automatically by the system. Do not change it.	
UID	Number (long integer)	A <u>unique identifier</u> assigned to the name (or named feature). In our exercise, each group may start to count from 1 and add the group number multiplied by 100, e.g. 201 for the first name by group 2.	20001 might indicate e.g. 2000 for feature type 'Populated places'
Name	Text (50 char.)	Geographical name in Romanian	Oran
Latitude	Number (double)	Geographical Coordinates, in degrees decimal.	35,
Longitude	Number (double)		-0,5
FeatureCode	Text (50 char.)	Feature codes, from an existing feature code table	DDS
AdminUnit	Text (50 char.)	Name of the administrative unit where the name is situated in	Departement d' Oran, Department of Oran
Language	Text (50 char.)	Language of the name	
Description	Text (255 char.)	Field remarks, meaning of the name, language of the name, historical names if any	e.g. capital of a political entity
VariantName	Text (50 char.)	Enter variant names, if any e.g. Hungarian name	Wilaya d' Oran, Wilaya d' Oran
MapSheet	Number (long integer)	Reference to a map sheet in a topographic map series, e.g. 1:250.000	80
Source	Text (255 char.)	Source of the information on the name: - Informant - Interviewer	Mr. XY, old person at xyz, interview by group 1
Status	Text (50 char.)	The status of the name. In our case, the names are not yet approved by the Board.	not approved
Pronunciation	OLE-Object	Audio-files of the pronunciation of the geographical name	e.g *.wav -file
Location information	OLE-Object	Digital pictures of the location	e.g *.jpg – image file

GN in INSPIRE – Infrastructure for Spatial Information in Europe

INSPIRE Data Specification on Geographical Names – Guidelines (Extract)

- [...] Geographical names are widely used in every-day communication
- [...] Geographical names are used extensively when searching for information in web-services [...]
- [...] Correct usage of geographical names [...] are a prime interest of many users [...]

[...] The ... INSPIRE geographical names model is a simple yet flexible structure that allows geographical names to be used as an attribute of a spatial object.

The possibility of **linking more names with the same named places** gives the opportunity to **integrate minority languages and exonyms**, which are an **important contribution to European multilingualism**.

[...] 15 - 19/05/2017

#### The European (INSPIRE) GN schema: elements

mandatory	<ul> <li>name(s) (text, spelling)</li> <li>geomety</li> <li>feature type</li> <li>unique identifier</li> </ul>

#### Management in Germany

- Official surveying and mapping in Germany
- Minority language areas and names in Germany
- Rendering names in German datasets & publications
- Finances & administration & human resources at BKG
- Names data within the German Spatial Data Infrastructure (GDI-DE)

# Finances & administration & human resources

# BKG personnel: about 90.000 Euros / year

- Office of Permanent Committee on Geographical Names
   1 person, full time, about 40.000 Euros / year
- Coordination of names activitiy at BKG

2 person, 30 %, about 10.000 Euros / year

Technical staff for administration of databases

1 person, 50 %, about 20.000 Euros / year

Technical staff for administration of web (gazetteer) service

1 person, 50 %, about 20.000 Euros / year

# Finances & administration & human resources

# BKG investments: about 20.000 Euros / year

- Database (hard- and software)
  - 2 databases, updates per year for 5.000 Euros / year
- Server (hard- and software)

1 server update per year for 5.000 Euros / year

IT-specific training

2 person, about 10.000 Euros / year

 Soft- and hardware amortization is different for server or database and varies between 3-5 years

# Content

#### Management in Germany

- Official surveying and mapping in Germany
- Minority language areas and names in Germany
- Rendering names in German datasets & publications
- Finances & administration & human resources at BKG
- Names data within the German Spatial Data Infrastructure (GDI-DE)

- The GN-DE dataset is currently used for the geographical names data provision within the '*German Spatial Data Infrastructure* (GDI-DE)' → UN Res VIII/6
- GN-DE is the rationale for the national data provision for European purposes as it is the only dataset in Germany that includes the mandatory and almost all optional European attributes (like language, status, gender ...).
- A wide range of **different applications** (e.g. geoportals) has been built up that provide discovery functionality for spatial data sets and services and generally make use of the functionality.
- Germany declared the federal government's geodata to be open data in the course of the revision to the Geodata Access Act (GeoZGÄndG) on 16 November 2012. Hence, the gazetteer web service of BKG is available free of charge, too.

# Further discussion on logistics, production time needed and necessary upkeep costs

- The financial and human resources roughly estimated by BKG as necessary for maintaining the national geographical names programme amounted to about € 110,000 per year for both personnel and investments.
- Most of the German Länder might invest a similar small amount in logistics, the maintenance of geographical names database and the development and up keeping of services and applications, about the overall yearly costs would amount to € 1,8 million.
- Considering that the data content for GN-DE is based on a map scale 1: 250,000 a cooperation of the Federal Government with the Länder– (the latter are responsible for data based on maps at scales 1:25,000 – 1:10,000) is envisaged to increase the content of the national web service.

## Thank you for your attention!
