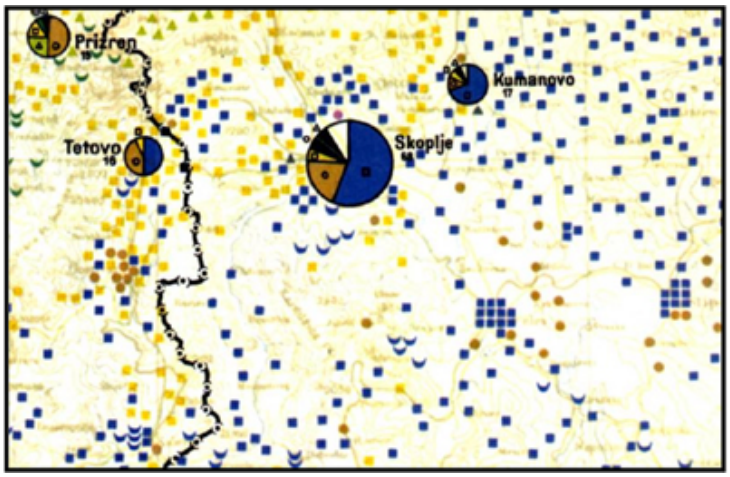
16. WHAT IS THE BEST WAY TO RENDER LINGUISTIC BOUNDARIES ON MAPS?

<previous - next>

How to render uninhabited areas? With white?

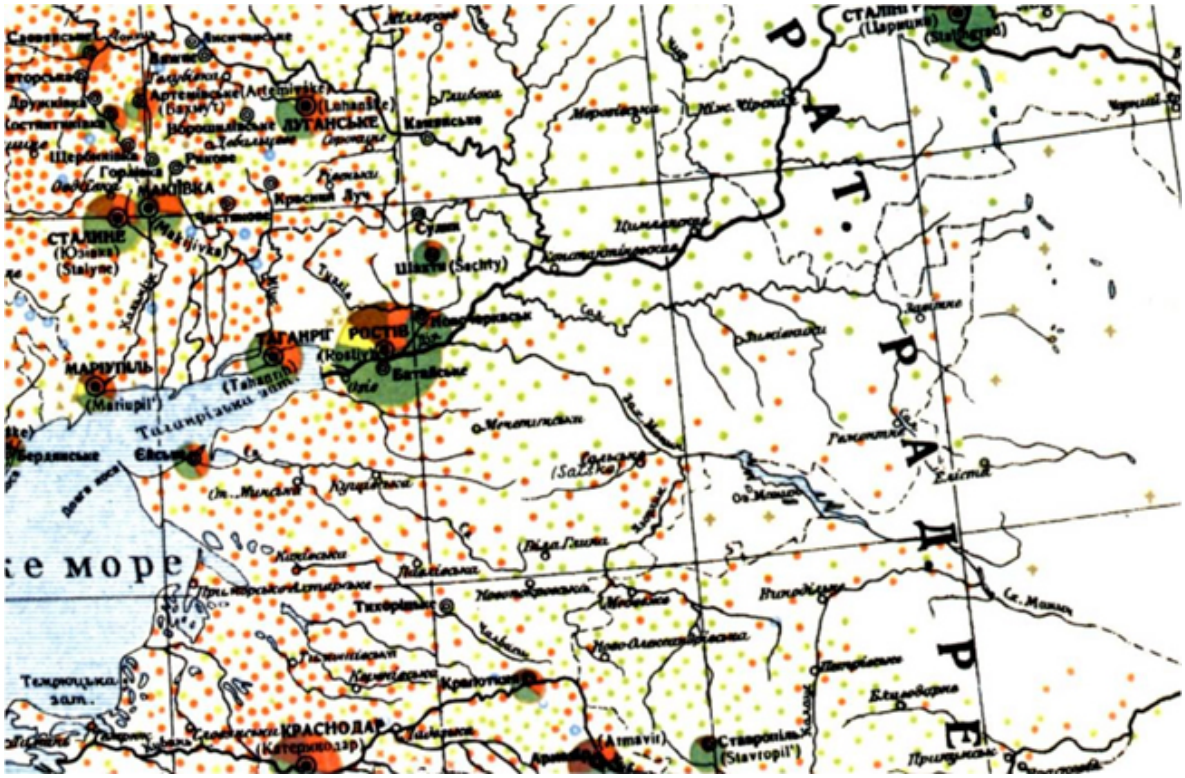
From Austrian school atlas.

Dot maps give better idea of distribution of various language groups.



Krallert, A.- Weltkarte 1 : 1 Mill. (Sonderausgabe Volkstum, Blatt K34, Sofia. Wien 1943)

Home | Selfstudy : Multilingual names, minority names | Contents | Intro | 1.Examples | 2.Language map | 3.Minorities | 4.History | 5.Trans-formation | 6. Topographer's bias | 7.Influences on the rendering | 8.Study of attitudes | 9.Plebiscites | 10.Discri-mination | 11.Bilingual presentation | 12.Mono-lingual presentation | 13.Incorpo-ration (examples) (a/b/c) | 14.Map use criteria | 15.How & Why | 16.Rendering linguistic boundaries | 17.Generics



Comparison of a chorochromatic and a dot map presentation of the same linguistic data.
