

Singapore Geospatial Collaborative Environment (SG-SPACE)

- the journey towards a spatially enabled Singapore

Victor Khoo, Singapore Land Authority

October 2009

Singapore National Spatial Data Infrastructure

Where are we now?

Where are we going?

How do we get there?

User Need Assessment (UNA) Survey

Data Needs

- **83%** of agencies have needs for spatial data
- **35%** of agencies are supported by Geographic Information Systems (GIS)

Data Sharing

- **40%** of existing spatial data layers are available for sharing by agencies
- Data users are unaware of data that is available and there is a lack of information sharing protocol

Standardisation

- **22%** of spatial data layers adopt recognised Metadata standards

Services & Applications within Public Sector

Land & Infrastructure Planning

SLA, URA, LTA, JTC, HDB

Environment & Public Health

NEA, AVA

Transportation

LTA, MPA, CAAS

Defence & Security

SPF, SCDF, Prison, DSTA, MU

Parks Management

NParks

Community Development

PA, NCSS

Utilities Management

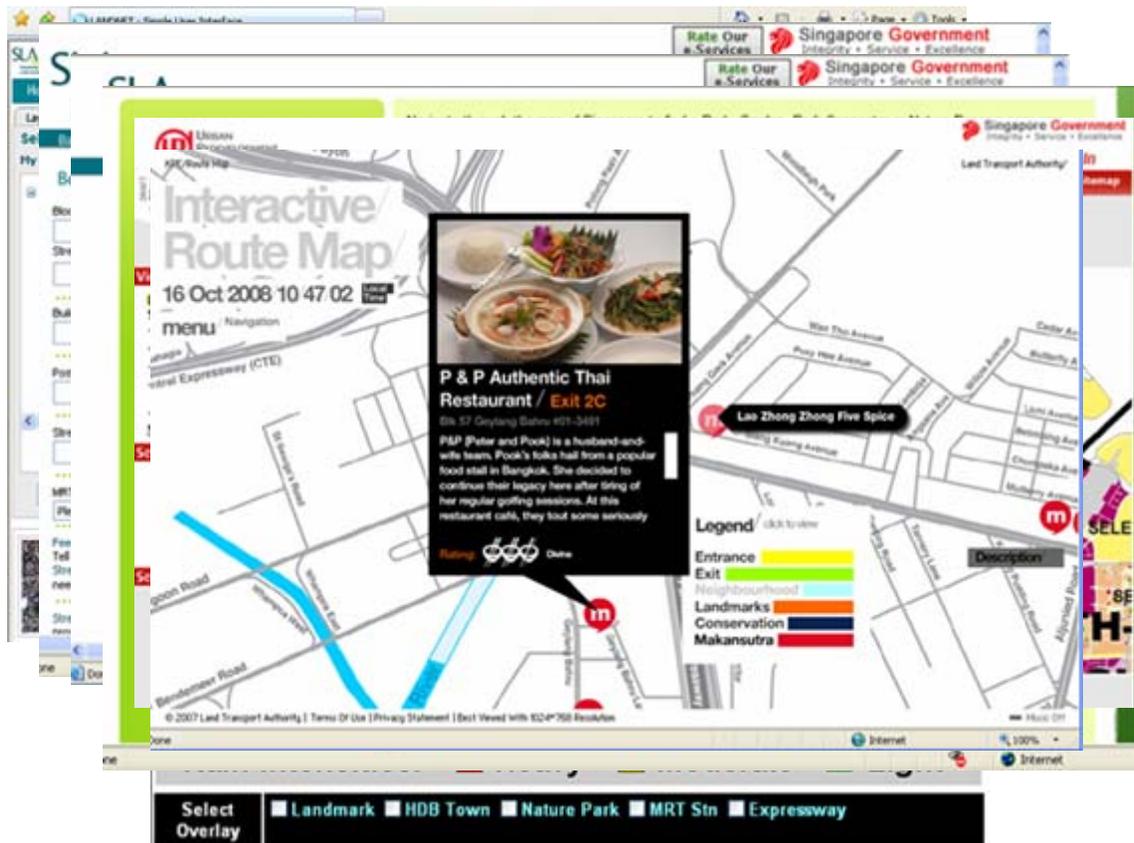

PUB

Health

MOH

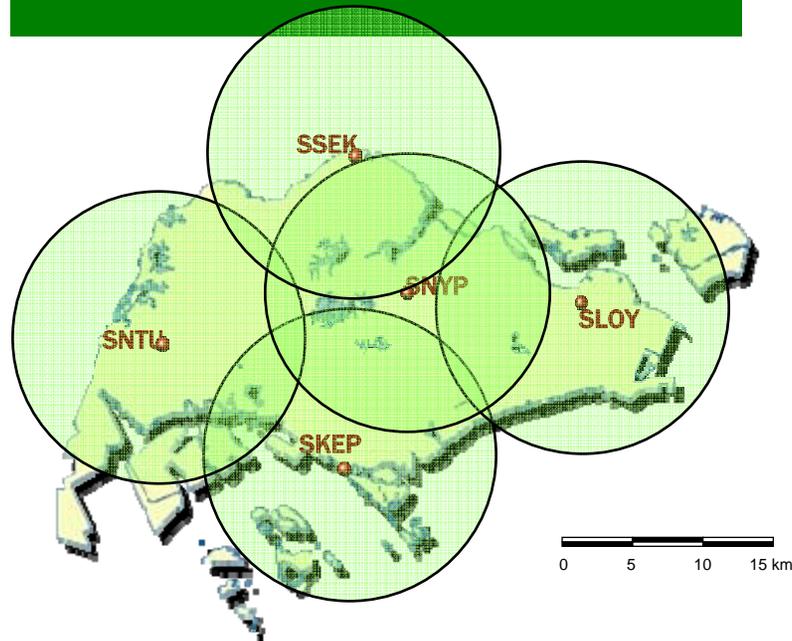

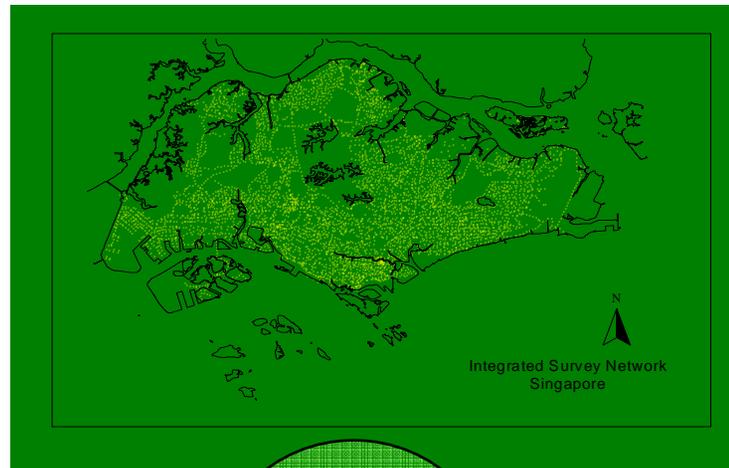

Others

IRAS, ELD, MOE, DOS

Uniform Spatial Reference System

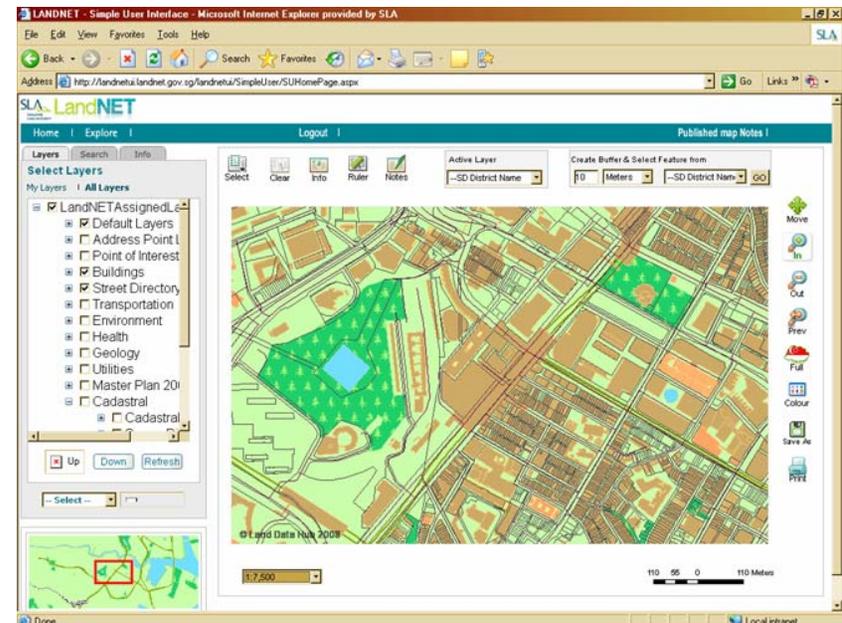

SiReNT

Data Sharing Portal

Land Data Hub - LandNET

- One-stop land data resource centre
- Pools land data from government agencies
- Eliminates needs for bilateral data exchange between agencies

We have the data and the basic infrastructure.

But, we need more...

Collection

Storage &
Retrieval

Application

Data Supplier

SG-SPACE
Clearinghouse
Policy
Standards
Capabilities

Data User

Data Flow

Desired Outcomes

- Establishment of a Clearinghouse with **richer** datasets and functionalities
- **Clarity** in policies on data access & pricing
- Definition, documentation and sharing of Data Standards
- **Consistent** definition of data, e.g. building data, address data
- Availability of data with better **resolution** & timeliness, e.g. aerial photos, demographic data
- Spatially-enabled **socio-economic** data, e.g. demographic & business data
- Improved awareness and **capabilities** on geospatial science & technology
- **Sustainable** operating model for both data suppliers and data users

Outcomes

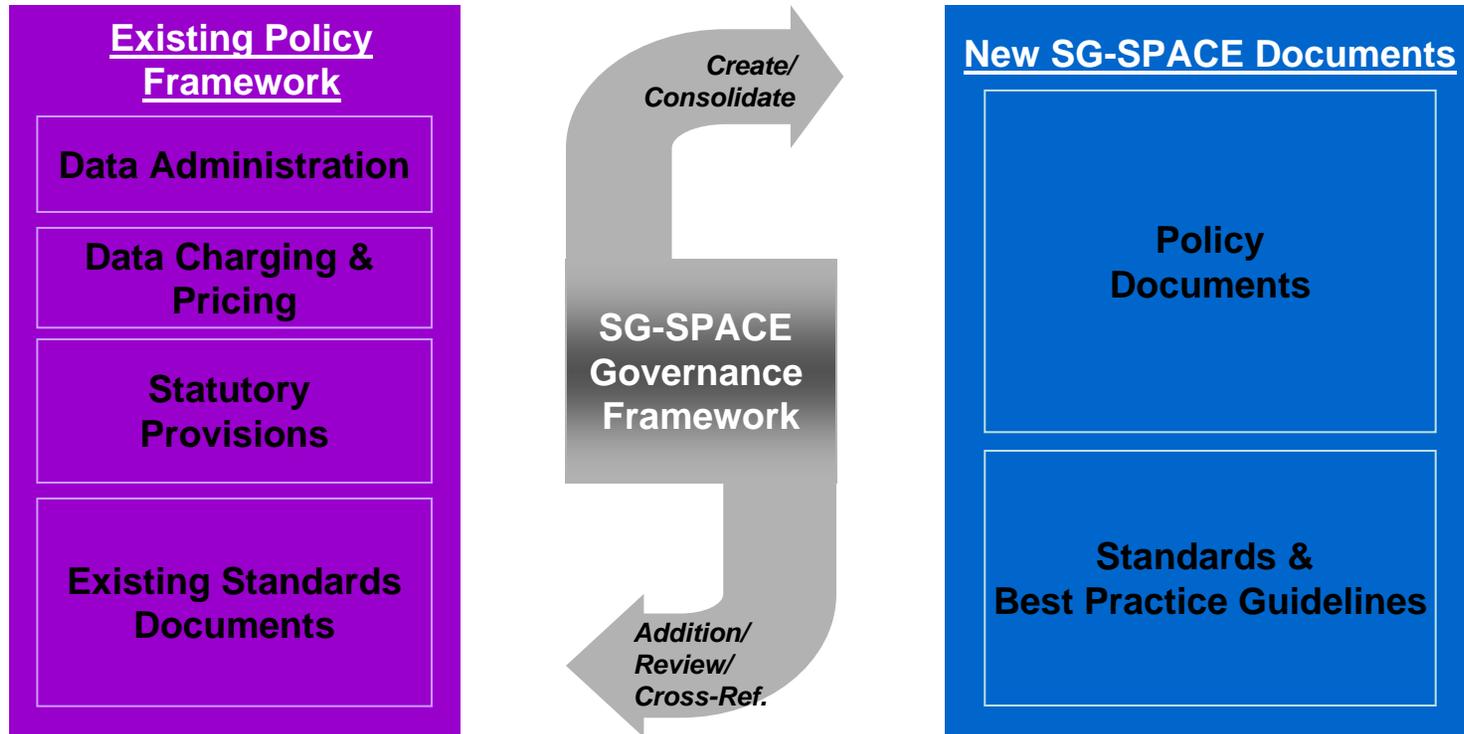

Success Factors

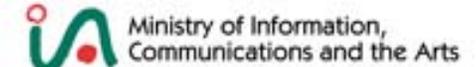

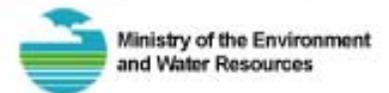

Building Blocks

Harmonisation into Existing Frameworks

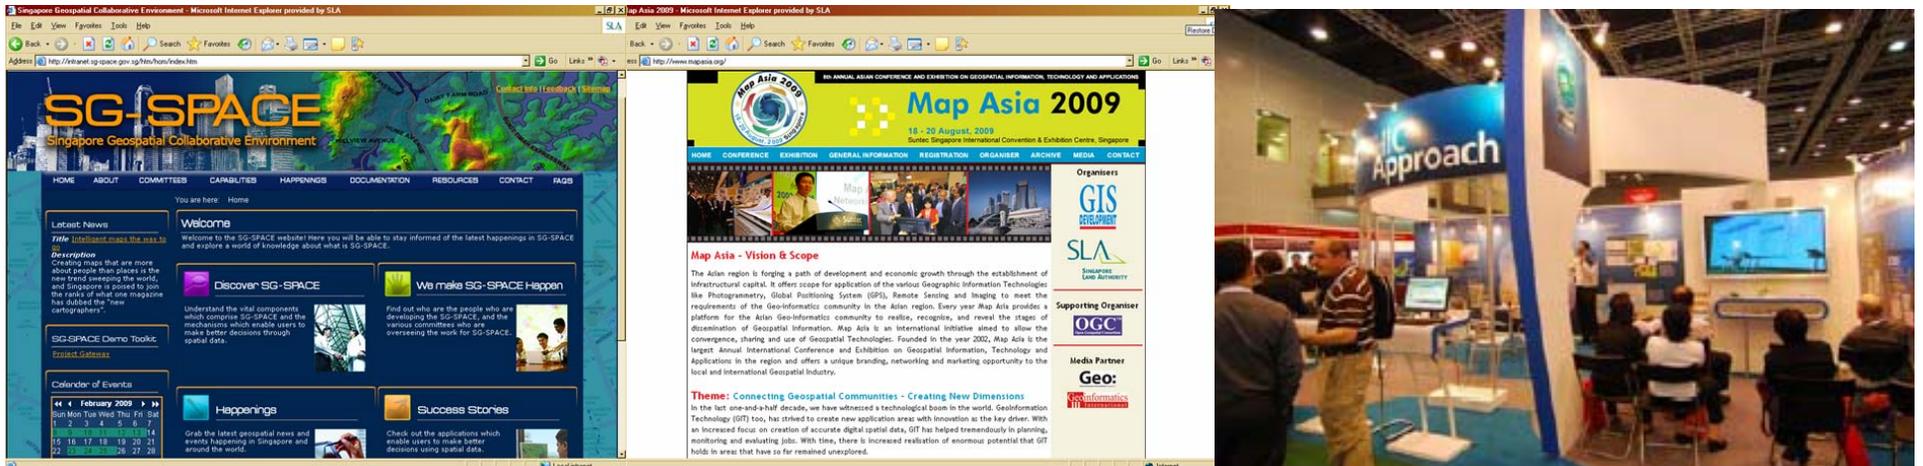

Ministry of Education
SINGAPORE

Capacity Building

- Awareness & communication
 - SG-SPACE website (<http://intranet.sg-space.gov.sg>)
- Collaboration with academia / institutes of higher learning / research centres
- Geospatial Conferences
 - Map Asia 2009: 18-20 August 2009
 - GSDI 12: October 2010

SG-SPACE Website

- A one-stop communication platform

Success Stories

Date	Latest News	Industry
2-Mar-09	SLA Expands SiRENIT User Base	Government
4-Mar-09	Dubai Municipality Takes DHM into Account	Natural Resources & Environmental

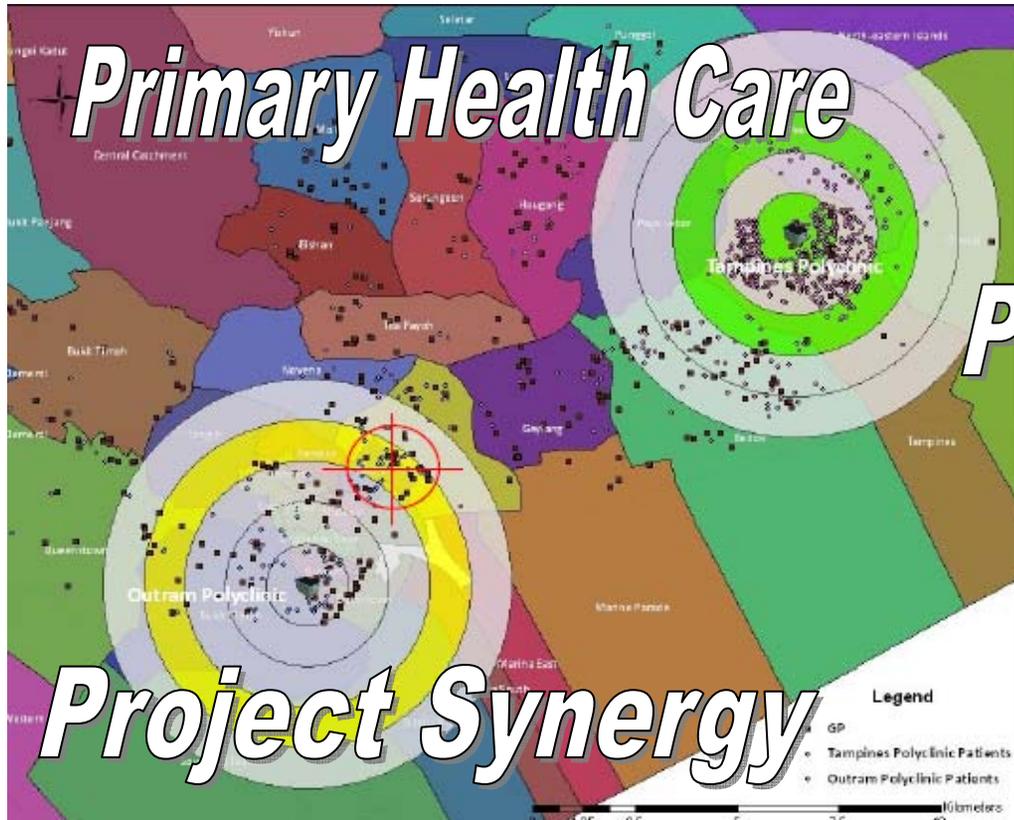

News & Events

Publications

Document Type	Title	Synopsis	Last Updated Date
Policy	NSDI Masterplan	NSDI masterplan presents the strategic plans and goals of SG-SPACE	20 Oct 2008
Policy	Policies & Guidelines in NSDI	A document map of the policies which will govern SG-SPACE, and the guidelines for SG-SPACE activities	20 Oct 2008
Presentation	Proposed Architecture of NSDI Clearinghouse	This presentation gives an overview of the possible SG-SPACE clearinghouse structure	20 Oct 2008
Presentation	NSDI Clearinghouse Spatially Enabled Government Summit 2008	A summary of learning points gained from attending the Spatially Enabled Government Summit 2008	20 Oct 2008
Presentation	Presentation on Technical Committee 1	An overview of the responsibilities and areas of concern for TC1	20 Oct 2008
Presentation	UNA Survey Report	User Needs Assessment (UNA) survey results which provide an indication of the current geospatial landscape within Singapore public sector	7 Apr 2009

Pilot Projects

- Stakeholder engagement

Key Challenges

- Support from stakeholders
- Priority of funding
 - Specialised vs General user needs
- Alignment with existing governance frameworks
 - Policy enforcement
 - Scope of data standardisation
- Capacity building
 - Awareness on use and utility of geospatial data

Completed Tasks

- Completion of SG-SPACE Masterplan
- Assessment of user demands from public & private sector
- Establishment of 14 Fundamental Dataset categories and stewards
- Alignment with existing government policy framework on Information Management
- Drafting of Metadata Profile for Singapore
- Launch of Interim Clearinghouse

Thank You
