How to Use the Place Name Searches

Use this search to find the location of places in Australia.

Enter the first few letters of a place name and click the Submit Query button. To refine a search, either select the Place Type or State from the lists. To clear the information, click Reset.

If a search does not produce the desired result, the search criteria should be modified. For example, key in either Mt Isa, Mount Isa, Isa Mt or Isa. Omitting Mount or Mt should still produce the correct result.

Some locality features have alternative names. Should a search display a second place name which does not match the initial query it is the result of the query engine searching for and displaying an alternative official name. For example if a query for Mount Acres is submitted, the alternative official name Helmshurst also is displayed. Note that the homestead names from Geoscience Australia sources are unofficial names.

You are here: [Home](#) > [Place names search](#)

Place Names Search Results

- ▶ **Click on one of the following places matching your search to see its position on a map.**
- ▶ To refine your search go [back](#) and specify State/Authority or Type
- ▶ Names displayed here are official names. Should your search display a place name that does not match your query, the query engine is displaying the alternative official place name.
- ▶ Currently, elevation values are included for 500 mountains, hills and peaks. Elevations values for other localities will be progressively added. *Please note that elevation values are not included for all places.*
- ▶ Locations are accurate to 1 minute of latitude/longitude, which is approximately 1.8 km.

Geographical Names of British Columbia

Vancouver

The City of Vancouver is named after the famous British navigator, Captain George Vancouver, R.N., who in 1792 named and explored Burrard Inlet, on whose shore the city stands.

Born of Dutch stock in the little Norfolk town of King's Lynn on 22 June 1757, George Vancouver entered the navy in 1771. In the following year he sailed with the great Captain Cook on the latter's second and third voyages of exploration.

In April 1792 Vancouver arrived off the shores of what was to become British Columbia. Sailing through the Strait of Juan de Fuca [sic], he began that detailed survey of the coast which was to occupy him until his departure for England late in 1794. Much of this work was done in small open boats operating at very considerable distance from Vancouver's ship H.M.S. *Discovery* and her tender the *Chatham*.

Back in England in 1795, Captain Vancouver (who had been promoted to that rank during his absence) devoted himself to preparing for publication an account of his great expedition. He had just about completed reading the proofs when he died on 10 May 1798. His *Voyage of Discovery to the North Pacific Ocean and round the World* was published later that same year.

Sources: Akrigg, G.P.V. and Helen B. (1986): ***British Columbia Place Names***, Sono Nis Press, Victoria, pp. 316-317.
