

## CONTENTS

Preface .....	iii
Overview .....	v
Acknowledgements .....	vii
List of contributing experts .....	xxxii
Authors .....	xxxiv
Reviewers .....	xxxv
<b>PART ONE. Survey Design, Implementation and Analysis .....</b>	<b>1</b>
<b>Chapter 1. Introduction .....</b>	<b>3</b>
A. Household surveys in developing and transition countries .....	4
B. Objectives of the present publication .....	5
C. Practical importance of the objectives .....	6
<b>Section A. Survey design and implementation .....</b>	<b>9</b>
<b>Chapter II. Overview of sample design issues for household surveys in developing and transition countries .....</b>	<b>11</b>
A. Introduction .....	12
1. Sample designs for surveys in developing and transition countries .....	12
2. Overview .....	12
B. Stratified multistage sampling .....	13
1. Explicit stratification .....	13
2. Implicit stratification .....	14
3. Sample selection of PSUs .....	14
4. Sampling of PSUs with probability proportional to size .....	16
5. Sample selection of households .....	18
6. Number of households to be selected per PSU .....	19
C. Sampling frames .....	21
1. Features of sampling frames for surveys in developing and transition countries .....	21
2. Sampling frame problems and possible solutions .....	22

3. Maintenance and evaluation of sampling frames .....	23
D. Domain estimation .....	24
1. Need for domain estimates .....	24
2. Sample allocation .....	24
E. Sample size .....	25
1. Factors that influence decisions about sample size .....	25
2. Precision of survey estimates .....	25
3. Data quality .....	28
4. Cost and timeliness .....	29
F. Survey analysis .....	29
1. Development and adjustment of sampling weights .....	29
2. Analysis of household survey data .....	31
G. Concluding remarks .....	31
Annex. Flowchart of the survey process .....	34
<b>Chapter III. An overview of questionnaire design for household surveys in developing countries</b> .....	<b>35</b>
A. Introduction .....	36
B. The big picture .....	36
1. Objectives of the survey .....	37
2. Constraints .....	38
3. Some practical advice .....	40
C. The details .....	40
1. The module approach .....	40
2. Formatting and consistency .....	42
3. Other advice on the details of questionnaire design .....	46
D. The process .....	47
1. Forming a team .....	47
2. Developing the first draft of the questionnaire .....	47
3. Field-testing and finalizing the questionnaire .....	48
E. Concluding comments .....	50
<b>Chapter IV. Overview of the implementation of household surveys in developing countries</b> .....	<b>53</b>
A. Introduction .....	54

B. Activities before the survey goes into the field .....	54
1. Financing the budget .....	55
2. Work plan .....	57
3. Drawing a sample of households .....	59
4. Writing training manuals .....	59
5. Training field and data entry staff .....	60
6. Fieldwork and data entry plan .....	60
7. Conducting a pilot test .....	61
8. Launching a publicity campaign .....	61
C. Activities while the survey is in the field .....	62
1. Communications and transportation .....	62
2. Supervision and quality assurance .....	63
3. Data management .....	63
D. Activities required after the fieldwork, data entry and data processing are complete .....	64
1. Debriefing .....	64
2. Preparation of the final data set and documentation .....	64
3. Data analysis .....	65
E. Concluding comments .....	66
<b>Section B. Sample design .....</b>	<b>67</b>
Introduction .....	68
<b>Chapter V. Design of master sampling frames and master samples for household surveys in developing countries .....</b>	<b>71</b>
A. Introduction .....	72
B. Master sampling frames and master samples: an overview .....	73
1. Master sampling frames .....	73
2. Master samples .....	74
3. Summary and conclusion .....	76
C. Design of a master sampling frame .....	78
1. Data and materials: assessment of quality .....	78
2. Decision on the coverage of the master sampling frame .....	79
3. Decision on basic frame units .....	80
4. Information about the frame units to be included in the frame .....	81
5. Documentation and maintenance of a master sampling frame .....	83

D. Design of master samples .....	85
1. Choice of primary sampling units for the master sample .....	85
2. Combining/splitting areas to reduce variation in PSU sizes .....	86
3. Stratification of PSUs and allocation of the master sample to strata .....	88
4. Sampling of PSUs .....	89
5. Durability of master samples .....	90
6. Documentation .....	91
7. Using a master sample for surveys of establishments .....	91
E. Concluding remarks.....	92
<b>Chapter VI. Estimating components of design effects for use in sample design .....</b>	<b>95</b>
A. Introduction .....	96
B. Components of design effects .....	99
1. Stratification .....	100
2. Clustering .....	105
3. Weighting adjustments .....	108
C. Models for design effects .....	111
D. Use of design effects in sample design .....	115
E. Concluding remarks .....	119
<b>Chapter VII. Analysis of design effects for surveys in developing countries .....</b>	<b>123</b>
A. Introduction .....	124
B. The surveys .....	124
C. Design effects .....	127
D. Calculation of rates of homogeneity .....	134
E. Discussion .....	138
Annex. Description of the sample designs for the 11 household surveys.....	139

<b>Section C. Non-sampling errors</b> .....	145
Introduction .....	146
<b>Chapter VIII. Non-observation error in household surveys in developing countries</b> .	149
A. Introduction .....	150
B. Framework for understanding non-coverage and non-response error .....	150
C. Non-coverage error .....	153
1. Sources of non-coverage .....	153
2. Non-coverage error .....	156
D. Non-response error .....	160
1. Sources of non-response in household surveys .....	160
2. Non-response bias .....	162
3. Measuring non-response bias .....	163
4. Reducing and compensating for unit non-response in household surveys .....	164
5. Item non-response and imputation .....	167
<b>Chapter IX. Measurement error in household surveys: sources and measurement</b> ....	171
A. Introduction .....	172
B. Sources of measurement error .....	173
1. Questionnaire effects .....	174
2. Data-collection mode effects .....	177
3. Interviewer effects .....	179
4. Respondent effects .....	181
C. Approaches to quantifying measurement error .....	183
1. Randomized experiments .....	184
2. Cognitive research methods .....	184
3. Reinterview studies .....	185
4. Record check studies .....	188
5. Interviewer variance studies .....	190
6. Behaviour coding .....	191
D. Concluding remarks: measurement error .....	192
<b>Chapter X. Quality assurance in surveys: standards, guidelines and procedures</b> .....	199
A. Introduction .....	200
B. Quality standards and assurance procedures .....	200

C. Practical implementation of quality assurance guidelines: example of World Health Surveys .....	202
1. Selection of survey institutions .....	203
2. Sampling .....	204
3. Translation .....	208
D. Training .....	211
E. Survey implementation .....	213
F. Data entry .....	217
G. Data analysis .....	221
H. Indicators of quality .....	222
1. Sample deviation index .....	222
2. Response rate .....	223
3. Rate of missing data .....	223
4. Reliability coefficients for test-retest interviews .....	224
I. Country reports .....	224
J. Site visits .....	226
K. Conclusions .....	227
<b>Chapter XI. Reporting and compensating for non-sampling errors for surveys in Brazil: current practice and future challenges .....</b>	<b>231</b>
A. Introduction .....	232
B. Current practice for reporting and compensating for non-sampling errors in household surveys in Brazil .....	235
1. Coverage errors .....	236
2. Non-response .....	239
3. Measurement and processing errors .....	243
C. Challenges and perspectives .....	244
D. Recommendations for further reading .....	246
<b>Section D. Survey costs .....</b>	<b>249</b>
Introduction .....	250

<b>Chapter XII. An analysis of cost issues for surveys in developing and transition countries</b> .....	253
A. Introduction .....	254
1. Criteria for efficient sample designs .....	254
2. Components of cost structures for surveys in developing and transition countries .....	255
3. Overview of the chapter .....	256
B. Components of the cost of a survey .....	256
C. Costs for surveys with extensive infrastructure available .....	257
1. Factors related to preparatory activities .....	257
2. Factors related to data collection and processing .....	258
D. Costs for surveys with limited or no prior survey infrastructure available .....	259
E. Factors related to modifications in survey goals .....	259
F. Some caveats regarding the reporting of survey costs .....	260
G. Summary and concluding remarks .....	261
Annex. Budgeting framework for the United Nations Children’s Fund (UNICEF) Multiple Indicator Cluster Surveys (MICS) .....	264
<b>Chapter XIII. Cost model for an income and expenditure survey</b> .....	267
A. Introduction .....	268
B. Cost models and cost estimates .....	268
C. Cost models for efficient sample design .....	270
D. Case study: the Lao Expenditure and Consumption Survey 2002 .....	272
E. Cost model for the fieldwork in the 2002 Lao Expenditure and Consumption Survey (LECS-3) .....	273
F. Concluding remarks .....	276
<b>Chapter XIV. Developing a framework for budgeting for household surveys in developing countries</b> .....	279
A. Introduction .....	280

B. Preliminary considerations .....	281
1. Phases of a survey .....	281
2. Timetable for a survey .....	281
3. Type of survey .....	283
4. Budgets versus expenditure .....	284
5. Previous studies .....	284
C. Key accounting categories within the budget framework .....	285
1. Personnel .....	285
2. Transport .....	286
3. Equipment .....	287
4. Consumables .....	287
5. Other costs .....	287
6. Examples of account categories budgeting .....	288
D. Key survey activities within the budget framework .....	290
1. Budgeting for survey preparation .....	290
2. Budgeting for survey implementation .....	291
3. Budgeting for survey data processing .....	291
4. Budgeting for survey reporting .....	291
5. Examples of budgeting for survey activities .....	291
E. Putting it all together .....	293
F. Potential budgetary limitations and pitfalls .....	294
G. Record-keeping and summaries .....	295
H. Conclusions .....	296
Annex. Examples of forms for the maintaining of daily and weekly records .....	297
<b>Section E. Analysis of survey data .....</b>	<b>301</b>
Introduction .....	302
<b>Chapter XV. A guide for data management of household surveys .....</b>	<b>305</b>
A. Introduction .....	306
B. Data management and questionnaire design .....	306
C. Operational strategies for data entry and data editing .....	308
D. Quality control criteria .....	311

E. Data entry program development .....	314
F. Organization and dissemination of the survey data sets .....	316
G. Data management in the sampling process .....	319
H. Summary of recommendations .....	332
<b>Chapter XVI. Presenting simple descriptive statistics from household survey data ..</b>	<b>335</b>
A. Introduction .....	336
B. Variables and descriptive statistics .....	336
1. Types of variables .....	337
2. Simple descriptive statistics .....	338
3. Presenting descriptive statistics for one variable .....	340
4. Presenting descriptive statistics for two variables .....	343
5. Presenting descriptive statistics for three or more variables .....	346
C. General advice for presenting descriptive statistics .....	347
1. Data preparation .....	347
2. Presentation of results .....	348
3. What constitutes a good table .....	349
4. Use of weights .....	352
D. Preparing a general report (abstract) for a household survey .....	353
1. Content .....	353
2. Process .....	353
E. Concluding comments .....	354
<b>Chapter XVII. Using multi-topic household surveys to improve poverty reduction policies in developing countries .....</b>	<b>355</b>
A. Introduction .....	356
B. Descriptive analysis .....	357
1. Defining poverty .....	357
2. Constructing a poverty profile .....	358
3. Using poverty profiles for basic policy analysis .....	359
C. Multiple regression analysis of household survey data .....	361
1. Demand analysis .....	362
2. Use of social services .....	363
3. Impact of specific government programmes .....	364

D. Summary and concluding comments .....	364
<b>Chapter XVIII. Multivariate methods for index construction .....</b>	<b>367</b>
A. Introduction .....	368
B. Some restrictions on the use of multivariate methods .....	369
C. An overview of multivariate methods .....	369
D. Graphs and summary measures .....	371
E. Cluster analysis .....	373
F. Principal component analysis (PCA) .....	377
G. Multivariate methods in index construction .....	379
1. Modelling consumption expenditure to construct a proxy for income .....	380
2. Principal components analysis (PCA) used to construct a “wealth” index .....	382
H. Conclusions .....	384
<b>Chapter XIX. Statistical analysis of survey data .....</b>	<b>389</b>
A. Introduction .....	390
B. Descriptive statistics: weights and variance estimation .....	391
C. Analytic statistics .....	396
D. General comments about regression modelling .....	398
E. Linear regression models .....	400
F. Logistic regression models .....	406
G. Use of multilevel models .....	408
H. Modelling to support survey processes .....	413
I. Conclusions .....	413

<b>Chapter XX. More advanced approaches to the analysis of survey data</b> .....	419
A. Introduction .....	420
1. Sample design and data analysis .....	420
2. Examples of effects (and of non-effect) of sample design on analysis .....	420
3. Basic concepts .....	422
4. Design effects and their role in the analysis of complex sample data .....	423
B. Basic approaches to the analysis of complex sample data .....	424
1. Model specifications as the basis of analysis .....	424
2. Possible relationships between the model and sample design: informative and uninformative designs .....	425
3. Problems in the use of standard software analysis packages for analysis of complex samples .....	426
C. Regression analysis and linear models .....	427
1. Effect of design variables not in the model and weighted regression estimators ..	427
2. Testing for the effect of the design on regression analysis .....	429
3. Multilevel models under informative sample design .....	430
D. Categorical data analysis .....	432
1. Modifications to chi-square tests for tests of goodness of fit and of independence .....	432
2. Generalizations for log-linear models .....	434
E. Summary and conclusions .....	436
Annex. Formal definitions and technical results .....	438
<b>Chapter XXI. Sampling error estimation for survey data</b> .....	447
A. Survey sample designs .....	448
B. Data analysis issues for complex sample survey data .....	448
1. Weighted analyses .....	448
2. Variance estimation overview .....	449
3. Finite population correction (FPC) factor(s) for without replacement sampling .....	449
4. Pseudo-strata and pseudo-PSUs .....	450
5. A common approximation ( <i>WR</i> ) to describe many complex sampling plans ....	451
6. Variance estimation techniques and survey design variables .....	452
7. Analysis of complex sample survey data .....	453
C. Variance estimation methods .....	453
1. Taylor series linearization for variance estimation .....	453
2. Replication method for variance estimation .....	454

3. Balanced repeated replication (BRR) .....	455
4. Jackknife replication techniques (JK) .....	456
5. Some common errors made by users of variance estimation software .....	457
D. Comparison of software packages for variance estimation .....	457
E. The Burundi sample survey data set .....	462
1. Inference population and population parameters .....	462
2. Sampling plan and data collection .....	462
3. Weighting procedures and set-up for variance estimation .....	462
4. Three examples for survey data analyses .....	463
F. Using non-sample survey procedures to analyse sample survey data .....	464
G. Sample survey procedures in SAS 8.2 .....	466
1. Overview of SURVEYMEANS and SURVEYREG .....	466
2. SURVEYMEANS .....	466
3. SURVEYREG .....	467
4. Numerical examples .....	468
5. Advantages/disadvantages/cost .....	468
H. SUDAAN 8.0 .....	469
1. Overview of SUDAAN .....	469
2. DESCRIPT .....	471
3. CROSSTAB .....	471
4. Numerical examples .....	472
5. Advantages/disadvantages/cost .....	473
I. Sample survey procedures in STATA 7.0 .....	474
1. Overview of STATA .....	474
2. SVYMEAN, SVYPROP, SVYTOTAL, SVYLC .....	475
3. SVYTAB .....	475
4. Numerical examples .....	476
5. Advantages/disadvantages/cost .....	476
J. Sample survey procedures in Epi-Info 6.04d and Epi-Info 2002 .....	477
1. Overview of Epi-Info .....	477
2. Epi-Info Version 6.04d (DOS), CSAMPLE module .....	478
3. Epi-Info 2002 (Windows) .....	479
4. Numerical examples .....	479
5. Advantages/disadvantages/cost .....	480
K. WesVar 4.2 .....	480
1. Overview of WevVar .....	480
2. Using WesVar Version 4.2 .....	481
3. Numerical examples .....	482

4. Advantages/disadvantages/cost .....	483
L. PC-CARP .....	484
M. CENVAR .....	485
N. IVEware (Beta version) .....	485
O. Conclusions and recommendations .....	486
<b>PART TWO. Case Studies .....</b>	<b>491</b>
Introduction .....	492
<b>Chapter XXII. The Demographic and Health Surveys .....</b>	<b>495</b>
A. Introduction .....	496
B. History .....	496
C. Content .....	497
D. Sampling frame .....	498
E. Sampling stages .....	499
F. Reporting of non-response .....	500
G. Comparison of non-response rates .....	502
H. Sample design effects from the DHS .....	503
I. Survey implementation .....	506
J. Preparing and translating survey documents .....	507
K. The pre-test .....	508
L. Recruitment of field staff .....	509
M. Interviewer training .....	510
N. Fieldwork .....	510

O. Data processing .....	512
P. Analysis and report writing .....	513
Q. Dissemination .....	514
R. Use of DHS data .....	514
S. Capacity-building .....	515
T. Lessons learned .....	515
Annex. Household and woman response rates for 66 surveys in 44 countries, 1990-2000, selected regions .....	519
<b>Chapter XXIII. Living Standards Measurement Study Surveys .....</b>	<b>523</b>
A. Introduction .....	524
B. Why an LSMS survey? .....	525
C. Key features of LSMS surveys .....	525
1. Content and instruments used .....	525
2. Sample issues .....	528
3. Fieldwork organization .....	529
4. Quality .....	530
5. Data entry .....	533
6. Sustainability .....	533
D. Costs of undertaking an LSMS survey .....	534
E. How effective has the LSMS design been on quality? .....	536
1. Response rates .....	536
2. Item non-response .....	537
3. Internal consistency checks .....	539
4. Sample design effects .....	540
F. Uses of LSMS survey data .....	542
G. Conclusions .....	544
Annex I. List of Living Standard Measurement Study surveys .....	545
Annex II. Budgeting an LSMS survey .....	547
Annex III. Effect of sample design on precision and efficiency in LSMS surveys .....	549

<b>Chapter XXIV. Survey design and sample design in household budget surveys</b> .....	557
A. Introduction .....	558
B. Survey design .....	559
1. Data-collection methods in household budget surveys .....	559
2. Measurement problems .....	559
3. Reference periods .....	560
4. Frequency of visits .....	561
5. Non-response .....	561
C. Sample design .....	562
1. Stratification, sample allocation to strata .....	562
2. Sample size .....	563
3. Sampling over time .....	563
D. A case study: the Lao Expenditure and Consumption Survey 1997/98 .....	564
1. General conditions for survey work .....	564
2. Topics covered in the survey, questionnaires .....	565
3. Measurement methods .....	565
4. Sample design, fieldwork .....	566
E. Experiences, lessons learned .....	566
1. Measurement methods, non-response .....	566
2. Sample design, sampling errors .....	567
3. Experiences from the use of the time-use diary .....	568
4. The use of LECS-2 for estimates of GDP .....	569
F. Concluding remarks .....	569
<b>Chapter XXV. Household surveys in transition countries</b> .....	571
A. General assessment of household surveys in transition countries .....	572
1. Introduction .....	572
2. Household sample surveys in Central and Eastern European countries and the USSR before the transition period (1991-2000) .....	572
3. Household surveys in the transition period .....	575
4. Household budget surveys .....	575
5. Labour-force surveys .....	576
6. Common features of the sampling designs and implementation of the HBS and the LFS .....	577
7. Concluding remarks .....	587

B. Household sample surveys in transition countries .....	588
1. The Estonian Household Sample Survey .....	588
2. Design and implementation of the Household Budget Survey and the Labour Force Survey in Hungary .....	592
3. Design and implementation of household surveys in Latvia .....	596
4. Household sample surveys in Lithuania .....	600
5. Household surveys in Poland in the transition period .....	603
6. The Labour Force Survey and the Household Budget Survey in Slovenia .....	609

## Tables

II.1 Design effects for selected combinations of cluster sample size and intra-class correlation .....	20
II.2. Optimal subsample sizes for selected combinations of cost ratio and intra-class correlation .....	21
II.3. Standard errors and confidence intervals for estimates of poverty rate based on various sample sizes, with the design effect assumed to be 2.0 .....	27
II.4. Coefficient of variation for estimates of poverty rate based on various sample sizes, with the design effect assumed to be 2.0 .....	28
IV.1. Draft budget for a hypothetical survey of 3,000 households .....	56
VI.1.Design effects due to disproportionate sampling in the two-strata case .....	103
VI.2. Distributions of the population and three alternative sample allocations across the eight provinces (A –H) .....	116
VII.1. Characteristics of the 11 household surveys included in the study .....	126
VII.2. Estimated design effects from seven surveys in Africa and South-East Asia .....	128
VII. 3. Estimated design effects for country level and by type of area estimates for selected household estimates (PNAD 1999) .....	129
VII.4. Estimated design effects for selected person-level characteristics at the national level and for various sub-domains (PNAD 1999) .....	130
VII.5. Estimated design effects for selected estimates from PME for September 1999 ....	131
VII.6. Estimated design effects for selected estimates from PPV .....	131
VII.7. Comparisons of design effects across surveys .....	132
VII.8. The overall design effects separated into effects from weighting ( $d_w^2(\bar{y})$ ) and from clustering ( $d_{cl}^2(\bar{y})$ ) .....	135
VII.9. Rates of homogeneity for urban and rural domains .....	136
X.1. Summary list for quality of sampling .....	208

X.2. Summary list for review of translation procedures .....	210
X.3. Summary list for review of training procedures .....	213
X.4. Summary list for review of survey implementation .....	216
X.5. Summary list for the data entry process .....	220
XI.1. Some characteristics of the main Brazilian household sample surveys .....	235
XI.2. Estimates of omission rates for population censuses in Brazil obtained from the 1991 and 2000 post-enumeration surveys .....	238
XIII.1. Estimated time for fieldwork in a village .....	274
XIII.2. Estimated costs for LECS-3 (US dollars per diem) .....	274
XIII.3. Optimal sample sizes in villages ( $m_{opt}$ ) and relative efficiency of the actual design ( $m=15$ ) for different values of $\rho$ .....	276
XIV.1. Proposed draft timetable for informal sector survey .....	282
XIV. 2. Matrix of accounting categories versus survey activities .....	285
XIV.3. Matrix of planned staff time (days) versus survey activities .....	286
XIV.4. Costs in accounting categories as a proportion of total budget: End-Decade Goals surveys (1999-2000), selected African countries .....	289
XIV.5. Proportion of budget allocated to accounting categories: Assessing the Impact of Macroenterprise Services (AIMS), Zimbabwe (1999) .....	290
XIV.6. Costs of survey activities as a proportion of total budget: End-Decade Goals surveys (1999-2000), selected African countries .....	292
XIV.7. Costs of survey activities as a proportion of total budget: AIMS Zimbabwe (1999) .....	293
XIV.8. Costs in accounting categories by survey activity as a planned proportion of the budget: AIMS Zimbabwe (1999) .....	293
XIV.9. Costs in accounting categories by survey activity as an implemented proportion of the budget: AIMS Zimbabwe (1999) .....	294
XV.1. Data from a household survey stored as a simple rectangular file .....	317

XVI.1. Distribution of population by age and sex, Saipan, Commonwealth of the Northern Mariana Islands, April 2002: row percentages .....	338
XVI.2. Distribution of population by age and sex, Saipan, Commonwealth of the Northern Mariana Islands, April 2002: column percentages .....	339
XVI.3. Summary statistics for household income by ethnic group, American Samoa, 1994 .....	340
XVI.4. Sources of lighting among Vietnamese households, 1992-1993 .....	341
XVI.5. Summary information on household total expenditures: Viet Nam, 1992-1993 .....	344
XVI.6. Use of health facilities among population (all ages) that visited a health facility in the past four weeks, by urban and rural areas of Viet Nam, in 1992-1993 .....	344
XVI.7. Total household expenditures by region in Viet Nam, 1992-1993 .....	346
XVIII.1. Some multivariate techniques and their purpose .....	370
XVIII.2. Farm data showing the presence or absence of a range of farm characteristics...	375
XVIII.3. Matrix of similarities between eight farms .....	376
XVIII.4. Results of a principal component analysis .....	378
XVIII.5. Variables used and their corresponding weights in the construction of a predictive index of consumption expenditure for the Kilimanjaro region in the United Republic of Tanzania .....	382
XVIII.6. Cut-off points for separating population into five wealth quintiles .....	383
XIX.1. Typical household survey design structure .....	390
XIX.2. Interpreting linear regression parameter estimates when the dependent variable is household earnings from wages for model 1 .....	402
XIX.3. Estimable household incomes from wages (model 1) .....	403
XIX.4. Interpreting linear regression parameter estimates when the dependent variable is household earnings from wages, under model 2 .....	404
XIX.5. Interpreting logistic regression parameter estimates when the dependent variable is an indicator for households below the poverty level, under model 4 .....	407

XX.1. Bias and Mean square of ordinary least squares estimator and variances of unbiased estimators for population of 3,850 farms using various survey designs .....	429
XX.2. ANOVA table comparing weighted and unweighted regressions .....	430
XX.3. Ratios of three iterated chi-squared tests to SRS tests .....	432
XX.4. Estimated asymptotic sizes of tests based on $X^2$ and on $X_c^2$ for selected items from the 1971 General Household Survey of the United Kingdom of Great Britain and Northern Ireland; nominal size is .05 .....	433
XX.5. Estimated asymptotic sizes of tests based on $X_i^2$ , $X_i^2/\hat{\delta}^2$ , and on $X_i^2/\hat{\lambda}^2$ for cross-classification of selected variables from the 1971 General Household Survey of the United Kingdom of Great Britain and Northern Ireland; nominal size is .05 .....	434
XX.6. Estimated asymptotic significance levels (SL) of $X^2$ and the corrected statistics $X^2/\hat{\delta}^2$ , $X^2/\hat{\lambda}^2$ , $X^2/\hat{d}^2$ : 2 x 5 x 4 table and nominal significance level $\alpha = 0.05$ .....	436
XXI.1. Comparison of PROCS in five software packages: estimated percentage and number of women who are seropositive, with estimated standard error, women with recent birth, Burundi, 1988-1989 .....	458
XXI.2. Attributes of eight software packages with variance estimation capability for complex sample survey data .....	460
XXII.1. Average $d(\bar{y})$ and $\hat{\rho}$ values for 48 DHS Surveys, 1984-1993 .....	505
XXIII.1. Content of Viet Nam household questionnaire, 1997-1998 .....	526
XXIII.2. Examples of additional modules .....	527
XXIII.3. Quality controls in LSMS surveys .....	531
XXIII.4. Response rates in recent LSMS surveys .....	537
XXIII.5. Frequency of missing income data in LSMS and LFS .....	538
XXIII.6. Households with complete consumption aggregates: examples from recent LSMS surveys .....	539
XXIII.7. Internal consistency of the data: successful linkages between modules .....	540
XXIII.8. Examples of design effects in LSMS surveys .....	541

AIII.1. Variation of design effects by variable, Ghana, 1987 .....	551
AIII.2. Variation in design effects over time, Ghana, 1987 and 1988 .....	552
AIII.3. Variation in design effects across countries .....	553
AIII.4. Description of analysis variables: individual level .....	554
AIII.5. Description of analysis variables: household level .....	554
XXIV.1. Design effects on household consumption and possession of durables .....	568
XXIV.2. Ratio between actual and expected number of persons in the time-use diary sample .....	568
XXV.1. New household budget surveys and labour-force surveys in some transition countries, 1992-2000: year started, periodicity and year last redesigned .....	576
XXV.2. Sample size, sample design and estimation methods in the HBS and the LFS, 2000, selected transition countries .....	581
XXV.3. Non-response rates in the HBS in some transition countries, 1992-2000 .....	584
XXV.4. Non-response rate in LFS in some transition countries in 1992-2000 .....	585
XXV.5. Cost structure of the HBS in Hungary in the year 2000 .....	586
XXV.6. Cost structure of the LFS in Hungary in the year 2000 .....	587

## FIGURES

III.1. Illustration of questionnaire formatting .....	43
IV.1. Work plan for development and implementation of a household survey .....	58
X.1. WHS quality assurance procedures .....	202
X.2. Data entry and quality monitoring process .....	218
X.3. Example of a sample deviation index .....	223
XV.1. Nepal living standards survey II .....	319
XV.2. Using a spreadsheet as a first-stage sampling frame .....	321
XV.3. Implementing implicit stratification .....	323
XV.4. Selecting a PPS sample (first step). .....	324
XV.5. Selecting a PPS sample (second step) .....	325
XV.6. Selecting a PPS sample (third step) .....	326
XV.7. Selecting a PPS sample (fourth step) .....	327
XV.8. Spreadsheet with the selected primary sampling units .....	328
XV.9. Computing the first-stage selection probabilities .....	329
XV.10. Documenting the results of the household listing operation .....	330
XV.11. Documenting non-response .....	331
XV.12. Computing the second-stage probabilities and sampling weights .....	332
XVI.1. Sources of lighting among Vietnamese households, 1992-1993 (column chart) ....	342
XVI.2. Sources of lighting among Vietnamese households, 1992-1993 (pie chart) .....	342
XVI.3. Age distribution of the population in Saipan, April 2002 (histogram) .....	343

XVI.4. Use of health facilities among the population (all ages) that visited a health facility in the past four weeks, by urban and rural areas of Viet Nam, in 1992-1993 .....	345
XVIII.1. Example of a matrix plot among six variables .....	372
XVIII.2. Dendrogram formed by the <i>between farms</i> similarity matrix .....	376
XIX.1. Application of weights and statistical estimation .....	392
XX.1. No selection .....	421
XX.2. Selection on X: $X_L < X < X_U$ .....	421
XX.3. Selection on X: $X < X_L$ ; $X > X_U$ .....	421
XX.4. Selection on Y: $Y_L < Y < Y_U$ .....	421
XX.5. Selection on Y: $Y < Y_L$ ; $Y > Y_U$ .....	421
XX.6. Selection on Y: $Y > Y_U$ .....	421
XXIII.1. Relation between LSMS purposes and survey instruments .....	526
XXIII.2. One-month schedule of activities for each team .....	530
XXIII.3. Cost components of an LSMS survey (share of total cost) .....	535
