

UNCTAD'S GENDER SENSITIVE TRADE STATISTICS FRAMEWORK

Anu Peltola

Development Statistics and Information Branch,
UNCTAD

Economic aspects of gender equality

Trade and trade policy affect gender equality

- Need to develop gender-responsive trade policies
- The interactions are often complex and country-specific

Women's economic empowerment on the global agenda

- Beijing Platform for Action (1995) – gender & economic stats
- The 2030 Agenda (2015) – a goal & a cross-sectional issue
- The Addis Ababa Action Agenda (2015) – a trade & gender link

Buenos Aires Declaration on Trade and Women's Economic Empowerment

- A call for gender-focused statistics related to trade

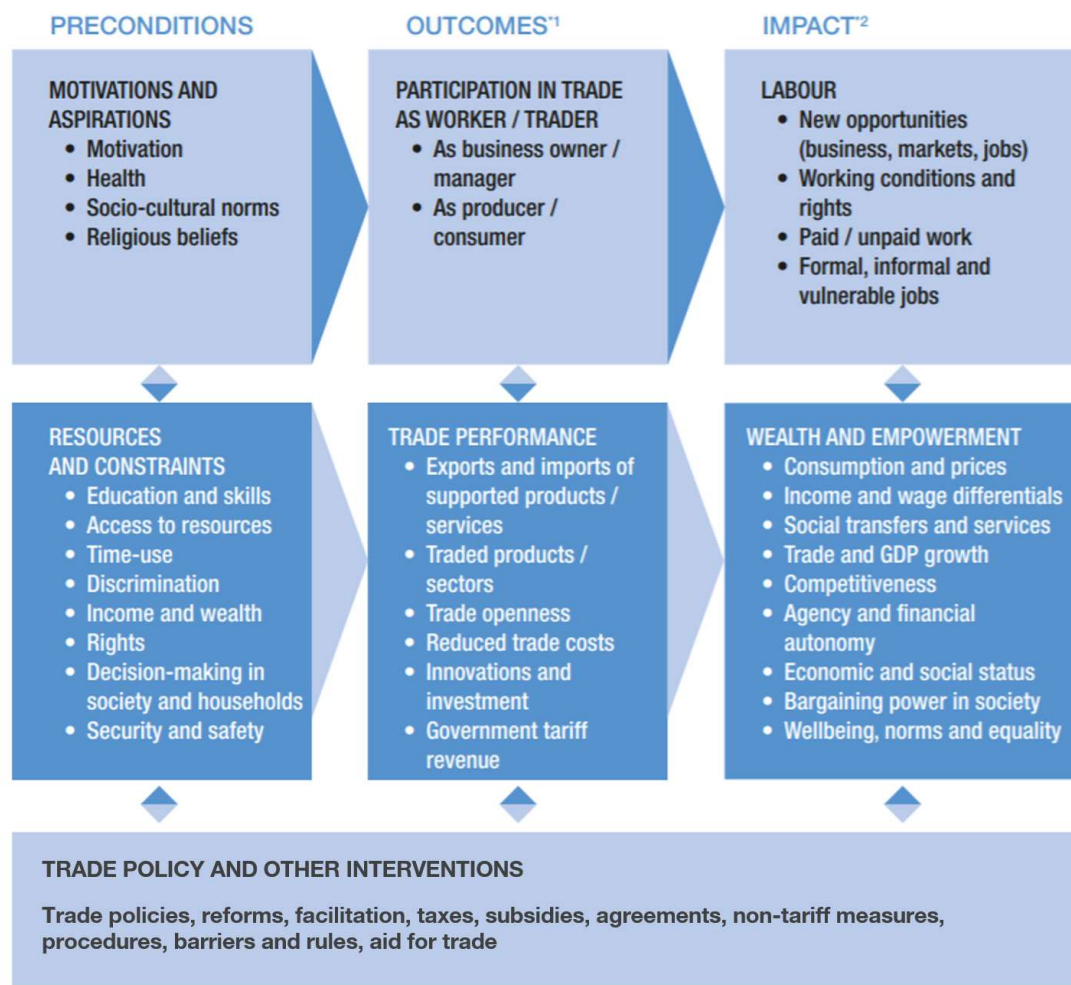

Interactions of gender and trade are complex

Watch [this video](#) on why gender-in-trade data matter

Framework for the measurement of gender and trade

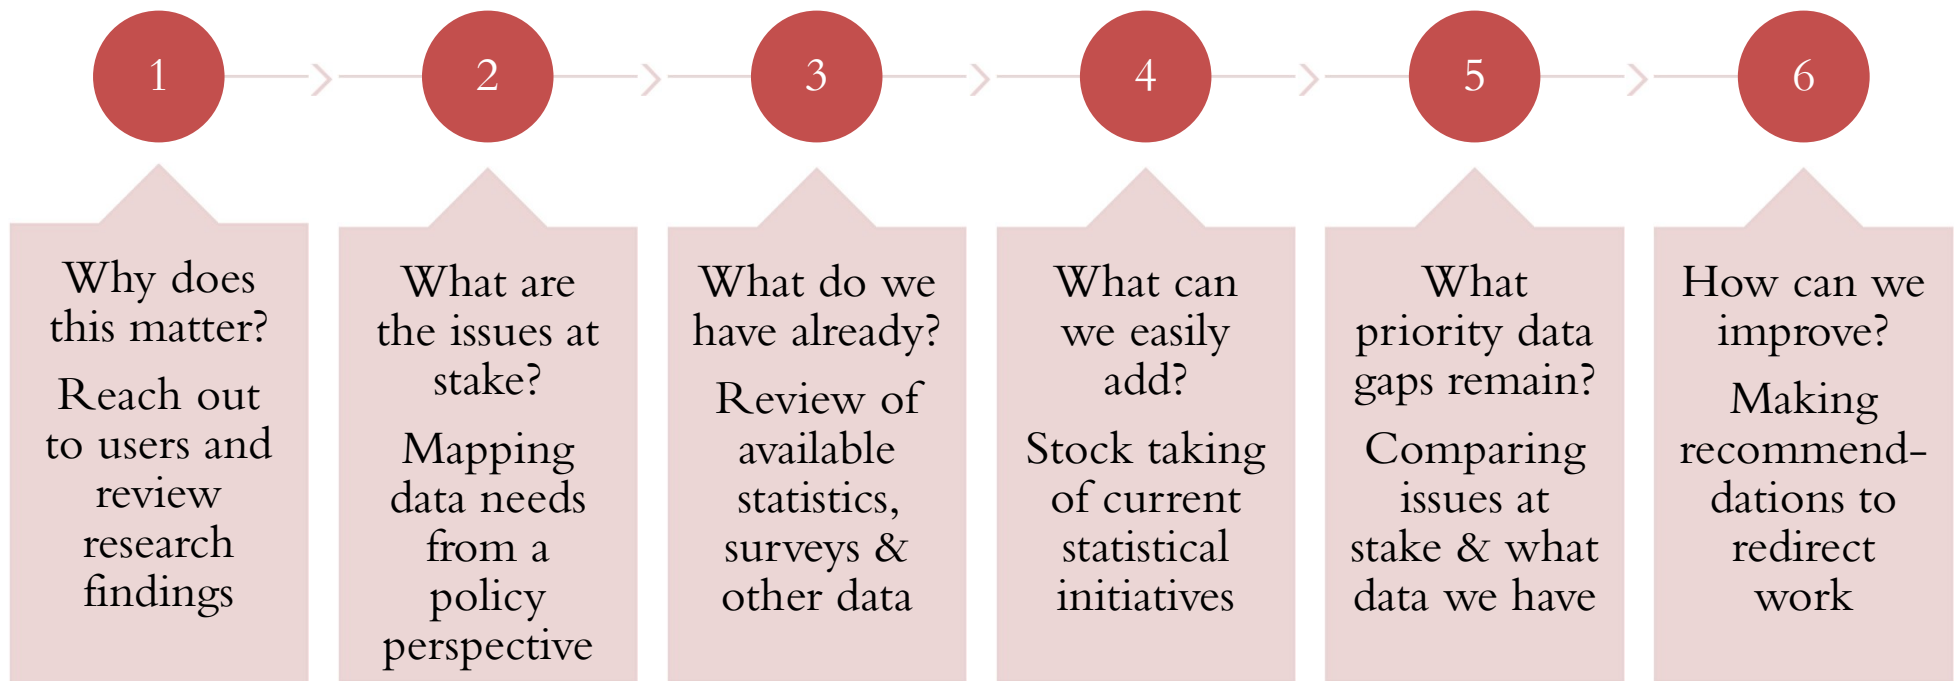

Aim of the framework:
 help national statistical offices to
review what data already exists
 for the measurement of gender
 and trade

¹ Immediate short-term outcome of a change

² Longer-term effects of the outcomes on lives and living conditions.

Generic steps for considering gender aspects across statistical areas
