

Time-use data for better policies in Africa, Western Asia and Latin America

Updates on the implementation of the DA-12 project

16th Inter-Agency and Expert Group on Gender Statistics

Iliana Vaca Trigo
Statistician

Demographic and Social Statistics Branch
United Nations Statistics Division

December 2022

Brief description

Objective: Contribute to government capacity to effectively **produce and use time-use data in policy formulation for the implementation of the 2030 Agenda** in Africa, Latin America and Western Asia.

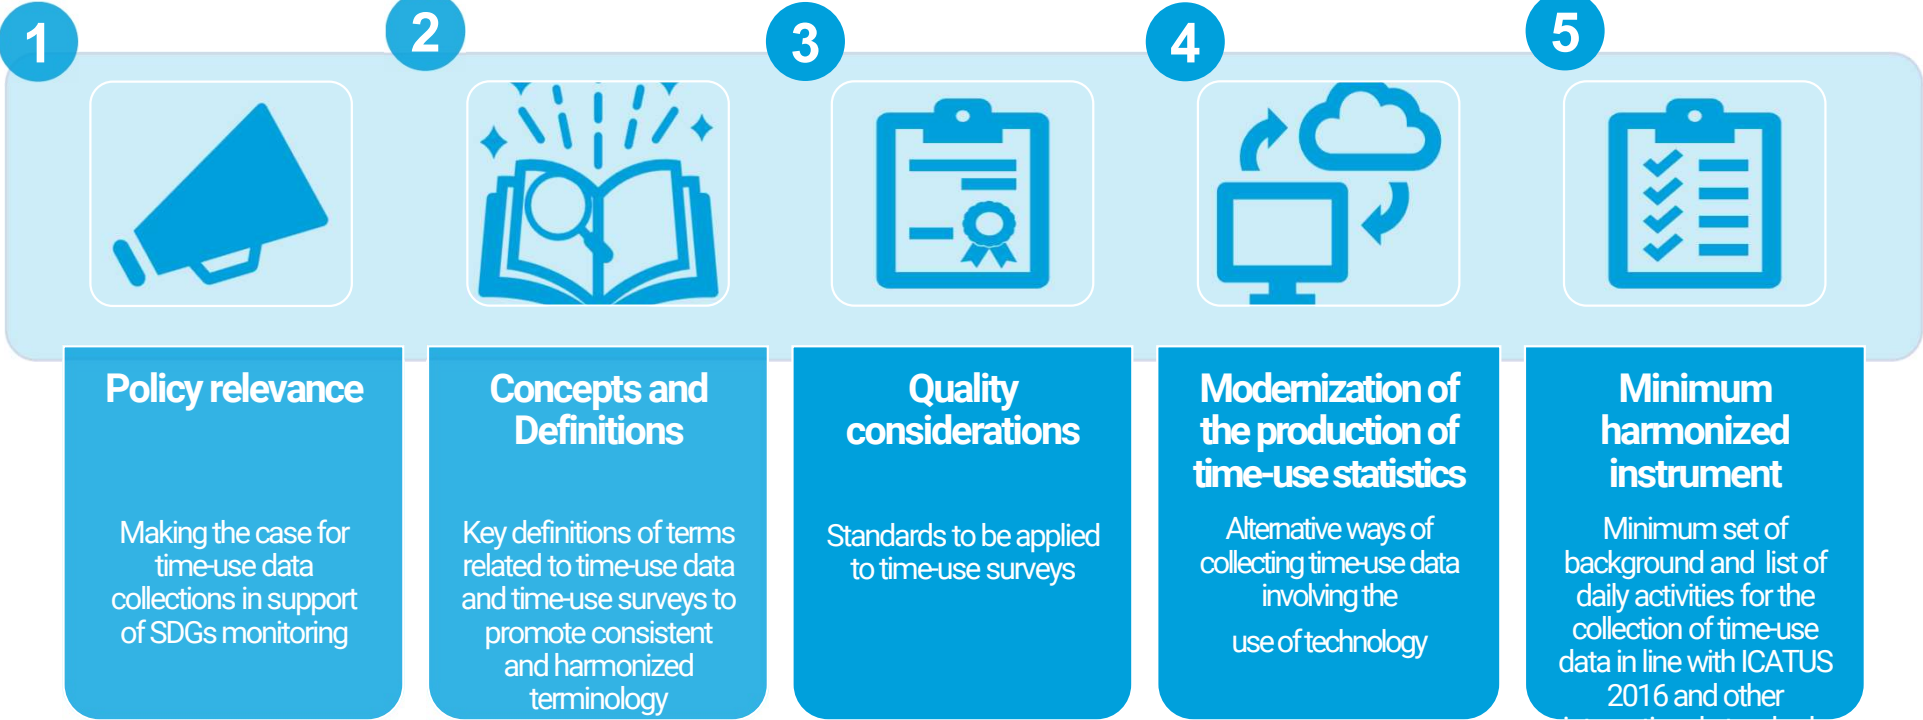

UNSD in collaboration with UNECA, UNECLAC and ESCWA
Build capacity in countries to produce and use time-use statistics

Improved and modernized methods to produce time-use data -cheaper, faster, of highest quality, and in line with international standards- **to inform SDG indicators** monitoring and available for the broader user community

Using the latest technologies and different instruments for **more frequent and efficient** production of time use data, responding to **national data needs** and meeting **international standards**

Guide for the production of time use statistics (2024 revision)

Strengthened national capacity to produce and use time-use data for higher quality data and improved data/policies integration at the national level

**Country visit to South Africa
Pretoria, 6-8 December 2022**

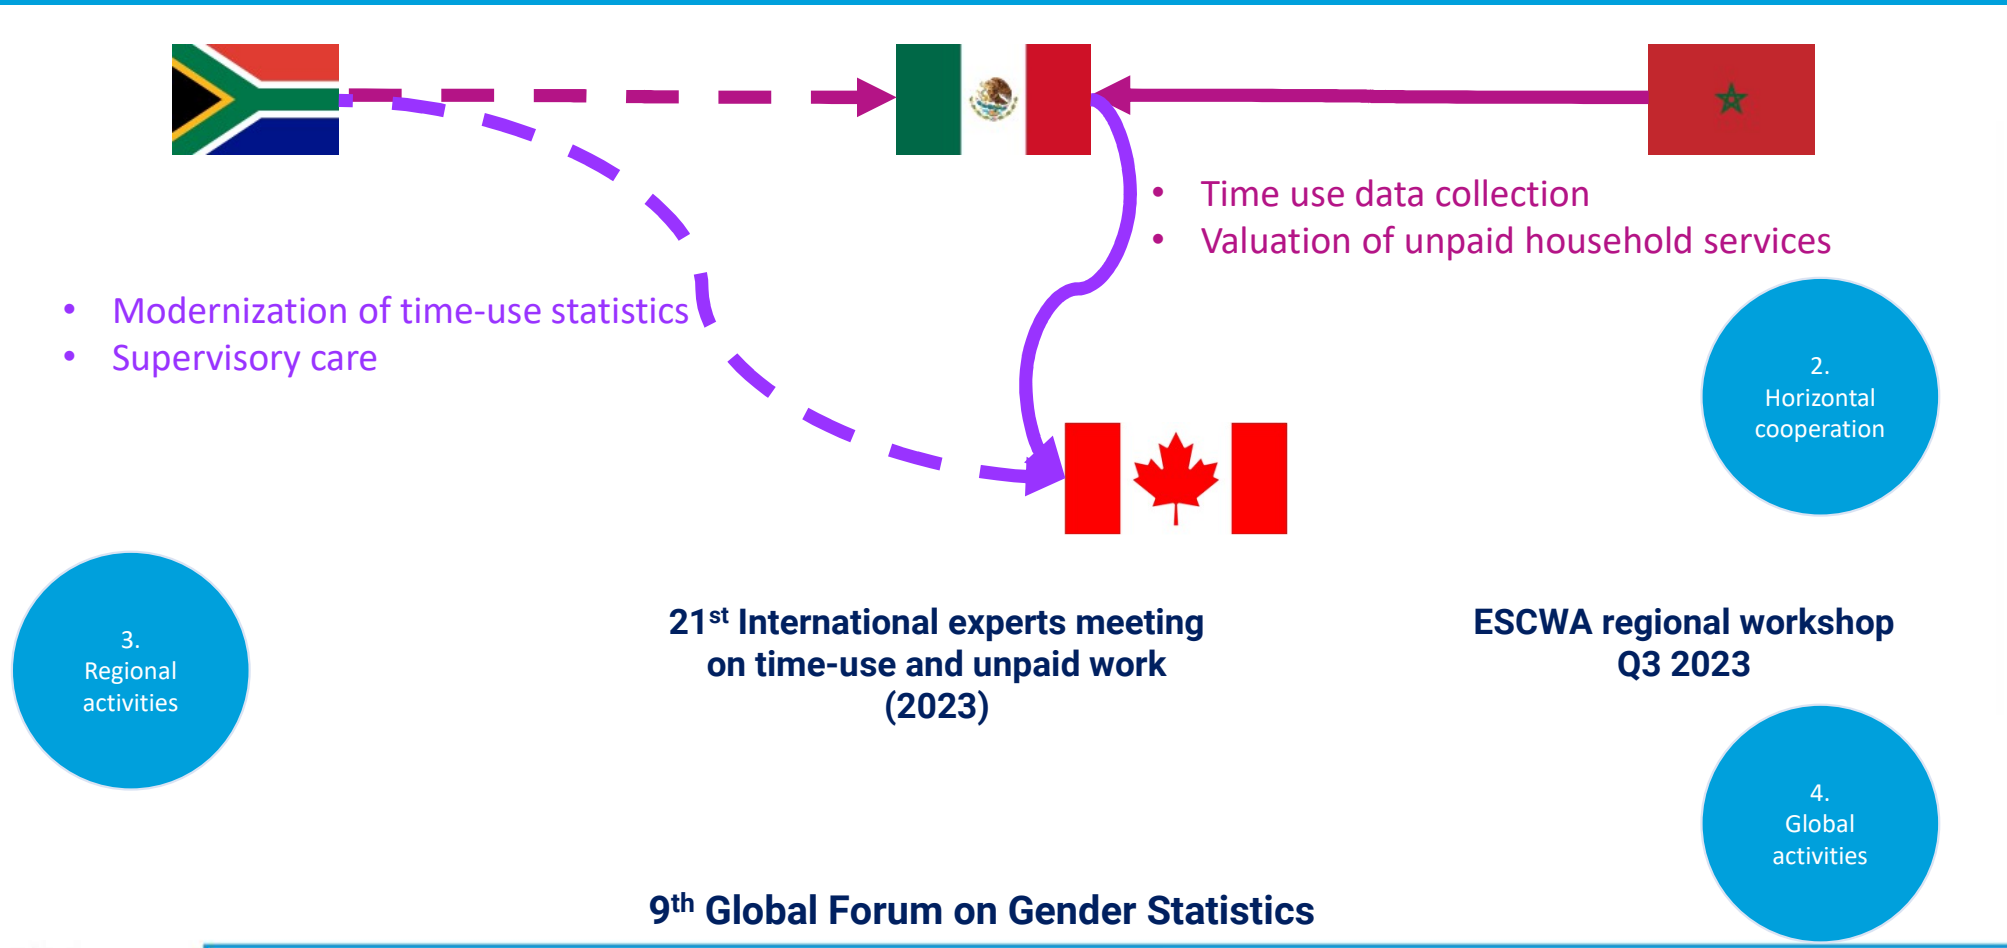

**Country visit to Morocco
Rabat, 23 June 2022**

- ✓ Present the recommendations of the EG-TUS
- ✓ Assess country needs/capacities to conduct a new data collection
 - ✓ User-producers dialogue

1.
National activities

Strengthened national capacity to produce and use time-use data for higher quality data and improved data/policies integration at the national level

Thank you
