

Road map for quality assurance for administrative data

December 2019

... Understanding the need!

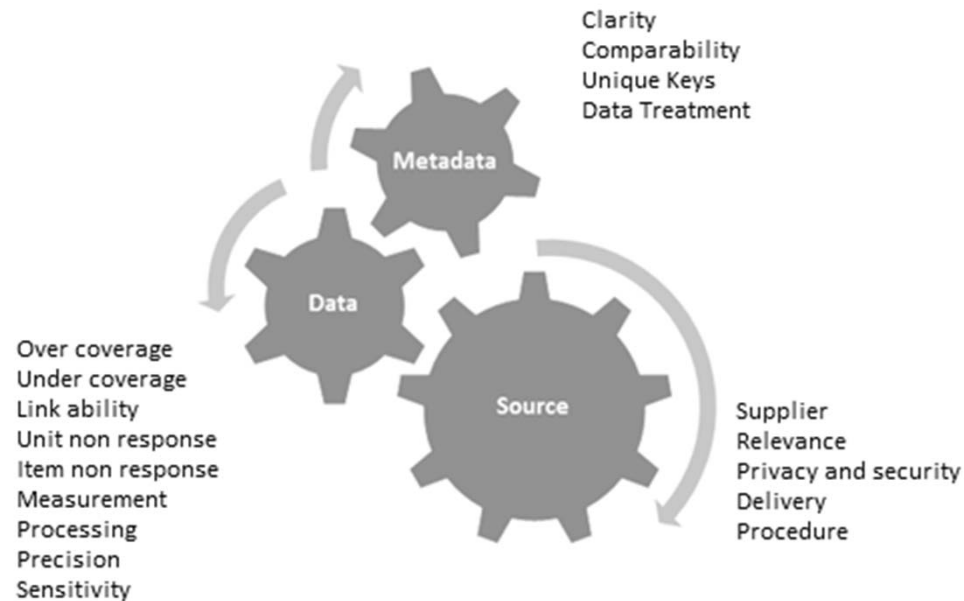

- Objective 3: Produce all official statistics to a high level of quality, meeting accepted European and international standards:
 - *Improve the quality of administrative data and records by supplier institutions*
 - Build, maintain and promote a quality management and quality control system for the NSS

- Consolidation of digital infrastructure in the whole territory of the Republic of Albania
- Improvement of the quality of online public services
- Increase of governance transparency

Quality criteria three hyper-dimensions:

- Source
- Data
- Metadata

Challenges related to administrative data

- Deeper understanding of the importance of data collected/generated by administrative data owners;
- The need for common identifiers among different data sources;
- Quality assurance framework;
- Fear of being assessed in regards to quality;
- Quality assessment by internal or external body.

- Organization of meetings, workshops, conferences to raise awareness on the importance of the quality assurance of administrative data;
 - Preparation of training curricula to be used for training regarding quality assurance and quality assessment;
 - Trainings in structural and referential metadata;
 - Quality assurance framework developed for the entire National statistical System;
 - Development of a roadmap with milestones to guide administrative data providers to assure quality;
 - Continuous support in implementing quality assurance;
 - Definition of common vocabulary for most important variables.
-

Training with administrative data holders and statistical agency focus on:

1. Organizational quality

- Quality in the management system (institutional environment)

2. Process quality

- Quality in the “way we do things”

3. Product quality

- Quality in a product or service

THANK YOU!
