

# Global Consultation on the Compilation Guide for Measuring Natural Resources

The 56th session of the United Nations Statistical Commission adopted the 2025 SNA as the international statistical standard for compiling national accounts statistics. *"Measuring natural resources in the national accounts: a compilation guide"* is one of the compilation guides to support implementation of the new standard. It has been developed by the OECD Informal Expert Group on Natural Capital (EGNC) and has already undergone extensive review. The draft of the guide was included as a background document to the United Nations Statistical Commission and is now made available for global consultation.

At this final stage in the process, we would specifically welcome comments on the following two aspects: a) Are the recommendations, as summarized at the end of chapters 3 to 6, sufficiently clear? and b) Do you see any inconsistencies with the 2025 SNA?

The final version of the guide will be published later in 2025 taking into account comments received during this global consultation and upon final review by the Advisory Expert Group on National Accounts (AEG) and the EGNC.

required

## Respondent's identification

Please provide your information below

1. Country \*

2. Institution/Department \*

3. First name \*

4. Last name \*

5. Position \*

6. Email

## Clarity and consistency

7. Are the recommendations, as summarized at the end of chapters 3 to 6, clear? \*

☐ Yes

☐ No

8. Please elaborate

9. Do you see any inconsistencies with the 2025 SNA? \*

☐ Yes

☐ No

10. Please elaborate

11. To ensure maximum transparency, we publish responses from the global consultations. Do you consent to the publication of your response to this questionnaire? \*

☐ Yes

☐ No
