

**National Accounts Workshop for SADC countries**

*16-19 June 2009, Windhoek, Namibia*

Strengthening statistical capacity-building in support of progress  
towards the Internationally Agreed Developments Goals in the  
Southern African Development Community region

**Supply and use tables: Practical experience**

# **SUPPLY AND USE TABLES**

**JUNE 2009**

# **Background of SU-tables in South Africa**

- ↓ First SU-tables reference year 1993**
  - ↓ SU-tables annually for reference years 1998 onwards**
  - ↓ SU-tables compiled after GDP release until 2004**
  - ↓ From 2004 SU-tables compiled to calculate annual GDP estimates**
-

**In national accounting and economic analysis two kinds of input-output tables are referred to:**

**↓ Symmetric input-output tables;**

**↓ Supply and use tables.**

---

## **Major difference between a symmetric input-output table and SU-tables:**

- ↓ A symmetric input-output table is a product by product or industry by industry matrix;**
  - ↓ The SU-tables framework has two tables. The SU-tables are industry by product matrices and both industry and commodity classifications are used.**
-

## **The three accounts included in the SU-tables:**

**↓ Goods and services account;**

**↓ Production account;**

**↓ Generation of income account.**

---

## Goods and services account: 2000

<b>Resources</b>	<b>R million</b>	<b>Uses</b>	<b>R million</b>
<b>Output</b>	1,616,976	<b>Intermediate consumption</b>	808,735
