International Workshop on Economic Census

CONTENT AND COVERAGE OF MONGOLIAN BUSINESS REGISTER

ERDENESAN ELDEV-OCHIR
(National Statistical Office Of Mongolia)

United Nations Statistics Division (UNSD)
National Bureau of Statistics of China (NBS)

26-29 July 2005, Beijing

Outline of Presentation

- Brief History
- Definitions of the units
- Importance of BR
- Business Registers, contents
- Identification data of Register
- Stratification information
- Demographic variables
- Relationship variables
- Data Model of the Register
- Classifications used in the Register
- Business Register, coverage

Brief History

➢ NSO was conducted census on establishments in 1998.

➢ Based on which results the legal units was developed.

➢ Two new questionnaires were implemented for updating of business register, which are BR-1 for the new entities, and BR-2 for changing. (from July 1,1999)

➢ Was conducted sample surveys based on legal units. (ISIC - C,D,E,F,G, H,O)

Brief History

➢ Attention has been paid to the improvement of the quality of the register, the development of maintenance procedure and checking quality of the registered information.

➢ Business register is updating on a quarterly basis at the NSO.

➢ NSO has implemented new 3 questionnaires for updating.(from 2002)

➢ BR database was developed in MS MSQL Server environment. (Legal unit, Enterprise, Local unit)

➢ NSO was conducted census on establishments in 2004(covered some regions).

Definitions of the units[1]

➢ **"Legal units"**

legal or natural person; the legal unit is responsible for the enterprise; it always forms the legal basis for the statistical unit known as the enterprise.

➢ **"Enterprises"**

smallest combination of legal units which keeps a complete set of accounts; it is attached to one or more legal units.

➢ **"Local units"**

The local unit is an enterprise or part thereof (e.g. a   workshop, factory, warehouse, office, mine or depot)   situated in a geographically identified place.

[1] **EU Register Regulation Art.2**

Importance of BR

- fundamental for the compilation of statistics.

- a sampling base for surveys

- a source of information for statistical analysis of the population of enterprises and its demography

- Business register focuses on national needs.

Business Registers, **contents**

variables	units
