Cinquante-septième édition

United Nations | Nations Unies
New York, 2015

## Department of Economic and Social Affairs

The Department of Economic and Social Affairs of the United Nations Secretariat is a vital interface between global policies in the economic, social and environment spheres and national action. The Department works in three main inter-linked areas: (i) it compiles, generates and analyses a wide range of economic, social and environmental data and information on which States Members of the United Nations draw to review common problems and to take stock of policy options; (ii) it facilitates the negotiations of Member States in many intergovernmental bodies on joint courses of action to address ongoing or emerging global challenges; and (iii) it advises interested Governments on the ways and means of translating policy frameworks developed in United Nations conferences and summits into programmes at the country level and, through technical assistance, helps build national capacities.

### Note

The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, city or area, or of its authorities, or concerning the delimitation of its frontiers or boundaries.

In general, statistics contained in the present publication are those available to the United Nations Secretariat up to September 2014 and refer to 2012 or earlier. They therefore reflect the country nomenclature currently in use.

The term “country” as used in the text of this publication also refers, as appropriate, to territories or areas.

The designations “developed” and “developing” which appear in some tables are intended for statistical convenience and do not necessarily express a judgement about the stage reached by a particular country or area in the development process.

Symbols of the United Nations documents are composed of capital letters combined with figures.

## Département des affaires économiques et sociales

Le Département des affaires économiques et sociales du Secrétariat de l’Organisation des Nations Unies assure le lien essentiel entre les politiques adoptées au plan international dans les domaines économique, social et écologique et les mesures prises au plan national. Il mène ses activités dans trois grands domaines interdépendants : i) il compile, produit et analyse une grand variété de données et d’informations économiques, sociales et écologiques dont les États Membres de l’ONU tirent parti pour examiner les problèmes communs et faire le point sur les possibilités d’action; (ii) il facilite les négociations que les États Membres mènent dans un grand nombre d’organes intergouvernementaux sur les moyens d’action à employer conjointement pour faire face aux problèmes mondiaux existants ou naissants; et (iii) il aide les gouvernements intéressés à traduire les orientations politiques établies lors des conférences et sommets de l’ONU en programmes nationaux et contribue à renforcer les capacités des pays en leur apportant une assistance technique.

### Note

Les appellations employées dans la présente publication et la présentation de données qui y figurent n’impliquent, de la part du Secrétariat de l’Organisation des Nations Unies, aucune prise de position quant au statut juridique des pays, territoires, villes ou zones, ou de leurs autorités, ni quant au tracé de leurs frontières ou limites.

En règle générale, les statistiques contenues dans la présente publication sont celles dont disposait le Secrétariat de l’Organisation des Nations Unies jusqu’à septembre 2014 et portent su la période finissant en 2012. Elles reflètent donc la nomenclature de pays en vigueur à l’époque.

Le terme « pays », tel qu’il est utilisé dans la présente publication peut également désigner des territoires ou des zones.

Les appellations « développées » et « en développement » qui figurent dans certains tableaux sont employées à des fins exclusivement statistiques et n’expriment pas nécessairement un jugement quant au niveau de développement atteint par tel pays ou telle région.

Les cotes des documents de l’Organisation des Nations Unies se composent de lettres majuscules et de chiffres.

# Preface

The 2012 United Nations *Statistical Yearbook* is the fifty-seventh issue of the publication, prepared by the Statistics Division of the Department of Economic and Social Affairs. Ever since the compilation of data for the *Statistical Yearbook* series was initiated in 1948, it has consistently provided a wide range of internationally available statistics on social and economic conditions and activities at the national, regional and world levels.

The tables include series covering an appropriate historical period, depending upon data availability and space constraints, for as many countries, territories and statistical areas of the world as available. The tables generally cover a period up to 2011 or 2012.

The *Yearbook* tables are based on data which have been compiled by the Statistics Division mainly from official national and international sources as these are more authoritative and comprehensive, more generally available as time series and more comparable among countries than other sources. These sources include the United Nations Statistics Division in the fields of national accounts, industry, energy and international trade, the United Nations Statistics Division and Population Division in the field of demographic statistics, and over 20 offices of the United Nations system and international organizations in other specialized fields. In some cases, official sources have been supplemented by other sources and estimates, where these have been subjected to professional scrutiny and debate and are consistent with other independent sources.

The United Nations agencies and other international, national and specialized organizations which provided data are listed under "Source" at the end of each table. Acknowledgment is gratefully made for their generous and valuable cooperation in continually providing data.

The 62 tables of the *Yearbook* are organized in four parts. The first part presents key world and regional aggregates and totals. In the other three parts, the subject matter is generally presented by countries or areas, with world and regional aggregates shown in some cases only; in particular, parts two, three and four relate to population and social topics, national economic activity and international economic relations respectively.

The four annexes contain information on country and area nomenclature (Annex I), summary technical notes on statistical sources and methods for all tables of the *Yearbook* (Annex II), the conversion coefficients and factors used in certain tables (Annex III), and a list of those tables which were added to or omitted from the last issue of the *Yearbook* (Annex IV).

The *Statistical Yearbook* is prepared by the Statistical Dissemination Section, Statistical Services Branch of the Statistics Division, Department of Economic and Social Affairs of the United Nations Secretariat. The programme manager is Jacob Assa and the chief editor is Ian Rutherford. They are assisted by David Carter, Anuradha Chimata and Aida Diawara. Bogdan Dragovic developed the software.

Comments on the present *Yearbook* and its future evolution are welcome. They may be sent via e-mail to statistics@un.org or to the United Nations Statistics Division, Statistical Dissemination Section, New York, NY 10017, USA.

# Préface

*L'Annuaire statistique* des Nations Unies 2012 est la cinquante-septième édition de cette publication, préparée par la Division de statistique du Département des affaires économiques et sociales. Depuis son instauration en 1948 comme outil de compilation des données statistiques internationales, l'*Annuaire statistique* s'efforce de constamment diffuser un large éventail de statistiques disponibles sur les activités et conditions économiques et sociales, aux niveaux national, régional et mondial.

Les tableaux présentent des séries qui couvrent une période historique appropriée, en fonction de la disponibilité des données et des contraintes d'espace, pour autant de pays, territoires et zones statistiques du monde comme disponibles. Les tableaux couvrent généralement pour la période jusqu'à 2011 ou 2012.

Les tableaux de l'*Annuaire* sont construits essentiellement à partir des données compilées par la Division de statistique et provenant de sources officielles, nationales et internationales; c'est en effet la meilleure source si l'on veut des données fiables, complètes et comparables, et si l'on a besoin de séries chronologiques. Ces sources sont: la Division de statistique du Secrétariat de l'Organisation des Nations Unies pour ce qui concerne la comptabilité nationale, l'industrie, l'énergie et le commerce extérieur, la Division de statistique et la Division de la population du Secrétariat de l'Organisation des Nations Unies pour les statistiques démographiques; et plus de 20 bureaux du système des Nations Unies et d'organisations internationales pour les autres domaines spécialisés. Dans quelques cas, les données officielles sont complétées par des informations et des estimations provenant d'autres sources qui ont été examinées par des spécialistes et confirmées par des sources indépendantes.

Les institutions spécialisées des Nations Unies et les autres organisations internationales, nationales et spécialisées qui ont fourni des données sont énumérées dans la "Source" sur chaque tableau. Les auteurs de l'*Annuaire statistique* les remercient de leur précieuse et généreuse collaboration.

Les 62 tableaux de l'*Annuaire* sont regroupés en quatre parties. La première partie présente les principaux agrégats et totaux aux niveaux mondial et régional. Dans les trios parties suivantes, les thèmes sont généralement présentés par pays ou régions. Les agrégats mondiaux ou régionaux ne sont indiqués que dans certains cas seulement. Les trois parties autres sont consacrées à la population et aux questions sociales (deuxième partie), à l'activité économique nationale (troisième partie) et aux relations économiques internationales (quatrième partie).

Les quatre annexes donnent des renseignements sur la nomenclature des pays et des zones (Annexe I), brèves notes techniques sur les sources et les méthodes statistiques utilisées pour chaque tableau de *l'Annuaire* (Annexe II), ainsi que sur les coefficients et facteurs de conversion employés dans les différents tableaux (Annexe III), et une liste des tableaux ajoutés et supprimés depuis la dernière édition de l'*Annuaire* y est également disponible (Annexe IV).

*L'Annuaire statistique* est préparé par la Section de la diffusion statistique, Service des statistiques de services de la Division de statistique, Département des affaires économiques et sociales du Secrétariat de l'Organisation des Nations Unies. La responsable du programme est Jacob Assa, et le rédacteur en chef est Ian Rutherford. Ils sont secondés par David Carter, Anuradha Chimata et Aida Diawara. Bogdan Dragovic est chargé des logiciels.

Les observations sur la présente édition de l'*Annuaire* et les suggestions de modification pour l'avenir seront reçues avec intérêt. Elles peuvent être envoyées par message électronique à statistics@un.org, ou adressées à la Division de statistique des Nations Unies, Section de la diffusion statistique, New York, NY 10017 (États-Unis d'Amérique).

# Explanatory notes

## Symbols and conventions used in the tables

**.** A point is used to indicate decimals.

**-** A hyphen between years, for example, 2008-2009, indicates the full period involved, including the beginning and end

**/** A slash indicates a financial year, school year or crop year, for example 2008/09.

**…** Data are not available or not applicable; including for reasons of confidentiality, for example in commodity production.

***** Data are provisional, estimated or include a major revision.

**#** Marked break in the time series.

**^0** Not zero but less than half of the unit used.

A space is used as a thousands separator, for example 1 000 is one thousand. Details and percentages in the tables do not necessarily add to totals because of rounding.

## Country notes and nomenclature

As a general rule, the data presented in the *Yearbook* relate to a given country or area within its present de facto boundaries. For a complete list of countries and territories, see annex I.

## References to statistical sources and methods in tables

For brevity the *Yearbook* omits specific information on source or methodology present in the original source for individual data points, and when a data point is estimated no distinction is made between whether the estimation was done by the international, national or specialized organization. Information on the original source are given at the end of each table or described in more detail in the technical notes to the tables, see annex II.

## Units of measurement

The metric system of weights and measures has been employed throughout the *Statistical Yearbook*. For conversion coefficients and factors, see annex III.

# Notes explicatives

**Signes et conventions employés dans les tableaux**

**.** Les décimales sont précédées d'un point.

**-** Un tiret entre des années, par exemple "2008-2009", indique que la période est embrassée dans sa totalité, y compris la première et la dernière année.

**/** Une barre oblique renvoie à un exercice financier, à une année scolaire ou à une campagne agricole, par exemple "2008/09".

**…** Données non disponibles ou non applicables, y compris pour des raisons de confidentialité, par exemple dans la production de marchandises.

***** Données provisoire, estimatif ou avec une révision majeure.

**#** Discontinuité notable dans la série chronologique.

**^0** Non nul mais inférieur à la moitié de l'unité employée.

Le séparateur utilisé pour les milliers est l'espace : par exemple, 1 000 correspond à un millier. Les chiffres étant arrondis, les totaux ne correspondent pas toujours à la somme exacte des éléments ou pourcentages figurant dans les tableaux.

**Notes sur les pays et nomenclature**

En règle générale, les données renvoient au pays ou zone en question dans ses frontières actuelles effectives. Une liste complète des pays et territoires figure à l'annexe I.

**Références à des sources et des méthodes statistiques dans les tableaux**

Par souci de concision l'Annuaire omet une information spécifique sur la source ou la méthodologie présente dans la source originale pour les points de données individuels, et quand un point de données est estimée aucune distinction ne est faite entre savoir si l'estimation a été faite par l'organisation internationale, nationale ou spécialisée. Information sur la source d'origine sont donnés à la fin de chaque tableau ou décrit plus en détail dans les notes techniques à la tableau, voir annexe II.

**Unités de mesure**

Le système métrique de poids et mesures a été utilisé dans tout l'*Annuaire statistique*. On trouvera à l'annexe III les coefficients et facteurs de conversion.

# Contents

Preface ..... iii
New features and explanatory notes ..... v
Introduction ..... 1

Part One: World and region summary

I. *World and region summary*
1. World statistics – selected series ..... 11
2. Population, rate of increase, birth and death rates, surface area and density ..... 13
3. Index numbers of total agricultural and food production ..... 15
4. Index numbers of per capita agricultural and food production ..... 15
5. Production, trade and consumption of commercial energy ..... 16
6. Total imports and exports by regions ..... 18

Part Two: Population and social statistics

II. *Population*
7. Selected indicators of life expectancy, childbearing and mortality ..... 23
8. Population in urban and rural areas, rates of growth and largest urban agglomeration population ..... 32
** Population by sex, rate of population increase, surface area and density

III. *Gender*
9. Proportion of seats held by women in national parliament ..... 43
10. Share of women in wage employment in the non-agricultural sector ..... 49
11. Ratio of girls to boys in primary, secondary and tertiary education ..... 54

IV. *Education*
12. Public expenditure on education ..... 67
13. Teaching staff at the primary, secondary and tertiary levels ..... 72
** Education at the primary, secondary and tertiary levels

V. *Nutrition and health*
14. Food supply ..... 91
15. Population below minimum level of dietary energy consumption ..... 96
16. People living with HIV ..... 99

VI. *Culture and communication*
17. Telephones ..... 103
18. Internet usage ..... 116
** Cinema infrastructure
** Cellular mobile telephone subscribers

Part Three: Economic activity

VII. *National accounts and industrial production*
19. Gross domestic product and gross domestic product per capita ..... 125
20. Implicit price deflators of gross domestic product ..... 143
21. Gross domestic product by type of expenditure ..... 160
22. Gross value added by kind of economic activity ..... 173
23. Index of industrial production ..... 185

VIII. *Financial statistics*
24. Rates of discount of central banks ..... 195
25. Short-term interest rates ..... 198

IX. *Labour force*
26. Unemployment ..... 205
** Employment by economic activity

X. P*rices*
27. Producer price indices ..... 223
** Consumer price indices
** Wages in manufacturing

XI. *Agriculture, forestry and fishing*
28. Agricultural production ..... 233
29. Oil crops ..... 239
30. Cereals ..... 244
31. Roundwood ..... 249
32. Fish production ..... 253
33. Fertilizers ..... 260
34. Livestock ..... 271

XII. *Manufacturing*
35. Sugar ..... 295
36. Beer ..... 305
37. Cigarettes ..... 310
38. Paper and paperboard ..... 314
39. Aluminium unwrought ..... 317
40. Radio receivers ..... 319
41. Television receivers ..... 321
42. Household washing and drying machines ..... 323
43. Machine tools ..... 325
** Trucks
** Meat

XIII. *Energy*
44. Production, trade and consumption of commercial energy ..... 328
45. Production of selected energy commodities ..... 360

XIV. *Environment*
46. Land ..... 379
47. $CO_2$ emissions estimates ..... 389
48. Ozone-depleting chlorofluorocarbons (CFCs) ..... 395
49. Water supply and sanitation coverage ..... 400
** Threatened species

XV. *Science and technology*
50. Personnel in research and development (R & D) ..... 417
51. Gross domestic expenditure on R & D ..... 427
** Patents

Part Four: International economic relations

XVI. *International merchandise trade*
52. Total imports and exports by regions and countries or areas ..... 437
53. Total imports and exports by countries or area ..... 454
54. Manufactured goods exports ..... 460

XVII. *International tourism and transport*
55. Tourist/visitor arrivals by region of origin ..... 465
56. Tourist/visitor arrivals and tourism expenditure ..... 493
57. Outbound tourism ..... 506
** Civil aviation

XVIII. *International finance*
58. External debt stocks and flows, long term ..... 521
59. External debt stocks, (long-term) public and publicly guaranteed ..... 523
** Exchange rates

XIX. *Development assistance*
60. Disbursements of bilateral and multilateral official development assistance and official aid to individual recipients ..... 527
61. Net official development assistance from DAC countries to developing countries and multilateral organizations ..... 541
62. Socio-economic development assistance through the United Nations system ..... 542

Annexes

I. Country and area nomenclature, regional and other groupings ..... 551
II. Technical notes ..... 561
III. Conversion coefficients and factors ..... 596
IV. Tables added and omitted ..... 598

** Asterisks preceding table names identify tables that were presented in previous issues of the *Statistical Yearbook* which are not contained in the present issue. These tables will be updated in future issues of the *Yearbook* when new data become available.

# Table des matières

Préface ..... iv
Les nouveautés et notes explicatives ..... vi
Introduction ..... 4

Première partie: Aperçu mondial et régional

I. *Aperçu mondial et régional*
1. Statistiques mondiales - séries principales ..... 11
2. Population, taux d'accroissement, taux de natalité, taux de mortalité, superficie et densité ..... 13
3. Indices de la production agricole totale et de la production alimentaire ..... 15
4. Indices de la production agricole totale et de la alimentaire production par habitant ..... 15
5. Production, commerce et consommation d'énergie commerciale ..... 16
6. Importations et exportations totales par régions ..... 18

Deuxième partie: Population et statistiques sociales

II. *Population*
7. Choix d'indicateurs de l'espérance de vie, de la maternité et de la mortalité ..... 23
8. Population urbaine, population rurale, taux d'accroissement et population de l'agglomération urbaine la plus peuplée ..... 32
** Population selon le sexe, taux d'accroissement de la population, superficie et densité

III. *La situation des femmes*
9. Proportion de sièges occupés par des femmes au parlement national ..... 43
10. Proportion de femmes salariées dans le secteur non agricole ..... 49
11. Rapport filles/garçons dans l'enseignement primaire, secondaire et supérieur ..... 54

IV. *Éducation*
12. Dépenses publiques afférentes à l'éducation ..... 67
13. Personnel enseignant au niveau primaire, secondaire et supérieur ..... 72
** Enseignement primaire, secondaire et supérieur

V. *Nutrition et santé*
14. Disponibilités alimentaires ..... 91
15. Population n'atteignant pas le niveau minimal d'apport calorique ..... 96
16. Population vivant avec le VIH ..... 99

VI. *Culture et communication*
17. Téléphones ..... 103
18. Utilisation de l'internet ..... 116
** Exploitation cinématographique
** Abonnés au téléphone mobile

Troisième partie: Activité économique

VII. *Comptabilités nationales et production industrielle*
19. Produit intérieur brut et produit intérieur brut par habitant ..... 125
20. Déflateurs implicites des prix de produit intérieur brut ..... 143
21. Dépenses imputées au produit intérieur brut ..... 160
22. Valeur ajoutée brute par type d'activité économique ..... 173
23. Indices de la production industrielle ..... 185

VIII. *Statistiques financières*
24. Taux d'escompte des banques centrales ..... 195
25. Taux d'intérêt à court terme ..... 198

IX. *Main-d'œuvre*
26. Chômage ..... 205
** Emploi par activité économique

X. *Prix*
27. Indices des prix à la production ..... 223
** Indices des prix à la consommation
** Salaires dans les industries manufacturières

XI. *Agriculture, forêts et pêche*
28. Production agricole ..... 233
29. Cultures oléagineuses ..... 239
30. Céréales ..... 244
31. Bois rond ..... 249
32. Production halieutique ..... 253
33. Engrais ..... 260
34. Cheptel ..... 271

XII. *Industries manufacturières*
35. Sucre ..... 295
36. Bière ..... 305
37. Cigarettes ..... 310
38. Papiers et carton ..... 314
39. Aluminium non travaillé ..... 317
40. Récepteurs de radio ..... 319
41. Télévision ..... 321
42. Machines à laver et à sécher le linge, de type ménager ..... 323
43. Machines-outils ..... 325
** Camions
** Viande

XIII. *Energie*
44. Production, commerce et consommation d'énergie commerciale ..... 328
45. Production de l'énergie ..... 360

XIV. *Environnement*
46. Terres ..... 379
47. Estimations des émissions de $CO_2$ ..... 389
48. Chlorofluorocarbones (CFC) qui appauvrissent la couche d'ozone ..... 395
49. Accès à l'eau et à l'assainissement ..... 400
** Espèces menacées

XV. *Science et technologie*
50. Personnel employé dans la recherche et le développement (R – D) ..... 417
51. Dépenses intérieures brutes de recherche et développement ..... 427
** Brevets

Quatrième partie: Relations économiques internationales

XVI. *Commerce international des marchandises*
52. Importations et exportations totales par régions et pays ou zones ..... 437
53. Importations et exportations totales par pays ou région ..... 454
54. Exportations des produits manufacturés ..... 460

XVII. *Tourisme international et transport*
55. Arrivées de touristes/visiteurs par régions de provenance ..... 465
56. Arrivées de touristes/visiteurs et dépenses touristiques ..... 493
57. Tourisme à l'étranger ..... 506
** Aviation civile

XVIII. *Finances internationales*
58. Stocks et flux de la dette extérieure, à long terme ..... 521
59. Stocks de la dette extérieur garantie par l'Etat (à long terme) ..... 523
** Le taux de change

XIX. *Aide au développement*
60. Versements d'aide publique au développement et d'aide publique bilatérales et multilatérales aux bénéficiaires ..... 527
61. Aide publique au développement nette de pays du CAD aux pays en développement et aux organisations multilatérales ..... 541
62. Assistance en matière de développement socioéconomique fournie par le système des Nations Unies ..... 542

Annexes
I. Nomenclature des pays et des zones, groupements régionaux et autres groupements ..... 555
II. Notes techniques ..... 578
III. Coefficients et facteurs de conversion ..... 596
IV. Tableaux ajoutés et supprimés ..... 599

** Ce symbole indique les tableaux publiés dans les éditions précédentes de l'*Annuaire statistique* mais qui n'ont pas été repris dans la présente édition. Ces tableaux seront actualisés dans les futures livraisons de l'*Annuaire* à mesure que des données nouvelles deviendront disponibles.

# Introduction

The 2012 United Nations *Statistical Yearbook* is the fifty-seventh issue of this publication, prepared by the Statistics Division, Department of Economic and Social Affairs, of the United Nations Secretariat. The tables include series covering an appropriate historical period, depending upon data availability (as of 30 September 2014) and space constraints, for as many countries, territories and statistical areas of the world as available. The tables generally cover the period up to 2011 or 2012.

**Objective and content of the Statistical Yearbook**

The main purpose of the *Statistical Yearbook* is to provide in a single volume a comprehensive compilation of internationally available statistics on social and economic conditions and activities, at world, regional and national levels, for an appropriate historical period.

Most of the statistics presented in the *Yearbook* are extracted from more detailed, specialized databases prepared by the Statistics Division and by many other international statistical services. Thus, while the specialized databases concentrate on monitoring topics and trends in particular social and economic fields, the *Statistical Yearbook* tables aim to provide data for a more comprehensive, overall description of social and economic structures, conditions, changes and activities. The objective has been to collect, systematize, coordinate and present in a consistent way the most essential components of comparable statistical information which can give a broad picture of social and economic processes.

The content of the *Statistical Yearbook* is planned to serve a general readership. The *Yearbook* endeavours to provide information for various bodies of the United Nations system as well as for other international organizations, governments and non-governmental organizations, national statistical, economic and social policy bodies, scientific and educational institutions, libraries and the public. Data published in the *Statistical Yearbook* may also be of interest to companies and enterprises and to agencies engaged in market research. The *Statistical Yearbook* thus provides information on a wide range of social and economic issues which are of concern in the United Nations system and among the governments and peoples of the world. A particular value of the *Yearbook* is that it facilitates meaningful analysis of issues by systematizing and coordinating the data across many fields and shedding light on such interrelated issues as:

- General economic growth and related economic conditions;
- Progress towards the Millennium Development Goals;
- Population by sex and rate of increase, surface area and density;
- Unemployment, inflation and prices;
- Energy production and consumption and the development of new energy sources;
- Expansion of trade;
- The financial situation of countries;
- Education, training and eradication of illiteracy;
- Improvement in general living conditions;
- Pollution and protection of the environment;
- Assistance provided to developing countries for social and economic development purposes.

**Organization of the Yearbook**

The 62 tables of the *Yearbook* are grouped into four broad parts:

- Part One: World and Region Summary (chapter I, tables 1-6);
- Part Two: Population and Social Statistics (chapters II-VI: tables 7-18);
- Part Three: Economic Activity (chapters VII-XV: tables 19-51);
- Part Four: International Economic Relations (chapters XVI-XIX: tables 52-62).

The more aggregated information shown in part one provides an overall picture of development at the world and region levels. More specific and detailed information for analysis concerning individual countries or areas is presented in the other three parts.

Part One, World and Region Summary, comprises 6 tables highlighting the principal trends in the world as well as in each of the regions and in the major economic and social sectors. It contains global totals of important aggregate statistics

needed for the analysis of economic growth, the structure of the world economy, major changes in world population and expansion of external merchandise trade. The global totals are, as a rule, subdivided into major geographical areas.

Part Two, Population and Social Statistics, comprises 12 tables which contain more detailed statistical series on population, gender, education, nutrition and communication.

Part Three, Economic Activity, 16 tables provide data on national accounts, interest rates, labour force, prices, energy, environment and science and technology; 17 tables provide data on production in the major branches of the economy (using, in general, the International Standard Industrial Classification, ISIC), namely agriculture, hunting, forestry and fishing, and manufacturing. Consumption data are combined with the production data in tables on specific commodities, where feasible.

Part Four, International Economic Relations, comprises 11 tables on international merchandise trade, international tourism and transport, international finance and development assistance.

**Annexes and regional groupings of countries or areas**

The annexes to the *Statistical Yearbook*, and the section "Explanatory notes" preceding the Introduction, provide additional essential information on the *Yearbook*'s contents and presentation of data.

Annex I provides information on countries or areas covered in the *Yearbook* tables and on their arrangement in geographical regions and economic or other groupings. The geographical groupings shown in the *Yearbook* are generally based on continental regions unless otherwise indicated. However, strict consistency in this regard is impossible. A wide range of classifications is used for different purposes in the various international agencies and other sources of statistics for the *Yearbook*. These classifications vary in response to administrative and analytical requirements.

Annex II provide brief descriptions of major statistical concepts, definitions and classifications required for interpretation and analysis of the data.

Annex III provides detailed information on conversion coefficients and factors used in various tables, and Annex IV provides a list of tables added and omitted in the present edition of the *Yearbook*. Tables for which a sufficient amount of new data is not available are not being published in this *Yearbook*. Their titles nevertheless are still listed in the table of contents since it is planned that they will be published in a later issue as new data are compiled by the collecting agency.

**Data comparability, quality and relevance**

The major challenge continuously facing the *Statistical Yearbook* is to present series which are as nearly comparable across countries as the available statistics permit. Considerable efforts have already been made among the international suppliers of data and by the staff of the *Statistical Yearbook* to ensure the compatibility of various series by coordinating time periods, base years, prices chosen for valuation, and so on. This is indispensable in relating various bodies of data to each other and in facilitating analysis across different sectors. Thus, for example, relating data on short-term interest rates to those on prices makes it possible to arrive at a general understanding about the inflation environment, and relating a country's data on tourism expenditure in other countries to those on its per capita GDP provides a gauge on that country's wealth status. In general, the data presented reflect the methodological recommendations of the United Nations Statistical Commission issued in various United Nations publications, and of other international bodies concerned with statistics. The use of international recommendations not only promotes international comparability of the data but also ensures a degree of compatibility regarding the underlying concepts, definitions and classifications relating to different series. However, much work remains to be done in this area and, for this reason, some tables can serve only as a first source of data, which require further adjustment before being used for more in-depth analytical studies. While on the whole, a significant degree of comparability has been achieved in international statistics, there will remain some limitations, for a variety of reasons.

One common cause of non-comparability of economic data is different valuations of statistical aggregates such as national income, wages and salaries, output of industries and so forth. Conversion of these and similar series originally expressed in national prices into a common currency, for example into United States dollars, through the use of exchange rates, is not always satisfactory owing to frequent wide fluctuations in market rates and differences between official rates and rates which would be indicated by unofficial markets or purchasing power parities. The use of different kinds of sources for obtaining data is another cause of incomparability. This is true, for example, in the case of employment and unemployment, where data are obtained from different sources, namely household and labour force sample surveys, establishment censuses or surveys, official estimates, social insurance statistics and employment office statistics, which

are not fully comparable in many cases. Non-comparability of data may also result from differences in the institutional patterns of countries. Certain variations in social and economic organization and institutions may have an impact on the comparability of the data even if the underlying concepts and definitions are identical. These and other causes of non-comparability of the data are briefly explained in the technical note associated with each table (see Annex II).

A further set of challenges relate to timeliness, quality and relevance of the data contained in the *Yearbook*. Users generally demand the most up-to-date statistics. However, due to the different development stages of statistical capacity in different countries, data for the most recent years may only be available for a small number of countries. For a global print publication, therefore, a balance has to be struck between presenting the most updated information and satisfactory country coverage. Of course the United Nations Statistics Division's website offers greater flexibility in presenting continuously updated information and is therefore a useful complement to the annual print publication. Furthermore, as most of the information presented in this *Yearbook* is collected through specialized United Nations agencies and partners, the timeliness is continuously enhanced by improving the communication and data flow between countries and the specialized agencies on the one hand, and between the United Nations Statistics Division and the specialized agencies on the other. The development of new XML-based data transfer protocols will address this issue and is expected to make international data flows more efficient in the future.

Data quality at the international level is a function of the data quality at the national level. The United Nations Statistics Division in close cooperation with its partners among the UN agencies and the international statistical system continues to support countries' efforts to improve both the coverage and the quality of their data. Metadata, as for example reflected in the footnotes and technical notes of this publication, are an important service to the user to allow an informed assessment of the quality of the data. Given the wide variety of sources for the *Yearbook*, there is of course an equally wide variety of data formats and accompanying metadata. An important challenge for the United Nations Statistics Division and its partners for the future is to work further towards the standardization, or at least harmonization, of metadata.

The final challenge relates to maintaining the relevance of the series included in the *Yearbook*. As new policy concerns enter the developmental debate, the United Nations Statistics Division will need to introduce new series that describe concerns that have gained prominence as well as to prune data as they become outdated and continue to update the recurrent *Yearbook* series that still address those issues which are most pertinent. Often choosing the appropriate moment when the statistical information on new topics has matured sufficiently so as to be able to disseminate meaningful global data can be challenging. Furthermore, a balance has to continuously be found between the ever-increasing amount of information available for dissemination and the space limitations of the print version of the *Statistical Yearbook*. International comparability, data availability and data quality will remain the key criteria to guide the United Nations Statistics Division in its selection.

Needless to say, more can always be done to improve the *Statistical Yearbook*'s scope, coverage, design, metadata and timeliness. The *Yearbook* team continually strives to improve upon each of these aspects and to make its publication as responsive as possible to its users' needs and expectations, while at the same time focusing on a manageable body of data and metadata. Since data disseminated in digital form have clear advantages over those in print, as much of the *Yearbook* information as possible will continue to be included in the Statistics Division's online databases. Still, the *Statistical Yearbook* will continue to claim its rightful place among the products of the Statistics Division as a useful resource for a general understanding of the global social and economic situation.

# Introduction

*L'Annuaire statistique* des Nations Unies 2012 est la cinquante-cinquième édition de cette publication, établi par la Division de statistique du Département des affaires économiques et sociales du Secrétariat de l'Organisation des Nations Unies. Les tableaux présentent des séries qui couvrent une période historique appropriée, en fonction de la disponibilité des données (à la date du 30 septembre 2014) et des contraintes d'espace, pour autant de pays, territoires et zones statistiques du monde comme disponibles. Les tableaux couvrent généralement pour la période jusqu'à 2011 ou 2012.

**Objectif et contenu de l'Annuaire statistique**

Le principal objectif de *l'Annuaire statistique* est de fournir en un seul volume un inventaire complet de statistiques internationales concernant la situation et les activités sociales et économiques aux niveaux mondial, régional et national, sur une période s'étalant, dans la mesure du possible, sur dix ans.

La plupart des données qui figurent dans l'*Annuaire statistique* proviennent de bases de données spécialisées davantage détaillées, préparées par la Division de statistique et par bien d'autres services statistiques internationaux. Tandis que les bases de données spécialisées se concentrent sur le suivi de domaines socioéconomiques particuliers, les données de l'*Annuaire* sont présentées de telle sorte qu'elles fournissent une description globale et exhaustive des structures, conditions, transformations et activités socioéconomiques. On a cherché à recueillir, systématiser, coordonner et présenter de manière cohérente les principales informations statistiques comparables, de manière à dresser un tableau général des processus socioéconomiques.

Le contenu de l'*Annuaire statistique* a été élaboré en vue d'un lectorat large. Les renseignements fournis devraient ainsi pouvoir être utilisés par les divers organismes du système des Nations Unies, mais aussi par d'autres organisations internationales, les gouvernements et les organisations non gouvernementales, les organismes nationaux de statistique et de politique économique et sociale, les institutions scientifiques et les établissements d'enseignement, les bibliothèques et les particuliers. Les données publiées dans l'*Annuaire* peuvent également intéresser les sociétés et entreprises, et les organismes spécialisés dans les études de marché. L'*Annuaire* présente des informations sur un large éventail de questions socioéconomiques liées aux préoccupations actuelles du système des Nations Unies, des gouvernements et des peuples du monde entier. Une qualité particulière de l'*Annuaire* est de faciliter une analyse approfondie de ces questions en systématisant et en articulant les données d'un domaine/secteur à l'autre, et en apportant un éclairage sur des sujets interdépendants, tels que :

- La croissance économique générale, et les conditions économiques qui lui sont liées;
- Les progrès accomplis dans la réalisation des Objectifs du Millénaire pour le Développement;
- La population selon le sexe, taux d'accroissement, superficie et densité;
- Le chômage, l'inflation et les prix;
- La production et la consommation d'énergie et le développement de nouvelles sources d'énergie;
- L'expansion des échanges;
- La situation financière des pays;
- L'éducation, la formation et l'élimination de l'analphabétisme;
- L'amélioration des conditions de vie;
- La pollution et la protection de l'environnement;
- L'assistance aux pays en développement à des fins socioéconomiques.

**Présentation de l'Annuaire**

Les 62 tableaux de l'*Annuaire* sont groupés en quatre parties:

- La première partie : Aperçu mondial et régional (chapitre I, tableaux 1 à 6);
- La deuxième partie : Statistiques démographiques et sociales (chapitres II à VI, tableaux 7 à 18);
- La troisième partie : Activité économique (chapitres VII à XV, tableaux 19 à 51);
- La quatrième partie : Relations économiques internationales (chapitres XVI à XIX, tableaux 52 à 62).

Les valeurs les plus agrégées qui figurent dans la première partie donnent un tableau global du développement à l'échelon mondial et régional, tandis que les trois autres parties contiennent des renseignements plus précis et détaillés qui se prêtent mieux à une analyse par pays ou par zones. Chacune de ces trois parties est divisée en chapitres portant sur des sujets donnés.

La première partie, intitulée “Aperçu mondial et régional”, comprend six tableaux présentant les principales tendances dans le monde et dans les régions ainsi que dans les principaux secteurs économiques et sociaux. Elle fournit des chiffres mondiaux pour les principaux agrégats statistiques nécessaires pour analyser la croissance économique, la structure de l’économie mondiale, les principaux changements dans la population mondiale et l’expansion du commerce extérieur de marchandises. En règle générale, les chiffres mondiaux sont répartis par grandes régions géographiques.

La deuxième partie, intitulée “Population et statistiques sociales”, comporte 12 tableaux où figurent des séries plus détaillées concernant la population, la situation des femmes, l'éducation et la communication.

La troisième partie, intitulée “Activité économique”, comporte 33 tableaux, 16 qui présentent des statistiques concernant les comptes nationaux, les taux d’intérêt, la population active, les prix, l’énergie, l’environnement, et la science et technologie; et 17 qui présentent des données sur la production des principales branches d’activité économique (en utilisant en général la Classification internationale type, par industrie, de toutes les branches d’activité économique): agriculture, chasse, sylviculture et pêche, et industries manufacturières. Les tableaux traitant de certains produits de base associent autant que possible les données relatives à la consommation aux valeurs concernant la production.

La quatrième partie, intitulée “Relations économiques internationales”, comprend 11 tableaux relatifs au commerce international de marchandises, au tourisme et transport internationaux, aux finances internationales, et à l’aide au développement.

**Annexes et groupements régionaux des pays et zones**

Les annexes à l’*Annuaire statistique*, et la section intitulée “Notes explicatives” qui précède l'introduction, offrent d’importantes informations complémentaires quant à la teneur et à la présentation des données figurant dans le présent ouvrage.

L’annexe I donne des renseignements sur les pays ou zones couverts par les tableaux de l’*Annuaire* et sur leur regroupement en régions géographiques et groupements économiques ou autres. Sauf indication contraire, les groupements géographiques figurant dans l’*Annuaire* sont généralement fondés sur les régions continentales, mais une présentation absolument systématique est impossible à cet égard car les diverses institutions internationales et autres sources de statistiques employées pour la confection de l’*Annuaire* emploient, selon l’objet de l’exercice, des classifications fort différentes en réponse à diverses exigences d’ordre administratif ou analytique.

L’annexe II contient les notes techniques de chaque chapitre apportent une brève description des principales notions, définitions et classifications statistiques nécessaires pour interpréter et analyser les données.

L’annexe II fournit des renseignements sur les coefficients et facteurs de conversion employés dans les différents tableaux, et l’annexe III contient la liste de tableaux qui ont été ajoutés ou omis dans la présente édition de l’*Annuaire*. Les tableaux pour lesquels on ne dispose pas d’une quantité suffisante des données nouvelles, n’ont pas été publiés dans cet *Annuaire*. Comme ils seront repris dans une prochaine édition à mesure que des données nouvelles seront dépouillées par l’office statistique d’origine, ses titres figurent toujours dans la table des matières.

**Comparabilité, qualité et pertinence des statistiques**

Le défi majeur auquel l’*Annuaire Statistique* fait continuellement face est de présenter des séries aussi comparables entre les pays que la disponibilité des statistiques le permettent. Les sources internationales de données et les auteurs de l’*Annuaire* ont réalisé des efforts considérables pour faire en sorte que diverses séries soient compatibles, en harmonisant les périodes de référence, les années de base, les prix utilisés pour les évaluations, etc. Cette démarche est indispensable si l’on veut rapprocher divers ensembles de données, et faciliter l’analyse intersectorielle de l’économie. Ainsi, lier les données concernant les taux d’intérêt à court terme à celles des prix permet d’arriver à une compréhension globale de l’environnement de l’inflation; lier les données de dépenses touristiques d’un pays dans d’autres pays à celles de son PIB par tête fournit un indicateur de la richesse de ce pays. De façon générale, les données sont présentées selon les recommandations méthodologiques formulées par la Commission de statistique des Nations Unies, et par les autres entités internationales impliquées dans les statistiques. Le respect des recommandations internationales tend non seulement à promouvoir la comparabilité internationale des données, mais elle assure également une certaine comparabilité entre les concepts, les définitions et classifications utilisés. Mais comme il reste encore beaucoup à faire dans ce domaine, les données présentées dans certains tableaux n’ont qu’une valeur indicative, et nécessiteront des ajustements plus poussés avant de pouvoir servir à des analyses approfondies. Bien que l’on soit parvenu, dans l’ensemble, à un degré de

comparabilité appréciable en matière de statistiques internationales, diverses raisons expliquent que subsistent encore de nombreuses limitations.

Une cause commune de non comparabilité des données économiques réside dans la diversité des méthodes d'évaluation employées pour comptabiliser des agrégats tels que le revenu national, les salaires et traitements, la production des différentes branches d'activité industrielle, etc. Il n'est pas toujours satisfaisant de ramener la valeur des séries de ce type—exprimée à l'origine en prix nationaux—à une monnaie commune (par exemple le dollar des États-Unis) car les taux de change du marché connaissent fréquemment de fortes fluctuations, et parce que les taux officiels ne coïncident pas avec ceux des marchés officieux ni avec les parités réelles de pouvoir d'achat. Le recours à des sources diverses pour la collecte des données est un autre facteur qui limite la comparabilité. C'est le cas, par exemple, des données d'emploi et de chômage, obtenues par des moyens aussi peu comparables que les sondages, le dépouillement des registres d'assurances sociales et les enquêtes auprès des entreprises. Dans certains cas, les données ne sont pas comparables en raison de différences entre les structures institutionnelles des pays. Des changements dans l'organisation et les institutions économiques et sociales peuvent affecter la comparabilité des données, même si les concepts et définitions sont fondamentalement identiques. Ces causes, et d'autres, de non comparabilité des données sont brièvement expliquées dans les notes techniques associée à chaque tableau (voir annexe II).

Un autre ensemble de défis à relever concerne la fraîcheur, la qualité et la pertinence des données présentées dans l'*Annuaire*. Les utilisateurs exigent généralement des données les plus récentes possibles. Toutefois, selon le niveau de développement de la capacité statistique des pays, les données pour les dernières années peuvent n'être disponibles que pour un nombre limité de pays. Dans le cadre d'une publication mondiale, un équilibre doit être trouvé entre la présentation de l'information la plus récente et une couverture géographique satisfaisante. Bien entendu, le site Internet de la Division de statistique des Nations Unies offre une plus grande flexibilité, puisqu'il propose une information actualisée au fil de l'eau, et constitue ainsi un complément utile à la publication papier annuelle. Par ailleurs, étant donné que la plupart des informations présentées dans cet *Annuaire* sont collectées parmi les agences spécialisées des Nations Unies et autres partenaires, la fraîcheur des données est continuellement améliorée, grâce à une meilleure communication et un meilleur échange de données entre les pays et les agences spécialisées d'une part, et entre la Division de statistique des Nations Unies et les agences spécialisées d'autre part. Le développement de nouveaux protocoles de transfert de données basés sur le langage XML devrait contribuer à rendre, à l'avenir, les échanges de données internationales encore plus efficaces.

La qualité des données au niveau international est fonction de la qualité des données au niveau national. La Division de statistique des Nations Unies, en étroite collaboration avec ses partenaires dans les agences de l'ONU et dans le système statistique international, continue de soutenir les efforts des pays pour améliorer à la fois la couverture et la qualité de leurs données. Des métadonnées, comme l'illustrent les notes de bas de page et les notes techniques de cette publication, constituent un important service fourni à l'utilisateur pour lui permettre d'évaluer de manière avisée la qualité des données. Etant donné la grande variété des sources de l'*Annuaire*, il y a bien entendu une non moins grande variété de formats de données et de métadonnées associées. Un important défi que la Division de statistique des Nations Unies et ses partenaires doivent relever dans le futur est d'aboutir à la standardisation, ou au moins l'harmonisation, des métadonnées.

Le dernier défi concerne la constance de la pertinence des séries présentées dans l'*Annuaire*. Au fur et à mesure que de nouvelles préoccupations politiques pénètrent le débat lié au développement, la Division de statistique des Nations Unies doit introduire dans l'*Annuaire* de nouvelles séries qui leur sont liées, et, ce faisant, effectuer une coupe sombre parmi les données qui lui semblent dépassées, tout en s'assurant de continuer à actualiser les séries récurrentes de qui paraissent encore pertinentes. Souvent, choisir le moment idoine auquel les données statistiques sur de nouveaux thèmes sont suffisamment matures pour qu'elles puissent, au niveau mondial, être diffusées sans hésitation, est un défi en soi. Par ailleurs, un équilibre doit continuellement être trouvé entre le volume toujours croissant d'informations disponibles à la diffusion, et les contraintes d'espace de la version papier de l'*Annuaire* statistique. La comparabilité internationale, la disponibilité des données et leur qualité devront rester le principal critère à considérer par la Division de statistique des Nations Unies dans sa sélection.

Inutile de dire qu'il est toujours possible d'améliorer l'*Annuaire* statistique en ce qui concerne son champ, sa couverture, sa conception générale, ses métadonnées et sa mise à jour. L'équipe en charge de l'*Annuaire* s'évertue en permanence à améliorer chacun de ces aspects, et de faire en sorte que cette publication réponde au plus près aux besoins et aux attentes de ses utilisateurs, sans toutefois oublier de mettre l'accent sur un corpus gérable de données et de métadonnées. Puisqu'il est avéré que les données diffusées de manière digitale ont des avantages comparés à celles diffusées sur papier, autant

d'informations de l'*Annuaire* que possible continueront d'être inclues dans les bases de données électroniques de la Division de statistique. L'*Annuaire* statistique garde toujours une place de choix parmi les produits de la Division de statistique comme une ressource utile pour une compréhension général de la situation sociale et économique globale.

# Part One

## World and region summary

Chapter I World and region summary (tables 1-6)

This part of the *Statistical Yearbook* presents selected aggregate series on principal economic and social topics for the world as a whole and for the major regions. The topics include population and surface area, agricultural and industrial production, external trade, government financial reserves, and energy production and consumption. More detailed data on individual countries and areas are provided in the subsequent parts of the present *Yearbook*. These comprise Part Two: Population and Social Statistics; Part Three: Economic Activity; and Part Four: International Economic Relations.

Regional totals between series may be incomparable owing to differences in definitions of regions and lack of data for particular regional components. General information on regional groupings is provided in annex I of the *Yearbook*. Supplementary information on regional groupings used in specific series is provided, as necessary, in table footnotes and in the technical notes in annex II.

# Première partie

## Aperçu mondial et régional

Chapitre I Aperçu mondial et régional (tableaux 1 à 6)

Cette partie de l'Annuaire statistique présente, pour le monde entier et ses principales subdivisions, un choix d'agrégats ayant trait à des questions économiques et sociales essentielles: population et superficie, production agricole et industrielle, commerce extérieur, réserves financières publiques, et la production et la consommation d'énergie. Des statistiques plus détaillées pour divers pays ou zones figurent dans les parties ultérieures de l'Annuaire, c'est-à-dire dans les deuxième, troisième et quatrième parties intitulées respectivement: population et statistiques sociales, activités économiques et relations économiques internationales.

Les totaux régionaux peuvent être incomparables entre les séries en raison de différences dans la définition des régions et de l'absence de données sur tel ou tel élément régional. A l'annexe I de l'Annuaire, on trouvera des renseignements généraux sur les groupements régionaux. Des informations complémentaires sur les groupements régionaux pour certaines séries bien précises sont fournies, lorsqu'il y a lieu, dans les notes figurant au bas des tableaux et dans les notes techniques à l'annexe II.

Source:
United Nations Statistics Division, New York, *Demographic Yearbook 2012*.

1 Population per square kilometre of surface area. Figures are merely the quotients of population divided by surface area and are not to be considered either as reflecting density in the urban sense or as indicating the supporting power of a territory's land and resources.

Source:
Organisation des Nations Unies, Division de statistique, New York, *Annuaire démographique 2012*.

1 Nombre d'habitants au kilomètre carré. Il s'agit simplement du quotient du chiffre de la population divisé par celui de la superficie, il ne faut pas y voir d'indication de la densité au sens urbain du terme ni de l'effectif de population que les terres et les ressources du territoire sont capables de nourrir.

# 3 Index numbers of total agricultural and food production

Source:
United Nations Statistics Division, New York, Trade Statistics Branch, last accessed October 2014.

1 Volume indices are derived from value data and unit value indices. They are base-period weighted.

2 Regional aggregates are current-period weighted.

3 This classification is intended for statistical convenience and does not, necessarily, express a judgement about the stage reached by a particular country in the development process.

4 Unit value index of exports divided by unit value index of imports.

5 Index does not include data for the major oil producing countries.

Source:
Organisation des Nations Unies, Division de statistique, New York, la base de données pour les statistiques du commerce extérieur, dernier accès octobre 2014.

1 Les indices du volume sont calculés à partir des chiffres de la valeur et des indices de valeur unitaire. Ils sont à coefficients de pondération correspondant à la période en base.

2 Les totaux régionaux sont à coefficients de pondération correspondant à la période en cours.

3 Cette classification est utilisée pour plus de commodité dans la présentation des statistiques et n'implique pas nécessairement un jugement quant au stage de développement auquel est parvenu un pays donné.

4 Indice de la valeur unitaire des exportations divisé par l'indice de la valeur unitaire des importations.

5 L'index n'inclut pas de données des pays producteurs de pétrole importants.

# Part Two

## Population and social statistics

Chapter II Population (tables 7 and 8)

Chapter III Gender (tables 9 to 11)

Chapter IV Education (tables 12 and 13)

Chapter V Nutrition and health (tables 14 to 16)

Chapter VI Culture and Communication (tables 17 and 18)

Part Two of the *Yearbook* presents statistical series on a wide range of population and social topics for all countries or areas of the world for which data have been made available.

# Deuxième partie

## Population et statistiques sociales

Chapitre II Population (tableaux 7 et 8)

Chapitre III La situation des femmes (tableaux 9 à 11)

Chapitre IV Éducation (tableaux 12 et 13)

Chapitre V Nutrition et santé (tableaux 14 et 16)

Chapitre VI Culture et Communication (tableaux 17 à 18)

La deuxième partie de l'*Annuaire* présente, pour tous les pays ou zones du monde pour lesquels des données sont disponibles.

&
Data in the range 2005 – 2010 is for the year 2005.
Data in the range 2010 – 2015 is for the year 2010.

&&
The figures are estimated by the international agency, when corresponding country data on a specific year or set of years are not available, or when multiple sources exist, or there are issues of data quality. Estimates are based on national data, such as surveys or administrative records, or other sources but on the same variable being estimated.

d'autres sources, mais sur le même être variable estimée.

1 Including Christmas Island, Cocos (Keeling) Islands and Norfolk Island.
2 Including Nagorno-Karabakh.
3 Refers to Guernsey and Jersey.
4 For statistical purposes, the data for China do not include those for the Hong Kong Special Administrative Region (Hong Kong SAR), Macao Special Administrative Region (Macao SAR) and Taiwan Province of China.
5 Including Northern-Cyprus.
6 Including Aland Islands.
7 Including Abkhazia and South Ossetia
8 Including Saint-Barthélemy and Saint-Martin (French part).
9 Including Sabah and Sarawak.
10 Including Agalega, Rodrigues and Saint Brandon.
11 Including Svalbard and Jan Mayen Islands.
12 Including East Jerusalem.
13 Including Transnistria.
14 Including Kosovo.
15 Including Canary Islands, Ceuta and Melilla.
16 Including Zanzibar.

1 Y compris les îles Christmas, Cocos (Keeling) et Norfolk.
2 Y compris le Haut-Karabakh.
3 Se rapporte à Guernsey and Jersey.
4 Pour la présentation des statistiques, les données pour la Chine ne comprennent pas la Région Administrative Spéciale de Hong Kong (Hong Kong RAS), la Région Administrative Spéciale de Macao (Macao RAS) et la province de Taiwan.
5 Y compris la partie nord de Chypre.
6 Y compris les Îles d'Åland.
7 Y compris l'Abkhazie et l'Ossétie du Sud.
8 Y compris Saint Barthélémy et Saint Martin.
9 Y compris Sabah et Sarawak.
10 Y compris Agalega, Rodrigues et Saint Brandon.
11 Y compris îles Svalbard et Jan Mayen.
12 Y compris Jérusalem-Est.
13 Y compris la Transnistrie.
14 Y compris Kosovo.
15 Y compris les Iles Canaries, Ceuta et Melilla.
16 Y compris Zanzibar.

# 8 Population in urban and rural areas, rates of growth and largest urban agglomeration population *(continued)*

## Population urbaine, population rurale, taux d'accroissement et population de l'agglomération urbaine la plus peuplée *(suite)*

Source:
United Nations Population Division, New York, *World Urbanization Prospects: The 2011 Revision*.

1 Annual rates of growth calculated for the periods 2010-2015 and 2015-2020.
2 Including Agalega, Rodrigues and Saint Brandon.
3 Including Ascension and Tristan da Cunha.
4 Including Zanzibar.
5 Including Saint-Barthélemy and Saint-Martin (French part).
6 Data refer to Bonaire, Curaçao, Saba, St. Eustatius and Saint Maarten.
7 Including Nagorno-Karabakh.
8 For statistical purposes, the data for China do not include those for the Hong Kong Special Administrative Region (Hong Kong SAR) and Macao Special Administrative Region (Macao SAR).
9 Including Northern-Cyprus.
10 Including Abkhazia and South Ossetia
11 Including Sabah and Sarawak.
12 Including East Jerusalem.
13 Refers to Guernsey and Jersey.
14 Including Aland Islands.
15 Data refer to the Vatican City State.
16 Including Svalbard and Jan Mayen Islands.
17 Including Transnistria.
18 Including Kosovo.
19 Including Canary Islands, Ceuta and Melilla.
20 Including Christmas Island, Cocos (Keeling) Islands and Norfolk Island.

Source:
Organisation des Nations Unies, Division de statistique, New York, "*World Urbanization Prospects: The 2011 Revision*."

1 Les taux d'accroissement annuel ont été calculés pour les périodes de 2010 à 2015 et de 2015 à 2020.
2 Y compris Agalega, Rodrigues et Saint Brandon.
3 Y compris Ascension et Tristan da Cunha.
4 Y compris Zanzibar.
5 Y compris Saint Barthélémy et Saint Martin.
6 Les données se rapportent à Bonaire, Curaçao, Saba, Saint-Eustache et la partie néerlandaise de Saint-Martin.
7 Y compris le Haut-Karabakh.
8 Pour la présentation des statistiques, les données pour la Chine ne comprennent pas la Région Administrative Spéciale de Hong Kong (Hong Kong RAS) et la Région Administrative Spéciale de Macao (Macao RAS).
9 Y compris la partie nord de Chypre.
10 Y compris l'Abkhazie et l'Ossétie du Sud.
11 Y compris Sabah et Sarawak.
12 Y compris Jérusalem-Est.
13 Se rapporte à Guernsey and Jersey.
14 Y compris les Îles d'Åland.
15 Les données se réfèrent à la Cité du Vatican.
16 Y compris îles Svalbard et Jan Mayen.
17 Y compris la Transnistrie.
18 Y compris Kosovo.
19 Y compris les Iles Canaries, Ceuta et Melilla.
20 Y compris les îles Christmas, Cocos (Keeling) et Norfolk.

Source:
Union interparlementaire, Genève, *Les femmes dans les parlements*, dernier accès janvier 2014.

1 This figure excludes the 45 reserved seats for women which were not yet filled in January 2009.

2 The 2008 Constitution provides that the National Congress shall be replaced by a 124-member National Assembly. Elections to that body are due to take place on 26 April 2009. During the transitional period, a Legislative and Oversight Commission, comprising the members of the Constituent Assembly, assumes the legislative and oversight functions. The date refers to the date when the Commission held its first session.

3 Figures correspond to the results of elections to the Lower House completed in January 2012. Elections to the Upper House will be completed in early 2012.

4 Parliament has been dissolved or suspended for an indefinite period.

5 The parliament was dissolved following the December 2008 coup.

6 Situation for 1 January 2008 for directly elected members endorsed by the electoral commission. The additional twelve appointed seats and two ex-officio seats had yet to be filled.

7 No woman candidate was elected in the 2006 elections. One woman was appointed to the 16-member cabinet. As cabinet ministers also sit in parliament, there is therefore one woman out of a total of 65 members.

8 No woman candidate was elected in the 2008 elections. Two women were appointed to the 16-member cabinet sworn in June

1 Ce chiffre exclut les 45 sièges réservés aux femmes toujours vacants en janvier 2009.

2 Conformément à la Constitution de 2008, le Congrès national est remplacé par une Assemblée nationale dotée de 124 sièges. Les élections à cette instance doivent avoir lieu le 26 avril 2009. Durant la période de transition, la Commission législative et de contrôle, composée des membres de l'Assemblée constituante, exerce les fonctions législatives et de contrôle. La date renvoie à la date à laquelle la Commission a tenu sa première séance.

3 Les chiffres correspondent aux résultats des élections à la Chambre basse, conclues en janvier 2012. Les élections à la Chambre haute s'achèveront dans les premiers mois de 2012.

4 Le Parlement a été dissous ou suspendu pour une durée indéterminée.

5 L'Assemblée nationale a été dissoute après le coup d'État de décembre 2008.

6 Au 1er janvier 2008, la situation des membres directement élus et approuvés par la commission électorale est la suivante: les sièges des 12 membres nommés et 2 des membres de droits restent vacants.

7 Aucune femme n'a été élue en 2006. Une femme a été nommée parmi les 16 membres du gouvernement. Les ministres siégeant également au Parlement, le Parlement compte donc une femme sur un total de 65 membres.

8 Aucune femme n'a été élue en 2008. Deux femmes ont été nommées parmi les 16 membres du gouvernement qui ont prêté serment en juin

2008. As cabinet ministers also sit in parliament, there are two women out of a total of 65 members.

9 Figure excludes 11 members yet to be sworn in.

10 After the promulgation of the interim constitution in January 2007, the House of Representatives dissolved itself in favour of a 330-member interim legislature, called the Legislative Parliament. This interim legislature comprises all members of the previous parliament and other appointed members. It was replaced by an elected unicameral Constituent Assembly in April 2008.

11 No woman was elected in the 2006 elections. However one woman was appointed Speaker of the House and therefore became a member of the House.

12 Based on a peace agreement signed in Djibouti in November 2008, the statutory number of the Transitional Federal Parliament (TFP) increased from 275 to 550 members. On 28 January 2009, 200 of the 275 new TFP members were sworn in, bringing the total number of members to 475. However, the final composition, including the number of women members, is not yet available.

13 The figures on the distribution of seats do not include the 36 special rotating delegates appointed on an ad hoc basis, and all percentages given are therefore calculated on the basis of the 54 permanent seats.

14 No women were elected in 2008, however one woman was appointed to the Cabinet. As cabinet ministers also sit in parliament, there is one woman out of a total of 32 members.

15 The total refers to all voting members of the House.

2008. Les ministres siégeant également au Parlement, le Parlement compte donc deux femmes sur un total de 65 membres.

9 Ce chiffre ne tient pas compte de 11 membres qui n'avaient pas encore été assermentés.

10 Après la promulgation de la constitution provisoire en janvier 2007, la Chambre des représentants a prononcé sa dissolution au profit d'une législature provisoire de 330 membres, baptisée Parlement législatif. Cet organe provisoire se compose de tous les membres du parlement précédent, ainsi que de membres nommés. Il a été remplacé en avril 2008 par une Assemblée constituante monocamérale.

11 Aucune femme n'a été élue en 2006. Une femme a cependant été nommée à la présidence de la chambre des députés et est donc devenue membre de cette dernière.

12 Suite à un accord de paix signé à Djibouti en novembre 2008, le nombre réglementaire de membres du Parlement transitoire fédéral (PTF) a été porté de 275 à 550. Le 28 janvier 2009, 200 des 275 nouveaux membres du PTF ont prêté serment, ce qui ramène le nombre total de membres à 475. Cependant, la composition finale ainsi que le nombre de femmes y siégeant n'est pas encore disponible.

13 Les chiffres sur la répartition des sièges ne comprennent pas les 36 représentants spéciaux nommés à des postes ad hoc pourvus par roulement, et tous les pourcentages indiqués ont donc été calculés sur la base des 54 sièges permanents.

14 Aucune femme n'a été élue en 2008. Cependant, une femme a été nommée au Gouvernement. Les ministres siégeant également au Parlement, le Parlement compte donc une femme sur un total de 32 membres.

15 le total correspond aux membres de la Chambre qui ont le droit de vote.

&
The figure is estimated by the international agency, when corresponding country data on a specific year or set of years are not available, or when multiple sources exist, or there are issues of data quality. Estimates are based on national data, such as surveys or administrative records, or other sources but on the same variable being estimated.

1 Data not statistically significant.
2 Data less than 5%.

Source:
Organisation des Nations Unies pour l'alimentation et lagriculture (FAO), Rome, la base de données FAOSTAT, dernier accès octobre 2014.

&
Lorsque les données d'un pays ne sont pas disponibles sur une ou plusieurs années, ou lorsque plusieurs sources existent, ou encore s'il y a des problèmes de qualité de données, le chiffre est estimé par un organisme international. Les estimations sont alors basées sur des données nationales, telles que les enquêtes ou dossiers administratifs, ou d'autres sources, mais sur la même variable estimée.

1 Données non significatives sur le plan statistique.
2 Les données représentent moins de 5%.

International Telecommunication Union (ITU), Geneva, the ITU database, last accessed October 2014.

& Fiscal year refers to the fiscal year used in each country or area. Countries or areas whose reference periods coincide with the calendar year ending 31 December are not footnoted. Those that have a fiscal year other than calendar year are denoted as follows:

1 Includes WLL subscriptions.
2 From this year, including copper lines, DSL lines, WiMax, CDMA and VSAT which are not included in previous years.
3 Excluding ISDN channels.
4 Includes public payphone, excludes VOIP.
5 Including ISDN channels.
6 VoIP lines included.
7 WLL lines included.
8 Includes managed VOIP.
9 Including PSTN, CDMA, and AMPS.
10 Only Bhutan Telecom provides fixed-telephone services.
11 Includes public payphones.
12 Includes WLL and GSM lines.
13 Retail lines.
14 Total access lines.
15 For statistical purposes, the data for China do not include those for the Hong Kong Special Administrative Region (Hong Kong SAR), Macao Special Administrative Region (Macao SAR) and Taiwan Province of China.
16 November.
17 Excludes ISDN channels, WLL subscribers and public payphones.
18 Excludes ISDN channels and WLL subscriptions.
19 Includes fixed wireless (CDMA).
20 Including PSTN + ISDN channels and VoIP subscriptions.
21 June.
22 Excluding Public Payphones and ISDN channels.
23 Telephone subscriber lines.
24 Including VoIP subscriptions.
25 The number of fixed-telephone lines (not subscriptions) were provided. Subscription data are higher since IP subscriptions are counted separately from PSTN subscriptions.
26 Many cancellations of subscribers that had not paid, following privatization (February 2007).
27 Excluding public call offices.
28 Decrease is caused by change in tariff policy of the biggest WLL operator.
29 Telephone channels including own consumption, excluding public payphones.
30 Telephone channels includes own consumption, excludes VoIP.

Union internationale des télécommunications (UIT), Genève, la base de données de l'UIT, dernier accès octobre 2014.

& Ex. budgét. fait référence à l'exercice budgétaire en vigueur dans chaque pays ou territoire. Les pays ou les territoires dont l'exercice budgétaire terminent le 31 décembre de l'année civile ne sont pas signalés. Dans le cas contraire, ils sont désignés de la manière suivante:

1 Y compris les abonnements au réseau d'accès hertzien (WLL).
2 À partir de cette année, et contrairement aux années précédentes, les lignes en cuivre, DSL, WiMax, AMRC et VSAT sont comptabilisées.
3 Non compris les canaux RNIS.
4 Y compris les téléphones publics payants , non compris la téléphonie par Internet (VOIP).
5 RNIS inclus.
6 Y compris la téléphonie par Internet (VoIP).
7 Y compris les lignes "WLL".
8 Y compris la voix sur réseau IP (VOIP) gérée.
9 Y compris RTCP, AMRC and STMP.
10 Bhutan Telecom est le seul opérateur de téléphonie fixe.
11 Y compris les téléphones publics payants.
12 Y compris les lignes GSM et de la WLL.
13 Lignes du commerce de détail.
14 Total des lignes d'accès.
15 Pour la présentation des statistiques, les données pour la Chine ne comprennent pas la Région Administrative Spéciale de Hong Kong (Hong Kong RAS), la Région Administrative Spéciale de Macao (Macao RAS) et la province de Taiwan.
16 Novembre.
17 Non compris les canaux RNIS, les abonnements au réseau d'accès hertzien (WLL) et les téléphones publics.
18 Non compris les canaux RNIS et les abonnements au réseau d'accès hertzien (WLL).
19 Y compris les téléphones fixes sans fil (accès multiple par code de répartition).
20 Y compris les canaux RTPC et RNIS et les abonnements VOIP.
21 Juin.
22 Téléphone publics et canaux RNIS exclus.
23 Lignes d'abonnés au téléphone.
24 Y compris les abonnements à la téléphonie par Internet (VoIP).
25 Le nombre de lignes téléphoniques fixes (pas les abonnements) ont été fournis. Les données d'abonnement sont plus élevées car les abonnements IP sont comptés séparément des abonnements RTPC.
26 Nombreuses résiliations d'abonnements non payés après la privatisation (février 2007).
27 Cabines publiques exclues.
28 Baisse causée par le changement dans la politique tarifaire de la plus grand opérateur de WLL.
29 Les voies téléphoniques comprennent leur propre consommation, non compris les téléphones publics payants.
30 Voies téléphoniques incluent la consommation personnelle, exclut VOIP.

31 Data excluding own (NRA) consumption.
32 Data refer to active subscriptions.
33 Excluding around 1% FWA lines.
34 Includes WLL and PSTN lines.
35 Including PSTN lines, ISDN paths, WLL subscription, public payphones and Local Loops.
36 Including PSTN lines, ISDN paths, FWA subscriptions, public payphones and VOIP subscriptions.
37 Total number of access paths.
38 Total of subscription telephone and ISDN. Excluding VOIP telephone.
39 Including digital lines. Without ISDN channels.
40 Data reported prior to 2009 included Direct Inward Dialling Numbers, which are not counted now.
41 Includes inactive subscribers.
42 April.
43 March.
44 February.
45 September.
46 Including telephone subscriptions over cable.
47 Includes fibre and satellite fixed telephone connections.
48 Revised data.
49 Includes POTS and ISDN.
50 January.
51 Fixed line connectivity dropped but efforts are underway to expand and improve it.
52 Sudatel terminate its fixed landline, WLL and GSM Services in South Sudan in Oct 2012.
53 Fixed wireless subscribers are not included.
54 Including ISDN subscriptions instead of ISDN channels.
55 Internal and test lines of incumbent included.
56 Does not include internal lines and WLR of incumbent.
57 Natural disasters impacted telecommunication network.
58 Increase in subscriptions due to the inclusion of double play and triple play subscriptions, which were not reported by operators in 2010.
59 Data refer to "Local Loops".
60 The December 2008 data includes only switched access lines. Because data for earlier years includes a largely unknown number of interconnected VoIP subscriptions, the data are not directly comparable over time.

31 Données excluant la consommation des Autorités nationales de régulation.
32 Les données concernent les abonnements actifs.
33 Approximativement 1% des lignes à accès sans fil fixe ne sont pas inclues.
34 Y compris les lignes de la WLL et les lignes raccordées au réseau téléphonique public commuté (RTPC).
35 Y compris les lignes du RTCP, du RNIS, les abonnements d'accès fixe sans fil, les cabines publiques et l'accès boucle locale dégroupée.
36 Y compris les lignes du RTCP, du RNIS, les abonnements d'accès fixe sans fil, les cabines publiques et les abonnements VoIP.
37 Nombre total de voies d'accès.
38 Nombre total d'abonnements au téléphone et RNIS. Non compris le téléphone VOIP.
39 Y compris les lignes numériques. Sans les canaux RNIS.
40 Les données antérieures à 2009 comprennent les numéros de sélection directe à l'arrivée (SDA), qui ne sont maintenant plus comptés.
41 Y compris les abonnés inactifs.
42 Avril.
43 Mars.
44 Février.
45 Septembre.
46 Comprend les abonnements téléphoniques par câble.
47 Y compris les téléphones fixes sur réseau par fibre et par satellite.
48 Données révisées.
49 Y compris POTS et RNIS.
50 Janvier.
51 Baisse de la connectabilité des lignes fixes mais des efforts sont en cours pour les améliorer et les accroître.
52 Sudatel a mis fin à ses services (lignes fixes, WLL et GSM) dans le Sud-Soudan en octobre 2012.
53 Les abonnés au non filaire fixe non-inclus
54 Y compris les abonnements RNIS au lieu des canaux RNIS.
55 Intérieur et de lignes de test du titulaire du poste inclus.
56 Les lignes internes et VGA (vente en gros de l'abonnement) du précédent ne sont pas inclus.
57 Les désastres naturels ont impacté les réseaux de télécommunication.
58 Augmentation due à l'inclusion de forfaits combinés (double et triple) qui n'étaient pas déclarés par les opérateurs en 2010.
59 Les données se réfèrent aux "Local Loops".
60 Les données de 2008 comprennent les lignes d'accès déviées car les données des années précédentes comprenaient un nombre d'abonnements de téléphonie par Internet (VoIP). Donc, à long terme, les données ne sont pas comparables.

Percentage of individuals per country

# 18 Utilisation de l'internet *(suite)*

Pourcentage de personnes par pays

Source:
International Telecommunication Union (ITU), Geneva, the ITU database, last accessed November 2014.

1 Population age 10+.
2 Population age 15+.
3 Population age 16-74.
4 Users in the last 3 months.
5 Population age 7+.
6 Population age 16+.
7 Population age 6+.
8 Population age 18+.
9 Residents of Canada excluding: Residents of the Yukon, Northwest Territories and Nunavut, Inmates of Institutions, Persons living on Indian Reserves, and Full time members of the Canadian Forces.
10 Population aged 5+.
11 For statistical purposes, the data for China do not include those for the Hong Kong Special Administrative Region (Hong Kong SAR), Macao Special Administrative Region (Macao SAR) and Taiwan Province of China.
12 Population age 3+.
13 Including users of the international network and also those having access only to the Cuban network.
14 Commercially not available. Local Intranet available in country.
15 Population age 12+.
16 Users in the last 12 months.
17 September.
18 Population age 20+.
19 Population age 14+.
20 Population age 15-74.
21 Excluding mobile internet users.
22 Population age 12-65.
23 Users in the last month.
24 Population age 6-74
25 December.
26 Persons aged 15 years and over.
27 Excluding population living in workers' camps.
28 Users in the last 6 months.
29 Population age less than 74.
30 Population age 15-72.
31 Population age 16-75.
32 Excluding game machine and digital TV.
33 Based on people in formal employment, schools and colleges connected to the internet as well as average number of Citizens that visit cyber cafes.

Union internationale des télécommunications (UIT), Genève, la base de données de l'UIT, dernier accès novembre 2014.

1 Population âgée de plus de 10 ans.
2 Population âgée de plus de 15 ans.
3 Population âgée de 16 à 74 ans.
4 Utilisateurs au cours des 3 derniers mois.
5 Population âgée de plus de 7 ans.
6 Population âgée de plus de 16 ans
7 Population âgée de plus de 6 ans.
8 Population âgée de plus de 18 ans.
9 Les résidents du Canada a l'exclusion: des résidents du Yukon, des Territoires du Nord-Ouest et du Nunavut, des pensionnaires des établissements, des personnes vivant sur les réserves indiennes et les personnes à plein-temps dans les Forces canadiennes.
10 Population âgée de plus de 5 ans.
11 Pour la présentation des statistiques, les données pour la Chine ne comprennent pas la Région Administrative Spéciale de Hong Kong (Hong Kong RAS), la Région Administrative Spéciale de Macao (Macao RAS) et la province de Taiwan.
12 Population âgée de plus de 3 ans.
13 Y compris les utilisateurs du réseau international et ceux qui n'ont accès qu'au réseau cubain.
14 Non disponible commercialement. L'Intranet local est disponible dans le pays.
15 Population âgée de plus de 12 ans.
16 Utilisateurs au cours des 12 derniers mois.
17 Septembre.
18 Population âgée de plus de 20 ans.
19 Population âgée de plus de 14 ans.
20 Population âgée de 15 à 74 ans.
21 Les utilisateurs d'Internet mobile non-inclus.
22 Population âgée 12 a 65 ans.
23 Utilisateurs au cours du mois passé.
24 Population âgée de 6 à 74 ans.
25 Décembre.
26 Personnes âgées de 15 ans et plus.
27 Non compris la population vivant dans les camps de travailleurs.
28 Utilisateurs au cours des 6 derniers mois.
29 Population âgée de moins de 74 ans.
30 Population âgée de 15 à 72 ans.
31 Population âgée de 15 à 75 ans.
32 À l'exclusion des machines de jeu et des télévisions numériques.
33 Basé sur personnes employées dans l'économie «officielle», les écoles et les universités connectées à l'Internet ainsi que le nombre moyen de citoyens qui visitent les cybercafés.

# Part Three

## Economic activity

Chapter VII National accounts and industrial production (tables 19-23)

Chapter VIII Financial statistics (tables 24 and 25)

Chapter IX Labour force (tables 26)

Chapter X Prices (tables 27)

Chapter XI Agriculture, forestry and fishing (tables 28-34)

Chapter XII Manufacturing (tables 35-43)

Chapter XIII Energy (tables 44 and 45)

Chapter XIV Environment (tables 46-49)

Chapter XV Science and technology (tables 50 and 51)

Part Three of the *Yearbook* presents statistical series on production and consumption for a wide range of economic activities, and other basic series on major economic topics, for all countries or areas of the world for which data are available.

# Troisième partie

## Activité économique

Chapitre VII Compatibilités nationales et production industrielle (tableaux 19 à 23)

Chapitre VIII Statistiques financières (tableaux 24 et 25)

Chapitre IX Main-d'œuvre (tableaux 26)

Chapitre X Prix (tableaux 27)

Chapitre XI Agriculture, forêts et pêche (tableaux 28 à 34)

Chapitre XII Industries manufacturières (tableaux 35 à 43)

Chapitre XIII Energie (tableaux 44 et 45)

Chapitre XIV Environnement (tableaux 46 à 49)

Chapitre XV Science et technologie (tableaux 50 et 51)

La troisième partie de l'*Annuaire* présente, pour une large gamme d'activités économiques, des séries statistiques sur la production et la consommation, et, pour tous les pays ou zones du monde pour lesquels des données sont disponibles, d'autres séries fondamentales ayant trait à des questions économiques importantes.

# 19 Gross domestic product and gross domestic product per capita

In millions of US dollars at current and constant 2005 prices; per capita US dollars; real rates of growth

# Produit intérieur brut et produit intérieur brut par habitant

En millions de dollars É.-U. aux prix courants et constants de 2005; par habitant en dollars É.U. ; taux de croissance réels

1 For statistical purposes, the data for China do not include those for the Hong Kong Special Administrative Region (Hong Kong SAR), Macao Special Administrative Region (Macao SAR) and Taiwan Province of China.
2 Excludes northern Cyprus.
3 Includes Guadeloupe, Martinique, Réunion and French Guiana.
4 Including Western Sahara.
5 Excluding Kosovo and Metohija.
6 Tanzania mainland only.

1 Pour la présentation des statistiques, les données pour la Chine ne comprennent pas la Région Administrative Spéciale de Hong Kong (Hong Kong RAS), la Région Administrative Spéciale de Macao (Macao RAS) et la province de Taiwan.
2 Chypre du nord non compris.
3 Y compris Guadeloupe, Martinique, Réunion et Guyane française.
4 Y compris les données de Sahara occidental.
5 Non compris Kosovo et Metohija.
6 Tanzanie continentale seulement.

1 For statistical purposes, the data for China do not include those for the Hong Kong Special Administrative Region (Hong Kong SAR), Macao Special Administrative Region (Macao SAR) and Taiwan Province of China.
2 Excludes northern Cyprus.
3 Includes Guadeloupe, Martinique, Réunion and French Guiana.
4 Including Western Sahara.
5 Does not incorporate value added generated by binational hydroelectric plants.
6 Excluding data for Kosovo and Metohija.
7 Tanzania mainland only.

1 Pour la présentation des statistiques, les données pour la Chine ne comprennent pas la Région Administrative Spéciale de Hong Kong (Hong Kong RAS), la Région Administrative Spéciale de Macao (Macao RAS) et la province de Taiwan.
2 Chypre du nord non compris.
3 Y compris Guadeloupe, Martinique, Réunion et Guyane française.
4 Y compris les données de Sahara occidental.
5 Ne comprend pas la valeur ajoutée produite par les centrales hydroélectriques binationales.
6 N'inclut pas les données pour le Kosovo et Metohija.
7 Tanzanie continentale seulement.

1 Excludes irrigation canals and landscaping care.
2 Excludes publishing activities, includes irrigation canals
3 Excludes recycling and publishing activities.
4 Excludes repair of personal and household goods.
5 Excludes travel agencies, includes publishing activities, computer and related activities and radio/TV activities.
6 Excludes computer and related activities and radio/TV activities, includes travel agencies and landscaping care.

1 Exclut les canaux d'irrigation et l'aménagement paysager.
2 Ne comprend pas les activités d'édition, comprend les canaux d'irrigation.
3 Ne comprend pas les activités de recyclage et celles de l'édition.
4 Exclut la réparation de biens personnels et articles ménagers.
5 Exclut les agences de voyage, y compris les activités d'édition, les activités liées a l'informatique et les activités de radio et télévision.
6 Non compris l'informatique et les activités liées, la radio et télévision, comprend les agences de voyages et l'aménagement paysager.

7 At factor cost.
8 Includes hotels and restaurants.
9 Including mining and quarrying.
10 Excluding mining and quarrying.
11 Oil refining is included in Electricity, gas and water supply.
12 At producers' prices.
13 For statistical purposes, the data for China do not include those for the Hong Kong Special Administrative Region (Hong Kong SAR), Macao Special Administrative Region (Macao SAR) and Taiwan Province of China.
14 Excluding hunting and forestry.
15 Includes waste management.
16 Excluding repair of motor vehicles, motorcycles and personal and household goods.
17 Includes repair of motor vehicles, motorcycles and personal and household goods.
18 Excludes waste management.
19 Excludes northern Cyprus.
20 Restaurants and hotels are included in "Other activities".
21 Excludes Oil derivatives.
22 Includes Guadeloupe, Martinique, Réunion and French Guiana.
23 Restaurants and Hotels and repair of motor vehicles and household goods are included in "Other Activities".
24 Basic petroleum manufacturing is included in mining and quarrying.
25 Including Western Sahara.
26 Refers to Wholesale and retail trade only. Restaurants and Hotels are included in "Other activities".
27 Includes gas and water.
28 Excludes hotels and restaurants, since those items are included in item "Other activities".
29 Including mining and quarrying, electricity, gas and water.
30 Excluding Kosovo and Metohija.
31 Includes mining and handicrafts.
32 Including quarrying.
33 Refers to buildings and public works.
34 Refers to trade only.
35 Excluding fishing.
36 Includes fishing, fishery; activity of hotel and restaurants; provision of communal and individual services; cultural and sporting activity.
37 Tanzania mainland only.

7 Au coût des facteurs.
8 Y compris les hôtels et restaurants.
9 Y compris les industries extractives.
10 Non compris les industries extractives.
11 Le raffinage du pétrole est inclus dans Production et distribution d'électricité, de gaz et d'eau.
12 Aux prix à la production.
13 Pour la présentation des statistiques, les données pour la Chine ne comprennent pas la Région Administrative Spéciale de Hong Kong (Hong Kong RAS), la Région Administrative Spéciale de Macao (Macao RAS) et la province de Taiwan.
14 Non compris la chasse et la sylviculture.
15 Y compris la gestion des déchets.
16 Non compris les réparations de véhicules à moteur, de motocycles et d'articles personnels et ménagers.
17 Y compris les réparations de véhicules à moteur, de motocycles et d'articles personnels et ménagers.
18 Gestion des déchets non-compris.
19 Chypre du nord non compris.
20 Restaurants et hôtels sont inclus dans "autres activités".
21 Exclut les dérivés du pétrole.
22 Y compris Guadeloupe, Martinique, Réunion et Guyane française.
23 Les restaurants, les hôtels et les réparations d'articles personnels et ménagers sont inclus dans "autres activités".
24 Les industries extractives y compris la fabrication de produits pétroliers de base.
25 Y compris les données de Sahara occidental.
26 Se réfère au commerce de gros et de détail seulement. Restaurants et hôtels sont inclus dans Autres activités.
27 Y compris le gaz et l'eau.
28 Non compris les hôtels et restaurants, car ils sont compris dans "Autres activités".
29 Y compris les industries extractives, l'électricité, le gaz et l'eau.
30 Non compris Kosovo et Metohija.
31 Y compris l'extraction et l'artisanat.
32 Y compris les carrières.
33 Se rapportent aux bâtiments et aux travaux publics.
34 Se rapporte seulement au commerce
35 Non compris la pêche.
36 Y compris la pêche, l'industrie de la pêche, les activités des hôtels et des restaurants, la mise à disposition de services collectifs ou individuels, les affaires culturelles et sportives.
37 Tanzanie continentale seulement.

United Nations Statistics Division, New York, Environment and energy statistics branch, Industrial and Energy Statistics Section, last accessed February 2014.

1 The indices are based on ISIC Rev. 3.
2 Country data supplemented with data from the Observatoire Economique et Statistique d'Afrique Subsaharienne (Afristat).
3 Twelve months ending 30 June of the year stated.
4 Including construction.
5 For government controlled areas.
6 Twelve months beginning 1 April of the year stated.
7 Twelve months beginning 1 July of the year stated.
8 Excludes the Overseas Departments (French Guiana, Guadeloupe, Martinique, Mayotte and Réunion).
9 Twelve months ending 31 March of the year stated.
10 Excludes repair and installation of machinery and equipment.

Organisation internationale du Travail, Genève, Indicateurs clés du marché du travail (ICMT 8e édition), dernier accès février 2015.

& Sauf indication contraire, Age 15 ans et plus.

1 Personnes âgées de 15 à 64 ans.
2 28 agglomérations urbaines.

3 Population age 10+.
4 31 urban agglomerations.
5 Excluding conscripts.
6 Population age 16+.
7 Population age 15 to 75.
8 Age 14+.
9 Population age 12+.
10 Persons aged 15 to 74 years.
11 Residents of Canada excluding: Residents of the Yukon, Northwest Territories and Nunavut, Inmates of Institutions, Persons living on Indian Reserves, and Full time members of the Canadian Forces.
12 Urban areas.
13 Excluding marine and institutional populations.
14 Excluding the institutional population.
15 Resident population (de jure)
16 Data for males refers to ages 17-59 and data for females to ages 17-54.
17 Excluding the provinces of Gracias a Dios and Islas de la Bahía.
18 Persons aged 16 to 74 years.
19 Excluding Leh and Kargil of Jammu and Kashmir districts, some villages in Nagaland, Andaman and Nicobar Islands
20 Excluding Chathams, Antarctic Territory and other minor offshore islands.
21 Excluding the departments of Boquerón and Alto Paraguay.
22 Excluding regular military living in barracks.
23 Excluding workers temporarily laid off.
24 Excluding contributing family workers working less than 18 hours per week.
25 Excluding Transnistria and the municipality of Bender.
26 Persons aged 15 to 72 years.
27 Permanent resident only.
28 Excluding the Northern and Eastern provinces.
29 Excluding the Northern province.
30 Excluding the unemployed not previously employed.
31 Persons aged 14 to 64 years.
32 Persons aged 15 to 70 years.
33 Excluding labour camps.
34 Tanzania mainland excluding Zanzibar.
35 Excluding Puerto Rico, Guam, the US Virgin Islands and American Samoa.
36 Persons aged 15 to 65 years.

3 Population âgée de plus de 10 ans.
4 31 agglomérations urbaines.
5 Non compris les conscrits.
6 Population âgée de plus de 16 ans
7 Population âgée de 15 à 75 ans.
8 Population âgée de plus de 14 ans.
9 Population âgée de plus de 12 ans.
10 Personnes âgées de 15 à 74 ans.
11 Les résidents du Canada a l'exclusion: des résidents du Yukon, des Territoires du Nord-Ouest et du Nunavut, des pensionnaires des établissements, des personnes vivant sur les réserves indiennes et les personnes à plein-temps dans les Forces canadiennes.
12 Régions urbaines.
13 A l'exclusion des populations marines et de la population institutionnelle.
14 Non compris la population dans les institutions.
15 Population résidente (de droit).
16 Les données se rapportent aux hommes âgés de 17 à 54 ans et aux femmes âgées de 17 à 59 ans.
17 Les départements de "Gracias a Dios" et de "islas de Bahia" ne sont pas inclus.
18 Personnes âgées de 16 à 74 ans.
19 Les districts de Leh et Kargil dans l'état de Jammu-et-Cachemire, quelques villages dans l'état de Nagaland ou dans les îles Andaman-et-Nicobar ne sont pas inclus.
20 Les îles Chatham, le territoire antarctique et d'autres îles mineures ne sont pas inclus.
21 Les départements de Boquerón et d'Alto Paraguay ne sont pas inclus.
22 Non compris les militaires de carrière vivant dans des casernes.
23 Non compris les employés mis à pied temporairement.
24 A l'exception des travailleurs familiaux collaborant à l'entreprise familiale travaillant moins de 18 heures par semaine.
25 Les données ne tiennent pas compte de l'information sur la Transnistrie et la municipalité de Bender.
26 Personnes âgées de 15 à 72 ans.
27 Résidents permanents seulement.
28 Non compris les provinces du nord et de l'est.
29 Non compris la province du nord.
30 Non compris les chômeurs n'ayant jamais travaillé.
31 Personnes âgées de 14 à 64 ans.
32 Personnes âgées de 15 à 70 ans.
33 Non compris les camps de travail.
34 Tanzanie continentale sans compter Zanzibar.
35 Non compris Porto Rico, Guam, les îles Vierges américaines et les Samoa américaines.
36 Personnes âgées de 15 à 65 ans.

1 Index base: 2008=100
2 Excluding fishing.
3 Calculated by the Statistics Division of the United Nations from component national indices.
4 Domestic agricultural products only.

1 Base de l'indice: 2008=100
2 Non compris la pêche.
3 Calculé par la Division de Statistiques de l'Organisation des Nations Unies à partir d'indices nationaux plus détaillés.
4 Produits agricoles intérieurs seulement.

| | | | |
|---|---|---|---|
| 5 | Including exported products. | 5 | Y compris les produits exportés. |
| 6 | Excluding forestry and fishing. | 6 | Non compris sylviculture et pêche. |
| 7 | Manufacturing industry only. | 7 | Industries manufacturières seulement. |
| 8 | Base: 2002=100. | 8 | Base: 2002=100. |
| 9 | Including service industries. | 9 | Y compris industries de service. |
| 10 | Data refer to goods sold both domestically and as exports. | 10 | Les données se réfèrent à des biens vendus au pays et aux exportations. |
| 11 | Annual figures: average of 12 months ending 30 June of the year stated. | 11 | Chiffres annuels : moyennes de douze mois finissant le 30 juin de l'année indiquée. |
| 12 | Base: 1 July 1988 - 30 June 1989 = 100. | 12 | Base : le 1 juillet 1988 au 30 juin 1989=100. |
| 13 | Base: 2010=100. | 13 | Base : 2010=100. |
| 14 | Non-durable goods only. | 14 | Les biens non-durables seulement. |
| 15 | Including durable consumer goods. | 15 | Y compris biens de consommation durables. |
| 16 | Annual figures: using data for base period as weights, and not a simple average of the monthly indices. | 16 | Chiffres annuelles : utilisant des données pour la période de base comme des poids, et pas une simple moyenne des indices mensuels. |
| 17 | Base: 2009=100. | 17 | Base : 2009=100. |
| 18 | The data refer to materials of construction. | 18 | Les données se rapportent aux matériaux de construction. |
| 19 | Excluding fuel. | 19 | Non compris le carburant. |
| 20 | For government controlled areas. | 20 | Pour les zones contrôlées par le gouvernement. |
| 21 | Excluding forestry. | 21 | Non compris sylviculture. |
| 22 | Agricultural products and products of manufacturing industry. | 22 | Produits agricoles et produits des industries manufacturières. |
| 23 | Data are in terms of Central Product Classification (CPC) version 1. | 23 | Les données sont basés sur la CPC version 1. |
| 24 | Base: 1 July 2004 - 30 June 2005 = 100. | 24 | Base : le 1 juillet 2004 au 30 juin 2005=100. |
| 25 | Includes the Overseas Departments (French Guiana, Guadeloupe, Martinique, Mayotte and Réunion). | 25 | Y compris les départements d'outre-mer (Guyane française, Guadeloupe, Martinique, Mayotte et Réunion). |
| 26 | Excludes the Overseas Departments (French Guiana, Guadeloupe, Martinique, Mayotte and Réunion). | 26 | Non compris les départements d'outre-mer (Guyane française, Guadeloupe, Martinique, Mayotte et Réunion). |
| 27 | Monthly data are seasonally weighted, while the annual average is derived from equally weighted monthly data. | 27 | Les données mensuelles sont des variations saisonnières de la pondération, alors que la moyenne annuelle est dérivée de la pondération égale des données mensuelles. |
| 28 | Including forestry and fishing. | 28 | Y compris l'exploitation forestière et la pêche. |
| 29 | Excluding imported products. | 29 | Non compris les produits importés. |
| 30 | Excluding agriculture, forestry, fishing, and water supply; sewerage, waste management and remediation activities. | 30 | Non compris l'agriculture, la sylviculture, la pêche, et la production et distribution d'eau ; assainissement, gestion des déchets et dépollution. |
| 31 | Primary articles include food, non-food articles and minerals. | 31 | Les articles primaires comprennent des articles des produits alimentaires, non- alimentaires et des minéraux. |
| 32 | Base: fiscal (solar) year 2004 (20 March 2004 - 20 March 2005)=100. Data refer to the periods of the solar year in Iran. | 32 | Base : année fiscale (solaire) 2005 (20 Mars 2004 - 20 Mars 2005) = 100. Les données se réfèrent aux périodes de l'année solaire en Iran. |
| 33 | Excluding Value Added Tax. | 33 | Non compris taxe sur la valeur ajoutée. |
| 34 | Including imported products. | 34 | Y compris les produits importés. |
| 35 | Excluding petroleum. | 35 | Non compris le pétrole. |
| 36 | Including hunting. | 36 | Y compris la chasse. |
| 37 | The index refers to private consumption. | 37 | L'indice se réfère à la consommation privée. |
| 38 | Refers to PPIs for agriculture outputs, which include some support services for agriculture. | 38 | Se réfère à des IPP pour les sorties de l'agriculture, qui comprennent certains services de soutien à l'agriculture. |
| 39 | Includes prices for exported goods and for service industries. | 39 | Y compris les prix pour les biens exportés et pour des industries de services. |
| 40 | Refers to the inputs index for all industries, which is also referred to as intermediate consumption. | 40 | Se réfère à l'indice des entrées pour toutes les industries, qui est aussi appelée la consommation intermédiaire. |
| 41 | Coverage is for 21 major cities. | 41 | La couverture est de 21 grande villes. |
| 42 | Refers to the "General Wholesale Price Index". | 42 | Se réfère à "l'indice général des prix de gros". |
| 43 | Index base: 2006=100. | 43 | Base de l'indice: 2006=100. |
| 44 | Data refer to sections C-E of ISIC Rev 3.1. | 44 | Les données se réfèrent à des sections C-E de la CITI Rev 3.1. |
| 45 | Refers to the "Singapore Manufactured Products Price Index". It monitors price movements of domestically manufactured goods which are sold either within Singapore or exported. | 45 | Se réfère à "l'indice des prix de produits manufacturés de Singapour". Il surveille les mouvements des prix des biens fabriqués localement qui sont vendus soit à Singapour ou exportés. |

46 Refers to the "Import Price Index", which includes data on re-exports. It monitors prices of imports which are either retained for domestic market or re-exported.

47 Prices of producers are surveyed without value added tax and without excise taxes.

48 Data are calculated using a "Laspeyres chain-linked" formula.

49 Index base: 2007=100

50 Data refer to domestic products used in the crop and animal production; hunting and related service activities.

51 Excluding foods and feeds production.

52 Excluding fishing, poultry and livestock.

46 Se réfère à "l'indice des prix à l'importation", qui comprend des données sur les réexportations. Il surveille les mouvements des prix des importations qui sont soit vendus pour le marché domestique ou réexporté.

47 Les enquêtes sur le prix à la production ne prennent pas en considération les taxes à la valeur ajoutée et excise.

48 Les données sont calculées en utilisant une formule de Laspeyres en chaîne liées.

49 Base de l'indice: 2007=100.

50 Les données se rapportent aux produits domestiques utilisés dans la culture et la production animale, chasse et services annexes.

51 Non compris les produits alimentaires et d'affouragement.

52 Non compris la pêche, la volaille et l'élevage.

Food and Agriculture Organization of the United Nations (FAO), Rome, FISHSTAT database, last accessed July 2014.

Source:
Organisation des Nations Unies pour l'alimentation et l'agriculture (FAO), Rome, les données des pêches de FISHSTAT, dernier accès juillet 2014.

1 For statistical purposes, the data for China do not include those for the Hong Kong Special Administrative Region (Hong Kong SAR), Macao Special Administrative Region (Macao SAR) and Taiwan Province of China.
2 Including Amsterdam Island, Saint-Paul Island, and French scattered Indian Ocean Islands in Western Indian Ocean and Kerguelen Islands and Crozet Archipelago in Antarctic Indian Ocean. Catches reported for Antarctic fishing areas are included with those of France.
3 Tanzania mainland only.

1 Pour la présentation des statistiques, les données pour la Chine ne comprennent pas la Région Administrative Spéciale de Hong Kong (Hong Kong RAS), la Région Administrative Spéciale de Macao (Macao RAS) et la province de Taiwan.
2 Y compris les iles des Terres australes et antarctiques françaises : l'île Amsterdam, l'île Saint-Paul, les Îles éparses, les îles Kerguelen et l'archipel Crozet. Les captures dans les zones antarctiques de pèche sont reportées parmi celles de France.
3 Tanzanie continentale seulement.

Source:
Food and Agriculture Organization of the United Nations (FAO), Rome, FAOSTAT data, last accessed September 2014.

1 Data obtained as a balance.
2 Apparent consumption has been set to zero due to utilization from stockpiles.
3 For statistical purposes, the data for China do not include those for the Hong Kong Special Administrative Region (Hong Kong SAR), Macao Special Administrative Region (Macao SAR) and Taiwan Province of China.

Source :
Organisation des Nations Unies pour l'alimentation et l'agriculture (FAO), Rome, données FAOSTAT, dernier accès septembre 2014.

1 Donnée obtenue par bilan.
2 La consommation apparente a été mise à zéro en raison de l'utilisation des réserves.
3 Pour la présentation des statistiques, les données pour la Chine ne comprennent pas la Région Administrative Spéciale de Hong Kong (Hong Kong RAS), la Région Administrative Spéciale de Macao (Macao RAS) et la province de Taiwan.

# 35 Sugar *(continued)*

Production and consumption: thousand metric tons; consumption per capita: kilograms

# Sucre *(suite)*

Production et consommation : milliers de tonnes ; consommation par habitant : kilogrammes

1 Beginning 2004, data for Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, Slovenia are incorporated in the European Union data. From 2007 including figures of Bulgaria and Romania.

2 For statistical purposes, the data for China do not include those for the Hong Kong Special Administrative Region (Hong Kong SAR), Macao Special Administrative Region (Macao SAR) and Taiwan Province of China.

3 Including non-human consumption: 2007-22 335 tons; 2008-107 684 tons; 2009-49 824 tons; 2010-78 058 tons; 2011-56 450 tons; 2012-60 929 tons.

4 Excluding production of sugar and sugar syrups used for fuel ethanol production: 2006-518 323 tons; 2007-1 541 064 tons; 2008-1 667 868 tons; 2009-1 763 511 tons; 2010-1 141 536 tons; 2011-1 347 021 tons; 2012-1 413 000 tons.

5 Excluding use of sugar and sugar syrups for fuel ethanol production: 2006-129 581 tons; 2007-774 012 tons; 2008-1 572 765 tons; 2009-1 691 778 tons; 2010-1 608 015 tons; 2011-1 192 908 tons; 2012-1 363 518 tons.

6 Including 15 515 tons sold to other Pacific Island nations in tons in 2006 and 13 398 tons in 2007.

7 Including sugar used for the production of mono-sodium glutamate and llysin: 2005 - 241 101 tons; 2006 - 232 665 tons; 2007 - 223 344 tons; 2008 - 226 401 tons; 2009 - 153 447 tons. As well as estimated non-food industrial consumption: 2005 - 105 000 tons; 2006 - 25 000 tons; 2007 - 85 000 tons; 2008 - 85 000 tons; 2009 - 100 000 tons; 2011-300 000 tons and 2012-300 000 tons.

8 Data for Sudan prior to the independence of South Sudan in 2011 include those for South Sudan.

9 Including 134 106 tons of non-human consumption.

1 À partir de 2004, les données pour Chypre, République tchèque, Estonie, Hongrie, Lettonie, Lituanie, Malta, Pologne, Slovaquie, Slovénie sont inclues dans les données de l'Union européenne. À partir de 2007, les données incluent également la Bulgarie et la Roumaine.

2 Pour la présentation des statistiques, les données pour la Chine ne comprennent pas la Région Administrative Spéciale de Hong Kong (Hong Kong RAS), la Région Administrative Spéciale de Macao (Macao RAS) et la province de Taiwan.

3 Y compris consommation non humaine: 2007-22 335 tonnes; 2008-107 684 tonnes; 2009-49 824 tonnes; 2010-78 058 tonnes; 2011-56 450 tonnes; 2012-60 929 tonnes.

4 Non compris la production de sirops de sucre et de sucre utilisées pour la production d'éthanol carburant: 2006-518 323 tonnes; 2007-1 541 064 tonnes; 2008-1 667 868 tonnes; 2009-1 763 511 tonnes; 2010-1 141 536 tonnes; 2011-1 347 021 tonnes; 2012-1 413 000 tonnes.

5 Non compris l'utilisation de sucre et de sirops de sucre pour la production d'éthanol-carburant: 2006-129 581 tonnes; 2007-774 012 tonnes; 2008-1 572 765 tonnes; 2009-1 691 778 tonnes; 2010-1 608 015 tonnes; 2011-1 192 908 tonnes; 2012-1 363 518 tonnes.

6 Y compris 15 515 tonnes vendues aux autres îles pacifiques en 2006 et 13 398 tonnes en 2007.

7 Y compris la sucre utilisée pour la production du glutamate monosodium et lysine: 2004 - 235 773 tonnes; 2005 - 241 101 tonnes; 2006 - 232 665 tonnes; 2007 - 223 344 tonnes; 2008 -226 401 tonnes; 2009 - 153 447 tonnes. Ainsi qu'une consommation industrielle non-alimentaire: 2004 - 105 000 tonnes; 2005 - 105 000 tonnes; 2006 - 25 000 tonnes; 2007 - 85 000 tonnes; 2008 - 85 000 tonnes; 2009 - 100 000 tonnes; 2011-300 000 tonnes et 2012-300 000 tonnes.

8 Avant l'indépendance du Soudan du Sud en 2011, les données du Soudan incluaient aussi celles du Soudan du Sud.

9 Y compris 134 106 tonnes de consommation non-humaine.

United Nations Statistics Division, New York, the energy statistics database, last accessed October 2013.
1 Negative value due to negligible primary electricity production as compared to net exports.
2 Refers to the Southern African Customs Union.
3 For statistical purposes, the data for China do not include those for the Hong Kong Special Administrative Region (Hong Kong SAR), Macao Special Administrative Region (Macao SAR) and Taiwan Province of China.
4 Including Monaco.
5 Including San Marino.
6 Including Svalbard and Jan Mayen Islands.
7 Including Liechtenstein.

Organisation des Nations Unies, Division de statistique, New York, la base de données pour les statistiques énergétiques, dernier accès octobre 2013.

1 La valeur négative est due à une production d'électricité primaire négligeable par rapport aux exportations nettes.

2 Se réfèrent à l'Union Douanière d'Afrique Australe.

3 Pour la présentation des statistiques, les données pour la Chine ne comprennent pas la Région Administrative Spéciale de Hong Kong (Hong Kong RAS), la Région Administrative Spéciale de Macao (Macao RAS) et la province de Taiwan.

4 Y compris Monaco.

5 Y compris Saint-Marin.

6 Y compris îles Svalbard et Jan Mayen.

7 Y compris Liechtenstein.

Source:
Food and Agriculture Organization of the United Nations (FAO), Rome, FAOSTAT data, last accessed December 2014.

[&] Calculated value by United Nations Statistics Division (UNSD).

1 May include official, semi-official or estimated data.
2 Data for Saint Helena include those for Ascension and Tristan da Cunha.
3 For statistical purposes, the data for China do not include those for the Hong Kong Special Administrative Region (Hong Kong SAR), Macao Special Administrative Region (Macao SAR) and Taiwan Province of China.
4 Total land area is greater than sum of arable land, permanent crops and forest cover.

Source :
Organisation des Nations Unies pour l'alimentation et l'agriculture (FAO), Rome, données FAOSTAT, dernier accès décembre 2014.

[&] Valeur calculée par la Division de statistique des Nations Unies (DSNU)

1 Les données peuvent être officielles, semi-officielles ou estimatives.
2 Les données concernant Sainte-Hélène comprennent celles relatives à Ascension et à Tristan da Cunha.
3 Pour la présentation des statistiques, les données pour la Chine ne comprennent pas la Région Administrative Spéciale de Hong Kong (Hong Kong RAS), la Région Administrative Spéciale de Macao (Macao RAS) et la province de Taiwan.
4 La superficie totale est supérieure à la somme des terres arables, cultures permanentes et la couverture forestière.

$CO_2$ emission estimates *(continued)*

From fossil fuel combustion, cement production and gas flared (thousand metric tons of carbon dioxide)

Estimation des émissions de $CO_2$ *(suite)*

Dues à la combustion de combustibles fossiles, à la production de ciment et au gaz brûlés à la torchère (milliers de tonnes de dioxyde de carbone)

[&] *These data are transformed from the original CDIAC data in metric tons of Carbon to metric tons of Carbon Dioxide by a factor of 3.667.*

[&] *Les données originales fournies par CDIAC en tonnes métriques de carbone sont converties en tonnes métriques de dioxyde de carbone en multipliant par un facteur de 3,667.*

# 47

## $CO_2$ emission estimates *(continued)*

From fossil fuel combustion, cement production and gas flared (thousand metric tons of carbon dioxide)

## Estimation des émissions de $CO_2$ *(suite)*

Dues à la combustion de combustibles fossiles, à la production de ciment et au gaz brûlés à la torchère (milliers de tonnes de dioxyde de carbone)

Source:
Carbon Dioxide Information Analysis Center (CDIAC) of the Oak Ridge National Laboratory, Oak Ridge, Tennessee, U.S.A., database on national $CO_2$ emission estimates, last accessed July 2014.

1 For statistical purposes, the data for China do not include those for the Hong Kong Special Administrative Region (Hong Kong SAR), Macao Special Administrative Region (Macao SAR) and Taiwan Province of China.
2 Including Monaco.
3 Including San Marino.

Source:
"Carbon Dioxide Information Analysis Center (CDIAC) of the Oak Ridge National Laboratory, Oak Ridge, Tennessee, U.S.A.", la base de données des estimations nationales des émissions de $CO_2$, dernier accès juillet 2014.

1 Pour la présentation des statistiques, les données pour la Chine ne comprennent pas la Région Administrative Spéciale de Hong Kong (Hong Kong RAS), la Région Administrative Spéciale de Macao (Macao RAS) et la province de Taiwan.
2 Y compris Monaco.
3 Y compris Saint-Marin.

United Nations Environment Programme (UNEP), Ozone Secretariat (Nairobi), data access centre, last accessed July 2014.

1 Negative numbers can occur when destruction and/or exports exceed production plus imports, implying that the destruction and/or exports are from stockpiles.

2 Data from China for the years up to 1996 includes Taiwan.

3 Data from China from 1997 includes Hong Kong and Taiwan.

4 The consumption figures for the European Community (EC) member states reflect the year of membership to the EC. Prior to 1995 there are 12 member states: Belgium, Denmark, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain, and the United Kingdom of Great Britain and Northern Ireland. Between 1995 and 2003, three additional member states joined: Austria,

1 Il peut y avoir des chiffres négatifs, lorsque les quantités exportées, ajoutées aux quantités détruites, sont supérieures aux quantités effectivement produites ajoutées aux quantités importées, ce qui est le cas par exemple lorsque les exportations proviennent des stocks reportés d'un exercice précédent.

2 Jusqu'en 1996, les données de la Chine incluent Taiwan.

3 A partir de 1997, les données pour la Chine incluent Hong Kong et Taiwan.

4 Les chiffres de la consommation pour la Communauté européenne (CE) Etats membres reflètent l'année de l'adhésion à la CE. Avant 1995, La CE se composait de 12 États membres: Belgique, Danemark, France, Allemagne, Grèce, Irlande, Italie, Luxembourg, Pays-Bas, Portugal, Espagne, le Royaume-Uni et l'Irlande du Nord. Entre 1995 et 2003, trois nouveaux États membres s'y sont joints :

Finland, and Sweden. Between 2004 and 2006 ten additional member states joined: Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, and Slovenia. Bulgaria and Romania joined the EC after 2007. The European Community (EC) has been replaced and succeeded by the European Union (EU) in 2009.

l'Autriche, la Finlande et la Suède. Entre 2004 et 2006, dix Etats membres ont joint : Chypre, la République tchèque, l'Estonie, la Hongrie, la Lettonie, la Lituanie, Malte, la Pologne, la Slovaquie et la Slovénie. La Bulgarie et la Roumanie ont rejoint la CE après 2007. La CE fut ensuite remplacée par l'Union européenne (UE) en 2009.

[&] *The figures are estimated by the international agency, when corresponding country data on a specific year or set of years are not available, or when multiple sources exist, or there are issues of data quality. Estimates are based on national data, such as surveys or administrative records, or other sources but on the same variable being estimated.*

[&] *Lorsque les données d'un pays sur une ou plusieurs années ne sont pas disponibles, ou lorsque plusieurs sources existent, ou s'il y a un problème de qualité des données, les chiffres sont estimés par l'organisme international. Ces estimations sont basées sur des données nationales comme les enquêtes, les registres administratifs, ou autres sources de la même variable estimée.*

# 49 Water supply and sanitation coverage *(continued)*
Accès à l'eau et à l'assainissement *(suite)*

Source:
World Health Organization (WHO) and United Nations Children's Fund (UNICEF), Geneva and New York, the WHO/UNICEF Joint Monitoring Programme for the Water and Sanitation database, last accessed July 2014.

1 The drinking water estimates for Bangladesh have been adjusted for arsenic contamination levels based on the national surveys conducted and approved by the Government of Bangladesh.

2 Data for Sudan prior to the independence of South Sudan in 2011 include those for South Sudan.

Source :
Organisation mondial de la santé (OMS) et Fonds des Nations Unies pour l'enfance (UNICEF), Genève et New York, la base de données de la Programme commun OMS/UNICEF de surveillance de l'eau et de l'assainissement, dernier accès juillet 2014.

1 Les estimations concernant l'eau potable pour le Bangladesh ont été ajustées afin de tenir compte des taux de pollution à l'arsenic constatés lors d'enquêtes nationales effectuées et approuvées par le Gouvernement bangladais.

2 Avant l'indépendance du Soudan du Sud en 2011, les données du Soudan incluaient aussi celles du Soudan du Sud.

# 50 Personnel in research and development (R & D)
Full-time equivalent (FTE)

## Personnel employé dans la recherche et le développement (R - D)
Equivalent temps plein (ETP)

Source:
United Nations Educational, Scientific and Cultural Organization (UNESCO) Institute for Statistics, Montreal, the UNESCO Institute of Statistics database, last accessed October 2014.

1 Estimate.
2 Head count instead of Full-time equivalent.
3 Overestimated or based on overestimated data.
4 Including other classes.
5 Data refer to the higher education sector only.
6 Excluding Higher Education.
7 Underestimated or based on underestimated data.
8 For statistical purposes, the data for China do not include those for the Hong Kong Special Administrative Region (Hong Kong SAR) and Macao Special Administrative Region (Macao SAR).
9 Do not correspond exactly to Frascati Manual recommendations.
10 Excluding business enterprise.
11 Including technicians and equivalent staff.
12 Government only.
13 Excluding defence forces.
14 Excluding private non-profit organizations.
15 Excluding social sciences and humanities.
16 Including other supporting staff.
17 Data refer to a different year.
18 Excluding government.
19 Excluding technical and equivalent staff.
20 Excluding data from some regions, provinces or states.
21 The sum of the breakdown does not add to the total.

Source:
L'Institut de statistique de l'Organisation des Nations Unies pour l'éducation, la science et la culture (UNESCO), Montréal, la base de données de l'Institut de statistique de l'UNESCO, dernier accès octobre 2014.

1 Estimation.
2 Personnes physiques au lieu d'Equivalents temps plein.
3 Surestimé ou fondé sur des données surestimées.
4 Comprend d'autres catégories.
5 Les données se réfèrent au secteur de l'enseignement supérieur seulement.
6 Non compris l'enseignement supérieur.
7 Sous-estimé ou basé sur des données sous-estimées.
8 Pour la présentation des statistiques, les données pour la Chine ne comprennent pas la Région Administrative Spéciale de Hong Kong (Hong Kong RAS) et la Région Administrative Spéciale de Macao (Macao RAS).
9 Ne corresponds pas exactement aux recommendations du Manuel de Frascati.
10 Ne comprend pas les entreprises commerciales.
11 Y compris les techniciens y le personnel assimilé.
12 Etat seulement.
13 A l'exclusion des forces de défense.
14 Non compris les organisations privées à but non lucratif.
15 Non compris les sciences sociales et les sciences humaines.
16 Y compris autre personnel de soutien.
17 Les données concernent une autre année.
18 Non compris l'état.
19 Non compris les techniciens et le personnel équivalent.
20 Non compris les données de certaines régions, provinces ou états.
21 La somme de toutes les valeurs diffère du total.

1 Including other classes.
2 Included elsewhere.
3 Overestimated or based on overestimated data.
4 Excluding most or all capital expenditure.
5 Data refer to the higher education sector only.
6 Underestimated or based on underestimated data.
7 The sum of the breakdown does not add to the total.
8 Including private non-profit funds.
9 Included in business enterprise.
10 S&T budget instead of R&D expenditure.
11 Government only.
12 Excluded Defence (all or mostly).
13 Including higher education.
14 Including Government.
15 Based on R&D budget instead of R&D expenditure.
16 Excluding business enterprise.
17 Excluding private non-profit organizations.
18 Excluding government.
19 Excluding Higher Education.
20 Included in government.
21 Excluding data from some regions, provinces or states.

1 Comprend d'autres catégories.
2 Inclus ailleurs.
3 Surestimé ou fondé sur des données surestimées.
4 A l'exclusion des dépenses d'équipement (en totalité ou en grande partie).
5 Les données se réfèrent au secteur de l'enseignement supérieur seulement.
6 Sous-estimé ou basé sur des données sous-estimées.
7 La somme de toutes les valeurs diffère du total.
8 Y compris les fonds privés à but non lucratif.
9 Compris dans les entreprises commerciales.
10 Budget pour la science et technologie au lieu des dépenses de recherche et développement.
11 Etat seulement.
12 A l'exclusion de la défense (en totalité ou en grande partie).
13 Y compris l'enseignement supérieur.
14 Y compris l'état.
15 Basé sur le budget de la recherche-développement au lieu des dépenses.
16 Ne comprend pas les entreprises commerciales.
17 Non compris les organisations privées à but non lucratif.
18 Non compris l'état.
19 Non compris l'enseignement supérieur.
20 Compris dans gouvernement.
21 Non compris les données de certaines régions, provinces ou états.

# Part Four

## International economic relations

Chapter XVI International merchandise trade (tables 52-54)

Chapter XVII International tourism and transport (tables 55-57)

Chapter XVIII International finance (58 and 59)

Chapter XIX Development assistance (tables 60-62)

Part Four of the *Yearbook* presents statistics on international economic relations in areas of international merchandise trade, international tourism and transport and assistance to developing countries. The series cover all countries or areas of the world for which data have been made available.

# Quatrième partie

## Relations économiques internationales

Chapitre XVI Commerce international des marchandises (tableaux 52 à 54)

Chapitre XVII Tourisme international et transport (tableaux 55 à 57)

Chapitre XVIII Finances internationales (tableaux 58 et 59)

Chapitre XIX Aide au développement (tableaux 60 à 62)

La quatrième partie de l'*Annuaire* présente des statistiques sur les relations économiques internationales dans les domaines du commerce international des marchandises, du tourisme international et transport et l'assistance aux pays en développement. Les séries couvrent tous les pays ou les zones du monde pour lesquels de données sont disponibles.

Source:
United Nations Statistics Division, New York, Trade Statistics Branch, last accessed October 2014.

[&] The regional totals for imports and exports have been adjusted to exclude the re-exports of countries or areas comprising each region.

[§] For member states of this grouping, see Annex I – Other groupings. The totals have been calculated for all periods shown according to the current composition.

[t] Systems of trade: Two systems of recording trade, the General trade system (G) and the Special trade system (S), are in common use. They differ mainly in the way warehoused and re-exported goods are recorded. See the Technical notes for an explanation of the trade systems.

1 This classification is intended for statistical convenience and does not, necessarily, express a judgement about the stage reached by a particular country in the development process.

Source:
Organisation des Nations Unies, Division de statistique, New York, la base de données pour les statistiques du commerce extérieur, dernier accès octobre 2014.

[&] Les totaux régionaux pour importations et exportations ont été ajustés pour exclure les réexportations des pays ou zones qui comprennent la région.

[§] Pour les Etats membres de ce groupements, voir annexe I – Autres groupements. Les totales ont été calculés pour toutes les périodes données suivant la composition présente.

[t] Systèmes de commerce : Deux systèmes d'enregistrement du commerce sont couramment utilisés, le Commerce général (G) et le Commerce spécial (S). Ils ne diffèrent que par la façon dont sont enregistrées les marchandises entreposées et les marchandises réexportées. Voir les Notes techniques pour une explication des Systèmes de commerce.

1 Cette classification est utilisée pour plus de commodité dans la présentation des statistiques et n'implique pas nécessairement un jugement quant au stage de développement auquel est parvenu un pays

2 Developed Economies of America, Europe, and the Asia-Pacific region.
3 Imports FOB.
4 Including the trade of the U.S. Virgin Islands and Puerto Rico but excluding shipments of merchandise between the United States and its other possessions (Guam, American Samoa, etc.). Data include imports and exports of non-monetary gold.
5 Imports exclude petroleum imported without stated value. Exports cover domestic exports.
6 Prior to 2008, special trade.
7 Exports include gold.
8 Including South Sudan.
9 Trade statistics exclude certain oil and chemical products.
10 Export and import values exclude trade in the processing zone.
11 The Netherlands Antilles was dissolved on October 10, 2010. Beginning 2011, data are reported separately for Curaçao, Sint Maarten (Dutch part), Bonaire, Saint Eustatius and Saba.
12 Trade data include maquiladoras and exclude goods from customs-bonded warehouses. Total exports include revaluation and exports of silver.
13 Exports include petroleum products.
14 For statistical purposes, the data for China do not include those for the Hong Kong Special Administrative Region (Hong Kong SAR), Macao Special Administrative Region (Macao SAR) and Taiwan Province of China.
15 Excluding military goods, fissionable materials, bunkers, ships, and aircraft.
16 Year ending 20 March of the years stated.
17 Data include oil and gas.The value of oil exports and total exports are rough estimates based on information published in various petroleum industry journals.
18 Imports and exports net of returned goods. The figures also exclude Judea and Samaria and the Gaza area.
19 Year ending 30 September.
20 The figures for the country groupings aim to always reflect the membership of the grouping of the latest year published.
21 Excluding intra-EU trade.

donné.
2 Économies développées de l'Amérique, de l'Europe, et de la région Asie-Pacifique.
3 Importations FOB.
4 Y compris le commerce des Iles Vierges américaines et de Porto Rico mais non compris les échanges de marchandises, entre les Etats-Unis et leurs autres possessions (Guam, Samoa américaines, etc.). Les données comprennent les importations et exportations d'or non-monétaire.
5 Non compris le pétrole brute dont la valeur des importations ne sont pas stipulée. Les exportations sont les exportations d'intérieur.
6 Avant 2008, commerce special.
7 Les exportations comprennent l'or.
8 Y compris le Sud Soudan.
9 Les statistiques commerciales font exclusion de certains produits pétroliers et chimiques.
10 Les valeurs à l'exportation et à l'importation excluent le commerce de la zone de transformation.
11 Les Antilles néerlandaises a été dissous le 10 Octobre 2010. Début 2011, les données sont présentées séparément pour Curaçao, Sint Maarten (partie néerlandaise), Bonaire, Saint-Eustache et Saba.
12 Les statistiques du commerce extérieur comprennent maquiladoras et ne comprennent pas les marchandises provenant des entrepôts en douane. Les exportations comprennent la réévaluation et les données sur les exportations d'argent.
13 Exportations comprennent produits pétroliers.
14 Pour la présentation des statistiques, les données pour la Chine ne comprennent pas la Région Administrative Spéciale de Hong Kong (Hong Kong RAS), la Région Administrative Spéciale de Macao (Macao RAS) et la province de Taiwan.
15 A l'exclusion des marchandises militaires, des matières fissibles, des soutes, des bateaux, et de l'avion.
16 Année finissant le 20 mars de l'année indiquée.
17 Les données comprennent le pétrole et le gaz. La valeur des exportations de pétrole et des exportations totales sont des évaluations grossières basées sur l'information publiée à divers journaux d'industrie de pétrole.
18 Importations et exportations nets, ne comprenant pas les marchandises retournées. Sont également exclues les données de la Judée et de Samara et ainsi que la zone de Gaza.
19 Année finissant le 30 septembre.
20 Les chiffres pour les groupes des pays visent à toujours refléter la composition du groupement de la dernière année de publication.
21 Non compris le commerce de l'intra-UE.

Source:
United Nations Statistics Division, New York, Trade Statistics Branch, last accessed January 2014.

1 Excluding trade of the countries of Eastern Europe and the former USSR.
2 Derived from price indices; national unit value index is discontinued.
3 Calculated by the United Nations Statistics Division.
4 Average price indexes of manufacturing industry products.
5 Industrial products.

Source:
Division de statistique des Nations Unies, New York, Service des statistiques du commerce, dernier accès janvier 2014.

1 Non compris le commerce des pays de l'Europe de l'Est et l'ex-URSS.
2 Calculés à partir des indices des prix; l'indice de la valeur unitaire nationale est discontinué.
3 Calculés par la Division de statistique des Nations Unies.
4 Les indices moyens de prix des produits de l'industrie manufacturière.
5 Produits industriels.

[+] For a listing of the Member States of the regions of origin, see Annex I, with the following exceptions:

Africa includes the countries and territories listed under Africa in Annex I but excludes Egypt and Libya

Americas is as shown in Annex I

Europe includes the countries and territories listed under Europe and Central Asia in Annex I, but also includes Armenia, Azerbaijan, Cyprus, Georgia, Israel, and Turkey.

East Asia and the Pacific include the countries and territories listed under Eastern Asia, South-eastern Asia, and Oceania in Annex I.

South Asia is as shown in Annex I under Southern Asia.

Middle east is as shown in Annex I under Western Asia, but excludes Armenia, Azerbaijan, Cyprus, Georgia, Israel, and Turkey, and includes Egypt and Libya.

[+] On se reportera à l'Annexe I pour les États Membres classés dans les différentes régions de provenance, sauf dans les cas suivants:

Afrique comprend les États et territoires énumérés dans l'Annexe I, mais exclut l'Égypte et la Libye.

Amériques comprend les États et territoires énumérés dans l'Annexe I.

L'Europe comprend les pays et territoires énumérés dans l'Europe et l'Asie centrale dans l'annexe I, mais comprend également l'Arménie, l'Azerbaïdjan, Chypre, la Géorgie, l'Israël, et la Turquie.

L'Asie de l'Est et le Pacifique comprennent les États et territoires énumérés dans l'Annexe I dans le groupe Asie orientale, Asie du Sud-est, et Océanie.

Asie du Sud comprend les États et territoires énumérés dans l'Annexe I dans le groupe Asie du Sud.

Le Moyen-Orient comprend les États et territoires énumérés dans l'Annexe I dans le groupe Asie occidentale et inclut l'Égypte et la Libye; cependant l'Arménie, l'Azerbaïdjan, Chypre, la Géorgie, l'Israël et la Turquie sont exclus.

[&] Series (by order of priority, see Annex II):

| | |
|---|---|
| TFR | Arrivals of non-resident tourists at national borders (excluding same-day visitors), by country of residence |

| TCEN | Arrivals of non-resident tourists in all types of accommodation establishments, by nationality |
| THSR | Arrivals of non-resident tourists in hotels and similar establishments, by country of residence |
| THSN | Arrivals of non-resident tourists in hotels and similar establishments, by nationality. |

Footnotes on the totals also apply to the other regions.

[&] Série (par ordre de priorité, voir Annexe II):

| | |
|---|---|
| TFR : | Arrivées de touristes non résidents aux frontières nationales (à l'exclusion de visiteurs de la journée), par pays de résidence. |
| TFN : | Arrivées de touristes non résidents aux frontières nationales (à l'exclusion de visiteurs de la journée), par nationalité. |
| VFR : | Arrivées de visiteurs non résidents aux frontières nationales (y compris touristes et visiteurs de la journée), par pays de résidence. |
| VFN : | Arrivées de visiteurs non résidents aux frontières nationales (y compris touristes et visiteurs de la journée), par nationalité. |
| TCER : | Arrivées de touristes non résidents dans tous les types d'établissements d'hébergement, par pays de résidence. |
| TCEN : | Arrivées de touristes non résidents dans tous les types d'établissements d'hébergement, par nationalité. |
| THSR : | Arrivées de touristes non résidents dans les hôtels et établissements assimilés, par pays de résidence. |
| THSN : | Arrivées de touristes non résidents dans les hôtels et établissements assimilés, par nationalité. |

Les notes sur les totaux s'appliquent aussi aux autres régions.

# 55 Tourist/visitor arrivals by region of origin *(continued)*

Number (thousands)

# Arrivées de touristes/visiteurs par région de provenance *(suite)*

Nombre (milliers)

1 Excluding nationals residing abroad.
2 Arrivals of nationals residing abroad are included in the total and are all accounted for in "region not specified" only.
3 Arrivals by air.
4 Excluding nationals residing abroad and crew members.
5 Only paid accommodation; excluding stays at friends and relatives and second homes.
6 Organized tourism.
7 Hotel establishments, campings, holiday centres, holiday villages and specific categories of accommodation. From 2012 including bed and breakfast.
8 Arrivals of nationals residing abroad are included in the total and are also accounted for in the individual regions.
9 Break in the series due to implementation of improved methodology for distinguishing visitors (tourists) from other travellers.
10 For statistical purposes, the data for China do not include those for the Hong Kong Special Administrative Region (Hong Kong SAR), Macao Special Administrative Region (Macao SAR) and Taiwan Province of China.
11 Data compiled by nationality.
12 Arrivals of non-resident tourists by immigration checkpoints.
13 Air and sea arrivals.
14 Excluding arrivals in ports of nautical tourism.
15 The arrivals data relate only to three border posts (N'Djili airport in Kinshasa, the Luano airport in Lubumbashi, and the land border-crossing of Kasumbalesa in Katanga province).
16 Including non-commercial tourism.
17 Arrivals to Bole airport only.
18 Charter tourists only.
19 Arrivals to Timehri airport only.
20 Excluding tourists' arrivals by sea.
21 Arrivals at Keflavik airport only.
22 Seasonal and border workers are excluded.
23 Tarawa and Christmas Island.
24 Non-resident departures. Survey of persons crossing the state border.
25 Excluding nationals residing abroad, Syrian nationals, Palestinians and students.
26 Departures.
27 Including Singapore residents crossing the frontier by road through the Johore Causeway.
28 Data based on departures by air and sea.
29 Including French overseas departments and territories.
30 Arrivals in the States of Kosrae, Chuuk, Pohnpei and Yap.
31 Change of methodology. Until 2007 the data correspond only to 12 border posts. From 2008, the data of all the border posts of the country are used.
32 Including tourist arrivals through border entry points to Yangon.
33 Including Niuans usually residing in New Zealand.
34 Air arrivals (Palau International Airport).
35 Total number of visitors broken down by permanent residence who arrived in Panama at Tocumen International Airport.
36 E/D cards in the "Silvio Petirossi" airport and passenger counts at the national border crossings - National Police and SENATUR.

1 A l'exclusion des nationaux résidant à l'étranger.
2 Les arrivées de nationaux résidant à l'étranger sont comprises dans le total, et sont toutes comptabilisées uniquement dans la catégorie Région non spécifiée.
3 Arrivées par voie aérienne.
4 A l'exclusion des nationaux du pays résidant à l'étranger et des membres des équipages.
5 Seulement logement payé; sont exclus les séjours chez des amis et membres de la famille et des résidences secondaires.
6 Tourisme organisé.
7 Établissements hôteliers, terrains de camping, centres de vacances, villages de vacances et catégories spécifiques d'hébergement. À partir de 2012 les chambres d'hôtes sont inclus.
8 Les arrivées de nationaux résidant à l'étranger sont comprises dans le total, et comptabilisées aussi dans chacune des régions.
9 Rupture de série due à la mise en œuvre d'une méthodologie améliorée qui distingue les visiteurs (touristes) des autres voyageurs.
10 Pour la présentation des statistiques, les données pour la Chine ne comprennent pas la Région Administrative Spéciale de Hong Kong (Hong Kong RAS), la Région Administrative Spéciale de Macao (Macao RAS) et la province de Taiwan.
11 Données compilées par nationalité.
12 Arrivées de touristes non-résidents par des contrôles d'immigration.
13 Arrivées par voie aérienne et maritime.
14 À l'exclusion des arrivées dans des ports à tourisme nautique.
15 Les données des entrées ne concernent que 3 postes frontaliers : l'aéroport de N'Djili à Kinshasa, l'aéroport de la Luano à Lubumbashi et le poste frontière terrestre situé à Kasumbalesa dans la province du Katanga.
16 Y compris le tourisme non commercial.
17 Arrivées à l'aéroport de Bole uniquement.
18 Arrivées en vols à la demande seulement.
19 Arrivées à l'aéroport de Timehri seulement.
20 Sont exclus les arrivées de touristes par voie maritime.
21 Arrivées à l'aéroport Keflavik seulement.
22 A l'exclusion des travailleurs saisonniers et frontaliers.
23 Tarawa et Ile Christmas.
24 Départs de non-résidents. Enquête menée auprès de personnes franchissant la frontière de l'État.
25 À l'exclusion des nationaux résidant à l'étranger, Syriens, Palestiniens et étudiants.
26 Départs.
27 Y compris les résidents de Singapour traversant la frontière par voie terrestre à travers le Johore Causeway.
28 Données tirées des départs par voies aérienne et maritime.
29 Y compris les départements et territoires français d'outremer.
30 Arrivées dans les États de Kosrae, Chuuk, Pohnpei et Yap.
31 Changement de méthodologie. Jusqu'en 2007, les données correspondent seulement à 12 postes frontaliers. A partir de 2008, les données de tous les postes frontaliers du pays sont utilisées.
32 Comprenant les arrivées de touristes aux postes-frontières de Yangon.
33 Y compris les nationaux de Niue résidant habituellement en Nouvelle-Zélande.
34 Arrivées par voie aérienne (Aéroport international de Palau).
35 Nombre total de visiteurs arrivés au Panama par l'aéroport international de Tocúmen.
36 Cartes d'embarquement et de débarquement à l'aéroport Silvio Petirossi et comptages des passagers lors du franchissement des frontières nationales – Police Nationale et SENATUR.

37 Since Poland joined the Schengen area, precise counting of incoming traffic is not possible. Data presented here are based on surveys by the Institute of Tourism. Only approximate results for main countries can be given.

38 Fiscal year July to June.
39 Arrivals at hotels only.
40 Including domestic tourism.
41 Europe and Americas.
42 Including crew members.
43 Visitors who have benefited from tourism services provided by the tourism agencies and tour operators (titular of tourism licences). Excluding the left side of the river Nistru and the municipality of Bender.

Source:
World Tourism Organization (UNWTO), Madrid, UNWTO statistics database and the *Yearbook of Tourism Statistics*, 2014 edition.

The majority of the expenditure data have been provided to the WTO by the International Monetary Fund (IMF).

[&] Series (by order of priority, see Annex II):

TF: Arrivals of non-resident tourists at national borders.
VF: Arrivals of non-resident visitors at national borders.
THS: Arrivals of non-resident tourists in hotels and similar establishments.
TCE: Arrivals of non-resident tourists in all types of accommodation establishments.

Source:
Organisation mondiale du tourisme (OMT), Madrid, la base de données de l'OMT, et l'*Annuaire des statistiques du tourisme*, édition 2014.

La majorité des données sur les dépenses touristiques sont celles que le Fonds monétaire international (FMI) a fournies à l'Organisation mondiale du tourisme (OMT).

[&] Série (par ordre de priorité,voir annexe II):

TF : Arrivées de touristes non résidents aux frontières nationales.
VF: Arrivées de visiteurs non résidents aux frontières nationales.
THS: Arrivées de touristes non résidents dans les hôtels et établissements assimilés.
TCE: Arrivées de touristes non résidents dans tous les types d'établissements d'hébergement touristique.

Tourist/visitor arrivals and tourism expenditure *(continued)*
Thousands arrivals and millions of US dollars

Arrivées de touristes/visiteurs et dépenses touristiques *(suite)*
Milliers d'arrivées et millions de dollars E.-U.

1 Excluding nationals residing abroad.
2 Including nationals of the country residing abroad.
3 Excluding passenger transport.
4 Arrivals by air.
5 Excluding nationals residing abroad and crew members.
6 Organized tourism.
7 Break in the series due to implementation of improved methodology for distinguishing visitors (tourists) from other travellers.
8 Arrivals by all means of transport.
9 Arrivals by air at Bangui only.
10 For statistical purposes, the data for China do not include those for the Hong Kong Special Administrative Region (Hong Kong SAR), Macao Special Administrative Region (Macao SAR) and Taiwan Province of China.
11 Does not include other non-residents namely workers, students, etc.
12 Data from 2005 to 2009 were revised so they can be comparable to 2010 (nautical ports were excluded).
13 Based on mobile positioning data by the Bank of Estonia and Positium LBS.
14 Arrivals through all ports of entry.
15 Charter tourists only.
16 Excluding the north islands (Saint Martin and Saint Barthelemy).
17 Arrivals to Timehri airport only.
18 Including tourists from Northern Ireland.
19 Excluding seasonal and border workers.
20 Arrivals of non-resident tourists by air. Including nationals residing abroad. E/D cards.
21 Air arrivals. Tarawa and Christmas Island.
22 Non-resident departures. Survey of persons crossing the state border.
23 Excluding nationals residing abroad, Syrian nationals, Palestinians and students.
24 Excluding long term tourists on campgrounds and in holiday flats.
25 Arrivals of non-resident tourists by air.
26 Departures.
27 Including Singapore residents crossing the frontier by road through the Johore Causeway.
28 Departures by air and by sea.
29 Air and sea arrivals.
30 Arrivals in the States of Kosrae, Chuuk, Pohnpei and Yap; excluding FSM citizens.
31 Excluding diplomats and foreign residents in Mongolia.
32 The data correspond only to 12 border posts.
33 The data of all the border posts of the country are used.
34 Including tourist arrivals through border entry points to Yangon.
35 Including arrivals from India.
36 Including Niueans residing usually in New Zealand.
37 Air arrivals (Palau International Airport).
38 Excluding nationals residing abroad and crew members. E/D cards in the "Silvio Petirossi" airport and passenger counts at the national border crossing.
39 Including tourists with identity document other than a passport.
40 Including arrivals of nationals residing abroad.
41 Arrivals in hotels only.
42 Including domestic tourism.

1 A l'exclusion des nationaux résidant à l'étranger.
2 Y compris les nationaux du pays résidant à l'étranger.
3 Non compris le transport de passagers.
4 Arrivées par voie aérienne.
5 A l'exclusion des nationaux du pays résidant à l'étranger et des membres des équipages.
6 Tourisme organisé.
7 Rupture de série due à la mise en œuvre d'une méthodologie améliorée qui distingue les visiteurs (touristes) des autres voyageurs.
8 Arrivées par tous moyens de transport confondus.
9 Arrivées par voie aérienne à Bangui uniquement.
10 Pour la présentation des statistiques, les données pour la Chine ne comprennent pas la Région Administrative Spéciale de Hong Kong (Hong Kong RAS), la Région Administrative Spéciale de Macao (Macao RAS) et la province de Taiwan.
11 Les chiffres concernant les arrivées de visiteurs ne comprendront pas les autres catégories de non-résidents, à savoir les travailleurs, les étudiants, etc.
12 Les données de 2005 à 2009 ont donc été révisées afin qu'ils puissent être comparables à 2010 (les ports nautiques ne sont pas inclus).
13 Basé sur les données de positionnement mobile par la Banque d'Estonie et Positium LBS.
14 Arrivées à travers tous les ports d'entrée.
15 Arrivées en vols à la demande seulement.
16 Excluyant les îles du Nord (Saint Martin et Saint Barthélemy).
17 Arrivées à l'aéroport de Timehri seulement.
18 Y compris les touristes en provenance d'Irlande du Nord.
19 A l'exclusion des travailleurs saisonniers et frontaliers.
20 Arrivées de touristes non résidents par air. Y compris les nationaux qui résident a l'étranger. Cartes d'embarquement et de débarquement.
21 Arrivées par voie aérienne. Tarawa et Ile Christmas.
22 Départs de non-résidents. Enquête menée auprès de personnes franchissant la frontière de l'État.
23 À l'exclusion des nationaux résidant à l'étranger, Syriens, Palestiniens et étudiants.
24 A l'exclusion des touristes à long terme en camping ou dans des appartements de vacances.
25 Arrivées de touristes non résidents par voie aérienne.
26 Départs.
27 Y compris les résidents de Singapour traversant la frontière par voie terrestre à travers le Johore Causeway.
28 Départs par voies aérienne et maritime.
29 Arrivées par voie aérienne et maritime.
30 Arrivées dans les États de Kosrae, Chuuk, Pohnpei et Yap; non compris les citoyens FSM.
31 Sont exclus les diplomates et les étrangers qui résident en Mongolie.
32 les données ne couvrent que 12 postes frontière.
33 Les données de l'ensemble des postes frontières du pays sont utilisées.
34 Comprenant les arrivées de touristes aux postes-frontières de Yangon.
35 Y compris les arrivées à Inde.
36 Y compris les nationaux de Niue résidant habituellement en Nouvelle-Zélande.
37 Arrivées par voie aérienne (Aéroport international de Palau).
38 À l'exclusion des nationaux résidant à l'étranger et membres des équipages. Cartes d'embarquement et de débarquement à l'aéroport Silvio Petirossi et comptages des passagers lors du franchissement des frontières nationales.
39 Nouvelle série estimée comprenant les touristes avec une pièce d'identité autre qu'un passeport.
40 Y compris les arrivées les nationaux résidant à l'étranger.
41 Arrivées dans les hôtels uniquement.
42 Y compris le tourisme interne.

# 56 Tourist/visitor arrivals and tourism expenditure *(continued)*

Thousands arrivals and millions of US dollars

## Arrivées de touristes/visiteurs et dépenses touristiques *(suite)*

Milliers d'arrivées et millions de dollars E.-U.

43 Including nationals residing abroad and crew members.

44 Visitors who received tourism services from licensed tourism agencies and tour operators. Excluding the left side of the river Dniester and the municipality of Bender.

45 Including Italian tourists.

46 Excluding Netherlands Antillean residents.

47 Including arrivals to Saint Martin (the French side of the island).

48 The number of inbound arrivals is based on a combination of accommodation statistics and border survey statistics (as calculated within Tourism Satellite Account).

49 Excluding arrivals by work and contract workers.

50 Including health establishments.

51 The Iraqi nationals are included from 2008 only and they have been excluded in the previous years (from the beginning of 2008, they have to require a visa to enter Syria; if they arrived previously to this date, it is considered that they stayed for a period longer than a year, becoming residents).

52 Arrivals by air at Dili Airport.

53 Turkish citizens resident abroad are included. Departing visitors survey carrying out at departure gates.

43 Y compris les nationaux résidant à l'étranger et membres des équipages.

44 Visiteurs qui ont bénéficié des services touristiques des agences de tourisme et des voyagistes (titulaires d'une licence touristique). À l'exception de la rive gauche de la rivière Dniester et de la municipalité de Bender.

45 Y compris les touristes touristes.

46 A l'exclusion des résidents des Antilles Néerlandaises.

47 Y compris les arrivées à Saint-Martin (la partie française de l'île).

48 Le nombre d'arrivées par le biais du tourisme récepteur est basé sur une combinaison de statistiques de l'hébergement et de statistiques d'une enquête à la frontière (calculés comme dans le Compte satellite du tourisme).

49 À l'exclusion des arrivées par travail et les travailleurs contractuels.

50 Y compris les établissements de cure.

51 Les nationaux iraquiens ne sont pris en considérations que depuis 2008: depuis le début de 2008, ils doivent demander un visa pour se rendre en Syrie; s'ils sont arrivés avant cette date, on considère qu'ils sont restés dans le pays pendant une période dépassant une année et sont donc devenus des résidents.

52 Arrivées par voie aérienne à l'aéroport de Dili.

53 Citoyens turcs résidant à l'étranger sont inclus. Enquête des visiteurs au départ effectuée aux portes d'embarquement.

Organisation mondiale du tourisme (OMT), Madrid, la base de données de l'OMT et l'*Compendium des statistiques du tourisme*, édition 2014.

1 Including leisure and business trips abroad with at least one overnight stay.
2 Person-trips (one or more nights).
3 For statistical purposes, the data for China do not include those for the Hong Kong Special Administrative Region (Hong Kong SAR) and Macao Special Administrative Region (Macao SAR).
4 Including air crew members and other servicemen.
5 Including Hong Kong residents to Macao and Mainland China.
6 Including only tours authorized by the "Instituto de Turismo".
7 Starting from 2004, border statistics are not collected any more. Household statistics are used instead.
8 Overnight trips abroad, including cruises abroad with overnight on board only.
9 The observation of the borders with the countries of the Schengen Area ceased from the year 2008.
10 Departures of nationals only, irrespective of purpose.
11 Including same-day visitors.
12 Number of resident tourists (overnight visitors) abroad.
13 Fiscal years (October 1 to September 30).
14 Holiday departures of nationals.
15 Returning residents.
16 Including overseas contract workers.
17 Outbound trips registered at frontiers.
18 Fiscal years (July-June).
19 West Bank and Gaza.

1 Y compris les voyages de détente et les voyages d'affaires à l'étranger comportant au moins une nuitée.
2 Personne-voyages (une ou plusieurs nuitées).
3 Pour la présentation des statistiques, les données pour la Chine ne comprennent pas la Région Administrative Spéciale de Hong Kong (Hong Kong RAS) et la Région Administrative Spéciale de Macao (Macao RAS).
4 Y compris les membres de l'équipage des aéronefs et le personnel technique.
5 Y compris les résidents de Hong Kong qui se rendent à Macao ou en Chine continentale.
6 Ne comprend que les excursions autorisées par l'Isntituto de Turismo.
7 À partir de 2004, les statistiques de frontière ne sont plus collectées.
8 Voyages à l'étranger comprenant une nuitée, y compris les croisières à l'étranger avec nuitées à bord uniquement.
9 La surveillance des frontières avec les pays de la zone Schengen a pris fin en 2008.
10 Départs des nationaux seulement, quel que soit le but de leur voyage.
11 Y compris les visiteurs qui ne restent qu'une journée.
12 Nombre de touristes résidents (visiteurs passant la nuit) à l'étranger.
13 Années fiscales (du 1er octobre au 30 septembre).
14 Départs en vacances de nationaux.
15 Résidents de retour.
16 Y compris les employés contractuels étrangers.
17 Voyages a l'étranger enregistrés aux frontières.
18 Années fiscales (juillet-juin).
19 Cisjordanie et Gaza.

1. As reported by OECD/DAC, covers agencies of the United Nations family, the European Commission, IDA and the concessional lending facilities of regional development banks. Excluding non-concessional flows (i.e., less than 25% grant elements).

1. Communiqué par le Comité d'aide au développement de l'OCDE, comprend les institutions et organismes du système des Nations Unies, la commission européenne, l'Association internationale de développement, et les mécanismes de prêt à des conditions privilégiées des banques régionales de développement. Les rapports aux conditions du marché (élément de libéralité inférieur à 25) en sont exclus.

# 61 Net official development assistance from DAC countries to developing countries and multilateral organizations

Net disbursements: millions of US dollars and as a percentage of gross national income (GNI)

# Aide publique au développement nette des pays du CAD aux pays en développement et aux organisations multilatérales

Versements nets: millions de dollars E.-U. et en pourcentage du revenu national brut (RNB)

UNICEF : Fonds des Nations Unies pour l'enfance
PAM : Programme alimentaire mondial

[a] Expenditures by FAO, IAEA, ICAO, ILO, IMO, ITU, UNESCO, UNIDO, UPU, WIPO, WHO, WMO, OHCHR and the World Tourism Organization.

[b] Expenditures by ITC, UNAIDS, UNCTAD, UNEP, UN-Habitat, UNODC, UNRWA, ECA, ECE, ECLAC, ESCAP, ESCWA,UNDESA and the Office for the Coordination of Humanitarian Affairs.

[a] Dépenses engagées par la FAO, l'AIEA, l'OACI, l'OIT, l'OMI, l'UIT, l'UNESCO, l'ONUDI, l'UPU, l'OMPI, l'OMS, l'OMM, le HCDH et l'Organisation mondiale du tourisme.

[b] Dépenses engagées par le CCI, ONUSIDA, la CNUCED, le PNUE, ONU/Habitat, UNODC, l'UNRWA, la CEA, la CEE, la CEPALC, la CESAP, la CESAO, le DAES de l'ONU et le Bureau de la coordination des affaires humanitaires.

# Annex I - Country and area nomenclature, regional and other groupings

The *Statistical Yearbook* lists countries or areas based on the United Nations Standard Country Codes (Series M, No. 49), prepared by the Statistics Division of the United Nations Secretariat and first issued in 1970[1]. The list of countries or areas; the composition of geographical regions and economic, trade and other groupings used within this yearbook (as at 31 December 2012) are presented in this Annex. The names of countries or areas refer to their short form used in day-to-day operations of the United Nations and not necessarily to their official name as used in formal documents[2]. As an aid to statistical data processing, a unique standard three-digit numerical code is assigned to each country or area and to each geographical region and grouping of countries or areas. For reference, these codes, where applicable, are presented to the left of each country or area listed in this Annex. These codes range from 000 to 899, inclusive.

## A. Changes in country or area names (since 31 August 1999)

The geographical extent of a country or area, or the composition of a geographical region, may change over time and users should take such changes into account in interpreting the tables in this Yearbook. A change in the name of a country or area while its geographical coverage remains the same is not usually accompanied by a change in its numerical code. Changes in numerical codes and names in the general period covered by the statistics (since 31 August 1999) in the *Yearbook*, are shown below;

| Numerical code | Country or area (added or changed) | Date of change | Numerical code | Country or area (Name changes with no change in code) | Date of change |
|---|---|---|---|---|---|
| 728 | South Sudan | 2011 | 132 | Cabo Verde, *previously Cape Verde* | 2013 |
| 729 | Sudan | 2011 | 275 | State of Palestine, *previously Occupied Palestinian Territory* | 2013 |

| 832 | Jersey | 2005 | 626 | Timor-Leste, *previously East Timor* | 2002 |
| 248 | Åland Islands | 2003 | 446 | China, Macao Special Administrative Region, *previously Macau* | 2000 |
| 175 | Mayotte | 2002 | | | |

## B. Regional groupings

The scheme of regional groupings given below presents 7 regions based mainly on continents; 5 of the 7 continental regions are further subdivided into 22 regions that are so drawn as to obtain greater homogeneity in sizes of population, demographic circumstances and accuracy of demographic statistics. This nomenclature is widely used in international statistics and is followed to the greatest extent possible in the present *Yearbook* in order to promote consistency and facilitate comparability and analysis. However, it is by no means universal in international statistical compilation, even at the level of continental regions, and variations in international statistical sources and methods dictate many unavoidable differences in particular fields in the present *Yearbook*. General differences are indicated in the footnotes to the classification presented below. More detailed differences are given in the footnotes and technical notes to individual tables.

Neither is there international standardization in the use of the terms “developed” and “developing” countries, areas or regions. These terms are used in the present publication to refer to regional groupings generally considered as “developed”: these are Northern America (numerical code 021), Europe (150), Japan (392) and Australia and New Zealand (053). These designations are intended for statistical convenience and do not necessarily express a judgement about the stage reached by a particular country or area in the development process. Differences from this usage are indicated in the notes to individual tables.

[1] Four revisions of this document were published in 1975, 1982, 1996 and 1999 (ST/ESA/STAT/SER.M/49/Rev.4). Further revisions are now published on the United Nations Statistics Division website under the M49 section.
[2] A listing in the 6 official languages of the United Nations is contained in Terminology Bulletin No. 347/Rev.1 or the UNTERM website, prepared by the Department of General Assembly Affairs and Conference Services of the United Nations Secretariat.
[3] Formerly part of South-Central Asia (numerical code 062).

## 142 Asia

### 143 Central Asia

398 Kazakhstan
417 Kyrgyzstan
762 Tajikistan
795 Turkmenistan
860 Uzbekistan

### 030 Eastern Asia

156 China
344 China, Hong Kong Special Administrative Region
446 China, Macao Special Administrative Region
408 Democratic People's Republic of Korea
392 Japan
496 Mongolia
410 Republic of Korea

### 035 South-eastern Asia

096 Brunei Darussalam
116 Cambodia
360 Indonesia
418 Lao People's Democratic Republic
458 Malaysia
104 Myanmar
608 Philippines
702 Singapore
764 Thailand
626 Timor-Leste
704 Viet Nam

### 034 Southern Asia

004 Afghanistan
050 Bangladesh
064 Bhutan
356 India
364 Iran (Islamic Republic of)
462 Maldives
524 Nepal
586 Pakistan
144 Sri Lanka

### 145 Western Asia

051 Armenia
031 Azerbaijan
048 Bahrain
196 Cyprus
268 Georgia
368 Iraq
376 Israel
400 Jordan
414 Kuwait
422 Lebanon
512 Oman
634 Qatar
682 Saudi Arabia
275 State of Palestine
760 Syrian Arab Republic
792 Turkey
784 United Arab Emirates
887 Yemen

## 150 Europe

### 151 Eastern Europe

112 Belarus
100 Bulgaria
203 Czech Republic
348 Hungary
616 Poland
498 Republic of Moldova
642 Romania
643 Russian Federation
703 Slovakia
804 Ukraine

### 154 Northern Europe

248 Åland Islands
208 Denmark
233 Estonia
234 Faeroe Islands
246 Finland
831 Guernsey **note 830**
352 Iceland
372 Ireland
833 Isle of Man
832 Jersey **note 830**
428 Latvia
440 Lithuania
578 Norway
744 Svalbard and Jan Mayen Islands
752 Sweden
826 United Kingdom of Great Britain and Northern Ireland

### 039 Southern Europe

008 Albania
020 Andorra
070 Bosnia and Herzegovina
191 Croatia
292 Gibraltar
300 Greece
336 Holy See
380 Italy
470 Malta
499 Montenegro **note 891**
620 Portugal
674 San Marino
688 Serbia **note 891 & /c**
705 Slovenia
724 Spain
807 The former Yugoslav Republic of Macedonia

### 155 Western Europe

040 Austria
056 Belgium
250 France
276 Germany
438 Liechtenstein
442 Luxembourg
492 Monaco
528 Netherlands
756 Switzerland

## 009 Oceania

### 053 Australia and New Zealand

036 Australia
554 New Zealand
574 Norfolk Island

### 054 Melanesia

242 Fiji
540 New Caledonia
598 Papua New Guinea
090 Solomon Islands
548 Vanuatu

### 057 Micronesia

316 Guam
296 Kiribati
584 Marshall Islands
583 Micronesia (Federated States of)
520 Nauru
580 Northern Mariana Islands
585 Palau

### 061 Polynesia

016 American Samoa
184 Cook Islands
258 French Polynesia
570 Niue
612 Pitcairn
882 Samoa
772 Tokelau
776 Tonga
798 Tuvalu
876 Wallis and Futuna Islands

## Other groupings

Following is a list of other groupings and their compositions presented in the *Yearbook*. These groupings are organized mainly around economic and trade interests in regional associations.

| **063** | **Andean Common Market (ANCOM)** | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| 068 | Bolivia (Plurinational State of) | 170 | Colombia | 218 | Ecuador | 604 | Peru | |

| **066** | **Asia-Pacific Economic Cooperation (APEC)** | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| 036 | Australia | 344 | China, Hong Kong Special Administrative Region | 554 | New Zealand | 702 | Singapore | |
| 096 | Brunei Darussalam | 360 | Indonesia | 598 | Papua New Guinea | 158 | Taiwan Province of China | |
| 124 | Canada | 392 | Japan | 604 | Peru | 764 | Thailand | |
| 152 | Chile | 458 | Malaysia | 608 | Philippines | 840 | United States of America | |
| 156 | China | 484 | Mexico | 410 | Republic of Korea | 704 | Viet Nam | |
| | | | | 643 | Russian Federation | | | |

| **073** | **Association of South-East Asian Nations (ASEAN)** | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| 096 | Brunei Darussalam | 360 | Indonesia | 458 | Malaysia | 608 | Philippines | 764 | Thailand |
| 116 | Cambodia | 418 | Lao PDR | 104 | Myanmar | 702 | Singapore | 704 | Viet Nam |

| **130** | **Caribbean Community and Common Market (CARICOM)** | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| 028 | Antigua and Barbuda | 084 | Belize | 332 | Haiti | 662 | Saint Lucia | |
| 044 | Bahamas (member of the Community only) | 212 | Dominica | 388 | Jamaica | 670 | Saint Vincent and the Grenadines | |
| | | 308 | Grenada | 500 | Montserrat | 740 | Suriname | |
| 052 | Barbados | 328 | Guyana | 659 | Saint Kitts and Nevis | 780 | Trinidad and Tobago | |

# Annexe I - Nomenclature des pays ou zones, groupements régionaux et autres groupements

L'Annuaire statistique répertorie de pays ou de zones sur la base de l'opuscule United Nations Standard Country Codes (Série M, n° 49) rédigée par la Division de statistique du Secrétariat de l'Organisation des Nations Unies et publiée en 1970[1]. La liste des pays ou zones; la composition des régions géographiques et économiques, commerciales et d'autres groupements utilisés dans cet annuaire (au 31 Décembre 2012) sont présentées dans la présente annexe. On a eu recours à la forme brève des noms des pays et des zones usitées au cours des activités courantes des Nations Unies, et pas nécessairement aux désignations officielles utilisées dans les documents officiels[2]. Afin de faciliter le traitement des données statistiques, un code numérique unique et standard à trois chiffres

[1] Quatre révisions de ce document ont été publiés en 1975, 1982, 1996 et 1999 (ST/ESA/STAT/SER.M/49/Rev.4). D'autres révisions sont maintenant publiés sur le site internet des la Division de statistique des Nations Unies.

[2] Le Bulletin terminologique No 347/Rev.1 ou UNTERM website, intitulé "Noms de pays" établi par le Département des affaires de l'Assemblée générale et des services de conférence du Secrétariat de l'Organisation des Nations Unies, répertorie les noms des États Membres dans les six langues de l'Organisation.

est attribué à chaque pays ou zone et à chaque région géographique et groupement de pays ou de zones. Pour référence, ces des, le cas échéant, sont présentés à la gauche de chaque pays ou zone visées dans cette annexe. Ces codes s'échelonnent entre 000 et 899.

## A. Changements dans le nom des pays ou zones (depuis 31 Août 1999)

L'étendue géographique d'un pays ou d'une zone ou la composition d'une région géographique peuvent varier au fil du temps et les utilisateurs devront tenir compte de telles modifications lorsqu'ils ont recours aux codes indiques dans la présente publication et qu'ils établissent des rapports entre les données portant sur différentes périodes. La modification du nom d'un pays ou d'une zone alors que son espace géographique demeure le même n'est pas habituellement accompagnée d'un changement de son code numérique. Changements dans les codes numériques et noms dans la période générale couverts par les statistiques (depuis le 31 Août 1999) dans l'Annuaire, sont présentés ci-dessous;

| Code numérique | Pays ou region (nouveaux codes et codes modifies) | Date de la modification | Code numérique | Pays ou region (Changements de nom sans modification du code) | Date de la modification |
|---|---|---|---|---|---|
| 728 | Soudan du Sud | 2011 | 132 | Cabo Verde, *ex-Cap-Vert* | 2013 |
| 729 | Soudan | 2011 | 434 | État de Palestine, *ex-Territoire palestinien occupé* | 2013 |
| 531 | Curaçao | 2010 | | | |
| 534 | Saint-Martin (partie néerlandaise) | 2010 | 275 | Libye, *ex-Jamahiriya arabe libyenne* | 2011 |
| 535 | Bonaire, Saint-Eustache et Saba | 2010 | | | |
| 652 | Saint-Barthélemy | 2007 | 068 | Bolivie (État plurinational de), *ex-Bolivie* | 2009 |
| 663 | Saint-Martin (partie française) | 2007 | | | |
| 499 | Monténégro | 2006 | 498 | République de Moldova, *ex-Moldova (depuis 2007)* | 2008 |
| 688 | Serbie | 2006 | | | |
| 034 | Asie méridionale [3] | 2005 | 862 | Venezuela (République bolivarienne du), *ex-Venezuela* | 2006 |
| 143 | Asie centrale [3] | 2005 | | | |
| 831 | Guernesey | 2005 | 891 | Serbie-et-Monténégro, *ex-Yougoslavie* | 2003 |
| 832 | Jersey | 2005 | | | |
| 248 | Îles d'Åland | 2003 | 626 | Timor-Leste, *ex-Timor oriental* | 2002 |
| 175 | Mayotte | 2002 | 446 | Chine, région administrative spéciale de Macao, *ex-Macao* | 2000 |

## B. Groupements régionaux

Le système de groupements régionaux présenté ci-dessous comporte 7 régions basées principalement sur les continents. 5 des 7 régions continentales sont elles-mêmes subdivisées, formant ainsi 22 régions délimitées de manière à obtenir une homogénéité accrue dans les effectifs de population, les situations démographiques et la précision des statistiques démographiques. Cette nomenclature est couramment utilisée aux fins des statistiques internationales et a été appliquée autant qu'il a été possible dans le présent *Annuaire* en vue de renforcer la cohérence et de faciliter la comparaison et l'analyse. Son utilisation pour l'établissement des statistiques internationales n'est cependant rien moins qu'universelle, même au niveau des régions continentales, et les variations que présentent les sources et méthodes statistiques internationales entraînent inévitablement de nombreuses différences dans certains domaines de cet *Annuaire*. Les différences d'ordre général sont indiquées dans les notes figurant au bas de la classification présentée ci-dessous. Les différences plus spécifiques sont mentionnées dans les notes techniques et notes de bas de page accompagnant les divers tableaux.

L'application des expressions "développés" et "en développement" aux pays, zones ou régions n'est pas non plus normalisée à l'échelle internationale. Ces expressions sont utilisées dans la présente publication en référence aux groupements régionaux généralement considérés comme "développés", à savoir l'Amérique septentrionale (code numérique 021), l'Europe (150), le Japon (392) et l'Australie et la Nouvelle-Zélande (053). Ces appellations sont employées pour des raisons de commodité statistique et n'expriment pas nécessairement un jugement sur le stade de développement atteint par tel ou tel pays ou zone. Les cas différant de cet usage sont signalés dans les notes accompagnant les tableaux concernés.

3 Faisait auparavant partie du Asie centrale et du Sud (code numérique 062).

## 002 Afrique

### --- Afrique subsaharienne

# Annex II: Technical notes

## Chapter I: World and region summary

### Table 1: World Statistics – selected series

The series of world aggregates on population, output, production, external trade and finance have been compiled from statistical publications and databases of the United Nations and the specialized agencies and other institutions. The sources should be consulted for detailed information on compilation and coverage.

### Table 2: Population, rate of increase birth and death rates, surface area and density

The table presents estimates of population size, average annual rates of change, crude birth and death rates, surface area and population density for the world and regions. Unless otherwise specified, all figures are estimates of the order of magnitude and are subject to a margin of error. The population estimates and rates presented in this table were prepared by the Population Division of the United Nations Secretariat and published in *World Population Prospects: The 2012 Revision*. The average annual percentage rates of population change were calculated by the Population Division of the United Nations Secretariat, using an exponential rate of increase formula.

Crude birth and crude death rates are expressed in terms of the average annual number of births and deaths respectively, per 1,000 mid-year population. These rates are estimated. Surface area totals were obtained by summing the figures for the individual countries or areas. Density is the number of persons in the population per square kilometre of total surface area.

The scheme of regionalization used for the purpose of making these estimates is presented in annex I. Although some continental totals are given, and all can be derived, the basic scheme presents macro regions that are so drawn as to obtain greater homogeneity in sizes of population, types of demographic circumstances and accuracy of demographic statistics.

### Tables 3: Index numbers of total agricultural and food production

### Table 4: Index numbers of per capita agricultural and food production

The index numbers in table 3 refer to agricultural production, which is defined to include both crop and livestock products. Seeds and feed are excluded. The index numbers of food refer to commodities which are considered edible and contain nutrients. Coffee, tea and other inedible commodities are excluded.

The index numbers of total agricultural and food production in table 3 are calculated by the Laspeyres formula with the base year period 2004-2006. The latter is provided in order to diminish the impact of annual fluctuations in agricultural output during base years on the indices for the period. Production quantities of each commodity are weighted by 2004-2006 average national producer prices and summed for each year. The index numbers are based on production data for a calendar year.

Index numbers for the world and regions are computed in a similar way to the country index numbers except that instead of using different commodity prices for each country group, “international commodity prices” derived from the Gheary-Khamis formula are used for all country groupings. This method assigns a single “price” to each commodity.

The indexes in table 4 are calculated as a ratio between the index numbers of total agricultural and food production in table 3 described above and the corresponding index numbers of population. For further information on the series presented in these tables, see the FAO Statistical Yearbook and the FAOSTAT database (www.faostat3.fao.org).

### Table 5: Production, trade and consumption of commercial energy

For a description of the series in table 5, see the technical notes to chapter XIII.

### Table 6: Total exports and imports by regions

For a description of the series in table 6, see the technical notes to chapter XVI. The composition of the regions is presented in table 52.

## Chapter II: Population

### Table 7: Selected indicators of life expectancy, childbearing and mortality

"Life expectancy at birth", "infant mortality rate", "total fertility rate" and "under-five mortality rate" are taken from the estimates and projections prepared by the United Nations Population Division, published in *World Population Prospects: The 2012 Revision*. "Maternal mortality ratio" are estimates developed by the World Health Organization, UNICEF, the United Nations Population Fund, the World Bank and United Nations Population Division and published in *Trends in Maternal Mortality: 1990 to 2013*.

"Life expectancy at birth" is an overall estimate of the average number of years of life expected by a hypothetical cohort of individuals who would be subject during all their lives to the mortality rates of a given period. It is expressed as years. Many developing countries lack complete and reliable statistics of births and deaths based on civil registration, so various estimation techniques are used to calculate life expectancy estimates using other sources of data, mainly population censuses and demographic surveys. Life expectancy at birth gives a statistical summary of current differences in mortality across all ages. However, trends and differentials in infant and child mortality rates are the predominant influence on trends and differentials in life expectancy at birth in many developing countries. Thus, life expectancy at birth is of limited usefulness in these countries in assessing levels and differentials in mortality at other ages.

The "total fertility rate" is the average number of children a hypothetical cohort of women would have at the end of their reproductive period if they were subject during their whole lives to the fertility rates of a given period and if they were not subject to mortality. It is expressed as children per woman.

The "infant mortality rate" is the probability of dying between birth and exact age 1 and similarly the "under-five mortality rate" is probability of dying between birth and exact age 5. Both are expressed as deaths per 1,000 births. In most developing countries where civil registration data are deficient, the most reliable sources are demographic household surveys. Where these are not available, other sources (and general estimates) are made which are necessarily of limited reliability. Where countries lack comprehensive and accurate systems of civil registration, infant mortality statistics by sex are difficult to collect or to estimate with any degree of reliability because of reporting biases, and thus are not shown here.

The "maternal mortality ratio" is the ratio of the number of maternal deaths during a given time period per 100,000 live births during the same time-period. A maternal death refers to a female death from any cause related to or aggravated by pregnancy or its management (excluding accidental or incidental causes) during pregnancy and childbirth or within 42 days of termination of pregnancy, irrespective of the duration and site of the pregnancy.

### Table 8: Population in urban and rural areas, rates of growth and largest urban agglomeration population

The statistics on population in urban and rural areas, rates of growth and largest urban agglomeration population of each country or area are estimates and projections published by the Population Division of the Department of Economic and Social Affairs of the United Nations Secretariat in the *World Urbanization Prospects: The 2011 Revision*. Because of national differences in the specific characteristics that distinguish urban from rural areas, there are no internationally agreed definitions of urban and rural. In most countries, the distinction is mainly based on size of locality. For the latest available census definition of urban areas in a particular country or area, reference should be made to the *Demographic Yearbook*.

An urban agglomeration comprises the city or town proper and also the suburban fringe or thickly settled territory lying outside, but adjacent to, its boundaries. The largest urban agglomerations refer to those inhabited by 750,000 people or more. Annual rates of change in urban and rural population are computed as average annual percentage changes using midyear population estimates.

## Chapter III: Gender

### Table 9: Proportion of seats held by women in national parliament

The table shows the percentage of seats held by women members in single or lower chambers of national parliaments as at January/ February each year (see table footnotes for specific details). National parliaments can be bicameral or unicameral. This table covers the single chamber in unicameral parliaments and the lower chamber in bicameral parliaments. It does not cover the upper chamber of bi-cameral parliaments. Seats are usually won by members in general parliamentary elections. Seats may also be filled by nomination, appointment, indirect election, rotation of members and by-election. The proportion of seats held by women in national parliament is derived by dividing the total number of seats occupied by women by the total number of seats in parliament. There is no weighting or normalising of statistics. The source for this table is the Inter-Parliamentary Union (IPU), see www.ipu.org for further information.

## Table 10: Share of women in wage employment in the non-agricultural sector

The share of women in wage employment in the non-agricultural sector is the share of female workers in wage employment in the non-agricultural sector expressed as a percentage of total wage employment in that same sector. The non-agricultural sector includes industry and services. “Industry” includes mining and quarrying (including oil production), manufacturing, construction, electricity, gas, and water, corresponding to divisions 2-5 in the International Standard Industrial Classification of All Economic Activities (ISIC-Rev.2) and to tabulation categories C-F in ISIC-Rev. 3. “Services” include wholesale and retail trade and restaurants and hotels; transport, storage, and communications; financing, insurance, real estate, and business services; and community, social, and personal services, corresponding to divisions 6-9 in ISIC-Rev. 2, and to tabulation categories G-Q in ISIC-Rev. 3.

Employment refers to people above a certain age who worked or held a job during a specified reference period (according to the ILO Resolution concerning statistics of the economically active population, employment, unemployment and underemployment, adopted by the Thirteenth International Conference of Labour Statisticians (ICLS), October 1982). Wage employment refers only to wage earners and salaried employees, or "persons in paid employment jobs". Employees are typically remunerated by wages and salaries, but may be paid by commission from sales, piece-rates, bonuses or payments in kind such as food, housing, training, etc. These persons are in wage employment as opposed to self-employment – that is employers, own-account workers, members of producers' cooperatives and contributing family workers. The different statuses in employment are defined according to the ILO Resolution concerning the International Classification of Status in Employment (ICSE), adopted by the 15th ICLS (1993). The source for this table is the Millennium Development Goals database, see http://mdgs.un.org for further information.

## Table 11: Ratio of girls to boys in primary, secondary and tertiary education

The ratio of girls to boys (gender parity index) in primary, secondary and tertiary education is the ratio of the number of female students enrolled at primary, secondary and tertiary levels of education to the number of male students in each level. To standardise the effects of the population structure of the appropriate age groups, the Gender Parity Index (GPI) of the Gross Enrolment Ratio (GER) for each level of education is used. The source for this table is the UNESCO Institute for Statistics (UIS), see www.uis.unesco.org for further information.

# Chapter IV: Education

Detailed data and explanatory notes on education can be found on the UNESCO Institute for Statistics web site www.uis.unesco.org. Brief notes which pertain to the statistical information shown in tables 12 and 13 are given below.

## Table 12: Public expenditure on education

Public expenditure on education consists of current and capital expenditures on education by local, regional and national governments, including municipalities. Household contributions are excluded. Current expenditure on education includes expenditure for goods and services consumed within the current year and which would need to be renewed if needed the following year. It includes expenditure on: staff salaries and benefits; contracted or purchased services; other resources including books and teaching materials; welfare services; and other current expenditure such as subsidies to students and households, furniture and equipment, minor repairs, fuel, telecommunications, travel, insurance and rents. Capital expenditure on education includes expenditure for assets that last longer than one year. It includes expenditure for construction, renovation and major repairs of buildings and the purchase of heavy equipment or vehicles.

## Table 13: Teaching staff at the primary, secondary and tertiary levels

The table shows the total number of teachers at a given level of education, as well as the proportion of female teachers expressed as a percentage of the total (male and female) at the same level in a given school year. The data sources include school census or surveys and teachers’ records. Teachers (or teaching staff) are defined as persons employed full-time or part-time in an official capacity to guide and direct the learning experience of pupils and students, irrespective of their qualifications or the delivery mechanism, i.e. face-to-face and/or at a distance. This definition excludes educational personnel who have no active teaching duties (e.g. headmasters, headmistresses or principals who do not teach) or who work occasionally or in a voluntary capacity in educational institutions.

## Chapter V: Nutrition and health

### Table 14: Food supply

Estimates on food supply are published by the Food and Agriculture Organization of the United Nations in *Food Balance Sheets*, see the FAOSTAT database (www.faostat3.fao.org), where the data give estimates of per capita food supplies per day in terms of caloric value. Per capita supplies in terms of product weight are derived from the total supplies available for human consumption (i.e. "Food") by dividing the quantities of food by the total population actually partaking of the food supplies during the reference period, i.e. the present in-area (de facto) population within the present geographical boundaries of the country. In other words, nationals living abroad during the reference period are excluded, but foreigners living in the country are included. Adjustments are made wherever possible for part-time presence or absence, such as temporary migrants, tourists and refugees supported by special schemes (if it has not been possible to allow for the amounts provided by such schemes under imports). In almost all cases, the population figures used are the mid-year estimates published by the United Nations Population Division. Per capita supply figures represent only the average supply available for the population as a whole and do not necessarily indicate what is actually consumed by individuals. Even if they are taken as an approximation of per capita consumption, it is important to bear in mind that there could be considerable variation in consumption between individuals.

### Table 15: Population below minimum level of dietary energy consumption

Proportion of the population below the minimum level of dietary energy consumption is the percentage of the population whose food intake falls below the minimum level of dietary energy requirements. This is also referred to as the prevalence of undernourishment, which is the percentage of the population that is undernourished. The source for this table is the FAOSTAT database, see www.faostat3.fao.org for further information.

### Table 16: People living with HIV

The prevalence of HIV among the population 15-49 years old is measured as the number of individuals aged 15-49 living with HIV divided by the total population aged 15-49. UNAIDS and WHO, in close consultation with countries, developed a methodology to obtain national estimates of HIV prevalence for men and women. Different approaches are used for generalized epidemics (where adult HIV prevalence exceeds 1% and transmission is mostly heterosexual) and low-level or concentrated epidemics (where HIV is concentrated in groups with behaviours that expose them to a high risk of HIV infection). The source for this table is UNAIDS website on the AIDSInfo portal, see http://www.unaids.org for further information.

## Chapter VI: Culture and communication

The statistics included in Tables 17 to 18 were obtained from the statistics database (see www.itu.int) and the *Yearbook of Statistics*, Telecommunication Services of the International Telecommunication Union.

### Table 17: Telephones

This table shows the number of main (fixed) lines in operation and the main lines in operation per 100 inhabitants for the years indicated. Main telephone lines refer to the telephone lines connecting a customer's equipment to the Public Switched Telephone Network (PSTN) and which have a dedicated port on a telephone exchange. Note that in most countries, main lines also include public telephones. The number of main telephone lines per 100 inhabitants is calculated by dividing the number of main lines by the population and multiplying by 100.

### Table 18 Internet usage

The table shows percentage of individuals using the internet and replaces the statistics shown in previous yearbooks such as the "Number (thousands) of fixed (wired) internet subscriptions" and "fixed (wired) internet subscriptions per 100 inhabitants". Besides capturing the use of the Internet, this indicator is able to measure changes in Internet access and use. In countries where many people access the Internet at work, at school, at cybercafés or other public locations, increases in public access serve to increase the number of users despite limited numbers of Internet subscriptions and of households with Internet access. Developing countries especially tend to have many Internet users per Internet subscriptions, reflecting that home access is not the primary location of access.

## Chapter VII: National accounts and industrial production

The National Accounts Main Aggregates Database (available at http://unstats.un.org/unsd/snaama) presents national accounts data for more than 200 countries and areas of the world. It is the basis for the publication of National Account Statistics: Analysis of Main Aggregates (AMA), a publication prepared by the Statistics Division of the Department for Economic and Social Affairs of the United Nations Secretariat with the generous co-operation of national statistical offices. The database is updated in December of each year with newly available national accounts data for all countries and areas.

The National Accounts Main Aggregates Database is based on the data obtained from the United Nations National Accounts Questionnaire (NAQ) introduced in October 1999, which in turn is based on the System of National Accounts 1993 (1993 SNA). The data are supplemented with estimates prepared by the Statistics Division. The updated SNA, called the System of National Accounts 2008 (2008 SNA) was finalised in September 2009. As of 2012, only Australia; China, Hong Kong Special Administrative Region; and Timor-Leste have started submitting data according to the 2008 SNA. However, several other countries' national statistics offices have national accounts data in 2008 SNA and they were used, whenever available, for preparing 2012 AMA estimates. These additional countries were: Canada, Malawi, Mexico, Pakistan, and the United States of America.

Every effort has been made to present the estimates of the various countries or areas in a form designed to facilitate international comparability. To this end, important differences in concept, scope, coverage and classification have been described in the footnotes for individual countries. Such differences should be taken into account to avoid misleading comparisons. Data contained in the tables relate to the calendar year for which they are shown, except in several cases. These special cases are posted on the National Accounts Main Aggregates Database website (http://unstats.un.org/unsd/snaama/notes.asp). The figures shown are the most recent estimates and revisions available at the time of compilation. In general, figures for the most recent year are to be regarded as provisional. The sums of the components in the tables may not necessarily add up to totals shown because of rounding.

### Table 19: Gross domestic product and gross domestic product per capita

This table shows gross domestic product (GDP) and GDP per capita in US dollars at current prices, GDP at constant 2005 prices and the corresponding real rates of growth. The tables are intended to facilitate international comparisons of levels of income generated in production. Official data and estimates of total and per capita GDP at current prices have been converted to US dollars, while total GDP at constant prices are converted to 2005 prices before conversion to US dollars using the 2005 exchange rates. The conversion methodology to US dollars is described in the document on the methodology for the National Accounts Main Aggregates Database (http://unstats.un.org/unsd/snaama/methodology.pdf). For inter-country comparisons over time, it would be more appropriate to use the growth rate in the table based on constant price data, which are more indicative of inter-country and intra-grouping comparisons of trends in total GDP. The growth rate shown in the table is computed as geometric mean of annual growth rates expressed as percentages for the years.

## Table 20: Implicit price deflators of gross domestic product

This table presents an analysis of economic development represented by the movements of prices and exchange rates in relation to economic growth. Indices of GDP at current prices derived from GDP in national currency and US dollars are shown in columns 1 and 2. Column 3 shows an index of the volume of GDP in national currency. Column 4 presents indices of price deflators of GDP in national currency and column 5 includes indices of price deflators of GDP in US dollars. The price indices in columns 4 and 5 are obtained by dividing, respectively, the indices of GDP at current prices in national currencies and in US dollars shown in columns 1 and 2, by the volume indices presented in column 3. Column 6 provides an implied development in exchange rates derived either by dividing the GDP deflators in national currency (column 4) by the GDP deflators in US dollar listed in column 5, or by dividing the GDP indices in national currencies by the United States dollar indices listed in column 1 and 2, respectively.

A note of caution is advised when using the price index information presented in the table. For one, the deflators shown may not be fully comparable between countries because a wide variety of methods had been applied to obtain the data on price movements. To cite an example, for some countries, explicit price indices were used directly in the calculations while for other countries implicit price indices were derived by dividing volume indices into indices of current price development of GDP. Likewise, even as the index numbers are shown for a common base year 2005 = 100, GDP data at constant prices used in the calculations actually have been compiled according to different original weight base periods.

## Table 21: Gross domestic product by type of expenditure

This table disaggregates GDP at current prices into component parts and expresses these as percentage shares that outline the economic structures in countries. This provides an overview of the structure of the economic system expressed in current prices. It shows what portion of income from production is spent by households or government on final consumption, what is spent on investment, and what part of GDP is exported after deducting the expenditures on imports. It is noted that in some instances the

shares for changes in inventories should be used with caution as countries may also include items such as statistical errors. Note that the breakdown in shares of GDP in current prices by type of expenditure might not add up to 100 per cent due to statistical discrepancies.

### Table 22: Gross value added by kind of economic activity

This table presents the shares of the components of gross value added at current prices by kind of economic activity (in terms of ISIC 3):

- Agriculture, hunting, forestry and fishing (ISIC A-B)
- Mining and quarrying, Manufacturing, Electricity, gas and water supply (ISIC C-E)
- Manufacturing (ISIC D) as a separate activity)
- Construction (ISIC F)
- Wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods, Hotels and restaurants (ISIC G-H)
- Transport, storage and communications (ISIC I)
- Other activities which includes Financial intermediation, Real estate, renting and business activities, Public administration and defense; compulsory social security, Education, Health and social work, Other community, social and personal service activities, Private households with employed persons (ISIC J-P).

### Table 23: Index of industrial production

The United Nations Statistics Division collects, compiles and publishes monthly, quarterly and yearly indices of industrial production through a questionnaire sent to national statistical offices. The indices are compiled according to the International Standard Industrial Classification of all Economic Activities (ISIC), Rev.4 categories, at the 2-digit level, for sections B-E of the classification, i.e. "Mining and quarrying", "Manufacturing", "Electricity, gas, steam and air conditioning supply" and "Water supply; sewerage, waste management and remediation activities". For countries that continue to use ISIC Rev.3, these data are still being collected and published. The collection of these index numbers was started in 1953 and is currently disseminated through the following United Nations publications: the *Monthly Bulletin of Statistics*, *Statistical Yearbook*, and the *World Statistics Pocket Book*.

The weights used in the calculation of the indices for a particular country represent the gross value added in basic prices of the contributing industries. Methodological guidelines for these index numbers are available in the "International Recommendations for the Index of Industrial Production 2010". The indices in the United Nations Statistical Yearbook are currently published with 2005 as a base year.

## Chapter VIII: Financial statistics

Detailed information and current figures relating to tables 24 and 25 are contained in International Financial Statistics, published by the International Monetary Fund (see also http://elibrary-data.imf.org) and in the United Nations Monthly Bulletin of Statistics.

### Table 24: Rates of discount of central banks

Rates shown represent those rates at which the central bank either discounts or makes advances against eligible commercial paper and/or government securities for commercial banks or brokers, typically shown on an end-of-period basis. For countries with more than one rate applicable to such discounts or advances, the rate shown is the one at which the largest proportion of central bank credit operations is understood to be transacted. The importance of these rates as instruments of monetary control varies considerably from country to country and inter-country comparisons should not be made without further investigation.

### Table 25: Short-term interest rates

This table provides treasury bill rates and money market rates. Rates shown represent short-term money market rates - the rate at which short-term borrowings are effected between financial institutions or the rate at which short-term government paper is issued or traded in the market.Typical standardized names for these rates are Money Market Rate and Treasury Bill Rate, respectively. Descriptions of the national series are contained in the IMF's International Financial Statistics, see http://elibrary-data.imf.org for further information.

## Chapter IX: Labour force

A comparable and comprehensive collection of data on labour force and related topics are available from the International Labour Organisation's (ILO) *Key Indicators of the Labour Market (KILM)* publication, which is updated every 2 years. More timely

information is contained in the ILO's ILOSTAT data repository (see www.ilo.org/ilostat) which publishes data as it is received from the countries either on an annual, quarterly or monthly basis but does not include all the consistency checks nor include all the sources used by KILM. For various reasons, national definitions of employment and unemployment often differ from the recommended international standard definitions and thereby limit international comparability. Inter-country comparisons are also complicated by a variety of types of data collection systems used to obtain information on employed and unemployed persons. The ILOSTAT website provides a comprehensive description of the methodology underlying the labour series.

### Table 26: Unemployment

Figures are presented in absolute numbers and in percentages. Data are normally annual averages of monthly, quarterly or semi-annual data.

Unemployment" is defined to include persons above a certain age who, during a specified period of time were:

(a) "Without work", i.e. were not in paid employment or self-employment;

(b) "Currently available for work", i.e. were available for paid employment or self-employment during the reference period; and

(c) "Seeking work", i.e. had taken specific steps in a specified period to find paid employment or self-employment

Persons not considered to be unemployed include:

(a) Persons intending to establish their own business or farm, but who had not yet arranged to do so and who were not seeking work for pay or profit;

(b) Former unpaid family workers not at work and not seeking work for pay or profit.

The series generally represent the total number of persons wholly unemployed or temporarily laid-off. Percentage figures, where given, are calculated by comparing the number of unemployed to the total members of that group of the labour force on which the unemployment data are based.

## Chapter X: Prices

### Table 27: Producer price indices

Producer prices are prices at which producers sell their output on the domestic market. Producer price indices normally cover the prices of the characteristic products of agriculture, forestry, and fishing, mining and quarrying, manufacturing, and electricity, gas and water supply. Prices are normally measured in terms of transaction prices, including non-deductible indirect taxes less subsidies, in the case of domestically produced goods and import duties and other non-deductible indirect taxes less subsidies in the case of imported goods. The Laspeyres index number formula is generally used. The price indices for each country are arranged according to the following scheme:

| (a) | Components of supply | | (b) | Stage of processing | |
|---|---|---|---|---|---|
| | | Domestic supply | | | Raw materials |
| | | Domestic production for domestic market | | | Intermediate goods |
| | | Agricultural products | (c) | End-use | |
| | | Industrial products | | | Consumer goods |
| | | Imported goods | | | Capital goods |

The source for this table is the United Nations *Monthly Bulletin of Statistics*, see http://unstats.un.org/unsd/mbs for further information. Data are mainly obtained from country questionnaire related to this publication and where necessary rebased to a uniform base period, which is currently 2005=100. This operation does not involve any change in the weighting systems used by the countries. For a more detailed explanation about the PPI, please refer to the *Producer Price Index Manual: Theory and Practice* published by the International Monetary Fund in 2004.

## Chapter XI: Agriculture, forestry and fishing

The series shown on agriculture and fishing have been furnished by the Food and Agriculture Organization of the United Nations (FAO). They refer mainly to the long-term trends in the growth of agricultural output and the food supply, the output of principal agricultural commodities and fish production.

Agricultural production is defined to include all crops and livestock products except those used for seed and fodder and other intermediate uses in agriculture; for example deductions are made for eggs used for hatching. Intermediate input of seeds and fodder and similar items refer to both domestically produced and imported commodities. For further details, reference may be made to *FAO Statistical Yearbook*. FAO data are also available through the Internet at http://faostat3.fao.org.

### Table 28: Agricultural production

"Agriculture" relates to the production of all crops and livestock products. The "Food Index" includes those commodities which are considered edible and contain nutrients. The index numbers of agricultural output and food production are calculated by the Laspeyres formula with the base year period 2004-2006. The latter is provided in order to diminish the impact of annual fluctuations in agricultural output during base years on the indices for the period. Production quantities of each commodity are weighted by 2004-2006 average national producer prices and summed for each year. The index numbers are based on production data for a calendar year. These may differ in some instances from those actually produced and published by the individual countries themselves due to variations in concepts, coverage, weights and methods of calculation. Efforts have been made to estimate these methodological differences to achieve a better international comparability of data. Detailed data on agricultural production are published by FAO in its *Statistical Yearbook*.

### Table 29: Oil crops

Oil crops, or oil bearing crops, are those crops yielding seeds, nuts or fruits which are used mainly for the extraction of culinary or industrial oils, excluding essential oils. In this table, data for oil crops represent the total production of oil seeds, oil nuts and oil fruits harvested in the year indicated. Naturally, the total production of oil crops is never processed into oil in its entirety, since depending on the crop, important quantities are also used for seed, feed and food. However, although oil extraction rates vary from country to country, in this table the same extraction rate for each crop has been applied for all countries. Moreover, it should be borne in mind that the crops harvested during the latter months of the year are generally processed into oil during the following year.

In spite of these deficiencies in coverage, extraction rates and time reference, the data reported here are useful as they provide a valid indication of year to year changes in the size of total oil crop production. The actual production of vegetable oils in the world is about 85 percent of the production reported here. In addition, about three million tonnes of vegetable oils are produced every year from crops which are not included among those defined above. The most important of these oils are maize germ oil and rice bran oil. The actual world production of cake/meal derived from oil crops is also about 86 percent of the production reported.

### Table 30: Cereals

The data on the production of cereals relate to crops harvested for dry grain only. Cereals harvested for hay, green feed or used for grazing are excluded.

### Table 31: Roundwood

The data on roundwood refer to wood in the rough, wood in its natural state as felled or otherwise harvested, with or without bark, round, split, roughly squared or in other form (i.e. roots, stumps, burls, etc.). It may also be impregnated (e.g. telegraph poles) or roughly shaped or pointed. It comprises all wood obtained from removals, i.e. the quantities removed from forests and from trees outside the forest, including wood recovered from natural, felling and logging losses during the period—calendar year or forest year.

### Table 32: Fish Production

The data cover (i) capture production from marine and inland fisheries and (ii) aquaculture, and are expressed in terms of live weight. They include fish, crustaceans, molluscs and other aquatic vertebrates (such as frogs and river turtles) and invertebrates (such as sea cucumbers and sea urchins). But they exclude sponges, corals, pearls, seaweed, crocodiles, and aquatic mammals (such as whales and dolphins). The flag of the vessel is considered as the paramount indication of the nationality of the catch. Marine fisheries data include landings by domestic craft in foreign ports and exclude landings by foreign craft in domestic ports. To separate aquaculture from capture fisheries production, at least two criteria must apply i.e., the human intervention in one or more of the phases of the growth cycle, and individual, corporate or state ownership of the organism reared and harvested. Data are published in the FAO *Yearbook of Fishery Statistics*.

### Table 33: Fertilizers

The data generally refer to the fertilizer year 1 July-30 June. Nitrogenous fertilizers: data refer to the nitrogen content of commercial inorganic fertilizers. Phosphate fertilizers: data refer to commercial phosphoric acid (P2O5) of super phosphates, ammonium phosphate and basic slag. Potash fertilizers: data refer to K2O content of commercial potash, muriate, nitrate and sulphate of potash, manure salts, kainit and nitrate of soda potash.

### Table 34: Livestock

The data refer to livestock numbers grouped into twelve-month periods ending 30 September of the year stated and cover all domestic animals irrespective of their age and place or purpose of their breeding.

## Chapter XII: Manufacturing

The Industrial Commodity Production Statistics Database (available at http://unstats.un.org/unsd/industry) contains data on production of industrial commodities from about 200 countries and areas based on a list of about 600 commodities. It is the basis for the publication of *Industrial Commodity Statistics Yearbook (Volume I and II)*, a publication prepared by the Statistics Division of the Department for Economic and Social Affairs of the United Nations Secretariat with the generous co-operation of national statistical offices. A historical series of commodity data are available back to 1950 but only a series, based on the current commodity classification, from 1995 is available in the current database available online.

The Industrial Commodity Production Statistics Database is based on the data obtained from the United Nations Questionnaire on Industrial Commodity Production Statistics, which in turn is based on the definitions of the products from the Central Product Classification (CPC) Version 1.1 and the Harmonized Commodity Description and Coding System (HS) 2002. The data cover products produced by mining, manufacturing and electricity and gas units, i.e. units classified in sections B, C, and D of the International Standard Industrial Classification of All Economic Activities (ISIC) Revision 4, whether as primary or secondary production. The data from the country questionnaires are supplemented with information from publications of other specialized agencies and intergovernmental bodies.

Data reported for the products reflect value and volume of production sold during the survey period, which is defined as the production carried out at some time, which has been sold (invoiced) during the reference period. A number of countries have been able to provide data only based on the "Prodcom list", used by the European Community for statistics on industrial products, rather than the CPC-based codes used in this publication. Whenever possible, the Prodcom-based data has been converted into the aggregations necessary for this publication. While information has been collected from countries in terms of national currencies, the data have been converted to US dollars to facilitate comparison among countries. The CPC classification and its relation or correspondence to other classifications as well as the methodology for conversion to US dollars are described in the latest edition of the *Industrial Commodity Statistics Yearbook Volume I and II*.

### Table 35: Sugar

The statistics on sugar were obtained from the database and the Sugar Yearbook of the International Sugar Organization. The data shown cover the production and consumption of centrifugal sugar from both beet and cane, and refer to calendar years.

The consumption data relate to the apparent consumption of centrifugal sugar in the country concerned, including sugar used for the manufacture of sugar-containing products whether exported or not and sugar used for purposes other than human consumption as food. Unless otherwise specified, the statistics are expressed in terms of raw value (i.e. sugar polarizing at 96 degrees). The world total also includes data for countries not shown separately whose sugar consumption was less than 10,000 metric tons.

**Table 36: Beer** (CPC code: 24310-0) refer to beer made from malt.

**Table 37: Cigarette** (25010-1) refers to cigarettes containing tobacco.

**Table 38: Paper and paperboard** (FAO series) refer to newsprint, printing and writing paper, construction paper and paperboard, household and sanitary paper, special thin paper,wrapping and packaging paper and paperboard.

**Table 39: Aluminium, unwrought** (41431-1) refer to unwrought aluminium, not alloyed.

**Table 40: Radio receivers** (47310-1) refer to Radio-broadcast receivers capable of operating without an external source of power, including apparatus capable of receiving also radio-telephony or radio-telegraphy, whether combined with sound recording or reproducing apparatus or not; radio-broadcast receivers not capable of operating without an external source of power, of a kind used in motor vehicles, including apparatus capable of receiving also radio-telephony or radio-telegraphy, whether combined with

sound recording or reproducing apparatus or not; other radio-broadcast receivers, including apparatus capable of receiving also radio-telephony or radio-telegraphy, whether combined with sound recording or reproducing apparatus or not.

**Table 41: Television receivers** (47313-2) refer to television receivers, colour, black and white and other monochrome. Also includes televison receivers with a video recorder or player, flat panel colour tv receivers, tuner blocks for CTV/VCR and cable tv receiver units and satellite tv receivers/decoders.

**Table 42: Household washing and drying machines** (44812-1) refer to household washing machines and drying machines, including machines that both wash and dry.

**Table 43: Machine tools** (44213-0 & 44214-0) refer to two commodities i.) to lathes including turning centres for removing metal, horizontal, numerically controlled or otherwise; and ii.) machine-tools (including way-type unit head machines) for drilling, boring, milling, threading or tapping by removing metal, other than lathes and turning centres.

## Chapter XIII: Energy

The Energy Statistics Yearbook (available at http://unstats.un.org/unsd/energy/yearbook) is a comprehensive collection of international energy statistics for over 220 countries and areas. The yearbook is prepared by the Statistics Division of the Department for Economic and Social Affairs of the United Nations Secretariat. The yearbook is produced every year with newly available data on energy production, trade, stock changes, bunkers and consumption for all countries and areas, and a historical series back to 1950 are available. The data are compiled primarily from the annual energy questionnaire distributed by the United Nations Statistics Division and supplemented by official national statistical publications, as well as publications from international and regional organizations. Where official data are not available or are inconsistent, estimates are made by the Statistics Division based on governmental, professional or commercial materials.

The period to which the data refer is the calendar year, with the exception of the data of the following countries which refer to the fiscal year: Afghanistan and Iran (Islamic Rep. of) – beginning 21 March of the year stated; Australia, Bangladesh, Bhutan, Egypt (for the latter two, electricity only), Nepal - ending June of the year stated; Pakistan - starting July of the year stated; India, Myanmar and New Zealand – beginning April of the year stated. Data on a per capita basis use population data from the United Nations Population Division as a denominator.

### Table 44: Production, trade and consumption of commercial energy

Data are presented in metric tons of oil equivalent (TOE), to which the individual energy commodities are converted in the interests of international uniformity and comparability. To convert from original units to TOE, the data in original units (metric tons, terajoules, kilowatt hours, cubic metres) are multiplied by conversion factors. For a list of the relevant conversion factors and a detailed description of methods, see the Energy Statistics Yearbook.

Included in the production of commercial primary energy for solids are hard coal, lignite, peat and oil shale; liquids are comprised of crude petroleum, natural gas liquids, other hydrocarbons, additives and oxygenates, and liquid biofuels; gas comprises natural gas and primary steam/heat; and electricity is comprised of primary electricity generation from hydro, nuclear, geothermal, wind, tide, wave and solar sources.

Changes in stocks, imports and exports refer to all primary and secondary forms of commercial energy (including feedstocks). Aviation bunkers refer to bunkers of aviation gasolene and jet fuel. Marine bunkers refer to bunkers of hard coal, gas-diesel oil and residual fuel oil. International trade of energy commodities is based on the "general trade" system, that is, all goods entering and leaving the national boundary of a country are recorded as imports and exports.

Included in the consumption of commercial energy for (1) solids are consumption of primary forms of solid fuels, net imports and changes in stocks of secondary fuels; (2) liquids are comprised of energy use of oil products including feedstocks and refinery gas, and the direct use of crude petroleum; (3) gases include the consumption of natural gas and primary heat, net imports and changes in stocks of manufactured gases; and (4) electricity is comprised of production of primary electricity and net imports of electricity. Consumption for some of the petroleum products is negative due to the exclusion of inter-product transfers from the calculations. Negative consumption of electricity is due to negligible primary electricity production as compared to net exports. More generally, negative consumption can represent a residual or statistical difference between production and exports when a particular product is mainly exported.

An unallocated column has been created in the table in order to balance out the difference between the total consumption column and the result of the formula production + imports - exports – bunkers +/- changes in stocks. This inequality occurs primarily because of the exclusion of non-energy use of petroleum products.

### Table 45: Production of selected energy commodities

The data on production refer to the first stage of production: accordingly, for hard coal the data refer to mine production; for briquettes to the output of briquetting plants; for crude petroleum and natural gas

to production at oil and gas wells; for natural gas liquids to production at wells and processing plants; for refined petroleum products to gross refinery output; for cokes and coke-oven gas to the output of ovens;

for other manufactured gas to production at gas works, blast furnaces or refineries; and for electricity to the gross production of generating plants. The definitions of the energy commodities presented in the table can be found in the Energy Statistics Yearbook (see http://unstats.un.org/unsd/energy/yearbook).

## Chapter XIV: Environment

### Table 46: Land

The data on land are compiled by the Food and Agriculture Organization of the United Nations (FAO). FAO's definitions of the land categories are as follows:

| | |
|---|---|
| Land area | Total area excluding area under inland water bodies. The definition of inland water bodies generally includes major rivers and lakes |
| Arable land | Land under temporary crops (multiple cropped areas are counted only once); temporary meadows for mowing or pasture; land under market and kitchen gardens; and land temporarily fallow (less than five years). Abandoned land resulting from shifting cultivation is not included in this category. Data for "arable land" are not meant to indicate the amount of land that is potentially cultivable. |
| Permanent crops | Land cultivated with crops that occupy the land for long periods and need not be replanted after each harvest, such as cocoa, coffee and rubber. This category includes land under flowering shrubs, fruit trees, nut trees and vines, but excludes land under trees grown for wood or timber |
| Forest | In the Global Forest Resources Assessment 2010 the following definition is used for forest: Land spanning more than 0.5 hectares with trees higher than 5 metres and a canopy cover of more than 10 percent, or trees able to reach these thresholds in situ. It does not include land that is predominantly under agricultural or urban land use. |

### Table 47: CO2 emissions estimates

The source of the data presented on the emissions of carbon dioxide (CO2) is the Carbon Dioxide Information Analysis Centre (CDIAC) of the Oak Ridge National Laboratory in the USA, see http://cdiac.ornl.gov/. The CDIAC estimates of CO2 emissions are derived primarily from United Nations energy statistics on the consumption of liquid and solid fuels and gas consumption and flaring, and from cement production estimates from the Bureau of Mines of the U.S. Department of Interior. The emissions presented in the table are in units of 1,000 metric tons of $CO_2$; to convert $CO_2$ into carbon, divide the data by 3.667. Full details of the procedures for calculating emissions are given in Global, Regional, and National Annual $CO_2$ Emissions Estimates from Fossil Fuel Burning, Hydraulic Cement Production, and Gas Flaring and on the CDIAC web site. Relative to other industrial sources for which CO2 emissions are estimated, statistics on gas flaring activities are sparse and sporadic. In countries where gas flaring activities account for a considerable proportion of the total $CO_2$ emissions, the sporadic nature of gas flaring statistics may produce spurious or misleading trends in national $CO_2$ emissions over the period covered by the table.

### Table 48: Ozone-depleting chlorofluorocarbons (CFCs)

Chlorofluorocarbons (CFCs) are synthetic compounds formerly used as refrigerants and aerosol propellants and known to be harmful to the ozone layer of the atmosphere. In the Montreal Protocol on Substances that Deplete the Ozone Layer, CFCs to be measured are found in vehicle air conditioning units, domestic and commercial refrigeration and air conditioning/heat pump equipment, aerosol products, portable fire extinguishers, insulation boards, panels and pipe covers, and pre-polymers. The Parties to the Montreal Protocol on Substances that Deplete the Ozone Layer report data on CFCs to the Ozone Secretariat of the United Nations Environment Programme, see http://ozone.unep.org/. The data on CFCs are shown in ozone depleting potential (ODP) tons that are calculated by multiplying the quantities in metric tons reported by the Parties, by the ODP of that sub-stance, and added together. Consumption is defined as production plus imports, minus exports of controlled substances. Feedstocks are exempt and are therefore subtracted from the imports and/or production. Similarly, the destroyed amounts are also subtracted. Negative

numbers can occur when destruction and/or exports exceed production plus imports, implying that the destruction and/or exports are from stockpiles.

### Table 49: Water supply and sanitation coverage

The proportion of the population with sustainable access to an improved water source, urban and rural, is the percentage of the population who use any of the following types of water supply for drinking: piped water, public tap, borehole or pump, protected well, protected spring or rainwater. Improved water sources do not include vendor-provided water, bottled water, tanker trucks or unprotected wells and springs. Proportion of the urban and rural population with access to improved sanitation refers to the percentage of the population with access to facilities that hygienically separate human excreta from human, animal and insect contact. Facilities such as sewers or septic tanks, poor flush latrines and simple pit or ventilated improved pit latrines are assumed to be adequate, provided that they are not public. To be effective, facilities must be correctly constructed and properly maintained. The data are estimated by the WHO/UNICEF Joint Monitoring Programme for Water Supply and Sanitation (JMP) based on available country sources, see www.wssinfo.org for further information.

## Chapter XV: Science and technology

Research and experimental development (R&D) is defined as creative work undertaken on a systematic basis in order to increase the stock of knowledge, including knowledge of humanity, culture and society, and the use of this stock of knowledge to devise new applications. More information can be found on the UNESCO Institute for Statistics web site www.uis.unesco.org.

### Table 50: Human resources in research and development (R & D)

The data presented on human resources in research and development (R&D) are compiled by the UNESCO Institute for Statistics. Data for certain countries are provided to UNESCO by OECD, Eurostat and the Latin-American Network on Science and Technology Indicators (RICYT). The definitions and classifications applied by UNESCO in the table are based on those set out in the Frascati Manual (OECD, 2002). The three categories of personnel shown are defined as follows:

| | |
|---|---|
| Researchers | Professionals engaged in the conception or creation of new knowledge, products, processes, methods and systems and also in the management of the projects concerned. Postgraduate students at the PhD level (ISCED level 8) engaged in R&D are considered as researchers. |
| Technicians and equivalent staff | Persons whose main tasks require technical knowledge and experience in one or more fields of engineering, physical and life sciences (technicians) or social sciences and humanities (equivalent staff). They participate in R&D by performing scientific and technical tasks involving the application of concepts and operational methods, normally under the supervision of researchers. |
| Other supporting staff | Skilled and unskilled craftsmen, secretarial and clerical staff participating in R&D projects or directly associated with (or providing services to researchers involved in) such projects. |

Headcount data reflect the total number of persons employed in R&D, independently from their dedication. Full-time equivalent (FTE) may be thought of as one person-year. Thus, a person who normally spends 30% of his/her time on R&D and the rest on other activities (such as teaching, university administration and student counselling) should be considered as 0.3 FTE. Similarly, if a full-time R&D worker is employed at an R&D unit for only six months, this results in an FTE of 0.5.

### Table 51: Gross domestic expenditure on R & D

The data presented on gross domestic expenditure on research and development are compiled by the UNESCO Institute for Statistics. Data for certain countries are provided to UNESCO by OECD, EUROSTAT and the Network on Science and Technology Indicators (RICYT). Gross domestic expenditure on R&D (GERD) is total intramural expenditure on R&D performed on the national territory during a given period. It includes R&D performed within a country and funded from abroad but excludes payments made abroad for R&D. The sources of funds for GERD are classified according to the following five categories:

| | |
|---|---|
| Business enterprise funds | Funds allocated to R&D by all firms, organizations and institutions whose primary activity is the market production of goods and services (other than the higher education sector) for sale to the general public at an economically significant price, and those private non-profit institutes mainly serving these firms, organizations and institutions. |
| Government funds | Funds allocated to R&D by all departments, offices and other bodies which furnish, but normally do not sell to the community, those common services, other than higher education, which cannot otherwise be conveniently and economically provided, as well as those that administer the state and the economic and |

| | |
|---|---|
| | social policy of the community. Public enterprises, mainly engaged in market production and sale of goods and services, funds are included in the business enterprise funds sector. Government funds also include private non-profit institutes controlled and mainly financed by government, not administered by the higher education sector. |
| Higher education funds | Funds allocated to R&D by institutions of higher education comprising all universities, colleges of technology, other institutions providing tertiary education (i.e. ISCED 5, 6, 7 or 8), whatever their source or finance or legal status. They also include all research institutes, experimental stations and clinics operating under the direct control of or administered by or associated with higher education institutions. |
| Private non-profit funds | Funds allocated to R&D by non-market, private non-profit institutions serving households (i.e. the general public), as well as by private individuals and households. |
| Funds from abroad | Funds allocated to R&D by all institutions and individuals located outside the political borders of a country; and all international organizations (except business enterprises), including facilities and operations within the country's borders. |

The absolute figures for R&D expenditure should not be compared country by country. Such comparisons would require the conversion of national currencies into a common currency by means of special R&D exchange rates. Official exchange rates do not always reflect the real costs of R&D activities and comparisons that are based on such rates can result in misleading conclusions, although they can be used to indicate a gross order of magnitude.

## Chapter XVI: International merchandise trade

The *International Trade Statistics Yearbook* (ITSY) provides an overview of the latest trends of trade in goods and services of most countries and areas in the world, a publication prepared by the Statistics Division of the Department for Economic and Social Affairs of the United Nations Secretariat. The yearbook, see http://comtrade.un.org/pb/, is released in two volumes; Volume I is compiled earlier in the year to present an advanced overview of international merchandise trade from the previous year, Volume II, generally released six months later, contains detailed tables showing international trade for individual commodities and 11 world trade tables covering trade values and indices. Volume II also contains updated versions of world trade tables, for example Table 52 in this yearbook. The tables in this yearbook are also updated monthly (Table 52) or quarterly (Tables 6, 53, and 54) in the United Nations Monthly Bulletin of Statistics and on the trade statistics website, see http://unstats.un.org/unsd/trade/data/tables.asp#annual.

The statistics in this Yearbook have been compiled by national statistical authorities largely consistent with the United Nations recommended International Merchandise Trade Statistics, Concepts and Definitions 2010 (IMTS 2010). Depending on what parts of the economic territory are included in the statistical territory, the trade data-compilation system adopted by a country (its trade system) may be referred to as general or special.

| | |
|---|---|
| General trade system | The statistical territory coincides with the economic territory. Consequently, it is recommended that the statistical territory of a country applying the general trade system comprises all applicable territorial elements. In this case, imports include goods entering the free circulation area, premises for inward processing, industrial free zones, premises for customs warehousing or commercial free zones and exports include goods leaving those territorial elements |
| Special trade system | (strict definition) The statistical territory comprises only a particular part of the economic territory, so that certain flows of goods which are in the scope of IMTS 2010 are not included in either import or export statistics of the compiling country. The strict definition of the special trade system is in use when the statistical territory comprises only the free circulation area, that is, the part within which goods "may be disposed of without customs restriction". Consequently, in such a case, imports include only goods entering the free circulation area of a compiling country and exports include only goods leaving the free circulation area of a compiling country |
| | (relaxed definition) (a) goods that enter a country for, or leave it after, inward processing, as well as (b) goods that enter or leave an industrial free zone, are also recorded and included in international merchandise trade statistics |

Generally, all countries report their detailed merchandise trade data according to the Harmonized Commodity Description and Coding System (HS) and the data correspond and are then presented by Standard International Trade Classifications (SITC, Rev.3). Data refer to calendar years; however, for those countries which report according to some other reference year, the data are presented in the year which covers the majority of the reference year used by the country.

FOB-type values include the transaction value of the goods and the value of services performed to deliver goods to the border of the exporting country. CIF-type values include the transaction value of the goods, the value of services performed to deliver goods to the border of the exporting country and the value of the services performed to deliver the goods from the border of the exporting country to the border of the importing country. Therefore, data for the statistical value of imported goods are presented as a CIF-type value and the statistical value of exported goods as an FOB-type value.

Conversion of values from national currencies into United States dollars is done by means of currency conversion factors based on official exchange rates. Values in currencies subject to fluctuation are converted into United States dollars using weighted average exchange rates specially calculated for this purpose. The weighted average exchange rate for a given currency for a given year is the component monthly factors, furnished by the International Monetary Fund in its International Financial Statistics publication, weighted by the value of the relevant trade in each month; a monthly factor is the exchange rate (or the simple average rate) in effect during that month. These factors are applied to total imports and exports and to the trade in individual commodities with individual countries.

### Table 52: Total imports and exports by regions and countries or areas

Figures on the total imports and exports of countries (or areas) presented in this table are mainly taken from International Financial Statistics published monthly by the International Monetary Fund (IMF) but also from other sources such as national publications and websites and the United Nations *Monthly Bulletin of Statistics* Questionnaire, see the *International Trade Statistics Yearbook* for further details. Estimates for missing data are made in order to arrive to regional totals but are otherwise not shown. The estimation process is automated using quarterly year-on-year growth rates for the extrapolation of missing quarterly data (unless quarterly data can be estimated using available monthly data within the quarter). The conversion factors applied to data in this table are published quarterly in the United Nations *Monthly Bulletin of Statistics* and are also available on the United Nations trade statistics website: http://unstats.un.org/unsd/trade/data/tables.asp#annual.

### Table 53: Total imports and exports by country or area

This table shows the volume and unit value (or price) indices for total exports and imports as well as the terms of trade and purchasing power of exports for individual countries or areas in U.S. dollars and with the year 2000 as base year. The volume and unit value/price indices are as compiled by countries. They show the changes in the volume (volume index) and the average price (unit value/price index) of total imports and exports. Using these indices UNSD calculates the terms of trade indices (export unit value/price indices divided by the corresponding import unit value/price indices), and the index of the purchasing power of exports (the terms of trade multiplied by the volume index of exports). The data are obtained from similar sources as Table 52. The missing data required for the calculation of regional totals are estimated using a variety of methods and additional data sources. All estimates are reviewed and adjusted where necessary.

### Table 54: Manufactured goods exports

Manufactured goods are here defined to comprise sections 5 through 8 of the Standard International Trade Classification (SITC). These sections are: chemicals and related products, manufactured goods classified chiefly by material, machinery and transport equipment and miscellaneous manufactured articles. Fuels are here defined to comprise all the products in section 3 of the SITC. These products are: coal, coke and briquettes, petroleum, petroleum products and related materials gas and electric current. The unit value indices are obtained from national sources, except those of a few countries which the United Nations Statistics Division compiles using their quantity and value figures. For countries that do not compile indices for manufactured goods exports and fuel imports conforming to the above definition, sub-indices are aggregated to approximate an index of SITC sections 5-8 and SITC section 3 respectively. Unit value indices obtained from national indices are rebased, where necessary, so that 2000=100. Indices in national currency are converted into U.S. dollars using conversion factors obtained by dividing the weighted average exchange rate of a given currency in the current period by the weighted average exchange rate in the base period. All aggregate unit value indices are current period weighted. The indices in Special Drawing Rights (SDRs) are calculated by multiplying the equivalent aggregate indices in U.S. dollars by conversion factors obtained by dividing the SDR/$US exchange rate in the current period by the rate in the base period. The quantum indices are derived from the value data and the unit value indices. All aggregate quantum indices are base period weighted. Total imports and exports used in the calculations are, in general, those published in Table 52.

## Chapter XVII: International tourism and transport

The data on international tourism have been supplied by the World Tourism Organization (UNWTO) from detailed tourism information published in either the *Yearbook of Tourism Statistics* or *Compendium of Tourism Statistics,* see www.unwto.org/statistics for further information. For statistical purposes, the term "international visitor" describes "any person who travels to a country other than that in which he/she has his/her usual residence but outside his/her usual environment for a period not exceeding 12 months and whose main purpose of visit is other than the exercise of an activity remunerated from within

the country visited". There are four series presented in the UNWTO *yearbook* and *compendium*, but only one series is selected to be presented in this yearbook, generally based on the following priority order to best describe an "international visitor";

| Order | Series code | Series name |
|---|---|---|
| 1 | TF | *Arrivals of non-resident tourists at national borders* are visitors who stay at least one night in a collective or private accommodation in the country visited (excludes same-day visitors) |
| 2 | VF | *Arrivals of non-resident visitors at national borders* are visitors as defined in series "TF" as well as same-day visitors who do not spend the night in a collective or private accommodation in the country visited |
| 3 | TCE | *Arrivals of non-resident tourists in all types of accommodation establishments* |
| 4 | THS | *Arrivals of non-resident tourists in hotels and similar establishments* |

The figures do not include immigrants, residents in a frontier zone, persons domiciled in one country or area and working in an adjoining country or area, members of the armed forces and diplomats and consular representatives when they travel from their country of origin to the country in which they are stationed and vice-versa. The figures also exclude persons in transit who do not formally enter the country through passport control, such as air transit passengers who remain for a short period in a designated area of the air terminal or ship passengers who are not permitted to disembark. This category includes passengers transferred directly between airports or other terminals. Other passengers in transit through a country are classified as visitors.

### Table 55: Tourist/visitor arrivals by region of origin

### Table 56: Tourist/visitor arrivals and tourism expenditure

Data on arrivals of non-resident (or international) visitors may be obtained from different sources. In some cases data are obtained from border statistics derived from administrative records (police, immigration, traffic counts and other types of controls), border surveys and registrations at accommodation establishments. Unless otherwise stated, table 55 shows the number of non-resident tourist/visitor arrivals at national borders classified by their region of origin. Totals correspond to the total number of arrivals from the regions indicated in the table. When a person visits the same country several times a year, an equal number of arrivals is recorded. Likewise, if a person visits several countries during the course of a single trip, his/her arrival in each country is recorded separately. Consequently, arrivals cannot be assumed to be equal to the number of persons travelling.

Expenditure associated with tourism activity of visitors has been traditionally identified with the travel item of the Balance of Payments (BOP): in the case of inbound tourism, those expenditures in the country of reference associated with non-resident visitors are registered as "credits" in the BOP and refer to "travel receipts". The new conceptual framework approved by the United Nations Statistical Commission in relation to the measurement of tourism macroeconomic activity (the so-called Tourism Satellite Account) considers that "tourism industries and products" includes transport of passengers. Consequently, a better estimate of tourism-related expenditures by resident and non-resident visitors in an international scenario would be, in terms of the BOP, the value of the travel item plus that of the passenger transport item. Nevertheless, users should be aware that BOP estimates include, in addition to expenditures associated with visitors, those related to other types of individuals. The data published should allow international comparability and therefore correspond to those published by the International Monetary Fund and provided by the Central Banks, any exceptions are listed within the *Compendium of Tourism Statistics* and the *Yearbook of Tourism Statistics,* see www.unwto.org/statistics for further information.

### Table 57: Outbound tourism

Outbound tourism includes departures (in thousands) as well as expenditure in million US dollars. Indicators on expenditure (in other countries) are equivalent to those for inbound tourism but are registered as "debits" in the BOP's travel and passenger transport items. The data published are also provided by the International Monetary Fund and the same previous warning is applicable. More detailed tourism information from the World Tourism Organization is available in the *Compendium of Tourism Statistics*, see http://www.unwto.org/statistics; and information on the balance of payments is published by the International Monetary Fund in the *Balance of Payments Statistics Yearbook*.

## Chapter XVIII: International finance

### Table 58: External debt stocks and flows, long term

The data on external debt for developing countries were extracted from World Bank databases, see http://data.worldbank.org/indicator/ and as published in the *International Debt Statistics*. In this table, developing countries are those in which 2010 GNI per capita was below $12,276. The World Bank Debtor Reporting System (DRS) maintains statistics on the external debt of developing countries on a loan-by-loan basis. The estimated total external indebtedness of developing countries

is a combination of DRS data and other information obtained from creditors through the debt data collection systems of other agencies such as the Bank for International Settlements (BIS) and the Organization for Economic Co-operation and Development (OECD), supplemented by market sources and estimates made by country economists of the World Bank and desk officers of the International Monetary Fund (IMF). Long-term external debt has three components: a) public debt, b) publicly guaranteed debt, and c) private non-guaranteed external debt and data are further disaggregated by type of creditor. The break-down and definitions found in the table are as follows:

| | |
|---|---|
| Total long-term debt | Debt that has an original or extended maturity of more than one year and that is owed to non-residents and is repayable in foreign currency, goods, or services. |
| (a) Public and (b) publicly guaranteed | (a) an external obligation of a public debtor, including the national government, a political subdivision (or an agency of either), and autonomous public bodies<br>(b) an external obligation of a private debtor that is guaranteed for repayment by a public entity |
| Official creditors | |
| Multilateral | Loans from international organizations (multilateral loans), excluding loans from funds administered by an inter-national organization on behalf of a single donor government. The latter are classified as loans from governments |
| IBRD | International Bank for Reconstruction and Development |
| IDA | International Development Association |
| Bilateral | Loans from governments (bilateral loans) and from autonomous public bodies |
| Private creditors | |
| Bonds | Publicly issued and privately placed bonds; |
| Commercial banks | Loans from private banks and other private financial institutions |
| Other private | External liabilities on account of nationalized properties and unclassified debts to private creditors and includes credits from manufacturers, exporters, or other suppliers of goods |
| (c)Private non-guaranteed | An external obligation of a private debtor that is not guaranteed for repayment by a public entity. Public and publicly guaranteed long-term debts are aggregated. |

A distinction is made between the following categories of external public debt:

| | |
|---|---|
| Undisbursed debt | Total public and publicly guaranteed debt undrawn at year end; data for private nonguaranteed debt are not available |
| Commitments | Total amount of long-term loans for which contracts were signed in the year specified; data for private nonguaranteed debt are not available. |
| Disbursements | Drawings on outstanding loan commitments during the year specified |
| Principal repayments | Actual repayments of principal amortization made in foreign currencies, goods or services in the year specified; |
| Net flows | (Or net lending) are disbursements minus principal repayments |
| Interest payments | Actual repayments of interest payments made in foreign currencies, goods or services in the year specified |
| Net transfers | Net flows minus interest payments or disbursements minus total debt service payments |
| Total debt service | Sum of principal repayments and interest payments actually made in the year specified. |

All data related to public and publicly guaranteed debt are from debtors except for those on lending by some multi-lateral agencies, in which case the data are taken from the creditors' records. These creditors include the African Development Bank, the Asian Development Bank, the Central Bank for Economic Integration, the Inter-American Development Bank, the International Bank for Reconstruction and Development (IBRD) and the International Development Association (IDA). (The IBRD and IDA are components of the World Bank.)

The data referring to public and publicly guaranteed debt do not include data for (a) transactions with the International Monetary Fund, (b) debt repayable in local currency, (c) direct investment and (d) short term debt (that is, debt with an original maturity of less than a year). The data referring to private non-guaranteed debt also exclude the above items but include contractual obligations on loans to direct investment enterprises by foreign parent companies or their affiliates.

### Table 59: External debt stocks, public and publicly guaranteed (long-term)

The countries included in the table are those for which data are sufficiently reliable to provide a meaningful presentation of debt outstanding and future service payments and follow the same definitions and source as Table 58.

## Chapter XIX: Development assistance

### Table 60: Disbursements of bilateral and multilateral official development assistance and official aid to individual recipients

The table presents estimates of flows of financial resources to individual recipients either directly (bilaterally) or through multilateral institutions (multilaterally). The multilateral institutions include the World Bank Group, regional banks, financial institutions of the European Union and a number of United Nations institutions, programmes and trust funds. The source of data is the Development Assistance Committee (DAC) of OECD to which member countries reported data on their flow of resources to developing countries and territories, countries and territories in transition, and multilateral institutions. Additional information on definitions, methods and sources can be found in OECD's *Geographical Distribution of Financial Flows to Developing Countries* publication, also see http://stats.oecd.org/ for further information.

### Table 61: Net official development assistance from DAC countries to developing countries and multilateral organizations

The table presents the development assistance expenditures of donor countries. This table includes donors' contributions to multilateral agencies; therefore, the overall totals differ from those in table 60, which include disbursements by multilateral agencies.

### Table 62: Socio-economic development assistance through the United Nations system

The table includes data on expenditures on operational activities for development undertaken by the organizations of the United Nations system. Operational activities encompass, in general, those activities of a development cooperation character that seek to mobilize or increase the potential and capacity of countries to promote economic and social development and welfare, including the transfer of resources to developing countries or regions in a tangible or intangible form. Expenditures on operational activities for development are financed from contributions from governments and other official and non-official sources to a variety of funding channels in the United Nations system. These include United Nations funds and programmes such as contributions to the United Nations Development Programme, contributions to funds administered by the United Nations Development Programme, and regular (assessed) and other extra budgetary contributions to specialized agencies. Data are taken from the (as yet unpublished) 2012 report of the Secretary-General to the General Assembly on operational activities for development.

***

# Annex II: Notes techniques

## Chapitre I: Aperçu mondial et régional

### Tableau 1: Statistiques mondiales – séries principales

Les séries d'agrégats mondiaux sur la population, la production, le commerce extérieur et les finances ont été établies à partir de publications statistiques et bases de données des Nations Unies et les institutions spécialisées et autres organismes. On doit se référer aux sources pour tous renseignements détaillés sur les méthodes de calcul et la portée des statistiques.

### Tableau 2: Population, taux d'accroissement, taux de natalité, taux de mortalité, superficie et densité

Le tableau présente les estimations mondiales et régionales de la population, des taux d'accroissement de la population, des taux bruts de natalité et de mortalité, de la superficie et de la densité de population. Sauf indication contraire, tous les chiffres sont des estimations de l'ordre de grandeur et comportent une marge d'erreur.

Les estimations de la population et tous les taux présentés dans ce tableau ont été établis par la Division de la population du Secrétariat des Nations Unies et publiés dans *World Population Prospects: The 2012 Revision*. Les pourcentages annuels moyens de l'accroissement de la population ont été calculés par la Division de la population du Secrétariat des Nations Unies, sur la base d'une formule de taux d'accroissement exponentiel.

Les taux bruts de natalité et de mortalité sont exprimés, respectivement, sur la base du nombre annuel moyen de naissances et de décès par tranche de 1.000 habitants au milieu de l'année. Ces taux sont estimatifs. On a déterminé les superficies totales en additionnant les chiffres correspondant aux différents pays ou régions. La densité est le nombre de personnes de la population par kilomètre carré de la superficie totale.

Le schéma de régionalisation utilisé aux fins de l'établissement de ces estimations est présenté dans l'annexe I. Bien que les totaux de certains continents soient donnés et que tous puissent être déterminés, le schéma de base présente les grandes régions qui sont établies de manière à obtenir une plus grande homogénéité en ce qui concerne l'ampleur des populations, les types de conditions démographiques et la précision des statistiques démographiques.

### Tableau 3: Indices de la production agricole totale et de la production alimentaire

### Tableau 4: Indices de la production agricole totale et de la production par habitant

Les indices du tableau 3 se rapportent à la production agricole, qui est définie comme comprenant à la fois les produits de l'agriculture et de l'élevage. Les semences et les aliments pour les animaux sont exclus de cette définition. Les indices de la production alimentaire se rapportent aux produits considérés comme comestibles et contenant des éléments nutritifs. Le café, le thé et les produits non comestibles sont exclus.

Les indices de la production agricole et de la production alimentaire présentés au tableau 3 sont calculés selon la formule de Laspeyres avec les années 2004-2006 comme période de référence, cela afin de limiter l'incidence, sur les indices correspondant à la période considérée, des fluctuations annuelles de la production agricole enregistrée pendant les années de référence. Les chiffres de production de chaque produit sont pondérés par les prix nationaux moyens à la production pour la période 2004-2006 et additionnés pour chaque année. Les indices sont fondés sur les données de production de l'année civile.

Les indices pour le monde et les régions sont calculés de la même façon que les indices par pays, mais au lieu d'appliquer des prix différents aux produits de base pour chaque groupe de pays, on a utilisé des "prix internationaux" établis d'après la formule de Gheary-Khamis pour tous les groupes de pays. Cette méthode attribue un seul "prix" à chaque produit de base.

Les indices du tableau 4 sont calculés comme ratio entre les indices de la production alimentaire et de la production agricole totale du tableau 3 décrits ci-dessus et les indices de population correspondants. Pour tout renseignement complémentaire sur les séries présentées dans ces tableaux, voir l'*Annuaire Statistique de la FAO* et la base de données FAOSTAT (faostat3.fao.org).

### Tableau 5: Production, commerce et consommation d'énergie commerciale

On trouvera une description de la série de statistiques du tableau 5 dans les notes techniques du chapitre XIII.

### Tableau 6: Importations et exportations totales par régions

On trouvera une description de la série de statistiques du tableau 6 dans les notes techniques du chapitre XVI. La composition des régions est présentée au tableau 52.

## Chapitre II: Population

### Tableau 7: Choix d'indicateurs de l'espérance de vie, de la maternité et de la mortalité

"L'espérance de vie à la naissance", le "taux de mortalité infantile", le "taux de fécondité" et le "taux de mortalité des enfants de moins de 5 ans" sont proviennent des estimations et projections de la Division de la population de l'ONU, qui ont publiées dans *World Population Prospects : The 2012 Revision*. La "mortalité maternelle" sont des estimations de l'Organisation mondiale de la santé, de l'UNICEF, du Fonds des Nations Unies pour la Population, de la Banque mondiale et de la Division de la population de l'ONU publiées dans *Trends in Maternal Mortality: 1990 to 2013*.

"L'espérance de vie à la naissance" est une estimation globale du nombre d'années qu'un nouveau-né de sexe masculin ou féminin vivant, peut s'attendre à vivre. Comme dans beaucoup de pays en développement, les registres d'état civil ne permettent pas d'établir des statistiques fiables et complètes des naissances et des décès, diverses techniques d'estimation ont été utilisées pour calculer l'espérance de vie à partir d'autres sources et notamment des recensements et enquêtes démographiques. Sur la base des statistiques de l'espérance de vie par sexe, on peut calculer la différence entre la longévité à tous les âges. Cependant, ce sont les tendances et les écarts des taux de mortalité infantile et juvénile qui influent de façon prépondérante sur les tendances et les écarts de l'espérance de vie à la naissance dans la plupart des pays en développement. Ainsi, l'espérance de vie à la naissance ne revêt qu'une utilité limitée dans ce pays pour évaluer les niveaux et les écarts de la mortalité à des âges plus avancés.

Le "taux de fécondité" est le nombre moyen d'enfants que mettrait au monde une cohorte hypothétique de femmes si, pendant toutes leurs années d'âge reproductif, les taux de fécondité par âge de l'année en question restaient inchangés.

Exprimée pour 1 000 naissances vivantes, le "taux de mortalité infantile" est le rapport entre le nombre d'enfants décèdes avant d'atteindre l'âge d'un an et l'ensemble des enfants nés vivants. Similairement, le "taux de mortalité des enfants de moins de 5 ans" est le rapport entre le nombre d'enfants décèdes avant d'atteindre l'âge de cinq ans et l'ensemble des enfants nés vivants. Dans la majorité des pays en développement, où les données d'état civil sont déficientes, les sources les plus fiables sont les enquêtes démographiques auprès des ménages. Lorsque de telles enquêtes ne sont pas réalisées, d'autres sources sont utilisées et des estimations générales sont réalisées qui est nécessairement d'une fiabilité limitée. Lorsqu'il n'a pas dans les pays de systèmes complets et exacts d'enregistrement des faits d'état civil, les statistiques de la mortalité infantile par sexe sont difficiles à rassembler ou à estimer avec quelque fiabilité que ce soit en raison des distorsions de la notification; elles ne sont donc pas indiquées ici.

Le "taux de mortalité maternelle" est le rapport entre le nombre de décès maternels survenant pendant la grossesse, l'accouchement ou dans les 42 jours suivant la fin de la grossesse par le nombre d'accouchements et exprimé en décès par 100 000 accouchements. Un décès maternel est défini comme le décès d'une femme survenu au cours de la grossesse ou dans un délai de 42 jours suivant sa terminaison, quelle qu'en soit la durée ou la localisation, pour une cause quelconque déterminée ou aggravée par la grossesse ou les soins qu'elle a motivés, mais ni accidentelle ni fortuite.

### Tableau 8: Population urbaine, population rurale, taux d'accroissement et population de l'agglomeration urbaine la plus peuplée

Les statistiques sur la population urbaine, la population rurale, les taux d'accroissement et population de l'agglomération urbaine la plus peuplée de chaque pays ou zone sont des estimations et projections publiées par la Division de la population du Département des affaires économiques et sociales du Secrétariat des Nations Unies dans *World Urbanization Prospects: The 2011 Revision*. Il n'existe pas de définition reconnue à l'échelle internationale des zones urbaines et rurales parce que les caractéristiques retenues pour distinguer ces deux types de zone diffèrent d'un pays à un autre. Dans la plupart des pays, cette distinction est essentiellement une fonction de la taille des agglomérations. Pour la définition la plus récente des zones urbaines utilisée dans une région ou un pays donné, se reporter à l'*Annuaire démographique*.

L'agglomération urbaine comprend la ville proprement dite et ses faubourgs ou banlieues, et tout territoire à forte densité de population situé à sa périphérie. Les agglomérations urbaines les plus peuplées se rapportent à celles habitées par 750 000 personnes ou plus. Les taux annuels de variation des populations urbaines et rurales se calculent sur la base de la variation annuelle moyenne en pourcentage déterminée à partir des estimations de la population au milieu de l'année.

## Chapitre III: La situation des femmes

### Tableau 9: Proportion de sièges occupes par des femmes au parlement national

Ce tableau indique le pourcentage des sièges des chambres uniques ou basses des parlements nationaux occupés par des femmes. Donnes disponibles en janvier ou février de chaque année (voir les notes de tableau pour plus de détails). Les parlements nationaux peuvent être bicaméraux ou unicaméraux. Ce tableau porte sur la chambre unique des parlements unicaméraux et sur la chambre basse des parlements bicaméraux. Il ne porte pas sur la chambre haute des parlements bicaméraux. Les sièges sont habituellement attribués aux membres à l'issue d'élections parlementaires générales. Certains sièges peuvent aussi être pourvus à l'issue de nominations, d'élections indirectes, de roulement des membres et d'élections partielles. La proportion d'élues est obtenue en

divisant le nombre total de sièges occupés par des femmes par le nombre total de sièges que compte le parlement. Les statistiques ne sont ni pondérées ni normalisées. La source de ce tableau est l'Union interparlementaire, voir www.ipu.org pour plus d'informations.

### Tableau 10: Proportion de femmes salariees dans le secteur non agricole

La proportion des femmes rémunérées dans le secteur non agricole correspond au pourcentage du nombre total de salariés employés dans le secteur agricole qui sont des femmes. Le secteur non agricole comprend l'industrie et les services. L'"industrie" comporte les industries extractives (y compris la production pétrolière), le secteur manufacturier, le bâtiment, l'électricité, le gaz et l'eau, correspondant aux divisions 2 à 5 de la Classification internationale type, par industrie, de toutes les branches d'activité économique (CITI) et aux catégories C à F de la CITI-Rev.3. Les "services" comportent le commerce de gros et de détail, la restauration et l'hôtellerie; les transports, l'entreposage et les communications; les finances, les assurances, l'immobilier et les services commerciaux; et les services communautaires, sociaux et personnels, correspondant aux divisions 6 à 9 de la CITI-Rev.2 et aux catégories G à Q de la CITI-Rev.3.

L'emploi se rapporte aux personnes d'un âge minimum donné qui ont travaillé ou occupé un emploi pendant une période donnée de référence (conformément à la résolution de l'OIT sur les statistiques de la population économiquement active, l'emploi, le chômage et le sous-emploi, adoptée par la treizième Conférence internationale des statisticiens du travail (CIST), octobre 1982). L'emploi salarié se réfère uniquement aux travailleurs salariés ou recevant un traitement et aux personnes dans des emplois rémunérés. Les employés sont généralement rémunérés par des salaires et des traitements, mais leur rémunération peut aussi provenir de commissions, de travaux à la pièce, de primes ou d'avantages en nature tels que repas, logement, formation, etc. Il s'agit de salariés par opposition aux travailleurs indépendants – employeurs, travailleurs à leur compte, membres de coopératives de producteurs et travailleurs familiaux. Les différentes situations d'après la profession sont définies conformément à la résolution de l'OIT concernant la Classification internationale d'après la situation dans la profession (CISP), adoptée par la quinzième Conférence internationale des statisticiens du travail (CIST) (1993). La source de ce tableau est l'Indicateurs des Objectives du Millénaire pour le développement (OMD), voir http://mdgs.un.org pour plus d'informations.

### Tableau 11: Rapport filles/garçons dans l'enseignement primaire, secondaire et supérieur

Ce tableau indique la proportion de filles par rapport aux garçons (indice de parité des sexes) dans l'enseignement primaire, secondaire et supérieur, à savoir le rapport entre le nombre de filles inscrites dans l'enseignement primaire, secondaire et supérieur et le nombre de garçons à chaque niveau. Pour normaliser les effets de la pyramide des âges, l'indice de parité des sexes du taux brut de scolarisation pour chaque niveau d'enseignement est utilisé. La source de ce tableau est l'Institut de statistique de l'UNESCO, voir www.uis.unesco.org pour plus d'informations.

## Chapitre IV: Education

On trouvera des données détaillées et des notes explicatives sur l'éducation sur le site Web de l'Institut de statistique de l'UNESCO www.uis.unesco.org. Ci-après figurent des notes sommaires, relatives aux principaux éléments d'information statistique figurant dans les tableaux 12 et 13.

### Tableau 12: Dépenses publiques afférentes à l'éducation

Les données relatives aux dépenses publiques afférentes à l'éducation se rapportent aux dépenses courantes et en capital de l'éducation engagées par l'administration au niveau local, régional, national/ central, y inclus les municipalités. Les contributions des ménages sont exclues. Les dépenses ordinaires (ou courantes) en éducation se réfèrent aux dépenses couvrant les biens et les services consommés dans l'année en cours et qui doivent être renouvelées périodiquement. Elles comprennent les dépenses en: salaires et avantages du personnel, services achetés ou assurés sous contrat, l'achat d'autres ressources y compris les manuels scolaires et du matériel pour l'enseignement, les services sociaux et d'autres dépenses de fonctionnement telles que les subventions aux étudiants et aux ménages, les fournitures et l'équipement, les réparations légères, les combustibles, les télécommunications, les voyages, les assurances et les loyers. Dépenses en capital pour l'éducation se réfèrent aux dépenses qui couvrent l'achat de biens d'une durée supérieure à une année. Elles peuvent comprendre les dépenses de construction, de rénovation et de grosses réparations de bâtiments, ainsi que l'achat d'équipements ou véhicules.

### Tableau 13: Personnel enseignant au niveau primaire, secondaire et supérieur

Le tableau montre le nombre total d'enseignants à chaque niveau ainsi que la proportion des enseignantes exprimée en pourcentage du nombre total d'enseignants (hommes et femmes) au même niveau au cours d'une année scolaire donnée. Les données proviennent de recensements ou d'enquêtes dans les écoles et des dossiers des enseignants. Les enseignants (ou personnel enseignant) sont définis comme les personnes employées à plein temps ou à temps partiel au sein d'effectifs constitués dans le but

de guider et de diriger le parcours didactique des élèves et étudiants, indépendamment de leurs qualifications et du mécanisme de transmission des connaissances (autrement dit soit face-à-face et/ou à distance). Cette définition exclut le personnel enseignant qui n'a pas de fonctions pédagogiques à la période de référence (par exemple les directeurs ou chefs d'établissements scolaires qui n'enseignent pas) et les personnes qui travaillent ponctuellement ou bénévolement dans des établissements d'enseignement.

## Chapitre V: Nutrition et santé

### Tableau 14: Disponibilités alimentaires

Les estimations sur les disponibilités alimentaires sont publiées par l'Organisation des Nations Unies pour l'alimentation et l'agriculture dans les *Bilans alimentaires* et sur la FAOSTAT base de données (faostat3.fao.org) où les données donnent des estimations des disponibilités alimentaires par habitant par jour en calories. Les disponibilités par habitant exprimées en poids du produit sont calculées à partir des disponibilités totales pour la consommation humaine (c'est-à-dire "Alimentation humaine") en divisant ce chiffre par la population totale qui a effectivement eu accès aux approvisionnements alimentaires durant la période de référence, c'est-à-dire par la population présente (de facto) dans les limites géographiques actuelles du pays. En d'autres termes, les ressortissants du pays vivant à l'étranger durant la période de référence sont exclus, mais les étrangers vivant dans le pays sont inclus. Des ajustements ont été opérés chaque fois que possible pour tenir compte des présences ou des absences de durée limitée, comme dans le cas des immigrants/émigrants temporaires, des touristes et des réfugiés bénéficiant de programmes alimentaires spéciaux (s'il n'a pas été possible de tenir compte des vivres fournis à ce titre à travers les importations). Dans la plupart des cas, les données démographiques utilisées sont les estimations au milieu de l'année publiées par la Division de la population des Nations Unies. Les disponibilités alimentaires par habitant ne représentent donc que les disponibilités moyennes pour l'ensemble de la population et n'indiquent pas nécessairement la consommation effective des individus. Même si elles sont considérées comme une estimation approximative de la consommation par habitant, il importe de ne pas oublier que la consommation peut varier beaucoup selon les individus.

### Tableau 15: Population n'atteignant pas le niveau minimal d'apport calorique

La proportion de la population n'atteignant pas le niveau minimal d'apport calorique est le pourcentage de la population dont la consommation de produits alimentaires reste insuffisante pour atteindre le niveau minimal d'apport calorique. On parle aussi de la prévalence de la sous-alimentation, à savoir le pourcentage de la population sous-alimentée. La source de ce tableau est la base de données FAOSTAT, voir www.faostat3.fao.org pour plus d'informations.

### Tableau 16: Population vivant avec le VIH

La prévalence du VIH dans la tranche d'âge 15-49 ans se mesure comme le nombre de personnes âgées de 15 à 49 ans vivant avec le VIH, divisé par le nombre total de personnes âgées de 15 à 49 ans. ONUSIDA et l'OMS, en consultation étroite avec les pays, ont développé une méthodologie en vue d'obtenir des estimations nationales de prévalence du VIH pour les hommes et les femmes. Des méthodes différentes sont utilisées pour les épidémies généralisées (dans lesque lles la prévalence du VIH dépasse les 1% et où la transmission est principalement hétérosexuelle) et les épidémies de faible ampleur ou concentrées (dans lesquelles la prévalence du VIH touche principalement des groupes ayant des comportements qui les exposent à un risque élevé d'infection). La source de ce tableau est l'ONUSIDA sur le portail de données AIDSInfo, voir http://www.unaids.org pour plus d'informations.

## Chapitre VI: Communication et culture

Les données présentées dans les Tableaux 17 à 18 proviennent de la base de données (voir www.itu.int) et *l'Annuaire statistique*, Services de télécommunications de l'Union internationale des télécommunications.

### Tableau 17: Téléphones

Ce tableau indique le nombre de lignes principales (fixes) en service et les lignes principales en service pour 100 habitants pour les années indiquées. Les lignes principales sont des lignes téléphoniques qui relient 'équipement terminal de l'abonné au Réseau de téléphone public connecté (RTPC) et qui possèdent un accès individualisé aux équipements d'un central téléphonique. Pour la plupart des pays, le nombre de lignes principales en service indiqué comprend également les lignes publiques. Le nombre de lignes principales pour 100 habitants se calcule en divisant le nombre de lignes principales par la population et en multipliant par 100.

### Tableau 18: Utilisation de l'internet

Le tableau indique le pourcentage de personnes qui utilisent l'internet et remplace les statistiques présentées dans des annuaires précédents tels que le nombre (en milliers) d'abonnements à l'internet fixe (filaire) ou le nombre d'abonnements à l'internet fixe (filaire) pour 100 habitants. Cet indicateur permet de mesurer les changements dans l'accès et l'utilisation d'Internet. Dans les pays où de nombreuses personnes accèdent l'internet au travail, à l'école, dans les cybercafés et autres lieux publics, le nombre d'utilisateurs augmente, malgré un nombre limité d'abonnements et le nombre limite des ménages ayant accès a l'internet. Ce

phénomène est notamment illustré dans les pays en voie de développement car on y trouve un nombre croissant d'utilisateurs malgré l'accès limité des ménages.

## Chapitre VII: Comptabilités nationales et production industrielle

La base de données les principaux agrégats des comptes nationaux (disponible à http://unstats.un.org/unsd/snaama) présente les données des comptes nationaux pour plus de 200 pays et régions du monde Elle est la base pour la publication des statistiques des comptes nationaux: Analyse des principaux agrégats, une publication préparée par la Division de statistique du Département des affaires économiques et sociales du Secrétariat des Nations Unies avec le généreux concours des bureaux nationaux de statistique. Cette base de données est mise à jour avec les données nouvellement disponibles des comptes nationaux de chaque pays et régions chaque décembre.

La base de données les principaux agrégats des comptes nationaux est établie sur les données extraites du questionnaire des Nations Unies comptes nationaux (NAQ) introduit en Octobre 1999, lui-même basé sur le Système de comptabilité nationale 1993 (SCN 1993). Les données sont ensuite complétées par des estimations établies par la Division de statistique de l'ONU. Finalisé en septembre 2009, la version actualisée du SCN est le Système de comptabilité nationale de 2008. En 2012, seuls l'Australie, la Chine, Hong Kong (région administrative spéciale), et le Timor-Leste commencèrent à soumettre les données selon le SCN 2008. Le Canada, le Malawi, le Mexique, le Pakistan et les Etats-Unis d'Amérique ont, dans la mesure du possible, fourni des données selon le SCN 2008 pour les estimations de l'Analyse des principaux agrégats de 2012.

Tout est mis en œuvre afin que les estimations des différents pays et régions facilitent la comparabilité internationale de données. Dans cet objectif, les différences importantes dans les concepts, la portée, la couverture et la classification ont été décrites dans les notes de chaque pays. Ces différences doivent donc être prises en compte pour éviter les comparaisons trompeuses. Les données contenues dans les tableaux se rapportent à l'année civile pour laquelle ils sont présentés, les exceptions sont indiqués sur le site web de la base de données les principaux agrégats des comptes nationaux : (http://unstats.un.org/unsd/snaama/notes.asp). Les chiffres disponibles sont les révisions et estimations les plus récentes au moment de la compilation. En général, les chiffres pour l'année la plus récente doivent être considérés comme provisoires. Les sommes des composants dans les tableaux ne correspondent pas nécessairement aux totaux indiqués en raison des arrondis.

### Tableau 19: Produit intérieur brut et produit intérieur brut par habitant

Ce tableau montre le produit intérieur brut (PIB) aux prix courants et constants de 2005 (en dollars américains), le PIB par habitant (en dollars américains), et les taux de croissance réels correspondant. Les tableaux sont destinés à faciliter les comparaisons internationales des revenus générés par la production. Les données ou les estimations du PIB total et du PIB par habitant aux prix courants ont été convertis en dollars américains, tandis que le PIB total aux prix constants sont convertis en prix de 2005 avant la conversion en dollars américains en utilisant les taux de change 2005. La méthode de conversion en dollars américains est décrite dans le document sur la méthodologie de la base de données principaux agrégats des comptes nationaux. (http://unstats.un.org/unsd/snaama/methodology.pdf). Pour les comparaisons entre pays, les taux de croissance sont préférés car comme ils sont basés sur des prix constants qui sont plus indicatifs des tendances du PIB total. Le taux de croissance (en pourcentage) est calculé comme la moyenne géométrique des taux de croissance annuels.

### Tableau 20: Déflateurs implicites des prix de produit intérieur brut

Ce tableau présente une analyse du développement économique à travers les mouvements des prix et les taux de change en relation à la croissance économique. La colonne 1 et la colonne 2 comportent les indices du PIB au prix courants en monnaie nationale, puis en dollars américains; la colonne 3 comporte les indices du volume du PIB en monnaie nationale ; La colonne 4 et la colonne 5 présentent les indices du PIB déflateurs implicites des prix en monnaie nationale, puis en dollars américains; enfin, la colonne 6 indique les taux de change obtenus soit en divisant les déflateurs implicites des prix en monnaie nationale (colonne 4) par les déflateurs en dollars américains (colonne 5), soit en divisant les indices du PIB aux prix courants en monnaies nationales(colonne 1) par les indices en dollars des États-Unis (colonne 2). Quant aux indices de prix dans les colonnes 4 et 5 sont obtenus en divisant respectivement, les indices du PIB aux prix courants en monnaie nationale (colonne 1) et en dollars (colonne 2) par les indices de volume présenté dans la colonne 3.

Les indices de prix présentés dans le tableau doivent toutefois être interprétés avec prudence. D'une part, les déflateurs indiqués ne sont pas totalement comparables entre les pays, car une vaste gamme de méthodes est utilisée pour obtenir les données sur les mouvements des prix. Par exemple, certains pays utilisent directement les indices de prix explicites dans les calculs tandis que d'autres pays dérivent les indices de prix implicites en divisant les indices de volume par les indices de développement actuel des prix du PIB ; d'autre part, même si les indices sont présentés pour une année de base 2005 = 100, ces données du PIB aux prix constants utilisées dans les calculs ont été compilées à partir d'années de base différentes.

### Tableau 21: Dépenses imputées au produit intérieur brut

Ce tableau fournit le PIB aux prix courants, puis le décompose en pourcentages des composantes économiques pour donner un aperçu de la structure du système économique. Il montre la proportion du revenu de la production des dépenses par les ménages ou le gouvernement sur la consommation finale, la part de l'investissement, et aussi la proportion du PIB exporté après les déductions des dépenses sur les importations. Dans certains cas, les variations de stocks doivent être interprétées prudemment, car les pays peuvent également inclure des éléments tels que les erreurs statistiques. Aussi, il est possible que le total n'atteigne pas 100 en raison de divergences statistiques.

### Tableau 22: Valeur ajoutée brute par type d'activité économique

Ce tableau présente la part de la valeur ajoutée brute aux prix courants attribuable à chaque'activité économique (en termes de CITI 3):

- Agriculture, chasse, sylviculture et pêche (CITI A-B)
- Activités extractives, activités de fabrication, production et distribution d'électricité, de gaz et d'eau (CITI C-E)
- Activités de fabrication (CITI D)
- Construction (CITI F)
- Commerce de gros et de détail, réparation de véhicules automobiles, de motocycles et de biens personnels et domestiques, hôtels et restaurants (CITI G-H)
- Transports, entreposage et communications (I)
- Et "autres activités", y compris intermédiation financière, immobilier, locations et activités de services aux entreprises, administration publique et défense, sécurité sociale obligatoire, éducation, santé et action sociale, autres activités de services collectifs, sociaux et personnels, et ménages privés employant du personnel domestique (CITI J-P).

### Tableau 23: Indices de la production industrielle

La Division de statistique de l'ONU recueille, compile et publie des indices mensuels, trimestriels et annuels de la production industrielle basé sur un questionnaire adressé aux bureaux nationaux de statistique. Les indices sont calculés selon la Classification internationale type par industrie de toutes les activités économiques (CITI), catégories Rev.4. Les deux chiffres, pour les sections BE de la classification, "fabrication" ie "Industries extractives", " Électricité, gaz, vapeur et air conditionné "et" distribution d'eau; assainissement, gestion des déchets et dépollution ". Pour les pays qui continuent à utiliser la CITI Rev.3, ces données sont toujours collectées et publiées. La collecte de ces indices a été lancée en 1953 et est actuellement diffusé à travers les publications des Nations Unies suivants: le *Bulletin mensuel de statistiques*, l'*Annuaire statistique*, et de la *World Statistics Pocket Book*.

Les pondérations utilisées dans le calcul des indices pour un pays particulier représentent la valeur ajoutée brute aux prix de base des industries qui contribuent. Directives méthodologiques pour ces indices sont disponibles dans les recommandations internationales pour l'Indice de la Production Industrielle 2010. Les indices de l'Annuaire sont actuellement publiés avec 2005 comme année de base.

## Chapitre VIII: Statistiques financières

Les informations détaillées et les chiffres courants concernant les tableaux 24 et 25 figurent dans les Statistiques financières internationales publiées par le Fonds monétaire international (voir aussi http://elibrary-data.imf.org) et dans le *Bulletin mensuel de statistique* des Nations Unies.

### Tableau 24: Taux d'escompte des banques centrales

Les taux indiqués représentent les taux pratiqués par les banques centrales 'escompte, ou pour avance de papier commercial admissible et /ou les titres d'État pour les banques commerciales ou les courtiers, généralement présentés sur une base de fin de période. Pour les pays ayant plus d'un taux applicable à ces réductions ou des avances, le taux indiqué est celui où la plus grande proportion des opérations de crédit des banques centrales est traitée. L'importance de ces taux comme des instruments de contrôle monétaire varie considérablement d'un pays à l'autre, donc une comparaison entre pays ne peut être faite sans un examen complémentaire.

### Tableau 25: Taux d'intérêt à court terme

Ce tableau fournit des taux des bons du Trésor et les taux du marché monétaire. Les taux indiqués représentent taux à court terme du marché monétaire - le taux auquel les emprunts à court terme sont effectués entre les institutions financières, la rapidité d'émission du papier d'État à court terme ou négociés sur les marchés. Les noms standards de ces tarifs sont les taux du marché monétaire et les taux des bons du Trésor, respectivement. Les descriptions des séries nationales sont fournis dans les statistiques financières internationales du FMI, voir http://elibrary-data.imf.org pour plus d'informations.

## Chapitre IX: Main-d'œuvre

Une collection complète et mise à jour tous les 2 ans des données sur la main-d'œuvre et des sujets connexes sont disponibles à partir *d'indicateurs clés du marché du travail (ICMT)*, de l'Organisation internationale du Travail (OIT). Accessible à www.ilo.org/ilostat, l'entrepôt de données de ILOSTAT publie annuellement, trimestriellement et mensuellement les données reçues des pays. Ces données ne comprennent donc pas tous les contrôles de cohérence, ni toutes les sources utilisées par ICMT. Pour diverses raisons, les définitions nationales de l'emploi et du chômage diffèrent souvent des définitions internationales types recommandées, limitant ainsi les possibilités de comparaison entre pays. Ces comparaisons se trouvent en outre compliquées par la diversité des systèmes de collecte de données utilisés pour recueillir des informations sur les personnes employées et les chômeurs. Le site ILOSTAT donne une description plus complète de la méthodologie employée pour établir les séries sur la main-d'œuvre.

### Tableau 26: Chômage

Les chiffres sont présentés en valeur absolue et en pourcentage. Les données sont normalement des moyennes annuelles des données mensuelles, trimestrielles ou semestrielles.

Par "chômeurs", on entend les personnes dépassant un âge déterminé qui, pendant une période donnée, étaient:

(a) "sans emploi", c'est-à-dire sans emploi rémunéré ou indépendant;

(b) "disponibles", c'est-à-dire qui pouvaient être engagées pour un emploi rémunéré ou pouvaient s'adonner à un emploi indépendant au cours de la période de référence; et

(c) "à la recherche d'un emploi", c'est-à-dire qui avaient pris des mesures précises à un certain moment pour trouver un emploi rémunéré ou un emploi indépendant.

Ne sont pas considérés comme chômeurs:

(a) Les personnes qui, pendant la période de référence, avaient l'intention de créer leur propre entreprise ou exploitation agricole, mais n'avaient pas encore pris les dispositions nécessaires à cet effet et qui n'étaient pas à la recherche d'un emploi en vue d'une rémunération ou d'un profit;

(b) Les anciens travailleurs familiaux non rémunérés qui n'avaient pas d'emploi et n'étaient pas à la recherche d'un emploi en vue d'une rémunération ou d'un profit.

Les séries représentent généralement le nombre total des chômeurs complets ou des personnes temporairement mises à pied. Les données en pourcentage, lorsqu'elles figurent dans le tableau, sont calculées en comparant le nombre de chômeurs au nombre total des personnes du groupe de main-d'œuvre sur lequel sont basées les données relatives au chômage.

## Chapitre X: Prix

### Tableau 27: Indices des prix à la production

Les prix à la production sont les prix auxquels les producteurs vendent leur production sur le marché intérieur. Indices de prix de production couvrent normalement les prix des produits caractéristiques de l'agriculture, de la sylviculture et la pêche, des mines et carrières, de la fabrication, de l'électricité, et du gaz et d'eau. Les prix sont normalement mesurés en termes de prix de transaction, y compris les impôts indirects non déductibles moins les subventions pour les produits d'origine nationale et pour les marchandises importées, les droits d'importation et autres impôts indirects non déductibles moins les subventions. La formule de l'indice de Lapeyres est généralement utilisée. Les indices de prix pour chaque pays sont arrangés selon le schéma suivant:

| (a) | Eléments de l'offre | | (b) | Stade de la transformation | |
|---|---|---|---|---|---|
| | | Offre intérieure | | | Matières premières |
| | | Production nationale pour le marché intérieur | | | Produits intermédiaires |
| | | Produits agricoles | (c) | Utilisation finale | |
| | | Produits industriels | | | Biens de consommation |
| | | Produits importés | | | Biens d'équipement |

La source pour cette table est le *Bulletin mensuel des statistiques* des Nations Unies, voir http://unstats.un.org/unsd/mbs pour plus d'informations. Les données sont principalement obtenues du questionnaire de pays liés à cette publication et, si nécessaire rebasé à une période de base uniforme, qui est actuellement 2005 = 100. Cette opération n'entraîne pas de changement dans les systèmes de pondération utilisés par les pays. Pour un complément de détails sur l'indice des prix à la production, on se reportera au *Producer Price Index Manual, Theory and Practice* publié par le Fonds monétaire international en 2004.

## Chapitre XI: Agriculture, forêts et pêche

Les séries présentées sur l'agriculture et la pêche ont été fournies par l'Organisation des Nations Unies pour l'alimentation et l'agriculture (FAO) et portent principalement sur les tendances à long terme de la croissance de la production agricole et des approvisionnements alimentaires, et sur la production des principales denrées agricoles et la production halieutique.

La production agricole se définit comme comprenant l'ensemble des produits agricoles et des produits de l'élevage à l'exception de ceux utilisés comme semences et comme aliments pour les animaux, et pour les autres utilisations intermédiaires en agriculture; par exemple, on déduit les œufs utilisés pour la reproduction. L'apport intermédiaire de semences et d'aliments pour les animaux et d'autres éléments similaires se rapportent à la fois à des produits locaux et importés. Pour tous détails complémentaires, on se reportera à l'annuaire statistique de la FAO. Des statistiques peuvent également être consultées sur le site Web de la FAO http://faostat3.fao.org.

### Tableau 28: Production agricole

"L'agriculture" se rapporte à la production de tous les produits de l'agriculture et de l'élevage. "L'indice des produits alimentaires" comprend les produits considérés comme comestibles et qui contiennent des éléments nutritifs. Les indices de la production agricole et de la production alimentaire sont calculés selon la formule de Laspeyres avec les années 2004-2006 pour période de base. Le choix d'une période de plusieurs années permet de diminuer l'incidence des fluctuations annuelles de la production agricole pendant les années de base sur les indices pour cette période. Les quantités produites de chaque denrée sont pondérées par les prix nationaux moyens à la production de 2004-2006, et additionnées pour chaque année. Les indices sont fondés sur les données de production d'une année civile. Ils peuvent différer dans certains cas des indices effectivement établis et publiés par les pays eux-mêmes par suite de différences dans les concepts, la couverture, les pondérations et les méthodes de calcul. On s'est efforcé d'estimer ces différences méthodologiques afin de rendre les données plus facilement comparables à l'échelle internationale. Des chiffres détaillés de production sont publiés dans l'*Annuaire statistique* de la FAO.

### Tableau 29: Culture oléagineuses

On désigne sous le nom de cultures oléagineuses l'ensemble des cultures produisant des graines, des noix ou des fruits, essentiellement destinées à l'extraction d'huiles alimentaires ou industrielles, à l'exclusion des huiles essentielles. Dans ce tableau, les chiffres se rapportent à la production totale de graines, noix et fruits oléagineux récoltés au cours de l'année de référence. Bien entendu, la production totale d'oléagineux n'est jamais transformée intégralement en huile, car des quantités importantes qui varient suivant les cultures sont également utilisées pour les semailles, l'alimentation animale et l'alimentation humaine. Toutefois, bien que les taux d'extraction d'huile varient selon les pays, on a appliqué dans ce tableau le même taux à tous les pays pour chaque oléagineux. En outre, il ne faut pas oublier que les produits récoltés au cours des derniers mois de l'année sont généralement transformés en huile dans le courant de l'année suivante.

En dépit de ces imperfections qui concernent le champ d'application, les taux d'extraction et les périodes de référence, les chiffres présentés ici sont utiles, car ils donnent une indication valable des variations de volume que la production totale d'oléagineux enregistre d'une année à l'autre. La production mondiale effective d'huiles végétales atteint 85 pour cent environ de la production indiquée ici. En outre, environ 3 millions de tonnes d'huiles végétales sont produites chaque année à partir de cultures non comprises dans les catégories définies ci dessus. Les principales sont l'huile de germes de maïs et l'huile de son de riz. La production mondiale effective tourteau/farine d'oléagineux représente environ 86 pour cent de la production indiquée.

### Tableau 30: Céréales

Les données sur la production de céréales se rapportent uniquement aux céréales récoltées pour le grain sec; celles cultivées pour le foin, le fourrage vert ou le pâturage en sont exclues.

### Tableau 31: Bois rond

Les données sur le bois rond se réfèrent au bois brut, bois à l'état naturel, tel qu'il a été abattu ou récolté autrement, avec ou sans écorce, fendu, grossièrement équarri ou sous une autre forme (par exemple, racines, souches, loupes, etc.). Il peut être également imprégné (par exemple, dans le cas des poteaux télégraphiques) et dégrossi ou taillé en pointe. Cette catégorie comprend tous les bois provenant des quantités enlevées en forêt ou provenant des arbres poussant hors forêt, y compris le volume récupéré sur les déchets naturels et les déchets d'abattage et de transport pendant la période envisagée (année civile ou forestière).

### Tableau 32: Production halieutique

Les données ont trait (i) à la pêche maritime et intérieure et (ii) à l'aquaculture, et sont exprimées en poids vif. Elles comprennent poissons, crustacés et mollusques, mais excluent éponges, coraux, perles, algues, crocodiles et les mammifères aquatiques (baleines, dauphins, etc.). Le pavillon du navire est considéré comme la principale indication de la nationalité de la prise. Les données de pêche maritime comprennent les quantités débarquées par des bateaux nationaux dans des ports étrangers et excluent les quantités débarquées par des bateaux étrangers dans des ports nationaux. Pour séparer la production d'aquaculture de la pêche de capture, au moins deux critères doivent se vérifier, c'est-à-dire l'intervention humaine dans une ou plusieurs des phases du cycle de croissance, et l'appartenance de l'organisme élevé et récolté à une personne physique, à une personne morale ou à l'état. Les données sont publiées dans l'*Annuaire statistique de la pêche*.

### Tableau 33: Engrais

Les données sur les engrais se rapportent en général à une période d'un an comptée du 1er juillet au 30 juin. Engrais azotés : les données se rapportent à la teneur en azote des engrais commerciaux inorganiques. Engrais phosphatés : les données se rapportent à l'acide phosphorique ($P_2O_5$) et englobent la teneur en ($P_2O_5$) des superphosphates, du phosphate d'ammonium et des scories de déphosphoration. Engrais potassiques : les données se rapportent à la teneur en $K_2O$ des produits potassiques commerciaux, muriate, nitrate et sulfate de potasse, sels d'engrais, kaïnite et nitrate de soude potassique.

### Tableau 34: Cheptel

Les statistiques sur les effectifs du cheptel sont groupées en périodes de 12 mois se terminant le 30 septembre de l'année indiquée et s'entendent de tous les animaux domestiques, quel que soit leur âge, leur emplacement ou le but de leur élevage.

## Chapitre XII: Industries manufacturières

La base de données des statistiques industrielles par produit relatives à la production (disponible à http://unstats.un.org/unsd/industry) contient des données sur la production de produits industriels 200 pays et régions pour environ 600 produits. C'est la base pour la publication de *l'Annuaire des statistiques industrielles par produit Volume I and II*, une publication préparée par la Division de statistique du Département des affaires économiques et sociales du Secrétariat des Nations Unies avec le généreux concours des bureaux nationaux de statistique. Une série historique des données sur les produits sont disponibles à partir de 1950 ; à partir de 1995, une série basée sur le classement actuel des matières premières est disponible dans la base de données disponible en ligne.

La base de données des statistiques industrielles par produit relatives à la production est basée sur les données obtenues à partir du questionnaire des Nations Unies sur les produits industriels, les statistiques de production basées sur les définitions des produits de la Classification centrale de produits (CPC) Version 1.1 et le système harmonisé de désignation et de codification des marchandises de 2002. Les données couvrent les produits provenant de l'exploitation minière, de la production d'électricité, de gaz, classées dans les sections B, C et D de la Classification internationale type par industrie de toutes les activités économiques (CITI) Révision 4, issues de la production primaire ou secondaire. Les données des questionnaires des pays sont complétées par d'autres informations provenant de publications d'institutions spécialisées et d'organismes intergouvernementaux.

Les données rapportées pour les produits reflètent la valeur et le volume de la production vendue au cours de la période de l'enquête, qui est définie comme la production réalisée à un moment donné, vendue (facturée) au cours de la période de référence. Un certain nombre de pays ont pu fournir que des données fondées sur la "liste Prodcom", utilisés par la Communauté européenne pour les statistiques sur les produits industriels, plutôt que les codes à base de PCC utilisés dans cette publication. Dès que possible, les données sur la base Prodcom ont été converties pour les agrégations nécessaires à cette publication. Bien que les informations fussent recueillies auprès des pays dans les monnaies nationales, les données ont été converties en dollars américains pour faciliter la comparaison entre les pays. La classification PCC et sa correspondance à d'autres classifications, ainsi que la méthodologie pour la conversion en dollars américains sont décrites dans la dernière édition dans l'*Annuaire des statistiques industrielles par produit (Volume I and II)*.

### Tableau 35: Sucre

Les données sur le sucre proviennent de la base de données et de l'*Annuaire du sucre* de l'Organisation internationale du sucre. Les données présentées portent sur la production et la consommation de sucre centrifugé à partir de la betterave et de la canne à sucre, et se rapportent à des années civiles.

Les données de la consommation se rapportent à la consommation apparente de sucre centrifugé dans le pays en question, y compris le sucre utilisé pour la fabrication de produits à base de sucre, exportés ou non, et le sucre utilisé à d'autres fins que pour la consommation alimentaire humaine. Sauf indication contraire, les statistiques sont exprimées en valeur brute (sucre polarisant à

96 degrés). Le total mondial compris également les données relatives aux pays où la consommation de sucre est inférieure à 10.000 tonnes.

**Tableau 36: Bière** (CPC code: 24310-0) se rapportent à la bière produite à partir du malte

**Tableau 37: Cigarettes** (25010-1) se rapporte aux cigarettes contenant du tabac.

**Tableau 38: Papier et cartons** (FAO série) se rapportent au papier journal, les papiers d'impression et d'écriture, les papiers et cartons de construction, les papiers de ménage et les papiers hygiéniques, les papiers minces spéciaux, les papiers d'empaquetage et d'emballage et carton.

**Tableau 39: Aluminium non travaille** (41431-1) se rapportent à l'aluminium brut non allié.

**Tableau 40: Récepteurs de radio** (47310-1) se rapportent à l'appareils récepteurs de radiodiffusion pouvant fonctionner sans source d'énergie extérieure, y compris les appareils pouvant recevoir également la radiotéléphonie ou la radiotélégraphie, même combinés à un appareil d'enregistrement ou de reproduction du son; appareils récepteurs de radiodiffusion ne pouvant fonctionner qu'avec une source d'énergie extérieure, du type utilisé dans les véhicules automobiles, y compris les appareils pouvant recevoir également la radiotéléphonie ou la radiotélégraphie, même combinés à un appareil d'enregistrement ou de reproduction du son; autres appareils récepteurs de radiodiffusion, y compris les appareils pouvant recevoir également la radiotéléphonie ou la radiotélégraphie, même combinés à un appareil d'enregistrement ou de reproduction du son.

**Tableau 41: Télévision** (47313-2) se rapportent à aux appareils récepteurs de télévision couleur, en noir et blanc ou en autres monochromes. Y compris les appareils incorporant un appareil d'enregistrement ou de reproduction vidéophonique, les récepteurs de télévision avec écran plat (écran à cristaux liquides ou écran à plasma), récepteurs de signaux vidéophoniques (tuner) et autres appareils récepteurs téléviseur sans écran.

**Tableau 42: Machines à laver et à sécher le linge, de type ménager** (44812-1) se rapportent aux machines à laver le linge, même avec dispositif de séchage, et machines à sécher le linge.

**Tableau 43: Machines-outils** (44213-0 & 44214-0) se rapportent à deux commodité i.) Tours y compris les centres de tournage travaillant par enlèvement de métal, horizontaux, à commande numérique ou autres et ii.) les machines (y compris les unités d'usinage à glissières) à percer, aléser, fraiser, fileter ou tarauder les métaux par enlèvement de matière, autres que les tours et centres de tournage.

## Chapitre XIII: Energie

L'*Annuaire statistique de l'énergie* (disponible à http://unstats.un.org/unsd/energy/yearbook) est une collection complète de statistiques internationales de l'énergie depuis plus de 220 pays et régions. L'annuaire est préparé par la Division de statistique du Département des affaires économiques et sociales du Secrétariat de l'ONU. L'annuaire est produit chaque année avec les nouvelles données disponibles sur la production d'énergie, le commerce, les variations de stocks, bunkers et de la consommation pour tous les pays et régions, et une série historique de 1950 sont disponibles. Les données, essentiellement rassemblées à partir du questionnaire annuel de l'énergie envoyé par la Division de statistique de l'ONU, sont complétées à l'aide des publications officielles des organismes nationaux de statistique ainsi que des publications des organisations internationales et régionales. Lorsque les données officielles ne sont pas disponibles ou ne sont pas cohérentes, la Division de statistique établit des estimations en s'appuyant sur la documentation d'origine gouvernementale, professionnelle ou commerciale.

Les données se rapportent à l'année civile, sauf celles des pays suivants qui se rapportent à l'exercice budgétaire: Afghanistan et Iran (Rép. islamique) - commençant le 21 mars de l'année indiquée; L'Australie, le Bangladesh, le Bhutan, l'Egypte (pour ces derniers deux pays, l'électricité seulement), le Népal - finissant en juin de l'année indiquée; Pakistan - à partir de Juillet de l'année indiquée L'Inde, le Myanmar et la Nouvelle-Zélande commençant en avril de l'année indiquée.

### Tableau 44: Production, commerce et consommation d'énergie commerciale

Les données relatives aux divers produits énergétiques ont été converties en tonnes d'équivalent pétrole (TEP), dans un souci d'uniformité et pour permettre les comparaisons entre la production de différents pays. Pour passer des unités de mesure d'origine à l'unité commune, les données en unités d'origine (tonnes, térajoules, kilowattheures, mètres cubes) sont multipliées par des facteurs de conversion. Pour une liste des facteurs de conversion appropriée et pour des descriptions détaillées des méthodes appliquées, voir l'*Annuaire des statistiques de l'énergie.*

Sont compris dans la production d'énergie primaire commerciale: pour les solides, la houille, le lignite, la tourbe et le schiste bitumineux; pour les liquides, le pétrole brut, les liquides de gaz naturel, autres hydrocarbures, additifs et oxygénant, et les biocarburants liquides; pour les gaz, le gaz naturel et la vapeur/chaleur primaire; pour l'électricité, l'électricité primaire de source hydraulique, nucléaire, géothermique, éolienne, solaire, marées, vagues et d'autres marins.

Les variations de stocks, importations et exportations se réfèrent à toutes les formes primaires et secondaires d'énergie commerciale (y compris les charges d'alimentation des usines de traitement). Les soutes avions se rapportent aux soutes d'essence et de carburéacteur. Les soutes maritimes se rapportent aux soutes de houille, de gazole ou carburant Diesel et de mazout résiduel. Le commerce international des produits énergétiques est fondé sur le système du "commerce général", c'est-à-dire que tous les biens entrant sur le territoire national d'un pays ou en sortant sont respectivement enregistrés comme importations et exportations.

Sont compris dans la consommation d'énergie commerciale: pour (1) les solides, la consommation de combustibles solides primaires, les importations nettes et les variations de stocks de combustibles solides secondaires; pour (2) les liquides, la consommation énergétique de produits pétroliers y compris les charges d'alimentation des usines de traitement et le gaz de raffinerie, ainsi que l'utilisation directe de pétrole brut; pour (3) les gaz, la consommation de gaz naturel et de vapeur/chaleur primaire, les importations nettes et les variations de stocks de gaz d'usines à gaz et de gaz de cokerie; pour (4) l'électricité, la production d'électricité primaire et les importations nettes d'électricité. La consommation de quelques produits pétroliers est négative du fait de l'exclusion des transferts inter-produits des calculs. La consommation d'électricité apparaît comme un nombre négatif quand la production d'électricité primaire est négligeable par rapport aux exportations nettes. En générale, la consommation négative peut représenter un écart statistique entre la production et les exportations lorsqu'un produit est pour la plupart exporté.

La colonne quantités non réparties introduite dans les tableaux 1 à 3 a pour objet de compenser la différence entre les résultats de la formule ci-dessus pour la consommation et les chiffres de la colonne consommation totale entre la consommation totale de colonne et les résultats de la formule production + importations - exportations - soutages +/- variations de stocks. Cette inégalité résulte essentiellement de l'exclusion d'utilisation non énergétique des produits pétroliers.

### Tableau 45: Production de l'énergie

Les données sur la production se rapportent au premier stade de production; il s'agit donc: pour la houille, des quantités extraites des mines; pour les agglomérés, de la production des usines d'agglomération; pour le pétrole brut et le gaz naturel, de la production des puits de pétrole et de gaz; pour les liquides de gaz naturel, de la production des puits et des usines de traitement; pour les produits pétroliers raffinés, de la production brute des raffineries; pour le coke et le gaz de cokerie, de la production des fours; pour les autres gaz manufacturés, de la quantité produite par les usines à gaz, les hauts fourneaux ou les raffineries; et pour l'électricité, de la production brute des centrales génératrices. Les définitions des produits énergétiques présentés dans le tableau sont fournies dans l'Annuaire statistique de l'énergie (voir http://unstats.un.org/unsd/energy/yearbook)

## Chapitre XIV: Environnement

### Tableau 46: Terres

Les données relatives aux terres sont compilées par l'Organisation des Nations Unies pour l'alimentation et l'agriculture (FAO). Les définitions de la FAO en ce qui concerne les terres sont les suivantes:

| | |
|---|---|
| Superficie totale des terres | Superficie totale, à l'exception des eaux intérieures. Les eaux intérieures désignent généralement les principaux fleuves et lacs. |
| Terres arables | Terres affectées aux cultures temporaires (les terres sur lesquelles est pratiquée la double culture ne sont comptabilisées qu'une fois); prairies temporaires à faucher ou à pâturer, jardins maraîchers ou potagers et terres en jachère temporaire (moins de cinq ans). Cette définition ne comprend pas les terres abandonnées du fait de la culture itinérante. Les données relatives aux terres arables ne peuvent être utilisées pour calculer la superficie des terres aptes à l'agriculture. |
| Cultures permanentes | Superficie des terres avec des cultures qui occupent la terre pour de longues périodes et qui ne nécessitent pas d'être replantées après chaque récolte, comme le cacao, le café et le caoutchouc. Cette catégorie comprend les terres plantées d'arbustes à fleurs, d'arbres fruitiers, d'arbres à noix et de vignes, mais ne comprend pas les terres plantées d'arbres destinés à la coupe. |
| Superficie forestière | Dans l'Évaluation des ressources forestières mondiales 2010, la FAO a défini les forêts comme suit : Terres occupant une superficie de plus de 0,5 hectares avec des arbres atteignant une hauteur supérieure à cinq mètres et un couvert arboré de plus de dix pour cent, ou avec des arbres capables d'atteindre ces seuils en situ. Sont exclues les terres à vocation agricole ou urbaine prédominante. |

### Tableau 47: Estimation des émissions de CO2

Les données sur les émissions de dioxyde de carbone ($CO_2$) proviennent du "Carbon Dioxide Information Analysis Center" (CDIAC) du "Oak Ridge National Laboratory" (États-Unis), voir http://cdiac.ornl.gov/. Les estimations du "Carbon Dioxide

Information Analysis Center" sont obtenues essentiellement à partir de statistique de la consommation d'énergie des Nations Unies des combustibles liquides et solides, a consommation de combustibles solides, liquides et gazeux et sur le brûlage à la torche des gaz, et des chiffres de production de ciment du Bureau of  du Ministère de l'Intérieur des États-Unis. Les émissions sont indiquées en milliers de tonnes de dioxyde de carbone (à diviser par 3.667 pour avoir les chiffres de carbone). Les méthodes utilisées pour calculer les émissions sont décrites en détail dans "Global, Regional, and National Annual $CO_2$ Emissions Estimates from Fossil Fuel Burning, Hydraulic Cement Production, and Gas Flaring" et sur le site Web du Carbon Dioxide Information Analysis Center. Par rapport à d'autres sources industrielles pour lesquelles on calcule les émissions de $CO_2$, les statistiques sur la production de gaz de torche sont rares et sporadiques. Dans les pays où cette production représente une proportion considérable de l'ensemble des émissions de dioxyde de carbone, on peut voir apparaître de ce fait des chiffres parasites ou trompeurs pour ce qui est des tendances des émissions nationales de dioxyde de carbone durant la période visée par le tableau.

### Tableau 48: Chlorofluorocarbones (CFC) qui appauvrissent la couche d'ozone

Les chlorofluorocarbones (CFC) sont des substances de synthèse utilisées comme réfrigérants et propulseurs d'aérosols, dont on sait qu'elles appauvrissent la couche d'ozone. Aux termes du Protocole de Montréal relatif à des substances qui appauvrissent la couche d'ozone, la production de certains CFC doit être mesurée : ils sont utilisés dans les climatiseurs de véhicules, le matériel domestique et commercial de réfrigération et de climatisation (pompes à chaleur), les produits sous forme d'aérosols, les extincteurs d'incendie portables, les planches, panneaux et gaines isolants, et les prépolymères. Les Parties au Protocole de Montréal communiquent leurs données concernant les CFC au secrétariat de l'ozone du Programme des Nations Unies pour l'environnement, voir http://ozone.unep.org/. Les données sur les CFC, indiquées en tonnes de potentiel de destruction de l'ozone (PDO), sont calculées en multipliant le nombre de tonnes signalé par les Parties par le potentiel de destruction coefficient de la substance considérée, et en faisant la somme de ces PDO. La consommation est définie comme production de substances contrôlées, plus les importations, moins les exportations. Les produits intermédiaires de l'industrie sont exemptés, et on les soustrait donc des importations et/ou de la production. De même, on soustrait aussi les quantités détruites. On peut obtenir des quantités négatives, lorsque les quantités détruites et/ou exportées sont supérieures à la somme production + importations, ce qui signifie que les quantités détruites ou exportées ont été prélevées sur les stocks accumulés.

### Tableau 49: Accès à l'eau et à l'assainissement

La proportion de la population ayant accès de façon durable à une source d'eau améliorée (zones urbaines et rurales) est le pourcentage de la population qui utilise l'un quelconque des types suivants d'approvisionnement en eau de boisson : eau courante, fontaine publique, forage ou pompe, puits protégé, source protégée ou eau de pluie. Les sources d'eau améliorées ne comprennent pas l'eau fournie par un vendeur, l'eau en bouteille, l'eau fournie par un camion- citerne ou les puits et sources non protégés. La proportion de la population ayant accès à un système d'assainissement amélioré (zones urbaines et rurales) se réfère au pourcentage de la population ayant accès aux installations qui dans des conditions hygiéniques empêchent l'homme, l'animal ou l'insecte d'entrer en contact avec des excréta humains. Les dispositifs tels que les égouts ou les fosses septiques, les latrines à siphon hydraulique et les latrines simples ou les latrines améliorées à fosse ventilée sont considérés comme appropriés, à condition de ne pas être publics. Pour être efficaces, ces installations doivent être bien construites et correctement entretenues. Les données sont estimées par le Programme commun OMS / UNICEF de surveillance de l'eau et de l'assainissement (JMP) à partir des sources nationales disponibles, se référer à www.wssinfo.org pour de plus amples informations.

## Chapitre XV: Science et technologie

La recherche et le développement expérimental (R-D) englobe tous les travaux de création entrepris de façon systématique en vue d'accroître la somme des connaissances, y compris la connaissance de l'homme, de la culture et de la société, ainsi que l'utilisation de cette somme de connaissances pour de nouvelles applications. Pour tout renseignement complémentaire, voir le site Web de l'Institut de statistique de l'UNESCO www.uis.unesco.org.

### Tableau 50: Personnel employé dans la recherche et le développement (R – D)

Les données présentées sur le personnel employé dans la recherche et le développement (R-D) sont compilées par l'Institut de statistique de l'UNESCO. Les données de certains pays ont été fournies à l'UNESCO par l'OCDE, EUROSTAT et "la Red de Indicadores de Ciencia y Tecnología (RICYT)". Les définitions et classifications appliquées par l'UNESCO sont basées sur le Manuel de Frascati (OCDE, 2002).

Les trois catégories du personnel présentées sont définies comme suivant:

| | |
|---|---|
| Les chercheurs | Les chercheurs sont des spécialistes travaillant à la conception ou à la création de connaissances, de produits, de procédés, de méthodes et de systèmes nouveaux et à la gestion des projets concernés. Les étudiants diplômés au niveau du doctorat (CITE niveau 8) ayant des activités de R-D sont considérés comme des chercheurs. |
| Techniciens et | Personnes dont les tâches principales requièrent des connaissances et une expérience technique dans un |

| | |
|---|---|
| personnel assimilé | ou plusieurs domaines de l'ingénierie, des sciences physiques et de la vie ou des sciences sociales et humaines. Ils participent à la R-D en exécutant des tâches scientifiques et techniques faisant intervenir l'application de principes et de méthodes opérationnelles, généralement sous le contrôle de chercheurs. |
| Autre personnel de soutien | les travailleurs, qualifiés ou non, et le personnel de secrétariat et de bureau participant à l'exécution des projets de R-D ou qui sont directement associés à l'exécution de tels projets. |

Personnes physiques est le nombre total de personnes qui sont principalement ou partiellement affectées à la R-D. Ce dénombrement inclut les employés à 'temps plein' et les employés à 'temps partiel'. Équivalent temps plein (ETP) peut être considéré comme une année-personne. Ainsi, une personne qui consacre 30% de son temps en R&D et le reste à d'autres activités (enseignement, administration universitaire ou direction d'étudiants) compte pour 0.3 ETP en R&D. De façon analogue, si un employé travaille à temps plein dans un centre de R&D pendant six mois seulement, il compte pour 0.5 ETP.

### Tableau 51: Dépenses intérieures brutes de recherche et développement

Les données présentées sur les dépenses intérieures brutes de recherche et développement sont compilées par l'Institut de statistique de l'UNESCO. Les données de certains pays ont été fournies à l'UNESCO par l'OCDE, EUROSTAT et "la Red de Indicadores de Ciencia y Tecnología (RICYT)". La dépense intérieure brute de R-D (DIRD) est la dépense totale intra-muros afférente aux travaux de R-D exécutés sur le territoire national pendant une période donnée. Elle comprend la R-D exécutée sur le territoire national et financée par l'étranger mais ne tient pas compte des paiements effectués à l'étranger pour des travaux de R-D. Les sources de financement pour la DIRD sont classées selon les cinq catégories suivantes:

| | |
|---|---|
| Les fonds des entreprises | Les fonds alloués à la R-D par toutes les firmes, organismes et institutions dont l'activité première est la production marchande de biens ou de services (autres que dans le secteur d'enseignement supérieur) en vue de leur vente au public, à un prix qui correspond à la réalité économique, et les institutions privées sans but lucratif principalement au service de ces entreprises, organismes et institutions. |
| Les fonds de l'Etat | Les fonds fournis à la R-D par le gouvernement central (fédéral), d'état ou par les autorités locales. Ceci inclut tous les ministères, bureaux et autres organismes qui fournissent, sans normalement les vendre, des services collectifs autres que d'enseignement supérieur, qu'il n'est pas possible d'assurer de façon pratique et économique par d'autres moyens et qui, de surcroît, administrent les affaires publiques et appliquent la politique économique et sociale de la collectivité. Les fonds des entreprises publiques sont compris dans ceux du secteur des entreprises. Les fonds de l'Etat incluent également les institutions privées sans but lucratif contrôlées et principalement financées par l'Etat. |
| Les fonds de l'enseignement supérieur | Les fonds fournis à la R-D par les établissements d'enseignement supérieur tels que toutes les universités, grandes écoles, instituts de technologie et autres établissements postsecondaires, ainsi que tous les instituts de recherche, les stations d'essais et les cliniques qui travaillent sous le contrôle direct des établissements d'enseignement supérieur ou qui sont administrés par ces derniers ou leur sont associés |
| Les fonds d'institutions privées sans but lucratif | Les fonds destinés à la R-D par les institutions privées sans but lucratif non marchandes au service du public, ainsi que par les simples particuliers ou les ménages. |
| Les fonds étrangers | Les fonds destinés à la R-D par les institutions et les individus se trouvant en dehors des frontières politiques d'un pays, à l'exception des véhicules, navires, avions et satellites utilisés par des institutions nationales, ainsi que des terrains d'essai acquis par ces institutions, et par toutes les organisations internationales (à l'exception des entreprises), y compris leurs installations et leurs activités à l'intérieur des frontières d'un pays |

Il faut éviter de comparer les chiffres absolus concernant les dépenses de R-D d'un pays à l'autre. On ne pourrait procéder à des comparaisons détaillées qu'en convertissant en une même monnaie les sommes libellées en monnaie nationale au moyen de taux de change spécialement applicables aux activités de R-D. Les taux de change officiels ne reflètent pas toujours le coût réel des activités de R-D, et les comparaisons établies sur la base de ces taux peuvent conduire à des conclusions trompeuses; toutefois, elles peuvent être utilisées pour donner une idée de l'ordre de grandeur.

## Chapitre XVI: Commerce international des marchandises

Préparée par la Division de statistique du Département des affaires économiques et sociales du Secrétariat des Nations Unies, l'*Annuaire statistique du commerce international (ASCI)* donne un aperçu des dernières tendances du commerce des biens et

services de la plupart des pays et régions dans le monde. L'annuaire, voir http://comtrade.un.org/pb/, est publié en deux volumes; Volume I est compilé plus tôt dans l'année pour présenter un aperçu de pointe du commerce international de marchandises à l'année précédente, Volume II, généralement publié six mois plus tard, contient des tableaux détaillés indiquant le commerce international pour des produits individuels et 11 tableaux du commerce mondial couvrant les valeurs commerciales et les indices . Volume II contient également la mise à jour des tableaux du commerce mondial, comme le tableau 52 de cet annuaire. Les tableaux de cet annuaire sont également mis à jour mensuellement (tableau 52) ou trimestriellement (tableaux 6, 53, et 54) dans le *Bulletin mensuel de statistique* des Nations Unis et sur le site des statistiques du commerce, voir http://unstats.un.org/unsd/trade/data/tableaux.asp#annual.

Les statistiques présentées dans cet Annuaire ont été compilées en majorité par les autorités statistiques nationales avec les Nations Unies d'après *les concepts et les définitions des Statistiques du commerce international de marchandises de 2010* (SCIM 2010). Selon les parties du territoire économique inclues dans le territoire statistique, le système du commerce de compilation de données adoptée par un pays (son système de commerce) peut être appelé générale ou spéciale.

| | |
|---|---|
| Le système du commerce général | Le territoire statistique coïncide avec le territoire économique. Par conséquent, dans le cadre du système général, les importations comprennent tous les biens admis sur le territoire économique du pays déclarant et les exportations comprennent tous les biens qui le quittent. Dans ce cas, les importations comprennent les marchandises entrant dans la zone de libre circulation, les locaux de perfectionnement actif, zones franches industrielles, des entrepôts de douane ou les zones franches commerciales et les exportations comprennent les marchandises quittant les éléments territoriaux |
| Le système du commerce spécial | (Définition stricte) Le territoire statistique ne comprend qu'une partie particulière du territoire économique, de sorte que certains flux de marchandises qui sont dans le champ d'application de l'IMTS 2010 ne sont pas inclus soit dans les statistiques d'importation ou d'exportation du pays déclarant. La définition stricte du système du commerce spécial est utilisé lorsque le territoire statistique ne comprend que la zone de libre circulation, c'est à dire la partie dans lequel les marchandises "peuvent être écoulées sans restriction douanière". Par conséquent, dans un tel cas, les importations ne comprennent que les marchandises entrant dans la zone de libre circulation d'un pays déclarant et les exportations comprennent seulement les marchandises qui quittent la zone de libre circulation du pays déclarant |
| | (Définition assouplie) (a) les marchandises qui entrent dans un pays pour, ou à laisser, après, le perfectionnement actif, ainsi que (b) les marchandises qui entrent ou quittent une zone franche industrielle, sont également enregistrés et inclus dans les statistiques du commerce international de marchandises |

En général, tous les pays rapportent leurs données du commerce de marchandises détaillée selon la description des produits Système harmonisé (SH) de codification et les données correspondent et sont ensuite présentés par Standard commerce international classifications (CTCI, Rev.3). Les données se rapportent aux années civiles; Toutefois, pour les pays qui déclarent selon une autre année de référence, les données sont présentées dans l'année qui couvre la majorité de l'année de référence utilisée par le pays.

Les valeurs de type FOB comprennent la valeur transactionnelle des marchandises et la valeur des services rendus à livrer des marchandises à la frontière du pays exportateur. Les valeurs de type CIF comprennent la valeur transactionnelle des marchandises, la valeur des services effectués pour livrer des marchandises à la frontière du pays exportateur et la valeur des services rendus à livrer les marchandises de la frontière du pays exportateur jusqu'à la frontière de la pays importateur. Par conséquent, les données pour la valeur statistique des marchandises importées sont présentés comme une valeur CIF-type et la valeur statistique des marchandises exportées comme une valeur de type FOB.

Conversion des valeurs de monnaies nationales en dollars des États-Unis se fait au moyen de facteurs de conversion de devises en fonction des taux de change officiels. Les valeurs en devises soumises à des fluctuations sont converties en dollars des États-Unis en utilisant les taux de change moyens pondérés calculés spécialement à cet effet. Le taux de change moyen pondéré pour une monnaie donnée pour une année donnée est les facteurs mensuels composants, fournis par le Fonds monétaire international dans sa publication Statistiques financières internationales, pondérée par la valeur du commerce pertinents de chaque mois; un facteur mensuel est le taux de change (ou la moyenne simple) en vigueur au cours de ce mois. Ces facteurs sont appliqués aux importations et exportations totales et au commerce des produits individuels avec des pays individuels.

### Tableau 52: Importations et exportations totales par régions et pays ou zones

Les données sur les importations et exportations totales des pays (ou régions) présentées dans ce tableau proviennent principalement *International Financial Statistics* publié mensuellement par le Fonds monétaire international (FMI), mais aussi d'autres sources telles que les publications et les sites web nationaux, les questionnaires de *Bulletin mensuel des statistiques* des Nations Unies, et l'Annuaire statistique du commerce international pour plus de détails. Les estimations des données manquantes sont faites pour arriver aux totaux régionaux, mais ne sont pas représentés ailleurs. Le procédé d'estimation est automatisé en utilisant les taux de croissance trimestriels année-sur-année pour l'extrapolation des données trimestrielles manquantes (sauf quand les données trimestrielles peuvent être estimées à partir des données mensuelles disponibles de ce trimestre). Les facteurs de conversion appliqués aux données dans ce tableau sont publiées trimestriellement dans le *Bulletin mensuel de statistique* des

Nations Unies et sont également disponibles sur le site Web des statistiques du commerce ONU: http://unstats.un.org/unsd/trade/data/tableaux.asp#annual.

### Tableau 53: Exportations et importations totales par pays ou régions

Les indices du volume et les indices de la valeur unitaire/prix sont comme compilées par les pays. Ils indiquent les variations des quantités (indice du volume) et des prix moyens (indice de la valeur unitaire/prix) des importations ou exportations totales. Utilisant ces indices la Division de Statistique des Nations Unies calcule les indices des termes de l'échange (sont obtenus en divisant les indices de la valeur unitaire à l'exportation par ceux à l'importation), et l'indice du pouvoir d'achat des exportations (sont obtenu en multipliant l'indice des termes de l'échange du volume des exportations). Les données sont obtenues à partir de sources similaires au tableau 52. Les données manquantes nécessaires pour le calcul des totaux régionaux sont estimées en utilisant une variété de méthodes et de sources supplémentaires. Toutes les estimations sont revues et ajustées si nécessaire.

### Tableau 54: Exportations des produits manufactures

Les produits manufacturés comprennent les sections 5 à 8 de la Classification type pour le commerce international (CTCI). Ces sections sont produits chimiques et produits connexes, articles manufacturés classés principalement d'après la matière première, machines et matériel de transport et articles manufacturés divers. Les produits énergétiques comprennent tous les produits appartenant à la section 3 de la CTCI. Ces produits sont huiles, cokes et briquettes, pétrole, produits dérivés du pétrole et produits connexes, gaz et énergie électrique. Les indices de la valeur unitaire sont obtenus de sources nationales, á l'exception de quelque pays pour lesquels la Division de Statistique des Nations Unies calcule ces indices en utilisant les chiffres de la valeur et du volume fournis par ces pays. Pour les pays ne calculant pas leurs indices des exportations des produits manufacturés et importations des produits énergétiques selon la définition décrite ci-dessus les sous-indices sont agrégés en un indice qui se rapproche les sections 5 à 8 de la CTCI et la section 3 de la CTCI respectivement. Les indices en monnaie nationale sont convertis en dollars des E.-U. en les multipliant par un facteur de conversion obtenu en divisant le taux de change courant, moyenne pondérés, d'une monnaie donnée par celui de la période de base. Tous les agrégés des indices de la valeur unitaire, sont à coefficients de pondération correspondant à la période indiquée. Les indices de droits de tirage spéciaux (DTS) sont calculés en multipliant les indices totaux équivalents en dollars E.-U. par un facteur de conversion obtenu en divisant le taux de change courant du DTS/$E-U d'une monnaie donnée par celui de la période de base. Les indices du quantum sont calculés à partir de chiffres de la valeur et les indices de la valeur unitaire. Tous les agrégés des indices du quantum sont à coefficients de pondération correspondant à la période en base. Les totaux des importations et exportations utilisées dans les calculs sont, en général, celles publiées dans le Tableau 52.

## Chapitre XVII: Tourisme international et transport

Les données sur le tourisme international ont été fournies par l'Organisation mondiale du tourisme (l'OMT) qui publie des renseignements détaillés sur le tourisme dans l'*Annuaire des statistiques du tourisme* ou le *Compendium des statistiques du tourisme*, voir www.unwto.org/statistics pour plus d'information. A des fins statistiques, l'expression "visiteur international" désigne "toute personne qui se rend dans un pays autre que celui où elle a son lieu de résidence habituelle, mais différent de son environnement habituel, pour une période de 12 mois au maximum, dans un but principal autre que celui d'y exercer une profession rémunérée". Quatre séries distinctes décrivant les visiteurs internationaux sont présentées dans l'Annuaire et le compendium de l'OMT, cependant une seule série sera sélectionnée pour cet annuaire dans l'ordre de priorité suivant :

| Ordre | Code | Nom de la série |
|---|---|---|
| 1 | TF | *Arrives de touristes non-résidents aux frontières nationales* sont les visiteurs qui passent une nuit au moins en logement collectif ou privé dans le pays visité (exclues les visiteurs ne restant que la journée) |
| 2 | VF | *Arrives de visiteurs non-résidents aux frontières nationales* sont les visiteurs définis dans la série "TF", ainsi que les visiteurs ne restant que la journée, c'est à dire les visiteurs qui ne passent pas la nuit en logement collectif ou privé dans le pays visité |
| 3 | TCE | *Arrivées de touristes non-résidents dans tous les types d'établissements d'hébergement touristique* |
| 4 | THS | *Arrivées de touristes non-résidents dans les hôtels et établissements assimiles* |

Ces chiffres ne comprennent pas les immigrants, les résidents frontaliers, les personnes domiciliées dans une zone ou un pays donné et travaillant dans une zone ou pays limitrophe, les membres des forces armées et les membres des corps diplomatique et consulaire lorsqu'ils se rendent de leur pays d'origine au pays où ils sont en poste, et vice versa. Ne sont pas non plus inclus les voyageurs en transit, qui ne pénètrent pas officiellement dans le pays en faisant contrôler leurs passeports, tels que les passagers d'un vol en escale, qui demeurent pendant un court laps de temps dans une aire distincte de l'aérogare, ou les passagers d'un navire

qui ne sont pas autorisés à débarquer. Cette catégorie comprend également les passagers transportés directement d'une aérogare à l'autre ou à un autre terminal. Les autres passagers en transit dans un pays sont classés parmi les visiteurs.

### Tableau 55: Arrivées de touristes/ visiteurs par régions de provenance

### Tableau 56: Arrivées de touristes/ visiteurs et dépenses touristiques

Les données relatives aux arrivées des visiteurs non-résidents (ou internationaux) peuvent être obtenues de différentes sources. Dans certains cas, elles proviennent des statistiques des frontières tirées des registres administratifs (contrôles de police, de l'immigration, de la circulation et autres effectués aux frontières nationales), des enquêtes statistiques aux frontières et des enregistrements d'établissements d'hébergement touristique. Sauf indication contraire, le tableau 55 indique le nombre d'arrivées de touristes/visiteurs non-résidents aux frontières nationales par région de provenance. Les totaux correspondent au nombre total d'arrivées de touristes des régions indiquées sur le tableau. Lorsqu'une personne visite le même pays plusieurs fois dans l'année, il est enregistré un nombre égal d'arrivées. En outre, si une personne visite plusieurs pays au cours d'un seul et même voyage, son arrivée dans chaque pays est enregistrée séparément. Par conséquent, on ne peut pas partir du postulat que les arrivées sont égales au nombre de personnes qui voyagent.

Les dépenses associées à l'activité touristique des visiteurs sont traditionnellement identifiées au poste "Voyages" de la balance des paiements. Dans le cas du tourisme récepteur, ces dépenses associées aux visiteurs non-résidents sont enregistrées dans la balance des paiements comme des "crédits" et il s'agit de "recettes au titre des voyages". Le cadre conceptuel approuvé par la Commission de statistique de l'Organisation des Nations Unies concernant l'évaluation de l'activité touristique à l'échelle macroéconomique (cadre qu'il est convenu d'appeler compte satellite du tourisme) considère que la notion "industries et produits touristiques" englobe le transport de passagers. Par conséquent, une meilleure estimation des dépenses liées au tourisme international que font les visiteurs résidents et non-résidents serait, sous l'angle de la balance des paiements, la somme des valeurs des postes "Voyages" et "Transport de passagers". Néanmoins, les utilisateurs doivent être conscients que les estimations de la balance des paiements comprennent, outre les dépenses associées aux visiteurs, celles liées à d'autres types d'individus. Les données publiées doivent permettre la comparabilité internationale et donc correspondre à celles publiées par le Fonds monétaire international (FMI) qui viennent des banques centrales, les exceptions sont indiquées dans le *Compendium des statistiques du tourisme* ou l'*Annuaire des statistiques du tourisme*, voir www.unwto.org/statistics pour plus d'informations.

### Tableau 57: Tourisme à l'étranger

Tourisme à l'étranger comporte départs en milliers et dépenses en millions de dollars E.-U. Les indicateurs relatifs aux dépenses touristiques dans d'autres pays sont équivalents à ceux du tourisme récepteur mais ils sont enregistrés comme "débits" aux postes "Voyages" et "Transport de passagers" de la balance des paiements. Les données publiées sont également fournies par le FMI. Il y a lieu de faire la même mise en garde que plus haut. On trouvera plus de renseignements publiés par l'Organisation mondiale du tourisme dans le *Compendium des statistiques du tourisme*, voir http://www.unwto.org/statistics; et des renseignements sur la balance des paiements sont publiés par le Fonds monétaire international dans *Balance of Payments Statistics Yearbook*.

## Chapitre XVIII: Finances internationales

### Table 58: Stocks et flux de la dette extérieure, à long terme

Les données concernant la dette extérieure des pays en développement sont extraites par de la base de données de la Banque mondiale, voir http://data.worldbank.org/indicator/, et de la publication *International Debt Statistics*. Les pays en développement sont dans ce tableau ceux où le RNB par habitant était en 2010 inférieur à 12 276 dollars. Le Système de notification de la dette de la Banque mondiale sert à tenir à jour prêt par prêt les statistiques de la dette extérieure des pays en développement. La dette à long terme comporte trois éléments (a) la dette publique, (b) la dette garantie par une administration publique et (c) la dette extérieure privée non garantie et les données sont en outre ventilées par type de créancier. Les définitions et la composition du tableau sont les suivantes:

| | | | |
|---|---|---|---|
| La dette extérieure à long terme | | | La dette due à des non-résidents dont l'échéance initiale ou prolongée d'une durée supérieure a un an et qui est et remboursable en devises étrangères, en biens ou en services. |
| | (a) la dette publique et (b) la dette garantie par l'Etat | | (a) une obligation externe d'un débiteur public, y compris le gouvernement, une subdivision politique, ou un organisme et administrations publiques autonomes.<br>(b) Une obligation externe d'un débiteur privé dont le remboursement est garanti par une entité publique. |
| | | Créanciers publics | |

| | | | | | |
|---|---|---|---|---|---|
| | | | Multilatéraux | | Les prêts obtenus auprès d'organisations internationales (prêts multilatéraux), à l'exclusion des prêts au titre de fonds administrés par une organisation internationale pour le compte d'un gouvernement donateur précis, qui sont classés comme prêts consentis par des gouvernements |
| | | | | BIRD | La Banque internationale de reconstruction et de développement |
| | | | | IDA | L'Association internationale de développement |
| | | | Bilatéraux | | Les prêts consentis par des gouvernements (prêts bilatéraux) et par des organisations publiques autonomes |
| | | Créanciers privés | | | |
| | | | Obligations | | émissions publiques d'obligations placées auprès d'investisseurs privés |
| | | | Banques commerciales | | Prêts consentis par des banques privées et autres institutions financières privées |
| | | | Autres institutions privées | | Engagements vis-à-vis de l'extérieur au titre des biens nationalisés et dettes diverses à l'égard de créanciers privés et inclues crédits consentis par des fabricants exportateurs et autres fournisseurs de biens |
| | (c) la dette privée non garantie | | | | Une obligation extérieure d'un débiteur privé dont le remboursement n'est pas garantie par une entité publique. La dette publique et garantie par l'Etat à long terme sont agrégées. |

Une distinction est faite entre les catégories suivantes de dette publique extérieure:

| | |
|---|---|
| Dette (montants non versés) | Dette totale publique et garantie publique par l'Etat non utilisée en fin d'année; les données pour la dette privée non garantie ne sont pas disponibles |
| Engagements | Montant total des prêts à long terme pour lesquels des contrats ont été signés dans l'année indiquée; données pour la dette privée non garantie ne sont pas disponibles. |
| Versements | Les sommes tirées sur l'encours des prêts pendant l'année considérée |
| Remboursements du principal | Les remboursements effectifs du principal en devises, biens ou services pendant l'année considérée;; |
| Apports nets | (ou prêts nets) sont les décaissements moins les remboursements de principal |
| Paiements d'intérêts | Les paiements d'intérêts effectués en devises, biens ou services pendant l'année considérée |
| Transferts nets | Les flux nets moins les paiements d'intérêts, ou les décaissements moins le total des paiements au titre du service de la dette. |
| Total du service de la dette | Somme du remboursement du principal et des paiements d'intérêt effectivement faits dans l'année spécifiée. |

Le total estimatif de la dette extérieure des pays en développement a été calculé en combinant les données du Système de notification avec d'autres informations obtenues auprès des créanciers par le biais des systèmes de collecte de données d'autres organismes, tels que la Banque des règlements internationaux (BRI) et l'Organisation de coopération et développement économiques, ou de sources du marché, et avec des estimations des économistes chargés des pays à la Banque mondiale et au Fonds monétaire international (FMI).

Toutes les données concernant la dette publique et la dette garantie par une entité publique proviennent des débiteurs, sauf celles concernant les prêts consentis par certains organismes multilatéraux, pour lesquels les données proviennent des dossiers des créanciers : il s'agit notamment de la Banque africaine de développement, de la Banque asiatique de développement, de la Banque centrale d'intégration économique, de la Banque interaméricaine de développement, de la Banque internationale de reconstruction et de développement (BIRD) et de l'Association internationale de développement (IDA) (la BIRD et l'IDA font partie du groupe de la Banque mondiale).

Les statistiques relatives à la dette publique ou à la dette garantie par l'Etat ne comprennent pas les données concernant: (a) les transactions avec le Fonds monétaire international; (b) la dette remboursable en monnaie nationale; (c) les investissements directs; et (d) la dette à court terme (c'est-à-dire la dette dont l'échéance initiale est inférieure à un an).Les statistiques relatives à la dette privée non garantie ne comprennent pas non plus les éléments précités, mais comprennent les obligations contractuelles au titre des prêts consentis par des sociétés mères étrangères ou leurs filiales à des entreprises créées dans le cadre d'investissements directs.

### Table 59: Stocks de la dette extérieure, garantie par l'Etat (à long terme)

Les pays figurant sur ce tableau sont ceux pour lesquels les données sont suffisamment fiables pour permettre une présentation significative de l'encours de la dette et des paiements futurs au titre du service de la dette. Les même définitions et sources que le tableau 58 s'appliquent.

## Chapitre XIX: Aide au développement

### Table 60: Versements d'aide publique au développement et d'aide publique bilatérale et multilatérale aux bénéficiaires

Le tableau présent les estimations des flux de ressources financières mises à la disposition des pays soit directement (aide bilatérale) soit par l'intermédiaire d'institutions multilatérales (aide multilatérale). Les institutions multilatérales comprennent le Groupe de la Banque mondiale, les banques régionales, les institutions financières de l'Union européenne et un certain nombre d'institutions, de programmes et de fonds d'affectation spéciale des Nations Unies. La source de données est le Comité d'aide au développement (CAD) de l'OCDE, auquel les pays membres ont communiqué des données sur les flux de ressources qu'ils mettent à la disposition des pays et territoires en développement et en transition et des institutions multilatérales. Pour plus de renseignements sur les définitions, méthodes et sources, se reporter à la publication de l'OCDE, la *Répartition géographique des ressources financières allouées aux pays en développement*, voir aussi http://stats.oecd.org/ pour plus d'informations.

### Table 61: Aide publique au développement nette des pays du CAD aux pays en développement et aux organisations multilatérales

Le tableau présente les dépenses que les pays donateurs consacrent à l'aide publique au développement (APD). Ces chiffres incluent les contributions des donateurs à des agences multilatérales, de sorte que les totaux diffèrent de ceux du tableau 60, qui incluent les dépenses des agences multilatérales.

### Table 62: Assistance en matière de développement socioéconomique fournie par le système des Nations Unies

Le tableau présente des données sur les dépenses consacrées à des activités opérationnelles pour le développement par les organisations du système des Nations Unies. Par "activités opérationnelles", on entend en général les activités ayant trait à la coopération au développement, qui visent à mobiliser ou à accroître les potentialités et aptitudes que présentent les pays pour promouvoir le développement et le bien-être économiques et sociaux, y compris les transferts de ressources vers les pays ou régions en développement sous forme tangible ou non. Les dépenses consacrées aux activités opérationnelles pour le développement sont financées au moyen de contributions que les gouvernements et d'autres sources officielles et non officielles apportent à divers organes de financement, tels que fonds et programmes du système des Nations Unies. On peut citer notamment les contributions au Programme des Nations Unies pour le développement, les contributions aux fonds gérés par le Programme des Nations Unies pour le développement, les contributions régulières (budgétaires) et les contributions extrabudgétaires aux institutions spécialisées. Les données sont extraites du rapport annuel 2012 (non encore publié) du Secrétaire général à la session de l'Assemblée générale sur les activités opérationnelles pour le développement.

***

# Annex III

## Conversion coefficients and factors

The metric system of weights and measures is employed in the *Statistical Yearbook*. In this system, the relationship between units of volume and capacity is: 1 litre = 1 cubic decimetre ($dm^3$) exactly (as decided by the 12th International Conference of Weights and Measures, New Delhi, November 1964).

Section A shows the equivalents of the basic metric, British imperial and United States units of measurements. According to an agreement between the national standards institutions of English-speaking nations, the British and United States units of length, area and volume are now identical, and based on the yard = 0.9144 metre exactly. The weight measures in both systems are based on the pound = 0.45359237 kilogram exactly (Weights and Measures Act 1963 (London), and *Federal Register announcement of 1 July 1959: Refinement of Values for the Yard and Pound* (Washington D.C.)).

Section B shows various derived or conventional conversion coefficients and equivalents.

Section C shows other conversion coefficients or factors which have been utilized in the compilation of certain tables in the *Statistical Yearbook*. Some of these are only of an approximate character and have been employed solely to obtain a reasonable measure of international comparability in the tables.

For a comprehensive survey of international and national systems of weights and measures and of units' weights for a large number of commodities in different countries, see *World Weights and Measures*.

# Annexe III

## Coefficients et facteurs de conversion

L'*Annuaire statistique* utilise le système métrique pour les poids et mesures. La relation entre unités métriques de volume et de capacité est: 1 litre = 1 décimètre cube ($dm^3$) exactement (comme fut décidé à la Conférence internationale des poids et mesures, New Delhi, novembre 1964).

La section A fournit les principaux équivalents des systèmes de mesure métrique, britannique et américain. Suivant un accord entre les institutions de normalisation nationales des pays de langue anglaise, les mesures britanniques et américaines de longueur, superficie et volume sont désormais identiques, et sont basées sur le yard = 0.9144 mètre exactement. Les mesures de poids se rapportent, dans les deux systèmes, à la livre (pound) = 0.45359237 kilogramme exactement (*Weights and Measures Act 1963* (Londres), et *Federal Register Announcement of 1 July 1959: Refinement of Values for the Yard and Pound* (Washington, D.C.)).

La section B fournit divers coefficients et facteurs de conversion conventionnels ou dérivés.

La section C fournit d'autres coefficients ou facteurs de conversion utilisés dans l'élaboration de certains tableaux de l'*Annuaire statistique.* Certains coefficients ou facteurs de conversion ne sont que des approximations et ont été utilisés uniquement pour obtenir un degré raisonnable de comparabilité sur le plan international.

Pour une étude d'ensemble des systèmes internationaux et nationaux de poids et mesures, et d'unités de poids pour un grand nombre de produits dans différents pays, voir *World Weights and Measures*.

### A. Equivalents of metric, British imperial and United States units of measure

| Metric units<br>Unités métriques | British imperial and US equivalents<br>Equivalents en mesures britanniques et des Etats-Unis | | British imperial and US units<br>Unités britanniques et des Etats-Unis | Metric equivalents<br>Equivalents en mesures métriques |
|---|---|---|---|---|
| **Length — Longueur** | | | | |
| 1 centimetre – centimètre (cm) | 0.3937008 | inch | 1 inch | 2.540 cm |
| 1 metre – mètre (m) | 3.280840 | feet | 1 foot | 30.480 cm |
| | 1.093613 | yard | 1 yard | 0.9144 m |
| 1 kilometre – kilomètre (km) | 0.6213712 | mile | 1 mile | 1609.344 m |
| | 0.5399568 | international nautical mile | 1 international nautical mile | 1852.000 m |
| **Area — Superficie** | | | | |
| 1 square centimetre – ($cm^2$) | 0.1550003 | square inch | 1 square inch | 6.45160 $cm^2$ |
| 1 square metre – ($m^2$) | 10.763910 | square feet | 1 square foot | 9.290304 $dm^2$ |
| | 1.195990 | square yards | 1 square yard | 0.83612736 $m^2$ |
| 1 hectare – (ha) | 2.471054 | acres | 1 acre | 0.4046856 ha |
| 1 square kilometre – ($km^2$) | 0.3861022 | square mile | 1 square mile | 2.589988 $km^2$ |
| **Volume** | | | | |
| 1 cubic centimetre – ($cm^3$) | 0.06102374 | cubic inch | 1 cubic inch | 16.38706 $cm^3$ |
| 1 cubic metre – ($m^3$) | 35.31467 | cubic feet | 1 cubic foot | 28.316847 $dm^3$ |
| | 1.307951 | cubic yards | 1 cubic yard | 0.76455486 $m^3$ |
| **Capacity — Capacité** | | | | |
| 1 litre (l) | 0.8798766 | British imperial quart | 1 British imperial quart | 1.136523 l |
| | 1.056688 | U.S. liquid quart | 1 U.S. liquid quart | 0.9463529 l |
| | 0.908083 | U.S. dry quart | 1 U.S. dry quart | 1.1012208 l |
| 1 hectolitre (hl) | 21.99692 | British imperial gallons | 1 British imperial gallon | 4.546092 l |
| | 26.417200 | U.S. gallons | 1 U.S. gallon | 3.785412 l |
| | 2.749614 | British imperial bushels | 1 imperial bushel | 36.368735 l |
| | 2.837760 | U.S. bushels | 1 U.S. bushel | 35.239067 l |

### A. Equivalents des unités métriques, britanniques et des Etats-Unis

| Metric units<br>Unités métriques | British imperial and US equivalents<br>Equivalents en mesures britanniques et des Etats-Unis | | British imperial and US units<br>Unités britanniques et des Etats-Unis | Metric equivalents<br>Equivalents en mesures métriques |
|---|---|---|---|---|
| **Weight or mass — Poids** | | | | |
| 1 kilogram (kg) | 35.27396 | av. ounces | 1 av. ounce | 28.349523 g |
| | 32.15075 | troy ounces | 1 troy ounce | 31.10348 g |
| | 2.204623 | av. pounds | 1 av. pound | 453.59237 g |
| | | | 1 cental (100 lb.) | 45.359237 kg |
| | | | 1 hundredweight (112 lb.) | 50.802345 kg |
| 1 ton – tonne (t) | 1.1023113 | short tons | 1 short ton (2 000 lb.) | 0.9071847 t |
| | 0.9842065 | long tons | 1 long ton (2 240 lb.) | 1.0160469 t |

## B. Various conventional or derived coefficients

**Air transport**

1 passenger-mile = 1.609344 passenger kilometre
1 short ton-mile = 1.459972 tonne-kilometre
1 long ton-mile = 1.635169 tonne kilometre

**Electric energy**

1 Kilowatt (kW) = 1.34102 British horsepower (hp)
1.35962 cheval vapeur (cv)

## C. Other coefficients or conversion factors employed in *Statistical Yearbook* tables

**Roundwood**

Equivalent in solid volume without bark.

**Sugar**

1 metric ton raw sugar = 0.9 metric ton refined sugar

For the United States and its possessions:
1 metric ton refined sugar = 1.07 metric tons raw sugar

**Energy**

1 metric ton peat = .325 metric ton of coal oil equivalent
1 ton oil equivalent = .4186 GJ or 11.63 MWh

## B. Divers coefficients conventionnels ou dérivés

**Transport aérien**

1 voyageur (passager) – kilomètre = 0.621371 passenger-mile
1 tonne-kilomètre = 0.684945 short ton-mile
0.611558 long ton-mile

**Energie électrique**

1 British horsepower (hp) = 0.7457 kW
1 cheval vapeur (cv) = 0.735499 kW

## C. Autres coefficients ou facteurs de conversion utilisés dans les tableaux de l'*Annuaire statistique*

**Bois rond**

Equivalences en volume solide sans écorce.

**Sucre**

1 tonne métrique de sucre brut = 0.9 tonne métrique de sucre raffiné

Pour les États-Unis et leurs possessions:
1 tonne métrique de sucre raffiné = 1.07 tonne métrique de sucre brut

**Energie**

1 tonne métrique d'équivalent charbon = 3.08 tonnes métrique de tourbe
1 GJ = 2.39 tonne d'équivalent pétrol or 1 MWh = .086 tonne métrique d'équivalent pétrol

# Annex IV - Tables added and omitted

*A. Tables added*

The present issue of the *Statistical Yearbook* includes the following tables which were not presented in the previous issue:

| | |
|---|---|
| Table 7 | Selected indicators of life expectancy, childbearing and mortality |
| Table 13 | Teaching staff at the primary, secondary and tertiary levels |
| Table 16 | People living with HIV |
| Table 17 | Telephones |
| Table 18 | Internet usage (previously *Fixed (wired) internet subscriptions*) |
| Table 26 | Unemployment |
| Table 27 | Producer Price Indices |
| Table 34 | Livestock |
| Table 48 | Ozone-depleting chlorofluorocarbons (CFCs) |
| Table 56 | Tourist/visitor arrivals and tourism expenditure |

*B. Tables omitted*

The following tables which were presented in previous issues are not presented in the present issue. They will be updated in future issues of the *Yearbook* when new data become available:

- Population by sex, rate of population increase, surface area and density
- Education at the primary, secondary and tertiary levels
- Cellular phones
- Cinemas
- Employment by economic activity
- Wages in manufacturing
- Consumer price indices
- Meat
- Trucks
- Fabrics
- Footwear production (uppers of leather)
- Sawnwood
- Cement
- Pesticide
- Pig iron and crude steel production
- Passenger car production
- Refrigerators for household use
- Exchange rates
- Threatened species
- Patents
- Civil aviation
- International reserves minus gold

# Annexe IV - Tableaux ajoutés et supprimés

*A. Tableaux ajoutés*

Dans ce numéro de l'*Annuaire statistique*, les tableaux suivants n'ont pas été présentés dans le numéro antérieur, et ont été ajoutés:

| | |
|---|---|
| Tableau 7 | Choix d'indicateurs de l'espérance de vie, de la maternité et de la mortalité |
| Tableau 13 | Personnel enseignant au niveau primaire, secondaire et supérieur |
| Tableau 16 | Population vivant avec le VIH |
| Tableau 17 | Téléphones |
| Tableau 18 | Utilisation de l'internet (ex- *Abonnements à l'internet fixe (filaire)*) |
| Tableau 26 | Chômage |
| Tableau 27 | Indices des prix à la production |
| Tableau 34 | Cheptel |
| Tableau 48 | Chlorofluorocarbones (CFC) qui appauvrissent la couche d'ozone |
| Tableau 56 | Arrivées de tourists/visiteurs et dépenses touristiques |

*B. Tableaux supprimés*

Les tableaux suivants qui ont été repris dans les éditions antérieures n'ont pas été repris dans la présente édition. Ils seront actualisés dans les futures livraisons de l'*Annuaire* à mesure que des données nouvelles deviendront disponibles:

- Population, taux d'accroissement, taux de natalité, taux de mortalité, superficie et densité
- Enseignement primaire, secondaire et supérieur
- Abonnes au téléphone mobile
- Cinémas
- Emploi par activité économique
- Salaires dans les industries manufacturières
- Indices des prix à la consommation
- Production de camions
- Production de tissus
- Production de chaussures à dessus en cuir naturel
- Production de sciages
- Production de ciment
- Production de pesticides
- Production de fonte et acier brut
- Production de voitures de tourisme
- Production de réfrigérateurs à usage domestique
- Cours des changes
- Espèces menacées
- Brevets
- Aviation civile : trafic aérien régulier
- Réserves internationales, moins l'or
