Part I: General comments

In the space below, please provide any general comments, such as about the clarity with which the new recommendations were incorporated (30 words or less).

Comment:

As in the other chapters, the clear separation of definitions and explanation of links to other accounts are very helpful.
The explanations about the revaluation account now do not include formulas – although the explanations in words fulfill the same role, one could give the formulas as well, some users find it easier to read a formula.

Part II: Comments on specific draft paragraphs or passages

In your review of draft chapter 12, you may wish to devote particular attention to the passages listed below. There is space after each issue for any comment you wish to make.

1. Sections B: As compared with the hierarchy of entries in the other changes in the volume of assets account in the 1993 SNA, the proposed list for the update has been restructured with the intention of making it easier to associate entries in the other changes in the volume of assets accounts with the entries in the other accumulation account chapters including the balance sheet.. Do you find this successful or are there other changes you would suggest?

Comment:

Seems fine.

2. Does it make sense to have information on the other changes in financial assets moved to this chapter instead of, as previously, having them in chapter 11? In the 1993 SNA, the information on the other changes in financial assets was covered in chapter 11, The Financial Account. Do you see any problems with moving this information to this chapter?

Comment:

Makes sense.

3. It is proposed to make the existing annex on the calculation of holding gains and losses an electronic annex, available to all users of the manual but not included in the printed version. Do you have comments on this proposal?

Comment:

The annex is quite small. As said above, formulas could be added in the chapter – if not, then the annex may help understanding for users, who find it easier to read formulas than explanations in words.
