21.35	Should FDI accounts be considered as an equipollent component of the SNA? If yes, their templates with numerical example should be introduced. If not, perhaps their inclusion under satellite accounts could be considered.

21.45	If A lowered the price of the items dispatched to B to minimise profits in X, but according to BoP recommendations items transferring across borders would be adjusted to prices prevailing if there were no relationship between A and B, how should be recorded and balanced continuing transactions (paid taxes, transfer of profit abroad, changes on accounts in banks, etc.)?

**Part III. Other specific comments**

You are welcome to make other specific comments. To assist you in doing so, the following points are provided as a guide to the types of points on which you might wish to comment. Note, though, that you are not restricted to commenting on only these points.

1. Are the examples of how to record changes in corporate structure clear and sufficient?
2. Is the description of FDI adequate as an introduction to the fuller description in the benchmark definition?
3. Should there be more discussion about the consequences of financial distress?
