This template allows you to record your comments on draft SNA chapter 29 “Satellite accounts and other extensions” and, at the same time, makes it easy for us to use your comments in considering revisions to the draft chapter. You may complete any or all parts of the template.

*Note that the examples of tables for the tourism, environmental and health satellites included in the chapter are exact pdf extracts from pages of those manuals. They will be formatted and numbered for the SNA later.*

There is no file comparing existing text with draft text for this chapter because the draft is largely new text.

Save this template and send it as an attachment to the following e-mail address:

**F. Examples of satellite accounts (paragraphs 29.83-29.157)**

General comment	In the case of health satellite accounts, the conceptual differences between the Central Framework of SNA and SHA are not really reflected in the chapter.
29.126	It might be also helpful to mention the Producer Guide of WHO 2003
29.127	Furthermore, SHA1.0 includes information about prices and volumes, patient characteristics, and human resources in health care.
29.129	Please, check this paragraph.
29.135	SHA1.0 is focusing on the consumption of health care by the resident population. Therefore, the production boundary of health care services might be quite different.
29.138	But CPC might be quite important to link SHA and SNA.
29.139	What about external trade and trade margins? Might it be useful to distinguish between SUT and I/O?
29.140	In the two tables, there is no row for capital goods but a column in the use table. Do you recommend to compile a special vector containing capital formation related to preventive services, curative services, etc.

\* Insert rows in this Word table for each paragraph on which you wish to comment.

**Part III. Other specific comments**

You are welcome to make other specific comments. To assist you in doing so, the following points are provided as a guide to the types of points on which you might wish to comment. Note, though, that you are not restricted to commenting on only these points.

1. Is the description of key satellite accounts clear and sufficient?

2. Are Sections D and E concerning the options for satellite accounts in general helpful?
3. Are there more examples of satellite accounts that should be referenced or described in Section F?
