STATISTICAL COMMISSION
Seventeenth session
Geneva, 13-24 November 1972
Item 7 of the provisional agenda

REVISION OF THE STANDARD INTERNATIONAL TRADE CLASSIFICATION (SITC)

Draft Standard International Trade Classification, Rev. 2

Report of the Secretary-General

1. The Statistical Commission, having recognized the growing need for a general revision of the Standard International Trade Classification (SITC), revised, recommended, in paragraph 159(23) of its report of the fifteenth session, 1/ the further revision of this classification as one of its ad hoc projects of high priority.
2. In compliance with this recommendation, the first meeting of a group of experts to consider the revision of the SITC was convened by the Statistical Office, Department of Economic and Social Affairs, United Nations Secretariat, in November 1969 (E/CN.3/409).
3. Countries and international organizations had been asked to communicate to the Statistical Office those headings of the SITC which they considered required revision and to put forth any suggestions which they wished to make. A summary of these comments and suggestions was supplied to the expert group in order to facilitate their work in laying out the general outline of detailed work and in defining areas for study in depth.
4. The group of experts agreed that the main objective of the revision of the SITC was an improved classification which would reflect the current pattern of international trade while at the same time retaining a correlation with the

1/ Official Records of the Economic and Social Council, Forty-fourth Session, Supplement No. 10.

Brussels Nomenclature (BTN) ^{2/} of the Customs Co-operation Council (CCC), though not necessarily the one-for-one correlation so strictly adhered to in the present SITC, and preserving continuity with the past.

5. A preliminary draft, called SITC, Rev. 2, based on the results of the first meeting of the group of experts and on the views of the Statistical Commission, was prepared by the Statistical Office and was circulated to Governments and international organizations for comment. The preliminary draft and the comments received were presented for the consideration of the group of experts at their second meeting, held in New York from 5 to 9 June 1972.

6. The preliminary draft was an attempt to apply to the SITC, Rev. 2, the views of the expert group, established at their first meeting, that the revision should (a) preserve the structure of the SITC at the group (3-digit code) level and above; and (b) maintain a close link with the BTN, so highly desirable in terms (i) of enabling countries whose tariff nomenclatures are based on the BTN to recast customs data into the form of the SITC for economic and statistical purposes and (ii) of making the precision of definition achieved in the BTN readily available to the SITC.

7. The Statistical Commission, in its report on the sixteenth session, ^{3/} taking note of the expert group's views, stated that it felt that "...essential changes would not necessarily be foregone in favour of historical continuity and that each change should be evaluated on its merits" and that "efforts should be made to complete the revision by the time of the seventeenth session of the Commission". ^{4/}

8. The group of experts, at their second meeting, examined the preliminary draft section by section. Taking note of the fact that Governments of countries accounting for about 88 per cent of world trade now regularly compile trade-by-commodity data according to the SITC and that a number of major international organizations have adopted the SITC as a basis for the reporting and/or analysing of external trade statistics, the group made every effort to keep to a minimum the number of SITC headings subdivided and to arrange that statistics according to SITC, Rev. 2, should, as far as possible, be readily comparable to those according to the present SITC.

9. The expert group, although it had originally decided that changes above the group level were to be avoided as much as possible, considered a number of modifications which would have crossed lines at the group level or above, but did

not include them in the redrafted SITC, Rev. 2, in order to maintain comparability and historical continuity. However, it felt that some substantial changes in the structure of the SITC were warranted in the following cases:

(a) Division 51 (Chemical Elements and Compounds) was subdivided into two divisions, Organic and Inorganic chemicals, and Division 52 was transferred to section 3;

(b) Section 7 (Machinery and Transport Equipment) was subdivided into nine divisions, because the present three divisions were considered inadequate when taking account of the importance of the commodities in this section, of the volume of trade involved and of the rapid advancement in technology in producing machinery and equipment in recent years;

(c) The grouping together within Section 8 of subgroups 729.5 (Electrical measuring and controlling instruments and apparatus), 861.8 (Meters and counters, non-electric) and 861.9 (Measuring, controlling and scientific instruments, n.e.s.) of the present SITC since these instruments, no matter how activated, follow the same channels of trade, are manufactured by an identical sector of industry and are for similar markets.

10. With reference to Division 51, the expert group agreed that the number of items which had resulted from the proposals of the ECE Chemical Industry Committee was too great. It was accordingly recommended that that part of SITC, Rev. 2, be referred back to the Committee with a request that it review its original proposal at its fifth session in September 1972 with a view to reducing the detail.

11. In a number of cases, where there were doubts as to the importance in international trade of certain subdivisions set out in the preliminary draft (e.g., the subdivision of eggs not in the shell (025.2) into liquid or frozen (025.21) or dry (025.22) and veneer sheets (631.1) into coniferous (631.11) or non-coniferous (631.12), the organization which put forth the proposal has been asked to justify its request for such subdivisions.

12. The group of experts was informed by the representative of the CCC that its Nomenclature Committee was setting up an SITC/BTN Working Party to look into the relationship of the BTN with the redrafted SITC, Rev. 2. The SITC/BTN Working Party, which is scheduled to hold its first session in September 1972, a second in October 1972 and a third in January 1973, will consider (a) the correlation of the SITC, Rev. 2, with the subheadings of the BTN; (b) the feasibility of the new headings proposed from the customs point of view; and (c) the definitions required by the new headings.

13. The group agreed that while the redrafted SITC, Rev. 2, was being studied by the SITC/BTN Working Party of the CCC, the same version should be submitted to the Statistical Commission at its seventeenth session for approval of its general framework and that the Commission should be asked to authorize its Working Group on International Statistical Programmes and Co-ordination to give formal approval

to the SITC, Rev. 2, when it meets in June 1973 if it finds satisfactory the version incorporating the findings of the SITC/BTN Working Party of the CCC.

14. However, it now appears desirable that the Statistical Commission at its eighteenth session should consider the SITC, Rev. 2, again before it is adopted, taking account of the findings of the Nomenclature Committee in respect of the subdivision of the BTN. None the less, the Statistical Commission may be in a position to approve the general framework of the SITC, Rev. 2, at its seventeenth session, as the questions of aligning the BTN and the SITC, Rev. 2, do not affect the general framework.

15. The Statistical Commission may wish to request the CCC to ensure that the subdivisions of the "Harmonized Commodity Description and Coding System for International Trade" will be aligned with the SITC, Rev. 2, and the subdivided BTN. It is hoped that the CCC will also decide to:

(a) Recommend that its members incorporate these subdivisions either in their legal tariffs or in their national statistical nomenclatures;

(b) Provide a commentary on these subheadings in the Explanatory Notes to the BTN;

(c) Insert the corresponding statistical numbers in the official edition of the Brussels Nomenclature and, in an appendix thereto, publish the SITC, Rev. 2.

16. The Statistical Commission may eventually wish to ask the Statistical Office:

(a) To revise the Commodity Indexes for the Standard International Trade Classification, Revised 5/ to take account of the SITC, Rev. 2;

(b) To publish in the SITC, Rev. 2, both the correlation code to the (subdivided) BTN and the (subdivided) Brussels Nomenclature itself;

(c) To include in the SITC, Rev. 2, for each heading thereof the related heading of the Classification by Broad Economic Categories; 6/

(d) To revise the Classification of Commodities by Industrial Origin 7/ to take account of the SITC, Rev. 2.

17. The modifications required of the present SITC to produce the SITC, Rev. 2, to a considerable extent preserved its structure at the "group" (3-digit) level and

above, except for those revisions which were required to increase the economic usefulness of the classification by taking account of structural changes in external trade since 1960 or to expand the SITC where technological advances made it necessary.

18. In general, any extensions of detail beyond the present SITC items were based on an analysis of the characteristics which were already in widespread use for defining items in national classifications. In an effort to preserve the structure of the SITC at the group level, changes required for the modernization of the SITC were made, in most instances, at the fourth-digit and fifth-digit levels. Although the advisability of keeping to a minimum the expansion of the present headings of the SITC was recognized, it was considered necessary to increase the detail by about one fourth since the 1,312 basic headings of the present SITC do not reflect the current trade pattern.

19. In general, in order to eliminate as separate headings those no longer important in trade, the reciprocal one-for-one SITC/BTN relationship has been modified in the SITC, Rev. 2, by having a single SITC heading cover two or more BTN headings.

20. Advantage was taken of the opportunity offered by the preparation of SITC, Rev. 2, to put forth the following important changes, inter alia, to the SITC for which there has been demand:

(a) At the request of the International Wool Textile Association, the classification of tops and carded sliver of wool or animal hair, formerly classified as raw materials in 262.7 and 262.8, with manufactured goods in 651.25;

(b) At the request of the International Federation of Cotton and Allied Textile Industries and of the General Agreement on Tariffs and Trade, the expansion of textiles and clothing to take into account the increased use of man-made fibres, blends of yarns and fabrics and knitted and crocheted fabrics which were only produced in negligible quantities when the SITC was last revised, in 1960;

(c) At the request of the Organisation for Economic Co-operation and Development, the revision of the classification of paper and paperboard, which it considered inadequate in the present SITC;

(d) Since it has been the opinion of experts that the treatment of chemicals and petroleum products in the SITC has serious shortcomings, the improvement of the classification of these products within the framework of the classification;

(e) At the suggestion of various Governments and international organizations, the separation of the parts of machinery and apparatus from the equipment itself.

21. The redrafted SITC, Rev. 2, produced by the expert group is contained in the annex to this paper and gives for each item, the corresponding item, items or

proposed subitems of the BTN, together with a reference to the related heading or headings of the present SITC wherever the former and the new headings differ, in ways unlikely to be of statistical importance. Appendix I refers to the treatment of monetary gold and current coin and appendix II presents the headings of the BTN, including the proposed subdivisions made necessary to effect the objectives of SITC, Rev. 2, in terms of the SITC, Rev. 2.

22. The SITC, Rev. 2, consists of 10 sections and 63 divisions, some of which correspond to groups of the present SITC, 233 groups (as compared with 177 groups of the present SITC) and 798 subgroups (625 in the present SITC). Of the 798 subgroups, 365 are further divided into 1,206 subsidiary items (5-digit code), thus making 1,639 basic headings (as compared with 1,312 of the present SITC).

23. As in the case of the present SITC, it is intended that countries wishing to expand or contract the SITC, Rev. 2, should be free to do so. Countries wishing to distinguish more detail in a given item than is provided in the SITC, Rev. 2, may either use vacant digits or, preferably, an additional digit or digits. Countries may find that, for certain classes of commodities, the pattern of their trade does not justify elaborating in their statistics the full detail provided by a given level of the SITC, Rev. 2. For such classes, countries may wish to contract the SITC, Rev. 2, by showing data only at the next higher level of the SITC, Rev. 2, or in some other way consistent with the structure of the SITC, Rev. 2.

24. In the code number of each heading of the SITC, Rev. 2, the first digit determines the section, the first two digits determine the division, the first three digits determine the group, the first four digits determine the subgroup and, if the subgroup is subdivided, five digits determine each of the resulting items. Countries can code any subdivisions of items they make for national purposes by adding digits in the sixth and subsequent positions.

25. The titles of the headings of the SITC, Rev. 2, have, in a considerable number of cases, been expanded and are designed to give as full a description of the contents of the heading as is possible in a limited number of words. The exact content of each heading is determined by that of the BTN item, items or subitems to which it is keyed, which in turn is determined by the CCC documentation. 8/
