

25 February 2016, Vilnius

Statistical Commission
Forty-seventh session
8-11 March 2016
Item 3 (d) National Accounts
Submitted by Lithuania

Lithuania appreciates the work carried out by the Inter-Secretariat Working Group on National Accounts and emphasizes the need for further extended and exhaustive discussions on the research agenda of the 2008 SNA.

Lithuania strongly supports the initiatives to assess Big Data and the possibility to use it for statistical purposes, in particular, for national accounts. Lithuania is also in favour of developments on SDMX projects that will facilitate the exchange of statistical information with international organizations and especially in an expanded e-learning programme for economic statistics.
