

25 February 2016, Vilnius

Statistical Commission
Forty-seventh session
8-11 March 2016
Item 3 (k) Climate change statistics
Submitted by Lithuania

Lithuania welcomes the activities carried out by the UNECE Task Force on Climate Change-Related Statistics and Indicators. The issues presented in CES Recommendations, the current work on their implementation and the development of the road map are of high importance and will aid countries in prioritization of their actions when improving their climate change-related statistics.

However, the feasibility and the scale of implementation process (financial requirements and possibilities, practical problems, etc.) at the national level could become clear only later – after the necessary practical steps have been thoroughly analysed and the implementation process has actually started.
