

Comments/Suggestions for Statistical Commission 49th Session

New York, 6-9 March 2018

2 Adoption of the agenda and other organizational matters

Page/Par.	Contents	Comments/Suggestions
E/CN.3/2018/1	SDGs Indicators, disaggregation data, and issue no one left behind	<p>From the Census or Survey carried out by BPS-Statistics Indonesia can only obtain 33 indicators SDGs which meet with the global standard, other indicators (around 66 indicators are only proxy indicators). Meanwhile, other indicators, most of them is from the administrative data from line ministries, which the methodology is still robust.</p> <p>Some indicators SDGs from the census and survey from BPS-Statistics Indonesia can be disaggregated into poor and non-poor group of people, disable and non-disable people, according to the different age groups, and according to male and female, provincial levels, and migrant and non-migrant</p> <p>However, there is a difficulty in disaggregating data until level of district or municipality. It needs guidance from Expert Groups. BPS Statistics Indonesia trying to obtain them through an estimation using small area estimation. So, it needs very clear information relating to the issue of no one left behind, whether the SDGs indicators should be disaggregated into district/municipal levels or not</p>
E/CN.3/2018/17	Disability Statistics	BPS Statistics Indonesia has already implemented a short set questions of Washington group questions into the 2015 Indonesian Intercensal Population Census, Labor Force Survey and National Socioeconomic Survey.
E/CN.3/2018/19	Ageing Statistics	Since 2001, BPS Statistics Indonesia every year published ageing statistics. But, it is only aged people who stayed on the household, not including the aged people who stayed in the nursing homes. Moreover, some SDGs Indicators from census or survey from BPS-Statistics Indonesia can also be disaggregated into different age groups, including ageing group
E/CN.3/2018/22	Gender Statistics	In responding to the EDGE projects, BPS-Statistics Indonesia needs assistance in capacity building in implementing Gender Statistics for Own-Production to be implemented into the household survey.

E/CN.3/2018/30	Informal Statistics	BPS-Statistics Indonesia carry on the Informal Survey in line with the Labor Force Survey this year.
