

REPUBLIKA E SHQIPËRISË
INSTITUTI I STATISTIKAVE

Statistical Commission

Forty-ninth session

6- 9 March 2018

Item 3 (k). Climate change statistics

Items for discussion and decision: climate change statistics

ALBANIAN STATEMENT

Institute of Statistics of Albania congratulates and fully supports the work carried out by the United Nations Statistics Division, in collaboration with other institutions, in the development of global set of climate change statistics and indicators. We find it very relevant the improvement and strengthening of the relationship between the climate data producers and data users, which can contribute to make the link between statistics and policy more efficient.

Albania believes and emphasis that the list of activities presented by the United Nations Statistics Division will help to further develops the climate change statistics. We approve the expansion of the mandate of the Expert Group on Environment Statistics for the development of the work plan since our main objective is to advance the work for producing more data related to the climate change statistics and indicator, resulting from the data requirements of the Paris Climate Agreement (PCA).

Related to this it is crucial receiving support regarding the development of methodologies and participating in the pilot surveys.
