

Side event

Measuring corruption in the framework of SDGs

49TH SESSION
OF THE UN
STATISTICAL
COMMISSION

Introduction by:

- Ambassador Inigo Lambertini
Deputy Permanent Representative of Italy to the UN.
- Ambassador Juan Sandoval Mendiolea
Deputy Permanent Representative of Mexico to the UN.

The side-event will present and discuss recent progress in the measurement of corruption, especially in the context of experience-based approaches (as opposed to perception-based) in line with the statistical global framework for SDG monitoring.

The side-event will be a forum for countries to report on their experiences in corruption measurement. It will give an opportunity to exchange views on the collection, analysis and use of experience-based corruption data.

International organisations will describe the work they are conducting to support countries and improve methodologies, including the forthcoming 'Manual on corruption surveys'.
