Comparing that number to Finland's 3 deaths per 100,000 reveals the stark differences in maternal health care between developed and less developed countries.

The ratio of boys to girls in schools varies considerably from country to country. On the map at right, countries shown in **blue** have an imbalance of male students over female students in secondary schools. **Red** countries have more girls than boys enrolled in secondary schools.

Women suffer from higher unemployment rates—in some cases three times higher—than men throughout much of the developing world.

The SDG Wheel is a circular diagram with 17 segments, each representing a Sustainable Development Goal. The segments are arranged in a circle around a central hub. The central hub is divided into four quadrants: 'Climate & Energy' (top), 'Food & Land' (bottom), 'Cities' (left), and 'Redefining value' (right). The segments are numbered 1 through 17, with icons representing each goal. The background of the wheel is a photograph of a cityscape, likely Jerusalem, with a large church and a hill in the background.

## 17 Goals to Transform our World

Governments, businesses and civil society together with the United Nations (UN) have started to mobilise efforts to achieve the Sustainable Development Agenda by 2030. Universal, inclusive and indivisible, the Agenda calls for action by all countries to improve the lives of people everywhere.

This is Ireland's public platform for exploring, downloading and combining publicly available data relating to the UN and the European Union (EU) Sustainable Development Goals. Ireland's progress against each Goal is measured using a set of globally and EU agreed Indicators and here you can search for, discover and visualise the data we use to create those Indicators.

This platform was developed as part of a partnership between Ordnance Survey Ireland, the Central Statistics Office and Esri Ireland.

## Ireland's Life on Land

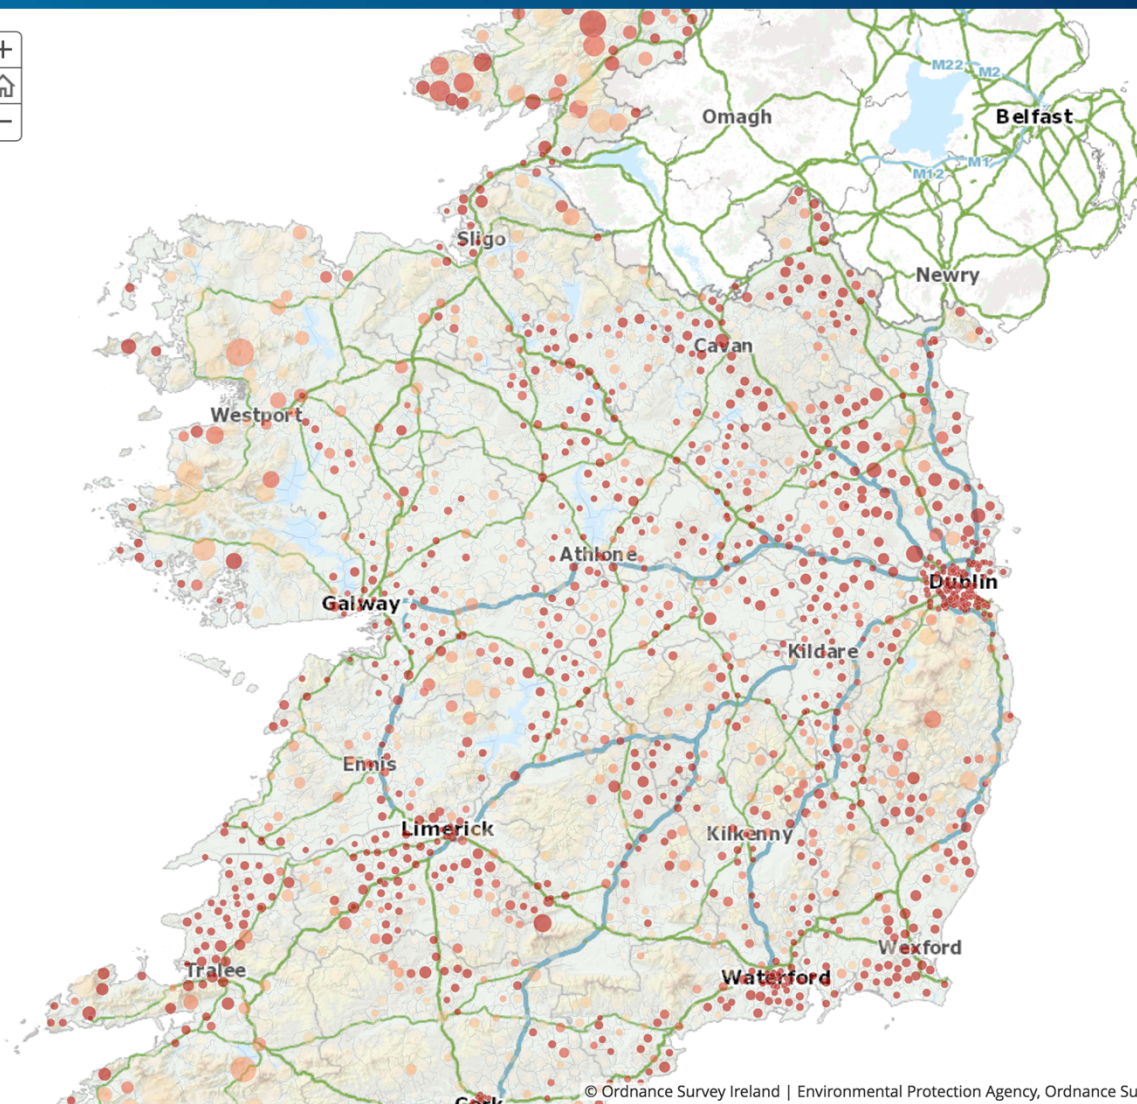

### What is the status of Ireland's Protected Areas?

The Shannon region highlighted above contains a diverse range of habitats and species. Many of the protected sites in this region are water bodies or water dependent habitats. The status of water bodies in this area provide some insight into the condition of the habitats it contains.

The map represents the proportion of rivers that have **not** achieved at least 'Good status', 2015 at Electoral Division level. The data supports SDG 6.3.2 Proportion of Rivers Achieving at Least Good Ambient Quality. Zoom to the River Shannon region.

## The Changing Patterns of Unemployment and Poverty in Ireland, 2011-2017

This Story Map illustrates changes in Ireland in relation to unemployment and poverty throughout the last decade. The Story Map has been developed to inform efforts in reporting Ireland's status in relation to achieving United Nations (UN) Sustainable Development Goals.

UN countries have adopted a set of 17 goals to end poverty, protect the planet and ensure prosperity for all as part of a new sustainable development agenda. Each goal has specific targets to help achieve the goals set out in the agenda by 2030.

Images, interactive maps, charts and text have been combined to highlight trends. Indicators illustrated below highlight

## The Status of Ireland's Rivers

A story map [f](#) [t](#) [e](#)

Introduction

Status of Ireland's Rivers, 2015

Where are the 'High Status' rivers?

Decline in River Status 2012 to 2015

Threats to Ireland's Rivers

Conclusion

This Story Map explores Ireland's river water quality, threats to river water quality and trends over time. The application has been developed to inform efforts to monitor Ireland's progress in relation to achieving targets set out by the 17 United Nation (UN) Sustainable Development Goals.

UN countries have adopted a set of 17 goals to end poverty, protect the planet and ensure prosperity for all as part of a new sustainable development agenda. Each goal has specific targets to help achieve the goals set out in the agenda by 2030.

This Story Map relates to UN Sustainable Development Goal 6 which aims to ensure availability and sustainable management of water and sanitation for all.

Interactive maps, images and text have been combined to investigate how Ireland is doing in relation to water quality.

The Environmental Protection Agency (EPA) monitors Ireland's rivers. Continuous sampling is carried out to report annually on river quality and a full survey cycle is completed every three years (EPA, 2017).

# Mexico – United Mexican States

On 1 January 2016, the world officially began implementation of the 2030 Agenda for Sustainable Development—the transformative plan of action based on 17 Sustainable Development Goals—to address urgent global challenges over the next 15 years. This agenda is a road map for people and the planet that will build on the success of the Millennium Development Goals and ensure sustainable social and economic progress worldwide. It seeks not only to eradicate extreme poverty, but also to integrate and balance the three dimensions of sustainable development—economic, social and environmental—in a comprehensive global vision. All nations will need to build the Sustainable Development Goals into their national policies and plans if we are to achieve them.

### SDG 1.2.1, Proportion of Population Living Below the National Poverty Line, NUTSIII, 2015, Ireland, CSO & OSI

This feature layer represents Sustainable Development Goal indicator 1.2.1 'Proportion of Population Living Below the National Poverty Line' for Ireland in 2015. The layer was created using 'at risk of poverty rate' data from the Survey on Income and Living Conditions (SILC) 2015 produced by the Central Statistics Office (CSO) and NUTSIII boundary data produced by Ordnance Survey Ireland (OSI). In 2015 UN countries adopted a set of 17 goals to end poverty, protect the planet and ensure prosperity for all as part of a new sustainable development agenda. Each goal has specific targets to help achieve the goals set out in the agenda.

### Indicator 1.2.1 Proportion of population living below the national poverty line, by sex and age

Source of statistical information used to calculate the indicator:

- Instituto Nacional de Estadística y Geografía (INEGI). Módulo de Condiciones Socioeconómicas de la Encuesta de Ingresos y Gastos de los Hogares, 2010 - 2014
- Consejo Nacional de Evaluación de la Política de Desarrollo Social (CONEVAL). Metodología para la medición multidimensional de la pobreza en México (1 de marzo de 2017).

Unit of measure: Percentage  
Time reference: 2010-2014

### Poverty at Provincial Level

This includes all measure of poverty (among family and population) at the provincial level for the years 2006, 2009, 2012, and 2015. These are Poverty Incidence and Magnitude, Poverty and Food Thresholds, Poverty Gap, Income Gap, and Extent of Poverty. These data were derived from the result of their corresponding Family Income and Expenditure Survey. Map Displays at Scale: 1:100 to 1:6,000,000

## The Sustainable Development Goals

We must take action today to help ensure the health and well-being of future generations. As an outcome of the Rio+20 Conference, the Sustainable Development Goals are part of *The Future We Want* Resolution, which is in pursuit of achieving tremendous goals by 2030 to promote sustainable development.

These 17 goals set out to end poverty, protect the planet, and ensure prosperity for all. This requires participation from everyone, including governments, the private sector, civil society, and even people like you.

### From Millennium Development Goals to the Sustainable Development Goals

At the turn of the century, the United Nations established 8 goals in an effort to tackle some of the world's most pressing challenges. The Millennium Development Goals were an ambitious project aimed at alleviating poverty by 2015. Building on the success of the MDGs, the UN created 17 Sustainable Development Goals that came into effect in January 2016.

While the MDGs were focused on developing countries, the SDGs are universal. These Sustainable Development Goals
