

# The 2020 Census round in Latin America and the Caribbean

Potentials and limitations for measuring the  
Sustainable Development Goals, the 2030  
Agenda and the Montevideo Consensus on  
Population and Development

United Nations Statistical Commission  
7 March 2018, New York, NY

NACIONES UNIDAS

Paulo M Saad

CELADE – Population Division

Economic Commission for Latin America and the  
Caribbean (ECLAC)

# Objectives

- Identify the indicators related to the SDGs and to the regional follow-up of the Montevideo Consensus on Population and Development that can be calculated by existing census data
- Make recommendations for the 2020 round of census
  - to improve census capacity for measuring the SDGs and MC indicators
  - to increase the comparability of these indicators between countries

NACIONES UNIDAS

CEPAL

# Notes

- **The Montevideo Consensus on Population and Development**
  - regional instrument for the implementation and monitoring of the PoA of the ICPD beyond 2014 in Latin America and the Caribbean
  - adopted by the LAC countries at the first session of the RCPD in 2013
  - complementary to the 2030 Agenda and the SDGs
- **The regional seminar**
  - Panama City, November 2016
  - jointly organized by CELADE-Population Division of ECLAC and UNFPA-LACRO
  - in coordination with the Census Working Group of the SCA
  - in the context of the UN Dev. Acc. Programme on Statistics and Data, under the coordination of the UN Statistics Division
  - attended by 19 NSOs of Latin American countries

NACIONES UNIDAS

CEPAL

# Potentials and limitations

- **Potentials**

- universal scope
- different units of analysis (individuals, households);
- sample frames for surveys
- Base for population estimates and projections

- **Limitations**

- periodicity: In general, censuses take place every 10 years
- Need for using proxies
- Takes time to adjust to social and political changes
- Comparability between countries

NACIONES UNIDAS

CEPAL

# Dynamics of the seminar: 3 steps

- **Selection of indicators (46)**
  - **19** from SDGs only; **9** from MC only; **18** from both
  - Topics: poverty, indigenous peoples, mortality, employment, mobility, education, health, social protection, households,...
- **Classification of the indicators**
  - Low level of complexity: **25**
  - Intermediate: **13**
  - High: **8**
- **Elaboration of technical data sheets**

NACIONES UNIDAS

CEPAL

# Contents of the technical data sheets

- Scope of the indicator
- Calculation of the indicator
  - operational definition for its calculation
  - variable(s) required for the calculation
  - limitations for its calculation
  - proposed alternative indicators (if pertinent)
  - countries with available data from the 2010 round of census
- Potential for integration with other data sources
- Recommendations for 2020

NACIONES UNIDAS

CEPAL

# General conclusions

- Main source for the disaggregations required by SDG 17.18
- Only available source for some indicators
- One of few data sources in some countries
- Potential has increased with technological progress
- Capacity and comparability can significantly improve: urgent actions are required for the 2020 round
