

**49th Session of the UN Statistical Commission
7 March, 2018**

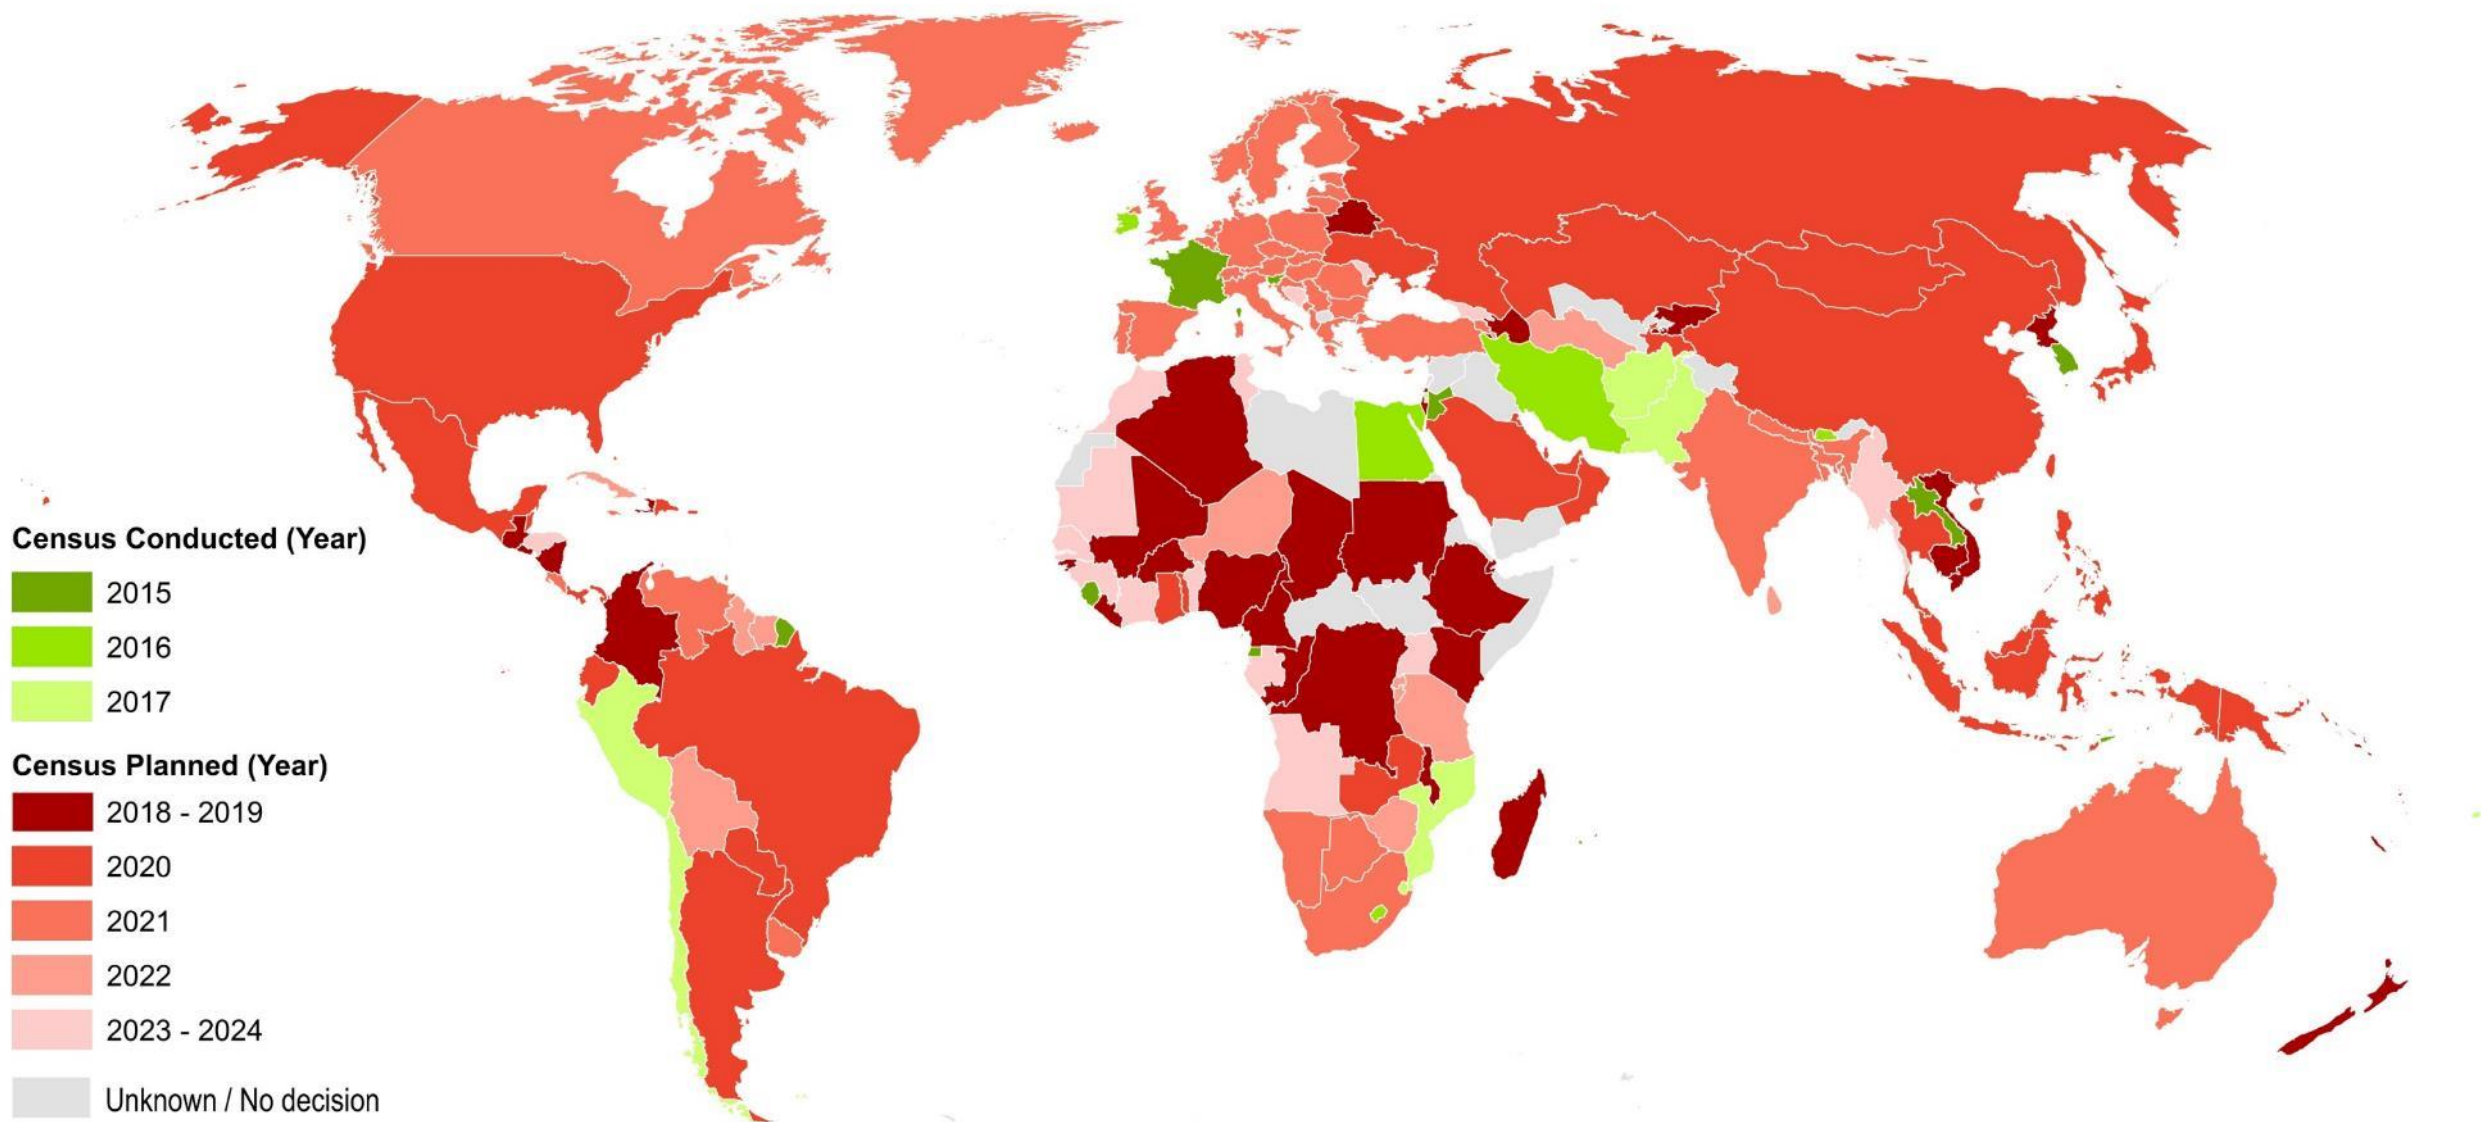

UNFPA's support to the 2020 Census Round

Rachel Snow, ScD

**Chief, Population and Development Branch, Technical Division
United Nations Population Fund**

National dates for 2020 round of census

UNFPA priorities for the 2020 census round

1. Use of hand-held devices to enhance cartography and generate high-resolution geospatial census data
2. Strengthen capacity for using and integrating geospatial census data with other datasets
3. Support hybrid census, where full enumeration is not possible
4. Support wide dissemination

Advocacy and procurement of hand-held devices

1. Create Map Resources

Professional GIS

2. Configure maps

Local Desktop

3. Deploy and Synchronize Changes

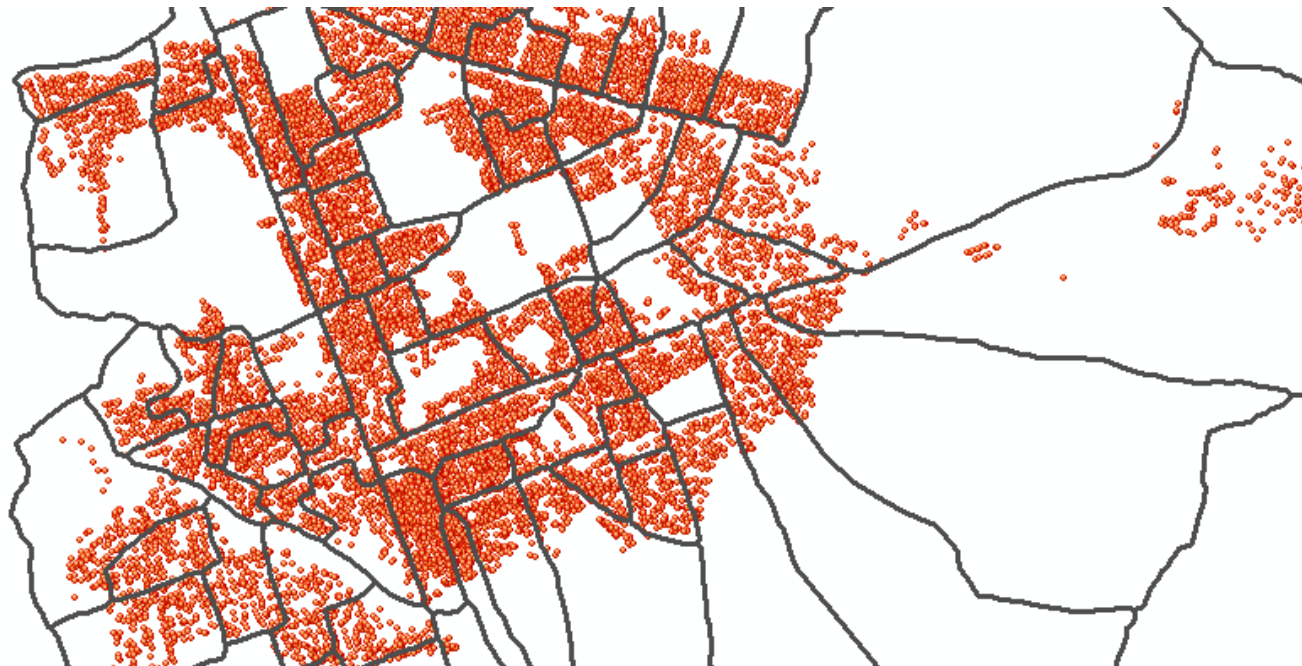

Deploy offline Maps

Synchronize Edits

Improving digital cartography

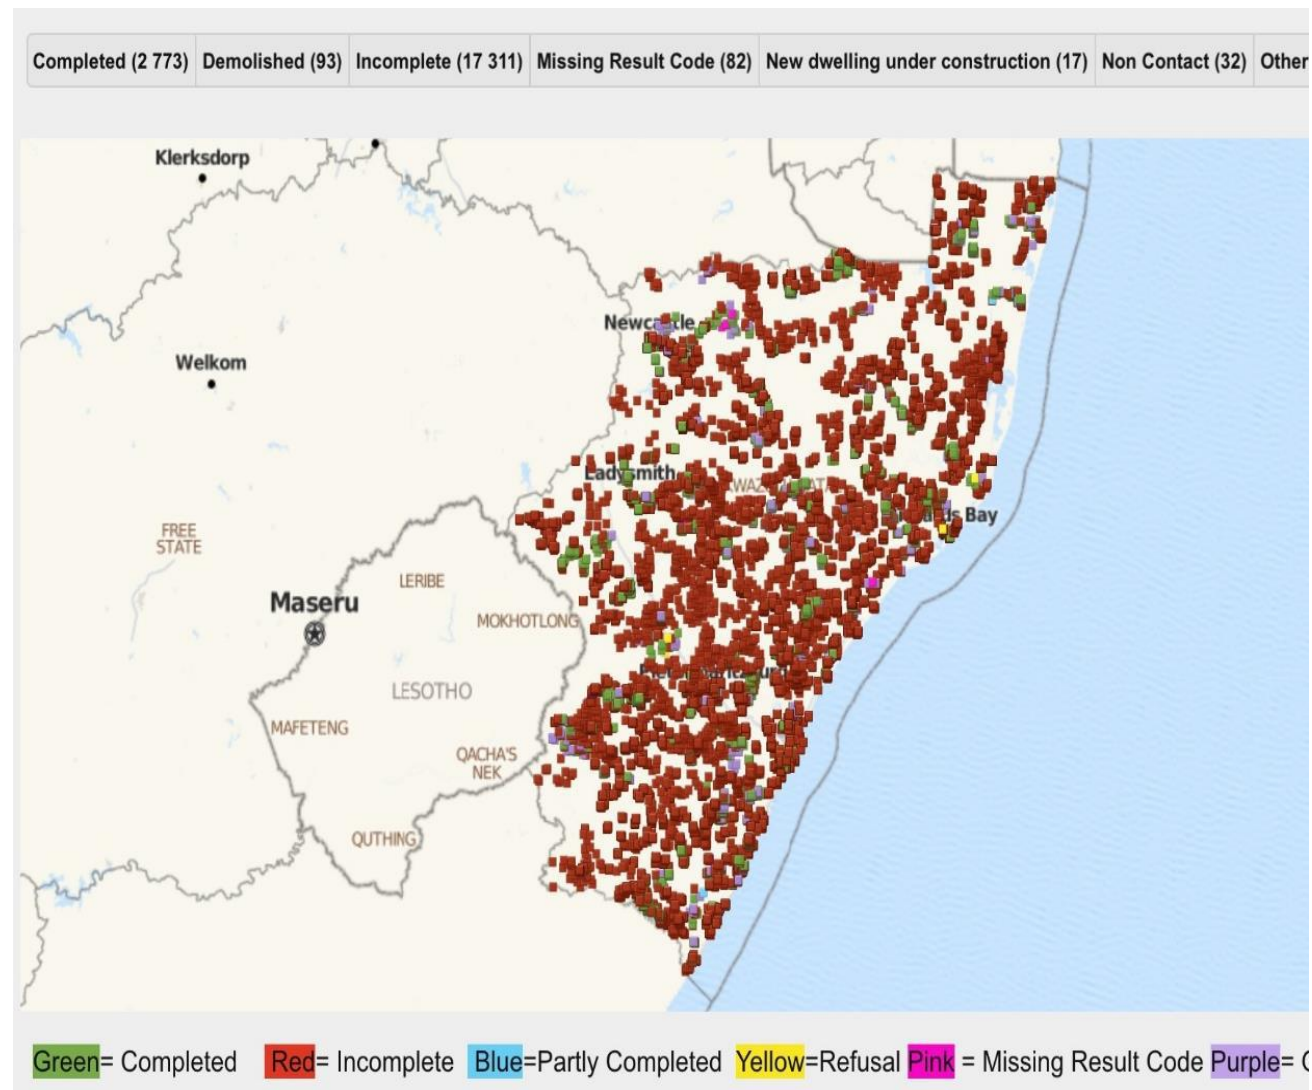

Improve timeliness and quality: EA boundaries can be reaffirmed on the ground; reducing omission or duplication.

Greater use of GIS

To improve census quality and coverage

- Using GPS navigation of HH by fieldworkers
- Monitoring enumeration in real time

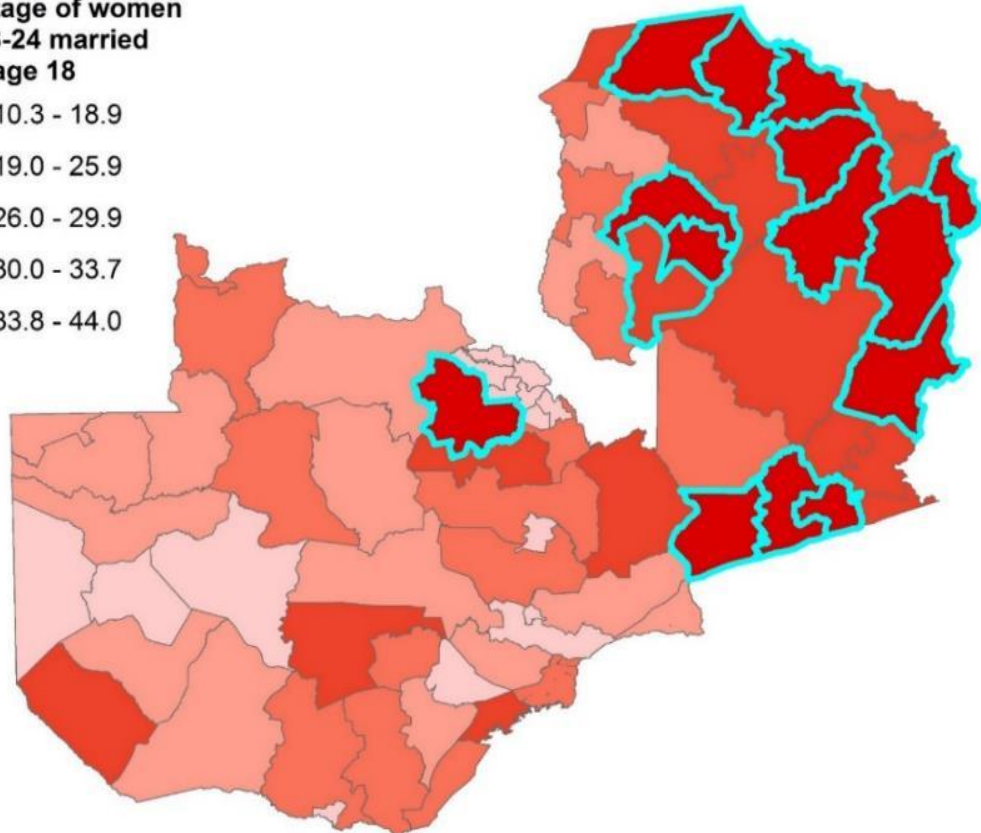

Using Census to Disaggregate SDG Indicators

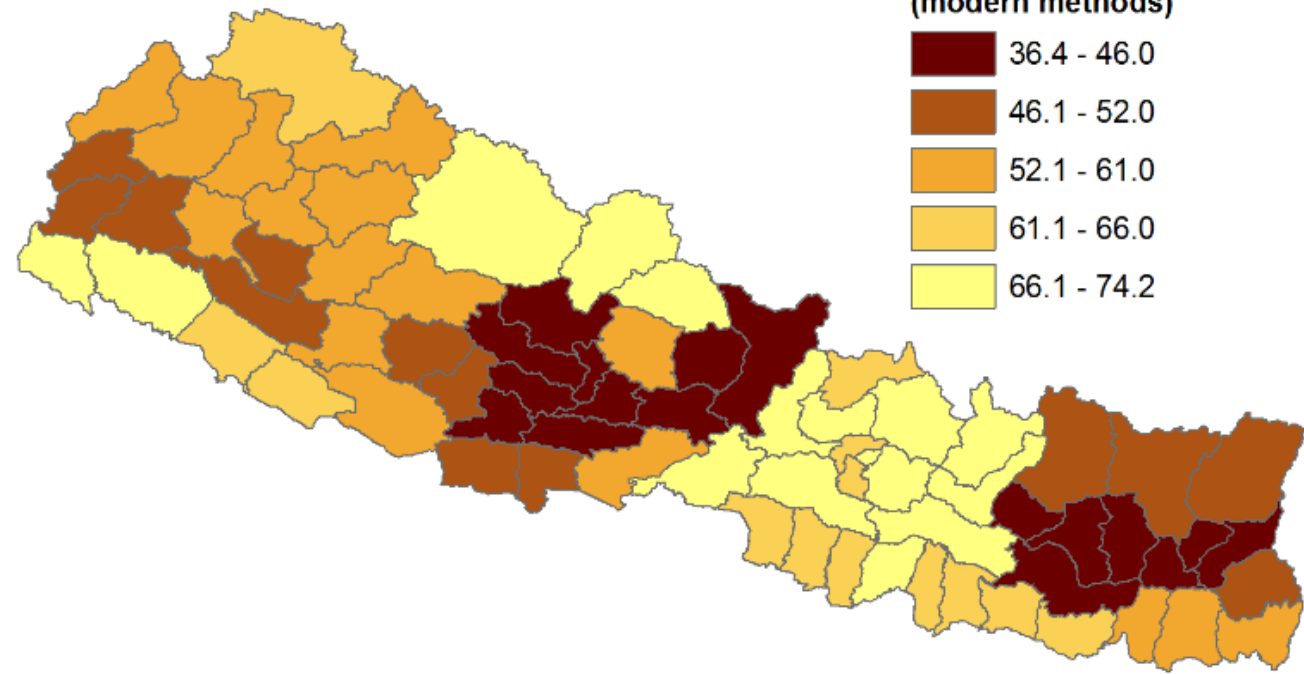

Child Marriage in Zambia

Percentage of women aged 18-24 married before age 18

Family Planning in Nepal

Proportion of demand for contraception satisfied (modern methods)

Supporting hybrid census, where full enumeration is not possible

Ancillary geospatial data

Vegetation index

Slope

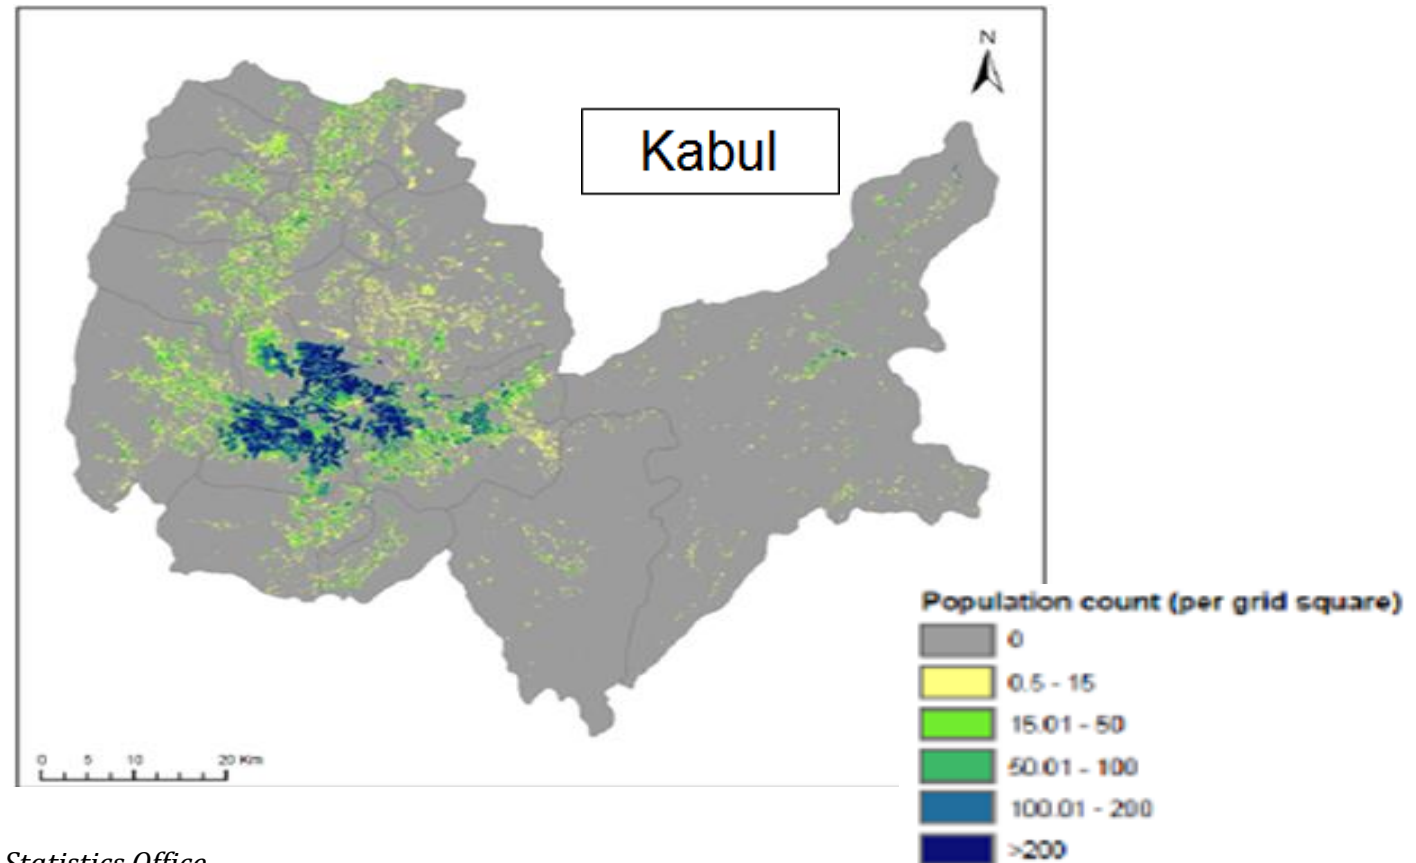

Night-time

Settlements

Output

- 100mx100m grid population estimates

Supporting Census Dissemination

- User-Producer consultations
- Redatam / IMIS for open-source census dissemination
- Capacity strengthening for subnational mapping, projections, SAE, etc.
- Advocacy for public access

BECAUSE EVERYONE COUNTS

UNFPA STRATEGY
OF SUPPORT FOR
THE 2020 CENSUS
ROUND

Thank you
