BPS – STATISTICS INDONESIA

Comments/Suggestions for Statistical Commission 50th Session
New York, March 2019

3(c) Items for discussion and decision: open data

File/Page/Par.	Contents	Comments/Suggestions
2019-5-FOC-FPOS-OpenData-EE Page 5/Par.17	**17.** The Statistical Commission is invited to: (a to e)	Indonesia in One Data Indonesia Presidential Decree draft insist of mechanism of interoperability data, because interoperability is a characteristic of good quality data, and it relates to broader concepts of value, knowledge creation, collaboration, and fitness-for-purpose. Further of interoperability data, we need to develop metadata standards in SDMX formats also code of reference that fit to international and national standards also in Open Data initiative. Statistics Indonesia has develop Application Programming Interface (API), that can communicate between server to server as OpenwebAPI at: https://webapi.bps.go.id/developer/ We need assistance and workshop to coordinate much better between ministry and institution at the future, that all ministry can connect to Statistics Indonesia server.
