

**Comments/Suggestions for Statistical Commission 50th Session
New York, March 2019**

3(j) Items for discussion and decision: price statistics

File/Page/Par.	Contents	Comments/Suggestions
2019-13-PriceStats-E/Page 2/Par. 3-8	International Standards and Methodological Guidance: A. Update of the Consumer Price Index Manual	Indonesia as an archipelagic country has different profiles or regional characteristics, requires a CPI manual that can be relied on for any nation's condition. In the era of digitalize everything, big data can be used to improve quality of CPI. In this context, still needs to discuss specific methods and concepts.
2019-13-PriceStats-E/Page 4	III. International Collection of Price Data	Indonesian CPI tried to do a web scrapping for data collection. But it has not been used for the current system. Because the CPI is built from the city base, and has been disseminated at the city-level CPI. The development of price data collection methodology with ICT innovation need to be included in the CPI standard.
