2019-15- EnvironmentalAccounting- Rev-EE/Page 3/Par. 6	The SEEA plays an important role in sharing information and upcoming events and initiatives among stakeholders .....	<p>SEEA is a concept that theoretically and methodologically well applied to calculate the economic and environmental balance for policy making for countries.</p> <p>We appreciate all the actions of the Committee planning a repository that contains not only SEEA training material but also accommodates old repositories and its policies, so that we understand the history and journey of the SEEA.</p> <p>However, because SEEA is a new knowledge, its implementation still requires a relatively long time. Stakeholders must understand the SEEA comprehensively regarding the basic concepts of the SEEA, technical calculations and data sources so that they can be applied for countries.</p> <p>In addition, needs capacity building and technical assistance on standardizing the SEEA implementation between countries.</p>
