

REGISTER FOR DEVELOPMENT

JOINT EFFORTS FOR DEVELOPING ADMINISTRATIVE REGISTERS

Geir Axelsen, Director General, Statistics Norway

WHY REGISTERS MATTER?

- Quality registers as a basis for good governance
 - Registrations important for rights and services
 - Social and economic development
 - Transparency
- Report once → share information
 - Increased benefits from coordinated and shared information
 - Improved quality of registers and official statistics
 - Reduced response burden for businesses and individuals
 - Increased efficiency and lower costs for maintaining registers and statistical production

COORDINATED AND SHARED INFORMATION

The National Coordinating Register
for Legal Entities in Brønnøysund
BUSINESSES

The National Registry
(The Norwegian Tax
Administration)
POPULATION

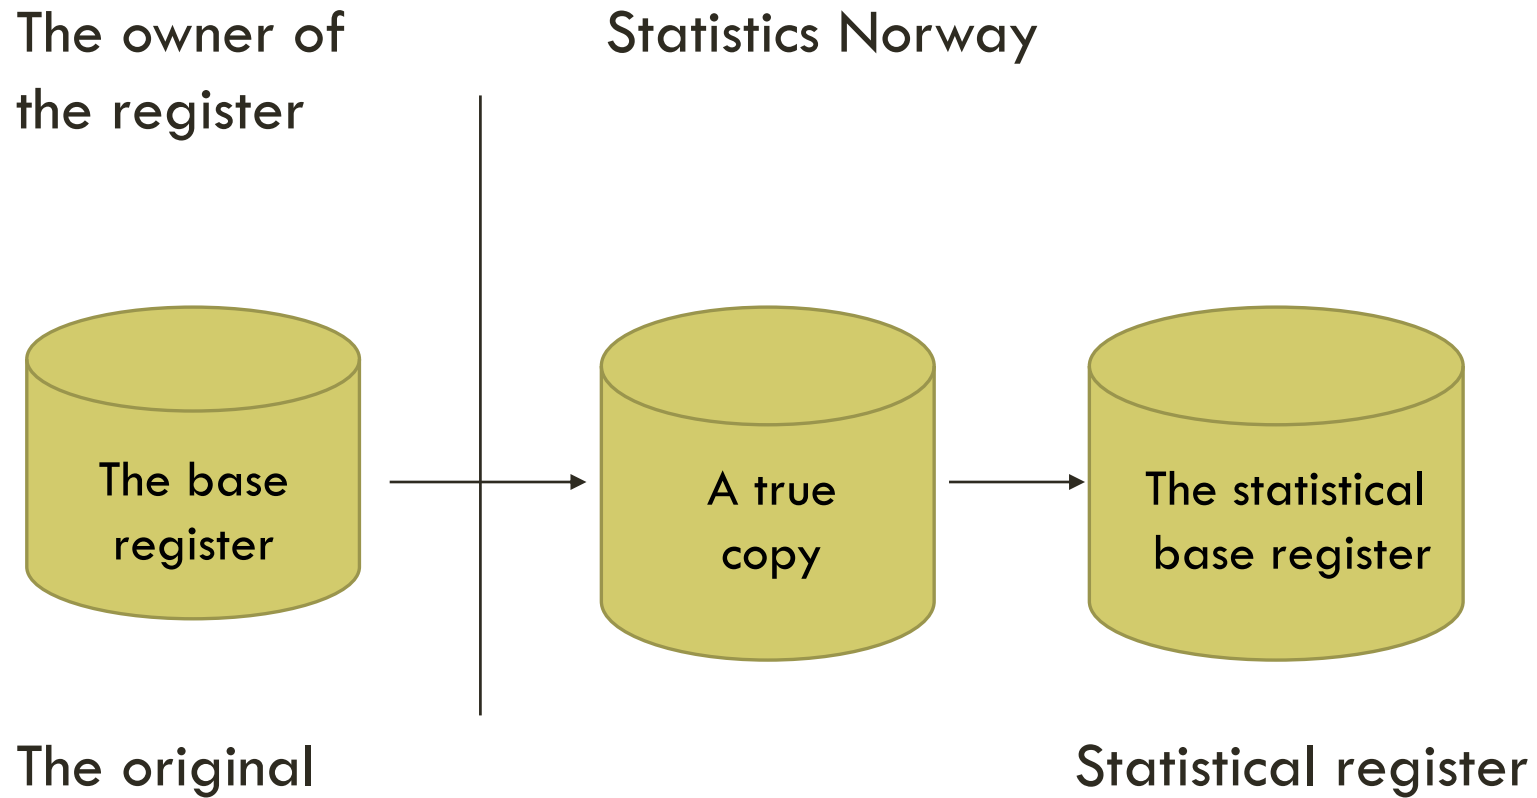

The New Cadastre
(Norwegian Mapping Authority)
PROPERTIES

Statistics Norway

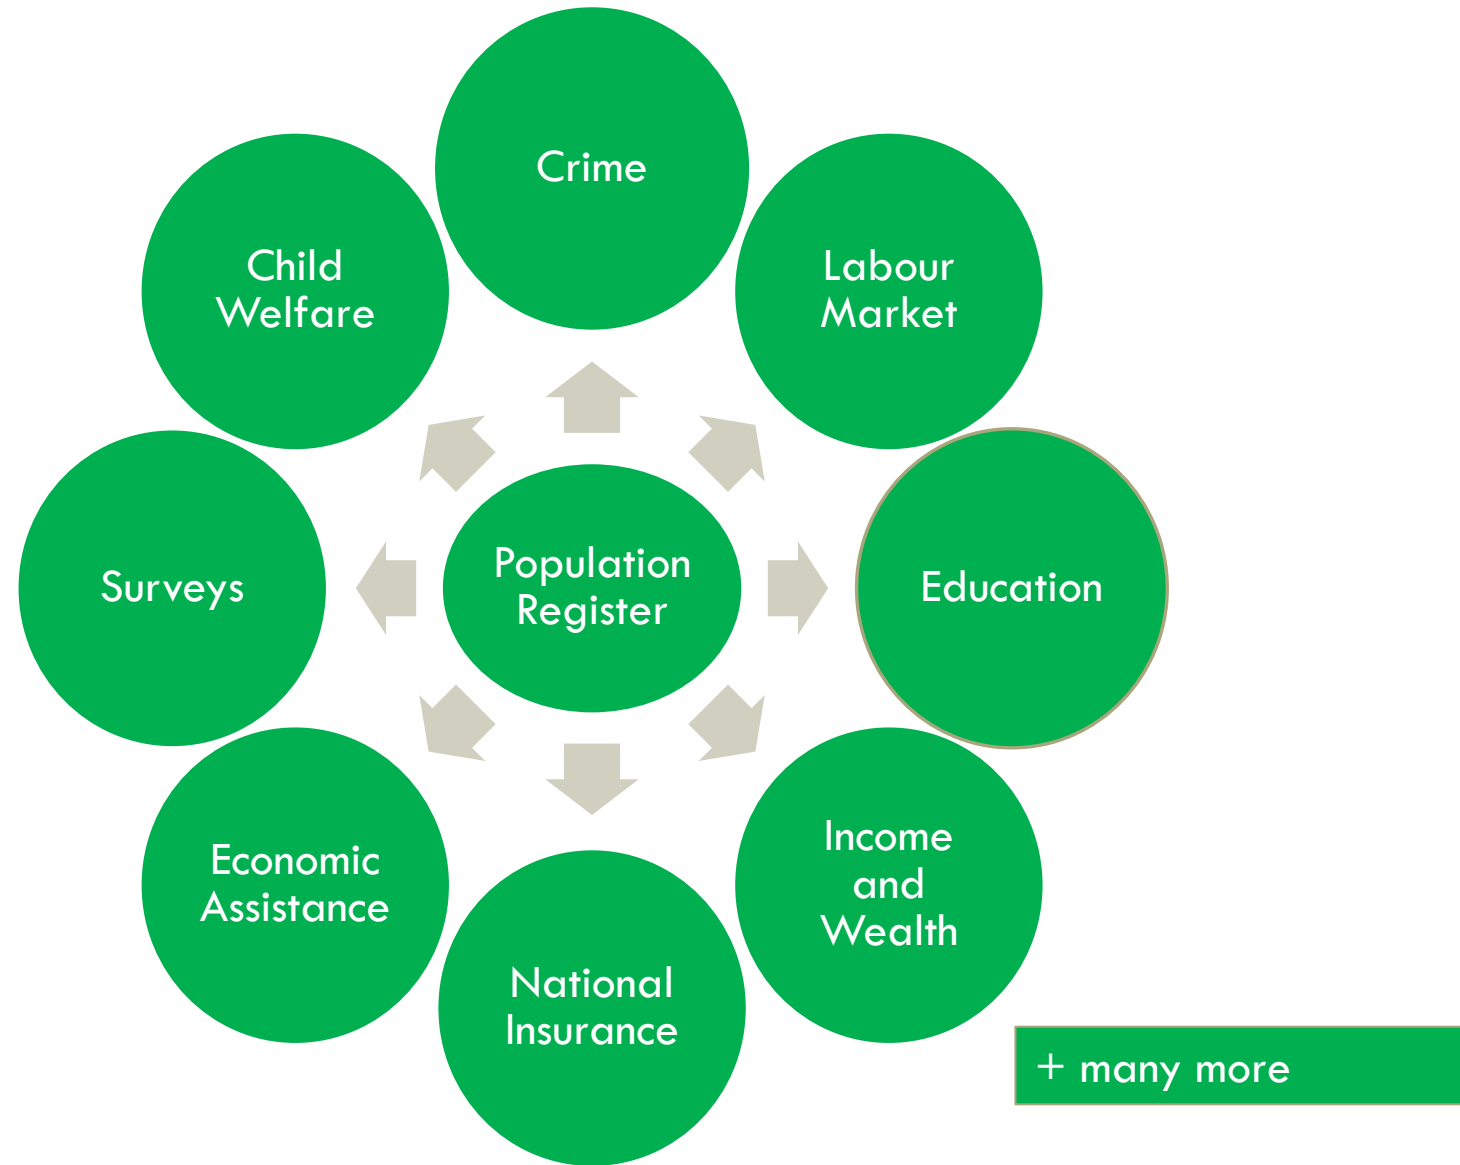

USING REGISTERS FOR OFFICIAL STATISTICS

- Directly for production of one or several statistics
- Cost and time efficient, reduces response burden
- National identification numbers facilitate linking registers
- Combined with data from surveys and “big data”
- As sampling frames
- For quality control
- All these applications may be relevant for establishing SDG indicators

THREE VERSIONS OF EACH REGISTER

USE OF DATA ON INDIVIDUALS IN STATISTICS NORWAY

SDG AND ADMINISTRATIVE REGISTERS

- Administrative registers as a source for SDG reporting
 - Include the entire population
 - Include more information
 - Updated regularly
 - National identification number

EXAMPLES OF ADMINISTRATIVE DATA RELEVANT FOR THE SDGs

Population

Health

Employment

Agriculture

Accidents

Education

Wages

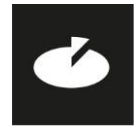

Electricity

Crime

Other possibilities: Registers on elections, properties, water, land use and fisheries
