

UNSC 2019 Side Event

The Global Statistical Geospatial Framework

Branko Vitas

Program Manager - International Statistics Branch

Australian Bureau of Statistics

UN-GGIM

United Nations Committee of Experts on
Global Geospatial Information Management

Challenge

There is an urgent need for a mechanism, such as a global statistical-spatial framework, to facilitate consistent production and integration approaches for geo-statistical information.

The Global Forum on the Integration of Statistical and Geospatial Information, New York 2014

UN-GGIM

United Nations Committee of Experts on
Global Geospatial Information Management

Target

... advance the implementation of a global statistical-geospatial framework so that there is increased information to support social, economic and environmental policy decision-making, including at the subnational level.

*United Nations Committee of Experts on Global Geospatial Information Management (UN-GGIM),
New York 2014*

UN-GGIM

United Nations Committee of Experts on
Global Geospatial Information Management

Side event purpose

The objective of this side event is to provide information on:

- development of the **Global Statistical Geospatial Framework**
- lessons learned and advantages gained through the adoption of the Framework's five principles within national and regional contexts
- the next steps in finalising the **Global Statistical Geospatial Framework**

UN-GGIM

United Nations Committee of Experts on
Global Geospatial Information Management

Side event agenda

➤ Introduction (15 mins)

Introduce the GSGF and set the scene.

➤ Regional Perspectives in Statistical Geospatial Integration (20 mins)

Regional perspectives of statistical geospatial integration

➤ GSGF: Implementation national experience (20 mins)

Sweden and Egypt national case studies

➤ Questions and discussion

UN-GGIM

United Nations Committee of Experts on
Global Geospatial Information Management
