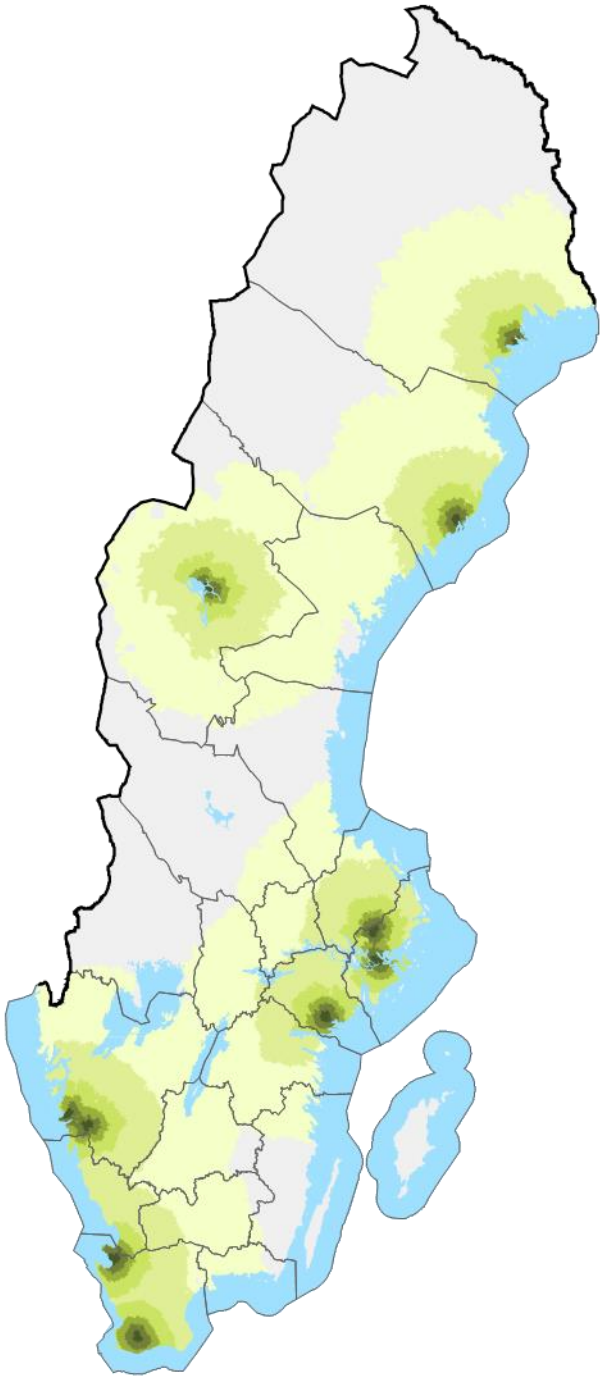
Implementing the GSGF in Sweden

Marie Haldorson

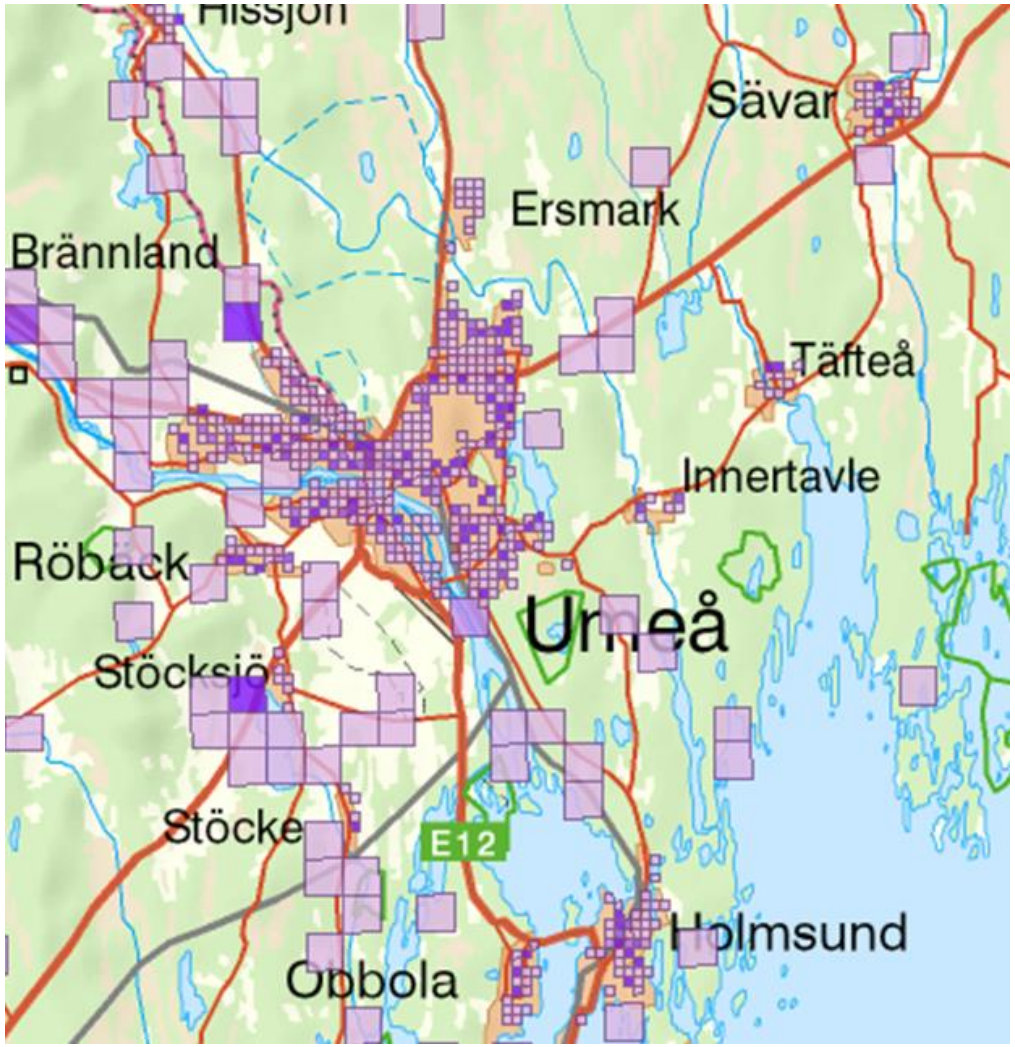
Why a National Assessment?

- We have the knowledge
- We have the data
- ..but the knowledge and data are under-utilised!
- Most importantly: how to improve our geospatial services to users?

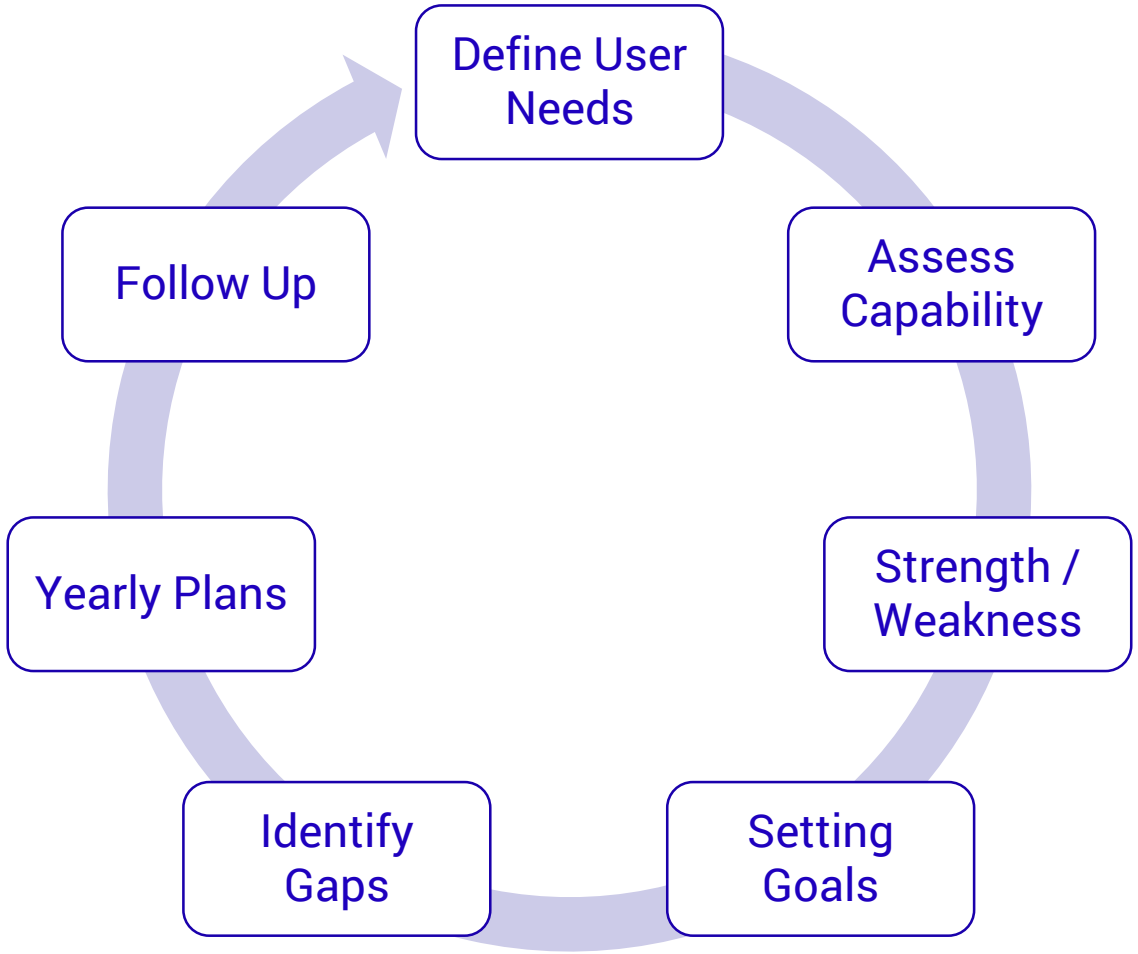


The Report

- User needs
- The GSGF principles and what we have in place
- A capability assessment
- Actions to improve our capability

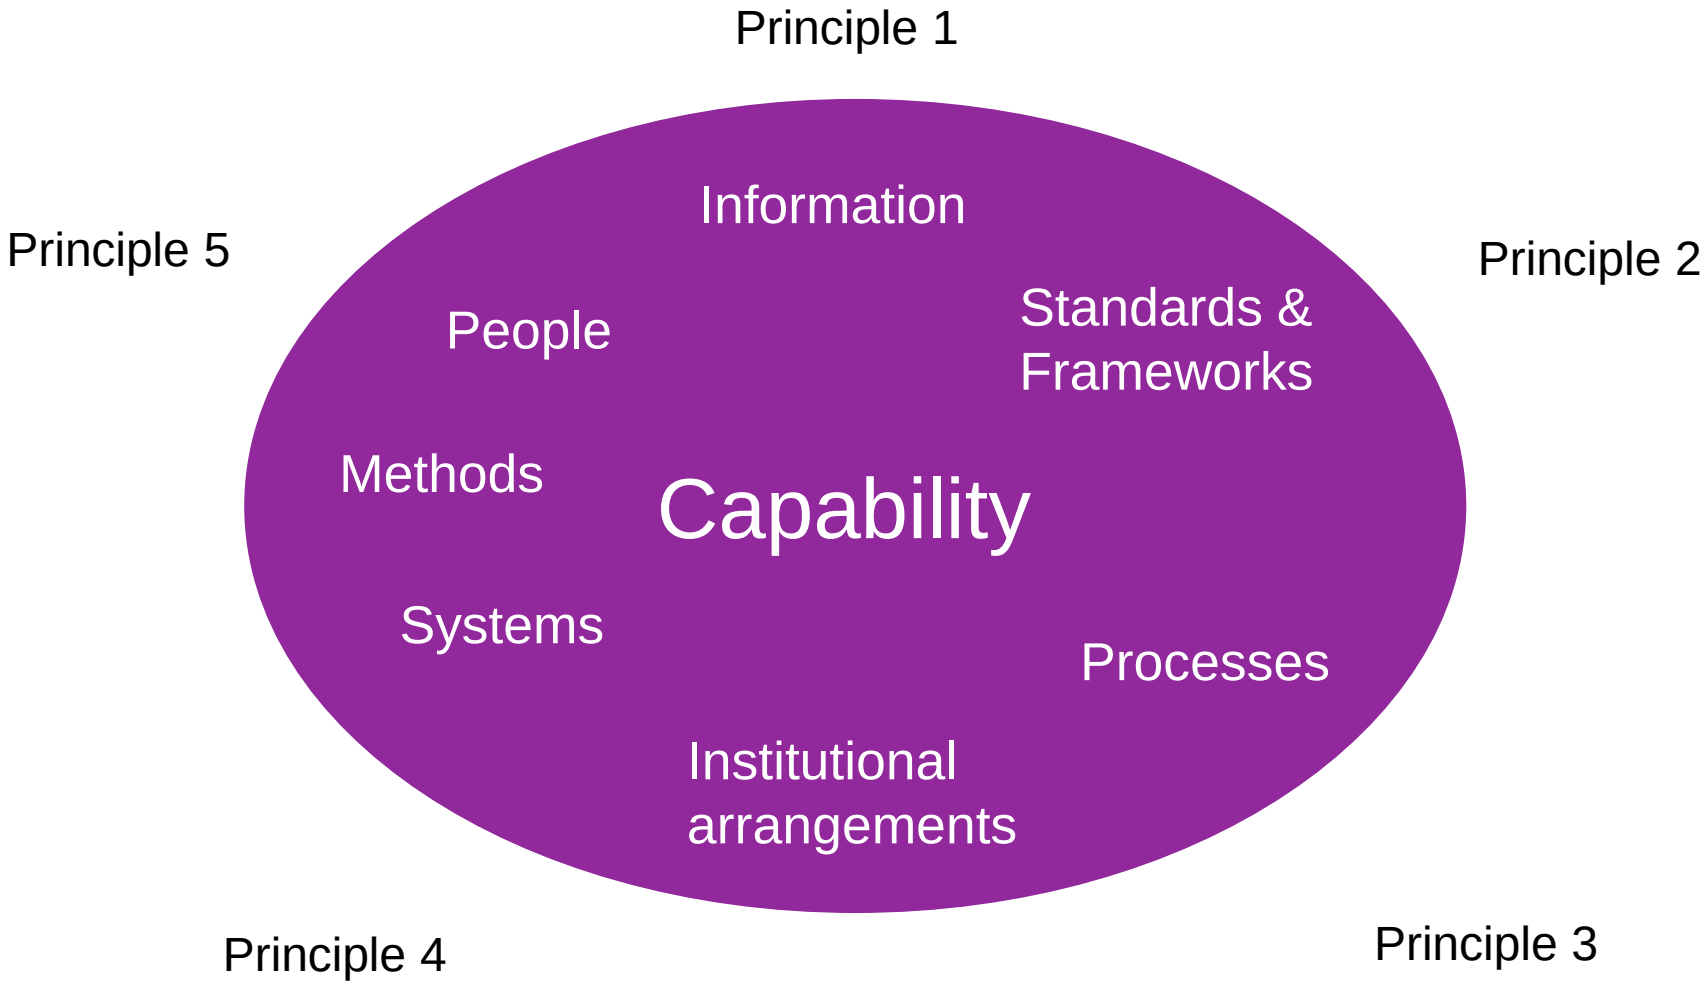


Implementation Steps



- New Activites
- Improve
- Maintain
- Reduce

The Capability Assessment



New activities needed!

Online guiding documents for statisticians

Open data at the local level

Guidance to other producers of official stats

Geospatial quality in registers

Interactive map services

Improved enterprise architechture
