

Leaving no one behind

Filling data gaps on children in the SDG decade of action

DATE

Wednesday,
March 4th

TIME

6:30pm - 8pm

LOCATION

UNICEF House (Danny Kaye),
3 UN Plaza, New York, NY 10017

UNICEF Data and Analytics Reception

Almost a billion (945 million) children live in countries where the SDGs remain out of reach, and countries are most likely to be off track to meeting progress envisioned by the SDGs. Many children also remain effectively uncaptured given the limited coverage of SDG data.

The objective of this side event organized by UNICEF is to draw attention and drive action towards filling data gaps on children. New and promising work will be showcased with particular emphasis on ramping up action and delivery of the SDGs through innovations and partnerships in data collection, analysis and use. The event will be framed as a marketplace in which participants can engage deeper on those topics.

UNICEF Data and Analytics section invites you to join us in this opportunity with Member States representatives, UN agencies, practitioners and civil society to share ideas and good practices.

Light refreshments and finger food will be served. **Please [RSVP](#) and bring a valid ID.**
