United Nations Statistical Commission
Fifty-second session
1–3 and 5 March 2021
Item 3 (a) of the provisional agenda
Items for discussion and decision: data and indicators for the 2030 Agenda for Sustainable Development

Statement provided by:
Federal Statistical Office Germany

Statement:
We welcome the document in the context of the data stewardship approach, since the topic of data stewardship became increasingly relevant. From our point of view, it is important to foster a further exchange of experiences in different countries in the context of data stewardship. Therefore, we have already contributed by submitting a document outlining the German considerations in this context. We would further like to express our interest to become a member of the working group regarding the data stewardship approach.
