United Nations Statistical Commission
Fifty-second session
1–3 and 5 March 2021
Item 3 (a) of the provisional agenda
Items for discussion and decision: data and indicators for the 2030 Agenda for Sustainable Development

Statement provided by:
BPS-Statistics Indonesia

Statement:

a) Indonesia supports the proposal of working mechanism to develop guidelines for the national statistics office on issues related to data stewardship. Indonesia think that this new working mechanism can show the conditions for achieving the SDGs globally, especially in achieving the Goal 17 SDGs, namely partnerships for the goals. Furthermore, this working mechanism can be a methodological review tool for the national statistical office in providing data on SDGs achievements.

b) Indonesia accept conclusions and outcome statements regarding the global response to COVID-19. However, it is necessary for the NSO’s to keep updated on what has changed from the original agreement and what recent recommendations have been produced by group and sub-group forums. So that if the support and commitment of member countries is needed, then this is a collective agreement.

c) Indonesia supports the capacity building program for 2030 Agenda for sustainable development, and would like to express our interest in participating the 2021 UN World Data Forum.

d) Indonesia agrees with the proposed workplan of the High-level Group for 2021.
