United Nations Statistical Commission
Fifty-second session
1–3 and 5 March 2021
Item 3 (a) of the provisional agenda
Items for discussion and decision: data and indicators for the 2030 Agenda for Sustainable Development

Document E/CN.3/2021/3 – Report of the Secretary-General on work for the review of progress towards the Sustainable Development Goals

Statement provided by: BPS-Statistics Indonesia	

Statement:

a) In the present, Data for Now initiative is a highly need program. This program could answer recent challenges to utilize innovative sources, technologies and methods for streamline production and dissemination **for better, more timely and disaggregated data** on key areas related to **sustainable development goals**. Therefore, Indonesia strongly agrees with the Data for Now Initiative.

b) Indonesia strongly supports the launch of a collaborative effort on the use of administrative data for statistical purposes. In this case, Indonesia has implemented the use of administrative data when conducted 2020 population census utilising population administrative data from the Ministry of Home Affairs. In the next future, administrative data will be a new target for producing key policy indicators including social and economics sector.

c) Indonesia supports the Federated Information System as a facilitator for the exchange of data, information and knowledge to achieve the 2030 agenda. For information, at the national level, Indonesia is implementing the One Data Indonesia program to accelerate the achievement of the SDGs, especially in data exchange between ministries and institutions. Indonesia are aware that cooperation, coordination, system infrastructure, and human resources play important roles to run the system.

d) Indonesia are hoping that the Global Network of Data Officers and Statistical training will narrow the gaps in statistical fields of all its members.

e) Indonesia would like to express sincere appreciation to UNSD regarding the launch of the Global Network of Data Officers and Statisticians. Regarding to the Yammer Platform: it should help in collaboration, coordination, knowledge sharing, networking and technical support of its member as well as its interoperability. All Global Network of Data Officers and Statisticians member should be socialized and well trained.

f) Indonesia strongly agrees with the survey to monitor the impact of the COVID-19 crisis on national statistical office. Through this survey, National statistical offices are able to share their experiences and best practices on how they adjust their business process in dealing with COVID-19, and how the institution can collect data during the pandemic.
