

**United Nations Statistical Commission**

**Fifty-second session**

1–3 and 5 March 2021

Item 3 (a) of the provisional agenda

**Items for discussion and decision: data and indicators for the 2030 Agenda for Sustainable Development**

**Document E/CN.3/2021/2 - Report of the Inter-Agency and Expert Group on Sustainable Development Goal Indicators**

<i>Statement provided by:</i> MEXICO	
<i>Statement:</i> Mexico reviewed the annual refinements presented in the November 2020 session and will adopt the changes for the indicators that apply to our country. We are considering the annual refinements to discuss with key providers of data across the NSS for the generation of the metadata and indicators.  Mexico thinks that the most relevant activities of the IAEG-SDGs in the current context are the impact of COVID-19 on SDGs indicators and having a guideline on data disaggregation so as to leave no one behind. The pandemic has led to the emergence of new vulnerable population groups (temporary workers, seasonal workers, for example) and the informal sector has grown. It is important to have an international guideline to assist us in the prioritization process of data disaggregation. Without a doubt, it will be a challenge for most of the statistical institutes in which the Geospatial Information Working Group will allow us to generate new sources of information.
