

United Nations Statistical Commission

Fifty-second session

1–3 and 5 March 2021

Item 3 (a) of the provisional agenda

Items for discussion and decision: data and indicators for the 2030 Agenda for Sustainable Development

Document E/CN.3/2021/3 – Report of the Secretary-General on work for the review of progress towards the Sustainable Development Goals

<i>Statement provided by:</i> MEXICO	
<i>Statement:</i> Mexico is very interested in this initiative since it is very demanding for the statistical offices or key providers across the National Statistics System to produce the information with the level of disaggregation required to leave no one behind. New sources of information, satellite images and new methods need to be explored to reach the lowest level of disaggregation and above all timely data. Mexico congratulates the coordination and communication efforts that have taken place during the pandemic to continue innovating in statistical matters; specially, international meetings allow us to share experiences, innovate and develop new ways of working and collecting data.
