

United Nations Statistical Commission

Fifty-second session

1–3 and 5 March 2021

Item 3 (b) of the provisional agenda

Items for discussion and decision: coordination of statistical programmes

Document E/CN.3/2021/5 – Report of the Committee of Chief Statisticians of the United Nations System on coordination within the United Nations statistical system

Statement provided by:

National Institute of Statistics, Albania

Statement:

Albania appreciates the work done by the Committee of the Chief Statisticians of the United Nations System, in the area of coordination within the United Nations system, in particular in supporting countries to produce relevant statistics and providing regional and global data and statistics important for policy making.

The System-wide Road Map for Innovating United Nations Data and Statistics, is considered as a valuable instrument at encouraging innovations while taking into consideration not only United Nations but also national statistical systems.

The Road map goals, their targets and the respective actions are welcomed.

The actions for promoting a culture of data literacy and the one supporting the design and implementation of a national statistical capacity development programme are highly appreciated and welcomed.

The challenges described in the Road Map are similar for NSOs and it would be worthwhile that solutions and actions to be taken are shared with the statistical community.
