Statement provided by:
The State of Kuwait

Statement:

Unofficial translation:

We approve of the recommendations contained in the report. We also suggest adding solutions for collecting increasingly important e-commerce data: surveys that can be done, administrative records that can be used.

The cooperation and consultation of the users in the report included only cooperation between national and regional statistical administrations, and we suggest discussing the relations and the internal cooperation between the producer (Statistics Department) and the users (offices, national research centers, individuals).
