**Statement provided by:**  
Republic of Korea

**Statement:**

The Republic of Korea supports the revised conceptual framework on international migration and mobility suggested by the Statistics Division and the Expert Group in connection with the revision of the 1998 Recommendations on Statistics of International Migration.  
We expect that the revised recommendations will consider the practical measurability of the ‘temporary population’ and ‘international temporary mobility’ concepts.  
The Republic of Korea also supports the future plans and priorities for the improvement of international migration statistics as suggested by the Statistics Division and the Expert Group.  
As types and characteristics of international migration vary by social and economic conditions of each country, it is encouraged to collect cases from various countries.
