

United Nations Statistical Commission

Fifty-second session

1–3 and 5 March 2021

Item 3 (i) of the provisional agenda

Items for discussion and decision: management and modernization of statistical systems

Document E/CN.3/2021/13 – Report of the Secretary-General on management and modernization of statistical systems

Statement provided by:

National Bureau of Statistics of China

Statement:

Unofficial translation based on google translate:

1. We appreciate the effective work of the drafting team and the advisory group. Since the release of the third edition of the Handbook of Statistical Organizations, it has played an essential role in guiding official statistical agencies of various countries to improve their statistical systems and optimize statistical services. At present, China's official statistics actively promote the modernization of the national governance system and governance capabilities and focus on implementing statistical modernization reforms. We look forward to the official release of the next edition of the Handbook on Management and Organizations of National Statistical Systems as soon as possible to further deepen and improve the national level. The statistical system provides methodological support.
2. The use of the "Handbook on Management and Organization of National Statistical Systems" as a solution based on Internet queries will significantly improve the efficiency of using the manual. We fully affirm this.
3. Agree to publish Chapter 2 (Statistical System) of " Handbook on Management and Organization of National Statistical Systems " in the form of a paper version translated into the official language of the United Nations;
4. Based on the new functions used through the Internet, the " Handbook on Management and Organization of National Statistical Systems " clearly stipulates the future update and revision mechanism, clearly distinguishes and defines "update" and "revision", and sets different tasks respectively The model is of positive significance for maintaining the consistency, relevance and keeping pace with the times such as the " Handbook on Management and Organization of National Statistical Systems " and the "Manual for the National Quality Assurance Framework for Official Statistics of the United Nations".
