Statement provided by:
Batdavaa Batmunkh, CFA
Chairman
National Statistics Office of Mongolia

Statement:

a) After reviewing the work of the technical subgroups and recommendations for updating the classification of all types of economic activities, it is considered possible to make a comprehensive overhaul of the ISIC in 2021 and to update it. It is proposed to include in more detail the activities of this category that reflect the specifics of public administration, defense, compulsory social security, and the specifics of the sector.

b) It is proposed to include the public and private sector services in more detail in Version 2.1 of the Central Product Classification.

c) Mongolia supports the proposal to change its name to the "United Nations Committee of Experts on International Statistical Classifications" proposed by an international group of statistical experts.

d) The future work of the Expert Group is very interesting, in particularly, Environmental Classification and Disaster Risk Reduction Statistics. Mongolia would like to ask to participate in the capacity building training seminars of the Expert Group.
