Statement provided by:
Spain

Statement:
Spain supports the statement of Czech Republic presented on behalf of UE Member States and EFTA countries.

Additionally, Spain would like to make the following comments:

- We welcome the proposal and agree with the proposed revision of ISIC Rev.4. We think it is important to highlight that this revision has significant implications for subsequent regional and national revisions of related classifications, as well in the SNA review. In this sense, we find critical to ensure the coordination with these other classification revision processes and specially their calendars.

- Concerning the proposal included at the background document "3k-TSG-ISIC-report-to-EGISC-E" related to a continuous update process of the ISIC (with a new revision in 2025), again we would like to point out the impact that this change would have over others classifications systems (EU, national or regional classifications) as well as the SNA that will be updated in 2025. In our opinion, this proposal should be more deeply discussed in the technical groups.
