“Measuring Human Development Progress 30 Year after the Birth of HDI”
A Side Event at the UN Statistical Commission

Organizer: UNDP/Human Development Report Office

Virtual Event
Event platform: Zoom
Registration link: https://undp.zoom.us/meeting/register/tZAkdeitrjgthNfubUPBFnM81rBzzPHzZWQB

Friday, 26 February 2021, 9:00 am – 10:15 am (New York time, GMT-5:00)

2020 marked the 30th Anniversary of UNDP’s first Human Development Report (HDR) and its key measure of well-being, the Human Development Index (HDI). The side event will present a brief review of concepts and measurements of human development over the past 30 years as well as a summary of its latest HDR launched in December 2020 (The Next Frontier: Human Development and the Anthropocene), the new Planetary Pressures-Adjusted HDI and its expanding digital data products.

The presentation will be followed by the floor discussion.

The HDRO has been organizing these informative sessions as side events to the annual UN Statistical Commission since 2011, as a part of the wider consultation process with statistical community. The HDRO is committed to regular consultations with the National Statistical Offices (NSOs), which include an annual letter, regional consultations, statistical advisory panel and expert group meetings.

This side event is open to all delegates. The side event will be conducted virtually using Zoom. Please register at https://undp.zoom.us/meeting/register/tZAkdeitrjgthNfubUPBFnM81rBzzPHzZWQB. In case of questions, please contact Ms. Yanchun Zhang (yanchun.zhang@undp.org).
