About

ABOUT US

The clearinghouse will be an online platform that offers information services to support statistical capacity development through more and better financing for sustainable development data. It will foster transparency, accountability, and alignment in financing, and facilitate coordination among donors and partner countries by providing information and services to better match the supply and demand of financing for data and statistics.

Donors can use it to identify key data funding gaps in recipient countries, benchmark their country's data funding, and highlight opportunities for joint projects with other donors. Recipient countries can use it to understand how much aid they are receiving for statistics across the board and plan investments accordingly, assess their funding gaps to lobby for more resources from government and donors, and access best practices to improve efficiency and effectiveness of investments in data and statistics.

But I must explain to you how all this mistaken idea of denouncing pleasure and praising pain was born and I will give you a complete account of the system, and expound the actual teachings of the great explorer of the truth, the master-builder of human happiness. No one rejects, dislikes, or avoids pleasure itself, because it is pleasure, but because those who do not know how to pursue pleasure rationally encounter consequences that are extremely painful. Nor again is there anyone who loves or pursues or desires to obtain pain of itself, because it is pain, but because occasionally circumstances occur in which toil and pain can procure him some great pleasure. To take a trivial example, which of us ever undertakes laborious physical exercise, except to obtain some advantage from it? But who has any right to find fault with a man who chooses to enjoy a pleasure that has no annoying consequences, or one who avoids a pain that produces no resultant pleasure?"

At vero eos et accusamus et iusto odio dignissimos ducimus qui blanditiis praesentium voluptatum deleniti atque corrupti quos dolores et quas molestias excepturi sint occaecati cupiditate non provident, similique sunt in culpa qui officia deserunt mollitia animi, id est laborum et dolorum fuga.
