Triggers to review the CTGAP:

1. Assess evolution and implementation
2. COVID-19 and new data financing priorities
3. Assess implementation and progress

-The HLG propose a **merge** between the subgroups working on the two subject matters to join efforts to **review** and plan for the **next steps** ahead.

- Previous work focused on **strategic principles** and guidance for implementation and financing CTGAP”
RECOMMENDATIONS

- Invest in modernization of NSS (Data Stewardship, Data Science, interoperability)

- Enhanced partnerships and coordination with the Donor Communities, Regional Partners, and International Partners in supporting statistics

- Align the support of the donor community with the national and local priorities.

- Enhance accessibility of the data to the National Statistical System (NSS), Private Sector

- Invest and assess the efficiency and coordinated statistical capacity development

- Reinforcement of trust in data to enhance and increase investments in data and statistics in both quantity and quality.
