

**United Nations Statistical Commission**

**Fifty-third session**

Item 3 (a) of the provisional agenda

**Items for discussion and decision: data and indicators for the 2030 Agenda for Sustainable Development**

**Document E/CN.3/2022/3 – Report of the Secretary-General on work for the review of progress towards the Sustainable Development Goals**

*Statement provided by:*

Uruguay

*Statement:*

National Statistical Institute of Uruguay really appreciates the establishment of the Collaborative on the Use of Administrative Data for Statistics in 2020. The NSI has been actively contributing to its work through membership in the Task team 2 (Data management and standardization) and co-leading the Task team 3 (Technical interoperability and linking).

The collaborative is an excellent initiative to promote the exchange of experiences among peers, generate knowledge, and enhance the statistical use of administrative registers.

The different resources created (website, inventory of resources, yammer group, etc.), group meetings and events held have allowed countries to show their progress (at different levels of maturity) and thus learn from the experience of others.

All this has been possible thanks to the support and commitment of the UNSD team.

The collaborative is a fundamental mechanism to continue advancing in the use of administrative registers for statistical purposes. We want the work of the collaborative to continue, for which we hope that funding sources will be obtained to ensure its operation and further progress can be made.
