

United Nations Statistical Commission

Fifty-third session

Item 3 (b) of the provisional agenda

Items for discussion and decision: data stewardship

Document E/CN.3/2022/5 – Report of the Working Group on Data Stewardship

<i>Statement provided by:</i> BPS – Statistics Indonesia	
<i>Statement:</i>	
<p>(a) Indonesia supports and appreciates the work of the data governance workstreams that provides data governance and legal frameworks guidance to assist national statistics offices in transforming and potentially expanding their role as data stewards. Indonesia agrees to supports the development of guidance on how national statistical offices can promote equity and inclusion along the data value chain to strengthen their role as stewards. The supports also for the deliverable of conceptual framework on data stewardship. Based on each goal of all of five workstreams, Indonesia acknowledges data must be accessible to improve the use of data in society while preserving confidentiality and privacy.</p> <p>(b) Indonesia admits that all scopes are comprehensively defined in data stewardship. In terms of data governance workstream, the National Statistical System (NSS) becomes the underlying roles and responsibilities of NSO and other stakeholders to perform collaborative works. Within the NSS, Indonesia makes attempt to develop national data capability including statistical infrastructure that can be used by NSO and other government agencies to produce the quality statistical data. The national data capability also supports the implementation of the other workstreams. Therefore, Indonesia proposes the development of data capability as part of data governance workstream.</p> <p>(c) Indonesia appreciates the progress that has been achieved by five workstreams and strongly supports the continuity of the programs. Indonesia hopes for the opportunity to actively involved in development of data stewardship workstreams.</p> <p>(d) Indonesia approves the amended terms of reference of the Working Group.</p> <p>(e) Indonesia approves the proposed workplan of working group since it is inline with our innitiative strategy to strengthen national statistical system.</p>
