Statement:
Pakistan Bureau of Statistics appreciates the new concept of data stewardship involving data governance, equity and inclusion, sharing and collaboration, need more elaboration which can be possible through the continue meetings and discussions of the working group. Role of NSOs being data Steward in the data ecosystem will involve countries according to their legal framework to strengthen the working group. The collaboration between public and private data to produce official statistics is appreciated by PBS under legal system of the NSOs, as there is need to streamline the private data producers. Pakistan can work with this group for the improvement and implementation of data stewardship by the NSOs.
