

United Nations Statistical Commission

Fifty-third session

Item 3 (c) of the provisional agenda

Items for discussion and decision: working methods of the Statistical Commission

Document E/CN.3/2022/6 – Report of the Bureau on the working methods of the Statistical Commission: Reassessing the terms of reference and review of other initiatives of the Bureau during the inter-sessional period, 2021-2022

Statement provided by:

NATIONAL STATISTICS AND INFORMATION OFFICE FROM THE REPUBLIC OF CUBA

Statement:

The National Statistics and Information Office (ONEI) from Cuba took part in the open consultation on the mandate of the Commission and coincided with the initial steps of the Presidency for its review, recognizing the need to incorporate modernization within the framework of its structure and working methods.

Accordingly, the report on the activities carried out by the Bureau between sessions is noted.

As for the other initiatives, the ONEI from Cuba welcomes these, especially the one related to the nomenclature of the executive work carried out by the Commission between 2008 and 2021, given its importance and impact on implementation at the national level. In this, the ONEI agrees that the next step is to analyze more thoroughly the sense approval roadmaps, in order to distinguish the nuances of each type of work, depending on whether it is classifications, frameworks, manuals, guidelines or guides, among others.

The integration of the gender perspective in all the topics on the Commission's agenda is considered positive, based on the experiences cited from the Statistical Conference of the Americas of the Economic Commission for Latin America and the Caribbean.

The Office analyzed the background document related to this agenda item and as a result of the study of the revised mandate according to the version of February 8th, 2022, under informal consultation until March 1st, no observations are made regarding its content.
