The Office of Registrar General of India, Ministry of Home Affairs, Government of India aims at achieving 100% registration target by 2024. In order to achieve this vision, the country has reduced the process time of civil registration and physical interface of different stakeholders by use of digital platform. More than three-fourth (3/4) of registration units in the country are working in digital mode. States and Medical institutions have been motivated to use the uniform software to bring in standardization in documentation, data archiving and issuance of certificate through rigorous follow up and consultations at all levels. Further, with the aim of further streamlining the registration process, the present Civil Registration System portal is being revamped.
